*Transcript indications for “without asterisk” or “with asterisk”: “without asterisk” indicates that the course will not be listed on the transcript; “with asterisk” indicates that course will appear on the transcript noting that the course was dropped after the third full week of classes.

**Students are expected to take their examinations at the scheduled times and will not have their schedules changed because of transportation difficulties or job appointments.

Pickard Commons will be closed during the fall, midwinter and spring vacations. Residence halls will be closed during midwinter vacation, but may remain open during fall and spring breaks if there is sufficient demand.
College Calendar for 2018-2019

Second Semester

January 7, Monday  Liberal Arts In Focus begins.
January 18, Friday  Liberal Arts In Focus ends.
January 20, Sunday  Residence halls open for all students, 9 a.m.
January 21, Monday  Martin Luther King Jr. Day, the College encourages and provides options for student, faculty and staff participation with volunteer and/or other learning activities that fulfill the vision of the Rev. Dr. Martin Luther King Jr.
January 22, Tuesday  Classes begin, 8 a.m.
January 25, Friday  Half-semester course add/drop deadline (without asterisk)*.
February 22, Friday  Last day for removing incompletes.
February 22, Friday  Full-semester course add/drop deadline (without asterisk)*.
March 5, Tuesday  Half-semester course withdrawal deadline (with asterisk)*.
March 15, Friday  Mid-semester D and F grade reports due.
March 15, Friday  Last class day for half-semester courses.
March 15, Friday  Spring vacation begins, 5 p.m.
March 23, Monday  Classes resume, 8 a.m.
March 25, Monday  Second half-semester classes begin.
March 25, Monday  Registration begins for fall classes.
March 25, Monday  Midsemester grade reports are distributed to students and advisors.
March 27, Wednesday  Second half-semester course add/drop deadline (without asterisk)*.
March 29, Friday  Full-semester course withdrawal deadline (with asterisk)* and election of Satisfactory- Unsatisfactory option deadline.
March 29, Friday  Registration ends.
April 24, Wednesday  Catalyst Day, classes suspended
April 24, Wednesday  Awards Convocation, 7 p.m.
April 30, Tuesday  Second half-semester course withdrawal deadline (with asterisk)*.
May 7, Tuesday  Last day of classes.
May 8, Wednesday  Reading day.
May 9, Thursday  Final examinations begin.**
May 15, Wednesday  Last day of final examinations.
May 19, Sunday  Commencement, 1:30 p.m.
May 20, Monday  Liberal Arts In Focus begins.
June 7, Friday  Liberal Arts In Focus ends.

May 18, Monday  Liberal Arts in Focus begins.
June 5, Friday  Liberal Arts in Focus ends.
The College

Mission Statement
Ripon College prepares students of diverse interests for lives of productive, socially responsible citizenship. Our liberal arts curriculum and residential campus create an intimate learning community in which students experience a richly personalized education.

Vision
Ripon envisions itself as a venerable, prosperous, and widely respected liberal arts and sciences college that is proud of its history and confident about the future.

An intense engagement with and concern for the academic, artistic and personal development of students have defined Ripon since its founding on the Wisconsin frontier and will always be enduring characteristics of the College. Vigorous and healthy growth will place Ripon in a distinctive class of intentionally sized, intellectually vibrant and civic-minded colleges. Ripon will attract students, faculty and staff of excellent character, great potential and high quality, and the College will be increasingly appealing to its alumni. Ripon will interact conscientiously with the local community and will extend its reach to the nation and the world at large.

Ripon College will command broad interest, recognition, support and respect. A burgeoning spirit of optimism and opportunity, accessibility and possibility will emanate from the College and will inspire it to imagine – and to do – great things.

Core Values
We are committed to:

Serious Intellectual Inquiry
A standard of academic excellence fosters scholarly and artistic achievement and promotes lifelong learning.

Integrity
Ethical conduct guides the College. Decisions and actions reflect the principles of honesty, fairness, candor, respect, responsibility, trust, inclusiveness and openness.

Diverse Community
Differences of perspective, experience, background and heritage enrich the College. Relationships are sincere, friendly, welcoming and supportive.

Stewardship
Ripon College is a responsible steward of its mission, traditions, and resources.

Service
Service within and beyond the campus enables effective governance, encourages community engagement and creates leadership opportunities.

Statement on Cultural, Ethnic and Racial Diversity
Cultural, ethnic and racial diversity is vital to the liberal arts mission of Ripon College.

Thus, alongside our commitment to understand and appreciate the western and Judeo-Christian traditions to which our society has historically adhered to, we are also committed to understanding and appreciating the enriching differences of other intellectual and cultural traditions. The understanding of particular differences can and should enhance appreciation for the essential kinship of the human spirit which is particularly important in an age of global interdependence where
powerful technology is available for both creative and destructive ends. Such understanding also serves to make each individual aware of the particularities of his or her own culture. Thus, awareness of and appreciation for such diversity is critical and should be reflected in all of Ripon's curricular and co-curricular programs.

Ripon's commitment to cultural, ethnic and racial diversity assumes three dimensions. First, such diversity is and should be a fundamental value and motivating principle explicitly acknowledged throughout the Ripon curriculum and promoted in all areas of the collegial enterprise. Second, the College is and should be devoted to recruiting and nurturing members of the College community who represent a diverse array of backgrounds. Finally, the College is and should be devoted to providing educational and developmental programs of direct and tangible value to members of the Ripon community from a wide variety of backgrounds.

These three dimensions are complementary and mutually reinforcing. As cultural, ethnic and racial diversity is encouraged and expressed in the curriculum, in the composition of the human population and in all aspects of campus life, the Ripon College experience is enriched for all those who share it.

Campus Buildings and Facilities

**Anderson Hall.** One of the Quads, Anderson Hall is a residence hall for upperclass men and women. From 1958-2004, it was called Smith Hall. This facility was renovated in 2001.

**Bartlett Hall.** Built in 1888, Bartlett mostly had served as a residence hall throughout its history. During 1987-88, the building was completely renovated.

**Ceresco Prairie Conservancy.** The Conservancy is being restored to a natural prairie ecosystem as part of a 20-year cooperative cost-share agreement and related management plan with the Wisconsin Department of Natural Resources. A 3.5 mile system...
of public recreational trails traverses the conservancy, which also includes the Patricia Kegel ’56 Environmental Classroom, Planet Walk, and the Stott Wetlands Trail. A mountain bike trail was added for sport enthusiasts in 2011.

**Collaborative Learning Center.**
In 1999, a college-owned house was converted from faculty housing into the Communicating Plus Center. In 2006, the building was renamed the Collaborative Learning Center. This center is the home of the Communicating Plus Curricular Program. See the Academic Policies section of this Catalog for more information about Communicating Plus.

**East Hall.** The original campus building, East Hall was begun in 1851 but not completed until 1863. It was thoroughly renovated in 1882 and in 1980. For several years, it was the only building on campus and has housed virtually every academic and administrative function at one time or another. It now houses faculty offices, a faculty lounge, classrooms and Kresge Little Theatre. In 1972, the State Historical Society placed an official Wisconsin Historical Society Marker near the entrance in recognition of the College’s three original structures (East, Smith, and West halls). A plaque in the theatre also commemorates the first debate sponsored by the National Forensic League, which was held therein. A renovation in 2015 made the theatre the hub for political speakers and esteemed guests hosted by the campus community.

**Evans Hall.** One of the Tri-Dorms, Evans was built in 1939 and is a residence hall for first-year men and women. It is named for Silas Evans, president of the College from 1911-17 and from 1921-43.

**Evans Admission Center.** Built during William E. Merriman’s presidency in 1863, it changed hands when Merriman left in 1876. It later was acquired by Ripon President Richard C. Hughes and served as the home of the president of the College from 1901-66. Renovated in 2005, this building is now used as an admissions welcome center.

**Farr Hall of Science.** Built in 1961, Farr contains faculty offices, laboratories, a science library, an auditorium and classrooms. Renovation of Farr Hall and a new addition were dedicated in the fall of 1997. It is named for Albert G. Farr, Ripon College trustee from 1897-1913.

**Francis Field.** Dedicated in June 1995 by Ripon trustee Patricia Parker Francis and her husband, Robert, Francis Field serves as the home of Ripon’s men’s intercollegiate baseball team.

**Harwood Memorial Union.** Completed in 1944, Harwood formerly housed the dining hall and administrative offices in addition to many of its current functions. Renovated in 2007, the Union now contains the Great Hall, Martin Luther King Jr. Study, the Spot Lounge and Restaurant, the Mail Center, “WRPN live” webcast station, College Days news offices and student organization offices. It is named for Frank J. Harwood, member of the Board of Trustees from 1916-40.

**Ingalls Field.** Purchased in 1888 and sold in 1939, Ingalls still serves as the College’s field for football and track. It is named for John G. Ingalls, a member of the Class of 1876, who was instrumental in acquiring the property for the College. It now is owned by the Ripon Public School District. Extensive renovation of the track and field was completed in 1986. Renovation of the facilities was completed in 2004, field turf was installed in 2008, and a new away-team locker room was added in 2011.

**The Interfaith Chapel.** Located at the
First Congregational Church of Ripon, the chapel may be accessed via the sidewalk branching off the main walk between East and Smith Halls. It provides a quiet space for contemplation, meditation and prayer for members of the Ripon College community. Individuals of all faith traditions are welcome to use the space. The chapel is open every day from 8:00 a.m. until 8:30 p.m.

**Johnson Hall.** Built in 1962 and expanded in 1966, Johnson is a residence hall for women. It is named for H. E. Johnson and his wife, Irene. Mrs. Johnson was a trustee of the College from 1953-72. The lounge and lobby were renovated in 2011.

**Patricia Kegel ’56 Environmental Classroom.** Developed in 1996 as an integral part of the West Campus Natural Habitat Preserve, this classroom provides space for environmental study in the midst of a restored nature area. It is named for Patricia Kegel ’56, in honor of her lifelong dedication to Ripon and her love of nature.

**Kemper Hall.** Built in 1966, Kemper served as the College clinic until 1988. It now houses Information Technology Services, a computer lab, and the Midwest Athletic Conference offices. It is named for James S. Kemper, Chicago insurance executive and longtime member of the Board of Trustees.

**Lane Library/Wehr Learning Resources Center.** Lane was built in 1930 and named for the principal donor, Rollin B. Lane, member of the Class of 1872. Wehr Learning Resources Center was added in 1974 and named for Milwaukee industrialist Todd C. Frederick Wehr. Together, they house the College’s book, periodical and microfilm collections; reading and conference rooms; the archives; group study areas; and the Weiske Computer lab. A partial renovation was completed in 2012.

**Larson Courts.** Serving as the College’s outdoor intercollegiate tennis courts, Larson Courts were dedicated in October 1995 in honor of Charles L. Larson ’65 Professor of Physical Education from 1966-2005 and men’s and women’s varsity tennis coach. Larson has been Ripon’s most successful tennis coach.

**Mapes Hall.** One of the Quads, Mapes was opened in 1961 and renovated in 2003. This residence hall for upperclass men and women is named for the College’s principal founder, David P. Mapes.

**Merriman House.** Built around 1940, this building is named after the first president of the College, William E. Merriman.

**One Merriman Lane.** Built in 1966, One Merriman Lane serves as the home of the president of the College.

**S. N. Pickard Commons.** Built in 1962, Pickard Commons is the campus dining hall. It is named for Samuel N. Pickard, chairman of the Ripon College Board of Trustees for many years. Extensive renovations were completed in 1997-98 with the assistance of Marriott Educational Services. In 2005, a coffee shop serving Starbucks Coffee was opened in the lobby. A partial renovation was completed in 2008 updating the student common area, recently dedicated as the David and Lynne Joyce Lounge. In 2012, all three meeting rooms had interior design and technology upgrades to beautify and improve functionality. Extensive renovations of the kitchen and student dining area were also completed with the assistance of Sodexo. The Center for Career and Professional Development was added to the lower level in 2017.

**Physical Plant Building.** Built in 2007, this building houses the offices of the maintenance, grounds and
housekeeping departments. The vehicle fleet is also managed from this building.

**Prairie Fields.** Constructed in 1992 and further improved in 1996, this complex of fields contains a regulation soccer field, the football practice field and Tracy Field, the women’s varsity softball field.

**The Quads.** Mapes, Brockway, Anderson and Bovay Halls; residence halls for upperclass students. Outdoor volleyball courts are located in the Quad area for student convenience and activities.

**C. J. Rodman Center for the Arts.** Opened in 1972, Rodman Center houses Benstead Theatre, Demmer Recital Hall, a music library and resource center, a multimedia center, practice and listening rooms, a recording booth, art studios, rehearsal and dressing rooms, faculty offices and classrooms. It is named for Ohio industrialist Clarence J. Rodman, Class of 1913. The 10,000-square-foot Thomas E. Caestecker Wing for the Fine Arts was added in 1992. It includes art studios, faculty offices, an art gallery and an outdoor sculpture garden. In 2015 the Caestecker Gallery was renovated by students as part of the Arts Management course. The Caestecker Wing is named for Thomas E. Caestecker, a member of the Ripon College Board of Trustees from 1988-2002. A digital art lab was added in 2016 and the Demmer Recital Hall was remodeled in 2018.

**Howard Sadoff Fields.** Dedicated in 1961, the field has been the home of many Ripon College championship baseball teams. It has been used for varsity soccer games and is now the site of intramural and club sports, including soccer, softball, lacrosse and rugby.

**Marshall Scott Hall.** Built in 1951 and expanded in 1966, Scott is a residence hall for men and women. Scott Hall underwent a complete renovation during the 1993-94 fall and spring semesters. As part of the construction process, a new wing containing 22 residence hall rooms was added. Enlarged rooms, suites and increased recreational space were provided by the renovation and expansion. In 2011, numerous living area upgrades were performed to beautify the facility. It is named for Marshall Scott, a trustee of the College from 1932-1936.

**Shaler Hall.** One of the Tri-Dorms, Shaler was built in 1939 and is a residence hall for first-year men and women. It is named for C. A. Shaler, businessman and sculptor.

**Elisha D. Smith Hall.** Completed in 1857, Elisha D. Smith Hall was destroyed by fire and rebuilt in 1931; from 1903-1971 it was known as Smith Hall and from 1971-2004 as Middle Hall. Elisha D. Smith Hall was the College’s first residence hall and has also housed classrooms, laboratories, and art studios. Advancement, alumni and finance offices are located in Smith Hall along with assorted administrative offices, faculty offices, classrooms and the print shop. An official Wisconsin Historical Society Marker near the entrance to East Hall recognizes Elisha D. Smith Hall as one of the College’s three original structures.

**Willmore Center.** Opened in 1967 under the name of the J. M. Storzer Physical Education Center, this building houses two full-size gymnasiums (Weiske Gymnasium and Kiepe Gymnasium); indoor tennis courts; practice areas for baseball, golf and archery; a weight room; an aerobics room; dance studio; competition-size swimming pool; locker rooms; and classrooms. In 2011, the basketball court was renamed the Bob Gillespie Court after Ripon’s own “winningest” coach in history and in the top 40 NCAA Division III “winningest” coaches. A $22 million revitalization was completed in 2017,
which includes 12,000 square feet of fitness training area, a 64,000-square-foot field house with an indoor track and 8,000 square feet for classrooms, state-of-the-art athletic training room, a human performance lab, fitness studios and a Micro Market featuring salads, sandwiches and snacks to go. With the renovation, the building was renamed Willmore Center.

**Stott Trails.** The wetland and woodland trails in the West Campus Natural Habitat area were developed in the summer of 1996 in honor of Bill and Peggy Stott. William R. Stott Jr. served as Ripon’s 10th president from 1985-1995. Bill and Peggy Stott are avid friends of nature and wildlife.

**Tri-Dorms.** Evans, Shaler and Wright halls; residence halls for first-year men and women built in 1939. These halls were completely renovated in 1986-87.

**Todd Wehr Hall.** Built in 1969, Todd Wehr is the main classroom building on campus. It houses classrooms, faculty offices, seminar rooms, psychology laboratories, several computer laboratories, and a lecture hall. First-floor expansion and renovations in 2007 provided additional and updated classrooms. It is named for Milwaukee industrialist Todd C. Frederick Wehr.

**West Hall.** Completed in 1867, West has at one time or another served as the library, residence hall, dining hall and general meeting place. It now houses faculty offices, classrooms, seminar rooms, ROTC headquarters and the Ripon College Museum. An official Wisconsin Historical Society Marker near the entrance to East Hall recognizes West as one of the College’s three original structures.

**Wright Hall.** One of the Tri-Dorms, Wright was built in 1939 and is a residence hall for first-year men and women. It is named for John W. Wright, a trustee of the College from 1910-1937.

**Special Facilities**

**Office of Information Technology.** Ripon College Office of Information Technology (OIT), located in Kemper Hall, supports the mission of the College by providing access to and support of information resources and technologies that enhance teaching, learning and living in the College community. Open-use computer labs are available for student use in Lane Library, Kemper, Rodman and Todd Wehr. Specific resources and services can be found on the College’s website at my.ripon.edu/ICS/ITS/

**Library Resources.** Lane Library has more than 315,000 physical and digital resources to support student work, a digital media lab, and many areas available for classes, tutoring, group meetings, individual studying and socializing. The library is open more than 100 hours per week, and librarians are available for personalized research assistance from 7:30 a.m. through 5 p.m. Monday through Friday.

Lane Library was built in 1930 and expanded in 1974 with the addition of the Wehr Learning Resources Center. Physical resources within Lane include books, government publications, films, microforms, newspapers and periodicals. Students may check out a variety of devices such as chromebooks, cameras, graphing calculators, DVD drives, jump drives, charging cables, tripods and microphones. The catalog, available on the library’s website, provides access to the library’s collection, including 100,000 e-books, and access to other library catalogs worldwide via WorldCat. Subscriptions to online databases provide access to academic and popular journals, newspapers and streaming films; they are available on-and off-campus. The free interlibrary loan service allows Ripon
College community members to check out books and articles from across the United States.

The main floor of the library has areas for speakers, classes, tutoring, group meetings, individual studying, socializing, an information commons with computer clusters and a digital media lab with scanners and two Macs and one PC computer with digital production software. There are two conference rooms on the top floor, one is reservable; each has a whiteboard, table and chairs and a large, flat-screen television to play DVDs or mirror with students’ laptops. On this floor is the Silent Study Room, which has a cozy, living-room-like atmosphere. The library houses the Waitkus Computer Lab with 20 computer stations, teacher’s station, projector, ELMO, three whiteboards and a blackboard wall. The rest of the library is for quiet study. Wireless internet access is available throughout the library.

A federal depository since 1982, the library receives approximately eleven percent of the materials published by the Government Printing Office including many online titles. Lane Library became a depositor for Wisconsin documents in 2002 and now receives around 1,500 state publications per year.

In addition to Lane Library, Ripon College has two other resource centers on campus; C.J. Rodman Center for the Arts contains music and art slide collections. A curriculum resource center with K-12 textbooks, periodicals, teaching materials and multicultural curriculum resources is available in Todd Wehr Hall.

**Accreditation and Affiliation**

Ripon College is accredited by the Higher Learning Commission. Associations, agencies or governmental bodies which accredit, approve or license the institution and its programs should contact the office of the dean of faculty for review of relevant documentation.

The College’s program in education is accredited by the Wisconsin Department of Public Instruction.

Ripon’s chapter in the national scholastic honor society Phi Beta Kappa was chartered in 1952.

Ripon’s historical ties to the Congregational Church are represented today in its affiliation with the successor ecclesiastical body, the United Church of Christ. The College Church relationship is more to the total Judeo-Christian tradition than to a particular denomination. Ripon’s membership on the Council of Higher Education of the United Church of Christ provides for cooperative and mutually non-subordinate relationships that enhance the programs of the College and Church alike. Other colleges in Wisconsin related to the United Church of Christ are Beloit, Lakeland and Northland.

As a member of Associated Colleges of the Midwest, Ripon offers its students opportunities for off-campus study and research at centers in the United States and abroad. The association, formed during the academic year 1958-59, now includes Beloit, Lawrence and Ripon in Wisconsin; Carleton, Macalester, and St. Olaf in Minnesota; Coe, Cornell, Grinnell and Luther in Iowa; Knox, Lake Forest and Monmouth in Illinois; and The Colorado College in Colorado.

Other important affiliations are with the Council of Independent Colleges, American Association of Colleges for Teacher Education, the Association of American Colleges, the Council for the Advancement and Support of Education, the College Entrance Examination Board, and the Wisconsin Association of Independent Colleges and Universities. These are national and state membership organizations that serve to sustain and advance higher education either nationally or regionally.
Governance

Ripon College is incorporated in the state of Wisconsin as an independent, privately endowed college governed by a self-perpetuating board of trustees. The faculty is governed through an elected committee system and in monthly meetings of the entire body. Ripon students participate in college governance by their representation on major committees and at faculty meetings. A graduating senior is elected annually by the student body to serve as a Special Graduate Trustee. The student senate is the formal channel for general expression of student attitudes and interests.

Free interchange of ideas is facilitated by Ripon’s small size and the accessibility of faculty and administration.
Admission

Ripon College enrolls students who will contribute to and benefit from the academic and residential programs we provide. In the administration of its educational policies, admission practices, scholarship and loan programs, athletic and other college-administered programs, Ripon College is committed to providing equal opportunities based on merit and without discrimination to all individuals regardless of race, gender, gender identity, color, religion, age, national or ethnic origin, disability, marital status, sexual orientation or any other characteristic protected by state or federal laws.

The faculty committee on academic standards establishes the criteria for admission. Factors that may be considered include the student's secondary school record, scores on standardized tests (SAT or ACT), a personal statement, recommendations from the applicant's school, and extracurricular or community service activities. The Ripon College admission process reflects the personal attention students can expect to receive during their college experience and applicants are encouraged to provide any additional information that they consider helpful.

Minimum Admission Requirements

The minimum requirements for admission are: graduation from an accredited secondary school (or GED equivalent), a completed application form and a secondary school transcript. As of the fall of 2016, Ripon College is a test-optional school. Candidates for admission have the opportunity to submit or not submit standardized test scores.

An applicant's secondary school course of study should be a well-rounded college preparatory program of at least 17 units including the following: English (4), math (3-4, including algebra, geometry and advanced algebra), social studies (3-4), natural sciences (3-4), and additional units of study selected from foreign languages, the fine arts, or other programs of college preparation to bring the total to at least 17.

Preference is given to students who have more than the minimum number of units.

Students coming from a home school background are required to submit standardized test scores as well as have an interview with the dean of admission.

Application Process

Students applying for fall term consideration are strongly encouraged to apply as early as possible. Notification of fall term admission will occur within two weeks of the completion of the student's application for admission, beginning Sep. 15. Students applying for spring term consideration should submit applications by Dec. 15, and notification will occur shortly after the application becomes complete.

Ripon, along with a select group of colleges in the United States, participates in the Common Application. We are pleased to accept the on-line version of the Common Application form in place of our own application form. Students using the Common Application are given equal consideration in Ripon's admission review process as students using the Ripon application form. The Common Application is available at www.commonapp.org. This program and
Ripon College’s own application can be accessed from our website at: ripon.edu/apply.

**Early Admission**

Today, many high school students have opportunities to accelerate their educational programs and many are entering college after 3 years in secondary school.

Superior students who wish to enter Ripon at the completion of three years of secondary school should write to the dean of admission during the first semester of their junior year. They should present a minimum of 13 units of work consisting of English (3), foreign language (2), science (2), social studies (2), algebra (1), geometry (1), and one other academic subject (1).

**International Admission**

Ripon welcomes international students to apply for admission. In addition to the requirements for domestic first-year students, international students must submit a TOEFL, IELTS, SAT or ACT score. Applicants are required to demonstrate their proficiency in English through results from the Test of English as a Foreign Language (TOEFL), the Advanced Placement International English Exam, or an ACT or SAT score.

Acceptable minimum TOEFL scores: Paper-550, CBT-213, IELTS-6.5, IBT-79, SAT 550 out of 800 on Critical Reading; or ACT 24 out of 36 on English/Writing. Please note that the test requirement is based on citizenship, not on where a student attends school. A certificate of finance form is also required for admission of international students.

**Transfer Admission**

Ripon welcomes transfer students from both two- and four-year colleges and universities. Transfer applications are reviewed on a rolling admission basis. Students are encouraged to submit all required information to Ripon well in advance of the beginning of each semester. It is to the candidates’ advantage to apply early. An applicant should present an application form, transcripts from their secondary school and college, and SAT or ACT results. Requirements may be altered dependent upon number of credits transferring. Students should have a minimum cumulative grade point average of 2.00 on a 4.00 scale and be in good standing at their previous college or university.

Transfer students must take a minimum of 32 credits of academic work at Ripon, including at least half the credits required for any major or minor, and must meet all the requirements for a Ripon College degree, including the senior residence requirement. Credit for liberal arts and sciences work at accredited institutions will be awarded for courses in which C- or better was earned. Grades for such courses are not included in computing a student's average at Ripon. Some credit granted by another accredited institution for College Level Examination Program (CLEP) examinations will be accepted by Ripon College if 1) the credit was earned before the student entered Ripon, and 2) the student also earned, in courses, transferable credit at that institution. The number of CLEP credits accepted when a student transfers from another institution shall not exceed the number of credits earned in courses and accepted by Ripon. Ripon College will give consideration to transferring a maximum of 12 online credits.

**Enrollment Deposit**

To confirm enrollment at Ripon, accepted first-year and transfer
candidates are required to submit a $200 enrollment deposit. International candidates are required to submit a $600 enrollment deposit.

We require that all accepted fall term admission candidates who are notified of admission before April 20 submit the enrollment deposit by the candidates’ reply date of May 1. Fall term regular admission candidates who are accepted after April 20 should submit the enrollment deposit within 10 days of notification of acceptance. The enrollment deposit for fall term is refundable until May 1.

Accepted spring term regular admission candidates will be notified of their deposit deadline in their letters of admission.

Accepted transfer admission candidates will also be notified of their deposit deadline in their letters of admission.

Deferred Admission

Students wishing to delay college entrance for a year or two after secondary school graduation should follow the normal application procedures during their senior year. In addition to the required application information, students should submit a written deferral request explaining what they plan to do and why they plan to defer admission. All deferral requests are reviewed on an individual basis and experiences such as work, travel abroad and independent study normally are approved. Students are required to submit a $200 non-refundable enrollment deposit after a deferment has been approved to reserve a place in the appropriate entering class.

Advanced Placement

First-year students who have completed one or more College Examination Board Advanced Placement (AP) Examinations and scored a four or above will receive credit. Application for such credit must be made before registration. Placement in course sequences and the applicability of advanced placement credit to distribution requirements, or toward the major, are subject to the approval of the appropriate Ripon College academic department.

Credit and placement are also given to entering students who have passed the International Baccalaureate-North America courses, high level, with a grade of five or better. The amount of credit and placement are subject to approval by the appropriate Ripon College academic department.
Financial Aid and Scholarships

Ripon College administers a comprehensive array of merit-and need-based financial aid programs that are designed to provide qualified students with the opportunity to attend the College regardless of their family financial situation. Financial need is not a factor in the Ripon College admission decision process.

Ripon College scholarships recognize and encourage academic potential and accomplishment as well as special talents and participation. These awards for excellence are given to deserving students regardless of financial need. Scholarships are available in the following areas:

**Academic Scholarships**
Ripon College academic scholarships are reviewed on a rolling basis following acceptance to the College. The admission application, along with supporting documentation, is reviewed to determine eligibility for all scholarships. The scholarship committee will begin consideration for an academic scholarship for those students who have achieved academically and have demonstrated leadership and service in their high schools and communities. Academic scholarships range from $14,000 to $31,000 annually.

**Recognition Tuition Awards**
- **Boys/Girls State Scholarship** - up to $8,000 ($2,000 per year). Awarded to students who have participated in a Boys/Girls State Program.

**Diversity Scholarship** - up to $8,000 ($2,000 per year). Awarded to high-achieving students each year who will contribute to the cultural, ethnic, geographical and socioeconomic diversity of Ripon’s student body.

**Legacy Award** - up to $8,000 ($2,000 per year). Awarded to siblings, children or grandchildren of Ripon alumnae/alumni.

**Ripon College Retention Scholarship**
Ripon College offers the scholarships below to continuing students who meet the criteria specified. These are one-year scholarships that require the student to submit an application during spring semester for the following academic year.

- **Curt and Cora Kanow Scholarship** - $2,000. Awarded to students who are rising sophomores or above and have demonstrated the ability to contribute to the diversity and vitality of the campus community through active involvement in campus organizations or other activities that contribute to campus life. Applicants must demonstrate financial need and a minimum GPA of 2.5. Scholarship may be renewed for up to three years upon receipt of an application, continued participation in campus activities and acceptable GPA.

- **Mabel Schwiesow Lent (1940) Endowed Scholarship** - $2,000. Awarded to students who are rising sophomores or above and have demonstrated the ability to contribute to the community at-large through recent active involvement in volunteer activities that contribute to improving the lives of individuals in the community. Applicants must demonstrate financial need and a minimum GPA of 2.5. Scholarship may be renewed for up to
three years upon receipt of an application, continued participation in volunteer activities and acceptable GPA.

**George H. Miller Scholarship** - $2,000. Awarded to students who are rising juniors or seniors who have demonstrated academic excellence at Ripon College through performance in the classroom, research activities or other scholarly pursuits. Applicants must have a minimum GPA of 3.25. Preference will be given to social science and humanities’ majors; however, all majors will be considered. Financial need may be considered. Scholarship may be renewed upon receipt of an application and continued academic performance and involvement.

**Grace Goodrich Class of 1906 Endowed Scholarship** - $2,000. Awarded to sophomores, juniors or seniors in a liberal arts major with a GPA of 3.0 or higher. Preference will be given to students who have a Classical Studies minor or have taken coursework in the classics.

**Hansen 1937/Kilbourne 1936 Scholarship** - $2,000. This scholarship was established in memory of alumnus and speech professor (1955-64) Howard C. Hansen 1937, alumna and dedicated Alumni Board member Helen Exner Hansen Kilbourne 1936 and Ripon College friend, Marjorie T. Kilbourne. The endowment was the result of combining the original endowment for The Howard C. Hansen ’37 Memorial Award in Speech, memorial gifts given in memory of Helen E. Kilbourne ’36, and any future gifts. Financial need may be considered. Scholarship may be renewed upon receipt of an application and continued academic performance and involvement.

**Al Jarreau Scholarship in the Arts** - $2,000. This scholarship was established in honor of the benefit concert performed by alumnus, Al Jarreau ’62. To be awarded to students who are or plan to major in any of the visual or performing arts. Financial need may be considered. Scholarship may be renewed upon receipt of an application and continued academic performance and involvement.

**Joanne Spelman ’46 Scholarship** - $1,000. This scholarship was established by Harold J. Spelman in honor of his wife to provide support to a student, with preference to female students majoring in fine arts (preferably painting). Financial need may be considered. Scholarship may be renewed upon receipt of an application and continued academic performance and involvement.

**Gerda Thiele Fine Arts Scholarship** - $2,000. Established by the children of Gerda Thiele who had a lifelong interest in the fine arts and worked in the Ripon community for humanitarian causes. Shall be awarded to students pursuing a fine arts major. Second preference will be given to students who intend to pursue a fine arts minor. Financial need may be considered. Scholarship may be renewed upon receipt of an application and continued academic performance and involvement.

Ripon College reserves the right to expand, discontinue or adjust the selection criteria, eligibility requirements and award amounts for these and other scholarships in the future.
ROTC
Ripon has a long tradition of Army ROTC on campus. Special incentive programs enable Army ROTC scholarship recipients to attend Ripon and receive additional scholarship assistance. Contact the Office of Admission for details. ROTC candidates must submit a Free Application for Federal Student Aid (FAFSA).

Need-Based Financial Aid
Financial need is the difference between the annual Cost of Attendance (COA) at Ripon and the amount a student, and his or her family, are able to contribute toward those costs. That ability is reflected in the Expected Family Contribution (EFC) which is determined annually based on the information entered on the Free Application for Federal Student Aid (FAFSA). Students may file their FAFSA online at www.fafsa.ed.gov. Continuing students will receive a Renewal FAFSA notice directly from the Department of Education on an annual basis.

New students must be admitted to Ripon College before a financial aid award can be made. All students are encouraged to apply/reapply for financial aid each year as soon as possible after Jan. 1. Late applications will be considered for available funding.

Financial aid is renewed annually based upon the Renewal FAFSA results and satisfactory academic progress. Award amounts may be adjusted to reflect changes in demonstrated financial need, changes in student enrollment or housing plans, student’s year in school and available funding.

Student financial aid awards may consist of a combination of federal-and state-funded grant programs, Ripon College grant and scholarship awards, other non-institutional scholarships, on-campus student employment and educational loans. The amount of each award is determined by the Office of Financial Aid in accordance with federal, state and program regulations and the availability of funds.

A student must be enrolled in the regular program of the College and be registered for a minimum of 12 semester hours of credit (full time) in order to qualify for receipt of aid funded by the College, and must be registered for at least 6 semester hours of credit (half time) to receive federal and state aid. Students must consult the Office of Financial Aid if they are planning to carry fewer than 12 credits because an adjustment may have to be made in the aid award.

In addition to federal and state financial aid, Off-Campus Study Grants are available for one semester with affiliated off-campus study programs. The amount of the grant will be determined by the financial aid office. Only federal and state financial aid is available for non-affiliated off-campus study programs.

For additional information about financial aid and scholarships, please consult the Ripon College Financial Aid Award Guide, the admission application, or simply contact the admission or financial aid offices for assistance.

Financial Aid - Satisfactory Academic Progress Policy
Federal regulations require all students receiving Federal Title IV Financial Aid funds (and state aid) maintain satisfactory academic progress while in the pursuit of their degree. SAP is defined as passing a required number of hours and achieving a required grade point average during a reasonable period of time. Regulations require that the entire academic history be considered, whether or not the student received federal aid.
The standards in this document are separate and distinct from the College's academic standing policy administered by the associate dean of faculty and registrar (see the Ripon College Catalog and on-line).

Three standards are used to measure academic progress only for federal (and state) financial aid eligibility:
1. Cumulative Grade Point Average. To retain financial aid eligibility, a student must academically progress according to the following scale:

<table>
<thead>
<tr>
<th>Semesters Completed at Ripon College</th>
<th>Minimum Cumulative GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>End of one semester</td>
<td>1.70 GPA</td>
</tr>
<tr>
<td>End of two semesters</td>
<td>1.80 GPA</td>
</tr>
<tr>
<td>End of three semesters</td>
<td>1.90 GPA</td>
</tr>
<tr>
<td>End of four or more sems.</td>
<td>2.00 GPA</td>
</tr>
</tbody>
</table>

2. Credit Completion Rate
   The completion rate is calculated by dividing the number of hours completed by the number of hours attempted. Attempted hours (without an asterisk) are those enrolled after the semester add/drop deadline. To retain financial aid eligibility, a student must earn 67 percent or more of the credit hours attempted. For example, a student who successfully completes 14 of 16 hours attempted has an 88 percent completion rate and is considered in satisfactory academic standing for financial aid eligibility.

3. Maximum Time Frame
   A student no longer is eligible to receive financial aid once s/he has attempted 150 percent or more of the credits required to complete the degree for which the student is currently enrolled. For example, a program requiring 124 credit hours to graduate would allow 186 attempted hours (124 x 1.5 = 186). The maximum time frame is not increased for changes in major, double majors, or adding a minor in another subject area. Teacher certification is a stand-alone program and will be calculated on its own. In Focus coursework will count toward the maximum time frame. Repeated coursework hours will count towards the maximum time frame. Second degrees and non-credit remedial coursework are not offered by the College.

Additional Factors

Grades and credits considered when evaluating Satisfactory Academic Progress:
- Grades of A+, A, A-, B+, B, B-, C+, C, C-, D+, D, D-, F or S are considered attempted and earned hours.
- Withdrawals (W), Incompletes (I), Failures (F), Unsatisfactory (U) and "*" grades are considered attempted but not earned.
- Grades of "I" are expected to be assigned a letter grade by the end of the subsequent term through the Office of the Registrar.
- Accepted transfer credits, credits granted for AP scores, IB scores and foreign language retro credits are included in the calculation of both attempted and earned hours.

Satisfactory Academic Progress Review
- Satisfactory academic progress is reviewed at the end of each semester.
- Transfer credits are reviewed for satisfactory academic progress after receipt of official transcripts.

Warning Status
Warning Status is assigned per semester when a student fails to meet SAP for GPA or credit completion, or reaches the maximum time frame.
- The student is notified through their ripon.edu email account.
- During Warning Status, a student may continue to receive federal Title IV aid for one semester.

Suspended Status
Suspended Status is assigned when a student fails to make SAP while in Financial Aid Warning and prevents the student from receiving Title IV, state aid and Ripon College financial aid in any future semester.
- Financial Aid Suspension may be appealed to the Office of Financial Aid.
- A student may be removed from Suspended Status after successfully appealing or meeting SAP in a subsequent semester.

Probation Status
Probation Status is assigned to a student who fails to make satisfactory academic progress while in Warning Status but successfully appeals and has eligibility for aid reinstated.
- Federal student aid, state aid and Ripon College aid may be received for one payment period while on Probation. To regain Title IV eligibility after that, the student must meet SAP or the requirements of the approved individual academic plan.

Academic Plan
An Academic Plan will be developed for a student in financial aid suspended status which, if followed, will ensure the student is able to meet financial aid SAP standards by an agreed upon date. This plan is developed with the associate dean of faculty/Office of the Registrar, and/or their academic adviser(s) in consultation with the Office of Financial Aid.

Appeal Process
The loss of financial aid eligibility may be appealed if extenuating circumstances interfered with the ability to meet satisfactory academic progress. To appeal the loss of financial aid, submit a letter explaining the extenuating circumstances that resulted in your lack of academic progress and provide supporting documentation.

Appeals of financial aid termination must be received by the Office of Financial Aid no later than 15 days prior to the start of the semester the student wishes to attend.

Extenuating circumstances must meet at least one of the following criteria:
- Prolonged illness, medical condition or injury to student or immediate family member.
- Death of an immediate family member.
- Unforeseen and/or extenuating circumstances beyond the student's control.

The letter must include the following information:
- The circumstances and how the circumstances affected academic performance.
- Include dates and time periods involved.
- Explain how the situation has changed and the steps you are taking to resolve the circumstances and improve your academic performance.

Documentation may include:
- Physician letters and hospital records (must include dates of illness and recovery time).
- Death certificate or obituary.
- Court or police documents.
- Letters from third party professionals on his/her letterhead.

Students who have exceeded the maximum time frame must include additional information:
- Explain why you were unable to complete your program within the time frame allowed for your degree.
- Include the number of hours needed to complete your current degree and your intended graduation date.
- A copy of your degree plan listing all remaining classes needed to graduate is required. It must be approved and signed by the associate dean of faculty/registrar.

**Appeal Decisions**
- Incomplete appeals or appeals submitted past the deadline will not be reviewed.
- All appeal decisions are final and affect only the student’s eligibility for federal financial aid.
- The associate dean of faculty/registrar and the dean of students office will be advised of the decision.
- Appeals are approved for only one semester at a time.
- Academic Plans are reviewed each semester.
- If student is progressing according to the plan, a new appeal is not required.
- If an appeal is approved, financial aid will be awarded on a probationary basis.
- Terms and conditions of appeal approval will be included in the decision notice.
- Notification of the decision will be sent to the student’s ripon.edu email account and updated on the MyRipon portal.

**Regaining Financial Aid Eligibility**
Students whose financial aid was terminated due to lack of satisfactory academic progress may choose to enroll without the benefit of financial aid. If standards are met, federal financial aid eligibility is restored for subsequent terms of enrollment.

Consult with a financial aid counselor if there are questions about this policy, the appeal process, or reinstatement of financial aid eligibility.

**Ripon College Refund Policy**

**Complete Withdrawal – Official Process**
Ripon College’s refund policy directly reflects federal regulation and applies to all students whether or not they are receiving federal financial aid. Students who withdraw from Ripon College up through the 60 percent point in time in the semester will be eligible for Ripon College up through the 60 percent point in time in the semester will be eligible for financial aid (federal, state and/or institutional) in an amount equal to the percentage of the semester completed (“earned amount”). The remainder of their financial aid (“unearned amount”) will be returned to the appropriate funding source (excluding Federal or College Work-Study earnings). Students are responsible for returning unearned federal assistance less the amount returned by the school. (See “Return of Title IV Funds” policy below.)

Students who withdraw after the 60 percent point in time in the semester will be considered to have “earned” all of their financial aid for that term. No funds will be returned to the funding source.

Students withdrawing from the College for any reason are liable for a $100 withdrawal fee plus payment of a percentage of the comprehensive fee (tuition, room and board, and activity fee) for the semester. The percentage of comprehensive fee charged corresponds to the percentage of the semester completed. For example, a student who withdraws at the midpoint of the semester would receive a 50 percent reduction of the comprehensive fee. After the 60 percent point of the semester is reached, no reduction of the comprehensive fee is provided.
Students or parents who feel that individual circumstances warrant exception to the above policy should appeal in writing to the Dean of Students, 300 Seward Street, PO Box 248, Ripon, WI 54971. Refund examples are available upon request from the Office of Financial Aid.

All withdrawing students need to complete the Withdrawal/Check-Out Form available from the Office of the Dean of Students. Completion of this form will ensure that students follow all withdrawal procedures. Withdrawal procedures include residence hall room inspection by hall director or resident assistant for resident students and return of all campus keys.

The completed Withdrawal/Check-Out Form must be returned to the Office of the Dean of Students along with the student’s identification card.

Partial Withdrawal
Students who withdraw from classes during the semester but remain enrolled for at least one credit will not receive a refund and financial aid for the semester will not be adjusted.

Unofficial Withdrawal
Students who stop attending all classes for at least two weeks will be administratively involuntarily withdrawn from classes. The determination that the student has stopped attending classes will be made by the associate dean of faculty and registrar after checking with all of the student’s instructors. A determination of last day of attendance will also be made. If no definitive date can be determined, then the midpoint of the semester will be used.

The associate dean of faculty and registrar will review all students who receive a final semester grade point average (GPA) of 0.00 to determine if the 0.00 was due to actual failure of the class (an earned “F”) or due to non-attendance (an unearned “F”). If all classes were failed due to non-attendance, then the student will be administratively involuntarily withdrawn from classes after a determination of the last day of attendance has been made. If no definitive date can be determined, then the midpoint of the semester will be used.

In either situation above, a Return of Title IV Funds calculation will be performed by the financial aid office.

Ripon College Return of Title IV Funds Policy (R2T4)
A student may find it necessary to withdraw from all classes during a semester. The student may be eligible to receive a refund of tuition and course fees depending upon the date of the withdrawal. If circumstances cause a student to withdraw from all classes, they are encouraged to contact their academic adviser so their decision will be based on a clear understanding of the consequences of withdrawing from all classes.

When it is determined that a student is withdrawing from school either through the “official process” by submitting the appropriate documents or through the “unofficial process” (see “Ripon College Refund Policy” above) the last day of attendance is determined by the date the paperwork is submitted or as determined by the associate dean of faculty and registrar for the “unofficial process.”

Determining Aid Earned
If a student withdraws from Ripon College, then the school, the student or both may be required to return some or all of the federal funds awarded to the student for that semester. The federal government requires a return of Title IV federal aid that was received if the student withdrew on or before
completing 60 percent of the semester. Federal funds, for the purposes of this federal regulation, include Pell Grant, Supplemental Educational Opportunity Grant, Federal Direct Loans Subsidized and Unsubsidized, Federal Perkins Loans and Federal Direct Parent PLUS Loans. The formula used in this federal “return of funds” calculation divides the aid received into earned aid and unearned aid.

A student “earns” financial aid in proportion to the time s/he is enrolled up to the 60 percent point. The percentage of federal aid to be returned (unearned aid) is equal to the number of calendar days remaining in the semester when the withdrawal takes place divided by the total number of calendar days in the semester. If a student was enrolled for 20 percent of the semester before completely withdrawing, 80 percent of federal financial aid must be returned to the aid programs. If a student stays through 50 percent of the semester, 50 percent of federal financial aid must be returned.

For a student who withdraws after the 60 percent point in time, there is no unearned aid. However, a school still must complete a R2T4 calculation in order to determine whether the student is eligible for a post-withdrawal disbursement.

In compliance with federal regulations, the financial aid office will perform the calculation within 30 days of the student's withdrawal, and funds will be returned to the appropriate federal aid program within 45 days of the withdrawal date. An evaluation will be done to determine if aid was eligible to be disbursed but had not been disbursed as of the withdrawal date. If the student meets the federal criteria for a post-withdrawal disbursement, the student will be notified of their eligibility within 30 days of determining the student’s date of withdrawal. If the eligibility is for a grant disbursement, the funds will be disbursed within 45 days of determining the student’s date of withdrawal. If the eligibility is for a loan, the student will be notified in the same time frame but they also must reply to the Financial Aid Office if they wish to accept the post withdrawal loan obligation. A post-withdrawal disbursement of any funds would first be used toward any outstanding charges before any funds are returned to the student.

Return of Title IV Federal Financial Aid

After the amount of unearned federal aid is calculated, the Ripon College repayment responsibility is the lesser of that amount or the amount of unearned institutional charges. The school satisfies its responsibility by repaying funds in the student’s package in the following order:

- Federal Direct Loan Unsubsidized
- Federal Direct Loan Subsidized
- Federal Perkins Loan
- Federal Direct PLUS Loan
- Federal Pell Grant
- FSEOG
- Other Title IV Grant Funds

Keep in mind that when Title IV funds are returned, the student borrower may owe a balance to the institution and/or the U.S. Department of Education. If a student fails to repay grant funds, s/he may be ineligible for future federal financial aid.
Academic Policies

As of the fall 2016-2017 semester, Ripon College has two sets of graduation requirements, Catalyst and Explore-Select-Connect. Beginning the fall 2016-2017 semester, students entering as new first year students must complete the Catalyst graduation requirements. Students transferring to Ripon College in the fall 2017-2018 semester with first year or first semester sophomore class standing must complete the Catalyst graduation requirements; other transfer students must complete the Explore-Select-Connect graduation requirements. Students transferring to Ripon College in the spring 2017-2018 semester with first year or sophomore class standing must complete the Catalyst graduation requirements; other transfer students must complete the Explore-Select-Connect graduation requirements.

Students transferring to Ripon College in the fall 2018-2019 semester with first year, sophomore or first semester junior class standing must complete the Catalyst graduation requirements; other transfer students must complete the Explore-Select-Connect graduation requirements. Students transferring to Ripon College in the spring 2018-2019 semester with first year, sophomore, or junior class standing, must complete the Catalyst graduation requirements; other transfer students must complete the Explore-Select-Connect graduation requirements. Beginning in the fall 2018-2019 semester, all transfer students must complete the Catalyst graduation requirements.

Concentration in Applied Innovation

The Catalyst Curriculum consists of five seminars, two in the first year, two in sophomore year, and the problem-solving seminar in the junior year. The first four seminars are designed to develop the essential skills students need to work collaboratively and independently in the junior seminar, in which they will work in teams mentored by faculty members as they develop and present proposed solutions to large, open-ended questions. The seminars also provide grounding in some basic college-level academic skills and expose students to a range of disciplinary approaches. Graduates who complete the Catalyst Curriculum earn a Concentration in Applied Innovation, which documents on the transcript that a graduate has mastered the skills of oral communication, writing, critical thinking, collaboration, quantitative reasoning, information literacy, integration and intercultural competence.

Completing the Concentration in Applied Innovation requires that a student earn credit for Catalyst 110, 120, 210, 220 and 300. No student may enroll in Catalyst 210 or 220 until credit is earned for Catalyst 110 and 120. No student may enroll in Catalyst 300 until credit is earned for Catalyst 210 and 220. Catalyst courses must be taken for a letter grade. However, the Credit/No Credit option may be invoked (see Credit/No Credit information in the Grading System section that follows). Catalyst seminars may not be repeated once credit has been earned.

CATALYST GRADUATION REQUIREMENTS
(Class of 2020)

Graduation requirements are 1) completion of the Concentration in Applied Innovation, 2) completion of a major, 3) the accumulation of 124 credits, and 4) a cumulative grade point average of 2.00 or better.
Catalyst seminars do not count toward major requirements. If the skills developed in a particular Catalyst seminar are essential to success in another course at Ripon College, a Catalyst seminar may serve as prerequisite. Catalyst courses may be used to fulfill external requirements, such as those imposed for teacher licensure.

**First Year Requirements**

**CATALYST 110**: This seminar emphasizes foundational skills in written communication essential to success in college. The primary objective of the seminar is to develop the basic writing and research skills students need in order to successfully navigate specific expectations in other courses and applied contexts. Students write several major essays related to the theme of the seminar. At least three of these projects involve significant revision and peer review, during which students will hone interpersonal oral communication skills and practice collaboration. The seminar may be organized around any topic chosen by the faculty instructor, and the writing and research skills students develop will advance understanding of the seminar's content focus. Catalyst Skills: Writing, Information Literacy, Oral Communication, Collaboration.

**CATALYST 120**: This seminar emphasizes foundational skills in reasoning and quantitative literacy. The primary objectives are to develop basic skills in evaluating numerical claims and, when appropriate, using quantitative data to construct logically sound arguments. Students develop skills in critical analysis, specifically deductive thinking and/or the scientific method. Students will complete several required writing assignments emphasizing skills that both evaluate and construct quantitative claims. Each student will also prepare, practice, and perform at least one oral presentation related to the topic of the seminar. The seminar may be organized around any topic chosen by the faculty instructor and the writing and research skills students develop will advance understanding of the seminar's content focus. Catalyst Skills: Quantitative Literacy, Critical Thinking (Deductive Logic and/or the Scientific Method), Oral Communication, Writing, Collaboration.

**Second Year Requirements**

**CATALYST 210**: This seminar provides all students foundational skills in intercultural competency and further develops skills in writing and critical analysis, with a particular focus on identifying and challenging biases and assumptions. Students make critical comparisons between other cultures and their own in ways that encourage both awareness of how one's own worldview is shaped by a particular culture and a recognition of a plurality of values; to genuinely understand cultural differences, students must understand how power, inequality, oppression and dominance have formed (and continue to impact) cultures. Students will become attentive to the ways in which their own cultural assumptions shape perception and begin to develop awareness of and empathy for the worldviews of other cultures. They will be able to describe how power and oppression shape the meaning of cultural differences, and situate their own cultural identity within these relations. These issues may be addressed from any disciplinary or interdisciplinary perspective. Catalyst Skills: Intercultural Competence, Critical Thinking (Identifying Assumptions), Writing, Collaboration.

**CATALYST 220**: In this seminar
students are prompted to connect examples, facts, or theories from more than one discipline in order to diagnose problems and explore issues from different perspectives. The seminar must include one significant project in which students collaboratively employ at least two distinct disciplinary approaches in order to propose solutions to a defined problem. Students will develop techniques to orally present information to an audience, including appropriate language choices, awareness of audience reception, and some comfort with public speaking. Students must rehearse and perform to the class at least one substantial presentation in which they present an argument using media and visual components designed to be effective for a particular audience. The topics for this seminar must be interdisciplinary, so that students are explicitly expected to learn across modes of inquiry. Catalyst Skills: Integration, Oral Communication, Information Literacy, Writing, Collaboration.

Third Year Requirements

CATALYST 300: Applied Innovation Seminar
Teams of students collaborate in development of strategies to address large, open-ended problems, mentored by faculty members from across the liberal arts. Student teams present their proposals at a public forum near the end of the semester. The seminar requires engaging in independent research, developing a clearly defined approach, analyzing both evidence and proposed solutions and working effectively with a diverse group. While each team is supervised by a faculty member, the majority of the work for this seminar is expected to be done autonomously in order to demonstrate mastery of applied innovations skills in ways that prepare graduates for independent work after college. Catalyst Skills: Oral Communication, Writing, Critical Thinking, Collaboration, Quantitative Reasoning, Information Literacy, Integration, Intercultural Competence.

### Majors

There are different types:
- Discipline-based Major (e.g., English)
- Interdisciplinary Major (e.g., Global Studies)
- Broad Field Major (e.g., Physical Science)
- Self-Designed Major (e.g., Performance Studies)

While all can lead to a variety of professional futures, some are especially recognizable as pre-professional, e.g.:
- Business Management
- Educational Studies
- Exercise Science tracks

Many majors fit well into available Pre-Professional Programs such as
- Health Professions
- Pre-Law
- Pre-Engineering

### Global and Cultural Studies

EXPLORE-SELECT-CONNECT
GRADUATION REQUIREMENTS
(Classes of 2018 and 2019)
Graduation requirements are 1) completion of the Explore-Select-Connect Requirements, 2) completion of a major, 3) the accumulation of 124 credits, and 4) a cumulative grade point average of 2.00 or better.
To complete the Explore-Select-Connect Requirements, students must complete at Ripon College or be credited with transfer credit for the equivalent of the following requirements:
• First Year Seminar
• English 110
• First Year Explorations (at least 3 credits in each of the four divisions defined below)
• Wellness
• Global and Cultural Studies
• Breadth (16 credits in courses taken in departments from divisions outside the division of the major)

First-Year Seminar
Any First Year Studies course may be used to satisfy the first-year explorations requirement, and if the course is offered in a department or program that is not in a division, then it may be used toward completion of the breadth requirement.

English 110
The First-Year Writing Course is English 110.
Emphasis in English 110 is on reading, analyzing and writing about texts. Close textual analysis is integrated with the study of the writing process. Frequent writing is required.
Students will be introduced to and practice the following:
• Practicing writing as a process;
• Developing basic skills of textual analysis and evaluation;
• Formulating and supporting their own interpretations.

First-Year Explorations Requirement
To complete the first-year explorations requirement normally a student must take at least three credits in the first year in each of the four divisions (see below for the definition of divisions). Departments will designate courses that cannot be used to satisfy this requirement. However, a student who participates in a performance group in music may complete the requirement in the second year. The same will apply to similar situations where an entry level course does not carry three credits and the natural successor course cannot be taken in the same year. Any course used to complete the explorations requirement cannot also be used to satisfy the breadth requirement or the global and cultural studies requirement.

First-Year Explorations Learning Goals
Behavioral and Social Sciences
The social and behavioral sciences study human beings in communities and as individuals through careful observation of behaviors, analysis and evaluation of data and the drawing of reasoned conclusions. Therefore, the introductory courses in the social and behavioral sciences have the following learning goals:
1. To explain fundamental concepts, theories, and vocabulary of one social or behavioral science;
2. To develop proficiency in comprehending, analyzing and applying texts and data to construct arguments on topics in a social or behavioral science discipline;
3. To explain how social scientists develop conceptual categories through the application of evidence-based inquiry;
4. To identify ethical concerns and solutions in conducting and applying research with humans and animals.
Fine and Performing Arts

Expression in the fine and performing arts is intrinsic to the human experience. The ability to recognize and work with an art form's formal structures and unifying principles is fundamental to deeper understanding of others' expressions in the past and present and for effective personal expression. Therefore, the introductory courses in the fine and performing arts have one or more of the following learning goals:

1. To use creatively the materials and principles of an art form for personal expression;
2. To recognize the formal structures and unifying principles of artistic or rhetorical constructions created by others;
3. To recognize the formal structures and unifying principles of artistic or rhetorical constructions through the ages.

Humanities

The humanities record our achievements in history, language, philosophy and religion. Studies in the humanities are designed to develop a sensitive understanding of cultural heritage, a critical ability to evaluate the products of mind and spirit and a disciplined capacity to participate in the creation of new dimensions and directions of human endeavor. Therefore, introductory humanities courses have the following learning goals:

1. To develop a sensitive understanding of a cultural heritage;
2. To develop a critical ability to evaluate and comprehend, through analysis and interpretation, products of mind and spirit;
3. To demonstrate an ability to assimilate, organize and evaluate arguments and interpretations and to articulate conclusions.

Natural Sciences

The natural sciences offer ways of knowing, understanding and making testable predictions about the natural world. Scientific studies involve cooperative and creative endeavors that develop observational, analytical, quantitative and communication skills. These studies are rooted in the scientific method involving hypothesis formation and experimentation, followed by public presentation of findings. The study of the natural sciences provides individuals with tools to understand the natural world and thus informs our lives as citizens and global stewards. Therefore, the student learning goals for introductory courses are:

1. To describe and apply the scientific method, which includes:
   • Applying observational skills to natural phenomena,
   • Posing questions that are answerable by the scientific method,
   • Employing analytical and quantitative skills to interpret scientific evidence,
   • Employing communication skills to describe the results;
2. To build a knowledge base of the fundamental concepts, theories and vocabulary of one of the natural sciences;
3. To apply scientific concepts to natural science issues relevant to contemporary life.

Divisions

We define the divisions as they have informally existed here at Ripon College. The following is the list of divisions and the departments they comprise.

Behavioral and Social Sciences:
   Anthropology, Business Management, Economics, Educational Studies, Politics and Government, Psychology and Sociology;
Fine Arts: Art, Communication, Music and Theatre; Humanities: English, Romance and Classical Languages, German, History, Philosophy and Religion; Natural Sciences: Biology, Chemistry and Physics.

The following courses do not count towards completion of the First-Year Explorations Requirements: French 111, 112, and 211; German 111, 112, and 211; Greek 111, 112, and 211; all Interdisciplinary Studies graded P/F or S/U, 211, and 212; Latin 111, 112, and 211; Spanish 111, 112, and 211; Theatre 200, 210, 212.

The following departments or programs are not members of divisions for the purpose of completing the explorations requirement: Environmental Studies, Exercise Science, Global Studies, Leadership Studies, Mathematical Sciences, Military Science, Women’s and Gender Studies.

Wellness

Exercise science strives to develop skills in physical activities and knowledge of the relationships among lifetime physical activity, physical fitness, and healthy lifestyles. Therefore, courses fulfilling the wellness requirement have the following learning goals:
1. To develop skill in physical activities for lifetime health and recreation;
2. To develop knowledge about physical activities for lifetime health and recreation.

Each student (unless presenting a medical excuse certified by the chair of the exercise science department) must pass an activity course offered by the department. A student who has a medical excuse for the entire first year will fulfill the requirement as soon as possible after the excuse is no longer valid.

Students who participate in two seasons of varsity sports or receive credit for a ROTC course with a physical training component are exempt from the wellness requirement.

Global and Cultural Studies Requirement

Global and Cultural Studies engage students in the acquisition of knowledge about the larger world, its languages and/or its cultures. In these pursuits, students analyze and reflect on connections between domestic and global issues and understand how their own cultures influence their thinking and perspective.

Students can fulfill the GCS requirement in one of three ways.

Study Abroad

Complete a Ripon College approved international off-campus study program. The learning goals of courses that fulfill the GCS requirement for study abroad are:
1) To develop in students a sense of themselves as global individuals through cultural immersion and on-site classroom instruction;
2) To develop appreciation of cultural identities through every day practice;
3) To develop awareness of the interplay among cultural identities and political, social, and economic factors;
4) To reflect upon how diversity is discussed and debated in other cultures.

Foreign Language

Earn credit for the third semester (211) of college-level foreign language study or an approved course at a higher level. The learning goals of courses that fulfill the GCS requirement for foreign language are:
1) To develop understanding of
and appreciation for the world through the study of foreign languages, literature, and cultural phenomena;
2) To develop skills that enhance communication with native speakers;
3) To develop informed perspectives from which to evaluate global issues.

Approved Courses
- Complete at least six credits approved for this purpose. These courses focus primarily on global and cultural topics from outside of the United States. Native American Nations are considered outside of the United States for this purpose. **One of the courses must be at the 200 level or higher.** No course may be credited toward completion of this requirement and either the breadth requirement or the first-year explorations requirement.

The learning goals of courses that fulfill the GCS requirement are:
1. To increase understanding and appreciation of other cultures;
2. To develop informed perspectives from which to evaluate global issues;
3. To understand and reflect on how one's own culture influences perceptions of and assumptions about other cultures.

*Some topics under this number may count toward the Global and Cultural Studies requirement.

No course may be counted toward completion of this requirement and either the breadth requirement or the first-year explorations requirement.

The Global and Cultural Studies Requirement will be waived for international students and permanent resident immigrants who have grown up in another country or who have had a substantive experience in another country. Consult the registrar for a waiver of the requirement. (vF; 3-3-04)

Foreign Language Retroactive Credit
- Students whose high school or other background permits them to enroll in a language course above 111 will, after completing the course with a grade of B or above, receive credit for previous courses in the sequence. The maximum credit granted retroactively shall be 12 credits for any one language; credit may be earned for more than one language. The credits will not carry a grade, but count towards the degree.

Majors
- Each student must have an approved major in order to graduate. Courses taken in a major or minor can also be used to satisfy any other requirement.
Breadth Requirement
Each student must earn 16 credits in courses taken in departments from divisions outside the division of the major. Courses taken to meet the breadth requirement will typically be taken after the first year of study. Exceptions to this practice may be made to accommodate students' needs and circumstances, but students are encouraged to take courses for breadth throughout their college careers. With the exception of Music 103 (Group Jazz Improvisation) and Music 190 (Performance Organizations), all courses used to satisfy this requirement must be letter-graded courses. No more than a total of four credits earned from Music 103 may be counted toward the requirement (or toward graduation). No more than a total of eight credits earned from Music 190 may be counted toward the requirement (or toward graduation). If a course has a listing in a department, then the course is treated as a course in that department even if there are other listings. Courses in leadership studies will be considered to be in the Behavioral and Social Sciences division for the purposes of this requirement. Courses in mathematics, computer science and exercise science (excluding activity courses), Environmental Studies 120 and Interdisciplinary Studies 211 and 212 will count as outside the division for all students majoring in other areas. For this purpose, Global Studies 111 is a course in the division of Humanities and Global Studies 112 is a course in the division of Behavioral and Social Sciences. Military science courses do not count for breadth. Spanish, French, German, Latin, and Greek 111, 112, and 211 may not count towards the breadth requirement. Students with a major that crosses divisional lines (for example some interdisciplinary majors and some business management majors) may count the division with the most courses as the home division. Courses (even in the major) outside this division will count toward completion of the breadth requirement. If the course does not have any listing in a department, then it counts as breadth for all students.

Individualized Learning Plan
Each student will design and maintain an individualized learning plan in conjunction with an academic advisor. Both the student and advisor will keep copies of this document. The document is to be used for planning purposes both in regard to curricular and extracurricular matters. Students should be encouraged to think about their entire experience including course work, study off campus, internships, involvement in campus and community life, etc. Furthermore, this document will help students and advisors keep track of graduation requirements. This is to be a fluid document that changes as students grow and change.

Communicating Plus
The Communicating Plus Program is a curricular initiative designed to ensure that Ripon College graduates will have had many opportunities to practice and develop sophisticated communication and lifelong learning skills. The program is an area of special emphasis within the existing liberal arts curriculum. Building on the long-term success of the College's Writing Across the Curriculum Program, it emphasizes excellence in written and oral communication. This “communicating” thrust of the program is designed to help students learn to communicate effectively and with aplomb in a variety of life situations. The “plus” component of the Communicating Plus Program supports curricular efforts to engage students in meaningful critical
thinking and problem-solving activities. The Ripon College faculty believes these skills are the basis for successful lifelong learning that will enrich a wide range of work, leisure, and personal endeavors.

As a curricular emphasis woven throughout the liberal arts curriculum of Ripon College, the program is defined by a discrete set of student learning goals (see below). Academic departments and programs of study, in consultation with the Communicating Plus director, determine how best to achieve the Communicating Plus student learning goals within the structures of their majors and minors. Departmental plans ensure that each student will experience a coherent, consciously planned approach to development of the skills involved. Summaries of the departmental plans are published in each department or program's section of the college catalog. In the advising process, faculty and students may refer to the departmental plan to build students' awareness of their progress toward mastery of the Communicating Plus student learning goals.

The Communicating Plus Program is housed in the Collaborative Learning Center located at 420 Thorne Street. Communicating Plus and the Collaborative Learning Center provide a student peer mentoring program, study and computer facilities, opportunities for faculty development, consultation for grant development, and outreach programming.

The Communicating Plus Program enriches the culture of the Ripon College community as it supports efforts to engage students, faculty, staff and others connected to the college in lively and disciplined discussions of the major intellectual, social and ethical issues confronting citizens of the 21st century. The program is a college-wide effort to clarify the connections between liberal arts education, effective communication and lifelong learning for all who come into contact with the intellectual life of this community.

The Communicating Plus Student Learning Goals:
Specifically with regard to written communication, all students will be introduced to and practice:

- Close analysis of the uses of language in a field of study.
- Critical analysis of the arguments and evidence in persuasive texts.
- Adaptation of reading skills to accomplish thorough comprehension of a variety of types of texts.
- Use of a multistage writing process to produce clearly organized, fluent and substantive written texts.
- Development of thesis statements for argumentative or persuasive essays.
- Use of a standard writing handbook, style manual and/or other aids as tools to edit final drafts for appropriate usage and grammatical correctness.
- Analysis and response to the written work of peers.
- Use of visual and technological aids appropriate to each field of study to facilitate the production or presentation of written work: e.g. online databases, style guides, web pages, computer graphics programs.

Specifically with regard to oral communication, all students will be introduced to and practice:

- Active and appropriate contribution to group discussion of an idea, issue, text, topic or work of art.
- Active and critical listening in such situations as lectures, forum discussions, media presentations and group discussions.
- Research, preparation and oral presentation on a topic in the students' field of study.
Analysis and response to the oral presentations of peers.
Use of appropriate visual and technological aids to facilitate the preparation and/or delivery of an oral presentation.

Specifically with regard to critical thinking, all students will be introduced to and practice:
  - Analysis of underlying assumptions, biases and appeals to emotion in arguments.
  - Analysis and assessment of the reasoning used to support an argument.
  - Conscious awareness of processes used to learn and integrate new ideas.
  - Consideration of issues and problems from multiple perspectives with the recognition that not all points of view are valid.
  - Critical evaluation of the credibility of information resources.

Specifically with regard to problem-solving, all students will be introduced to and practice:
  - Identification and analysis of problems.
  - Articulation and application of the problem-solving processes in a field of study.
  - Information gathering using a variety of strategies: e.g. observation, experimentation, interviewing, and library, database, and online research.
  - Appropriate and substantial participation in collaborative problem-solving processes.
  - Recognition of the implications and new problems arising from the proposed solution to a problem.

Individual department implementation plans can be found under the department’s heading in the Courses of Study section of this catalog.

The Collaborative Learning Center
The Collaborative Learning Center supports the Catalyst Curriculum, the Communicating Plus Program and student success in all courses. Located at 420 Thorne Street, the Collaborative Learning Center provides a student peer mentoring program under faculty direction. The Center offers group study space, computer facilities, a public speaking laboratory, and video viewing areas. The student mentors are available for essay and presentation critiques and assistance with other course assignments. They also develop and present a variety of workshops with faculty and staff partners, with the goals of supporting the Communicating Plus Program and addressing perceived student needs.

Majors and Minors
Majors
A student’s major provides two important elements of liberal arts education: an understanding of what mastery in a field entails and the expertise necessary for subsequent study or employment. Each major provides depth of analysis to complement the breadth in the distribution requirements.

Four broad categories of majors are available at Ripon: discipline-based, interdisciplinary, broad field and self-designed. Because of the problems of scheduling necessary courses, it is advisable to make the choice of a major no later than the end of the sophomore year.

Because major requirements differ in each field of study, students should refer to “Courses of Study” for specific information about each major offered. The typical major consists of at least 24 credits of upper-class courses in the major field. At least one-half of the credits counted toward a major must be taken at Ripon.
All courses required for a major, including required courses in departments other than the major department, and all courses elected to count toward the major must be passed with a grade of C- or higher in order to count toward that major. (This C- rule does not apply to courses needed as a prerequisite to a required major course except where noted.) A 2.00 average must be attained for all courses presented for a major. No course may be substituted for a course required for a major without the approval of the chair of the department and the associate dean of faculty.

All students are expected to meet the requirements of their major department in effect at the time they declare their major. If requirements change after they have declared a major, they may choose either the new or old set of requirements. In extenuating circumstances, students may, with the written approval of their major advisor, arrange a combination of old and new requirements.

Some students arrange their programs so as to complete two departmental or interdepartmental majors.

Interdisciplinary majors, established by the faculty, combine courses from two or more fields when the courses have strong interrelations, serve an emerging vocational objective, and constitute a legitimate and liberal area of study.

Self-designed

Self-designed majors are for the mature student with special interests and abilities and the motivation to design a unique major not available through existing college programs. Self-designed majors should be structured out of courses from different academic departments or disciplines, supplemented in most cases by independent study. The student's academic ability, motivation, justification and coherence in planning will be considered when a proposal for a self-designed major is evaluated for approval.

Proposals for self-designed majors are usually prepared during the sophomore year and must be submitted before fall break of the fifth semester and approved by the end of the fifth semester. The student chooses as an advisor a faculty member who will assist the student in designing an individualized major with a coherent theme, oversee the work, advise the student throughout the program and supervise the completion of a senior essay or project which will integrate the courses chosen for the major. Two to four credit hours will be given for the senior essay/project course.

Under the guidance of the advisor, the student will write a detailed outline of the proposed major, describing its purpose and rationale and specifying the courses to be taken. The proposal must specify how coursework for the major addresses the Communicating Plus goals of written communication, oral communication, critical thinking and problem solving. No self-designed major will be approved without this material. This written proposal is then submitted to the associate dean of faculty for evaluation. If the proposal is approved, the student will then become a “self-designed major” under the supervision of the student's chosen advisor.

A student may do an independent study project in one of the academic departments (see Independent Study in this section of the Catalog) or design an interdisciplinary project (see Interdisciplinary Courses in the Courses of Study section of this Catalog). All students must submit a written evaluation of their self-designed major to the associate dean of faculty by the last class day of their senior year.

The self-designed major must not
duplicate too closely existing college programs and should be comparable in breadth, depth, and intellectual content to such specific interdisciplinary majors as Business Management, Chemistry-Biology, Latin American Area Studies, and Psychobiology. A minimum of eight courses, amounting to at least 32 credits, with a reasonable distribution of courses at the 200, 300, and 400 level, will be required. Application forms for self-designed majors are available in the office of the associate dean of faculty.

Recently approved self-designed majors include Classical Studies, Criminal Justice and Journalism.

**Minors**

Departments are authorized to request approval of minors totaling no fewer than 18 and no more than 22 credits and made up of a group of courses selected on the basis of close integration of content and methodology. At least one-half of the credits counted toward a minor must be taken at Ripon. For a student who completes these courses with a 2.00 average and no grade below C- and no S-U grade, the name of the minor will be recorded on their permanent record.

A student who elects a major in a course of study may not also elect a minor in the same course of study; only one minor in any course of study may be elected.

No course may be counted toward both a major and a minor or toward two minors. Where a given course is required for both the major and the minor or for two minors, an additional course must be selected with the approval of the head of the appropriate course of study.

**Academic Integrity Policy**

Ripon College’s vision and educational mission statements are printed on page one of this Catalog. In order to fulfill the college’s mission, a high degree of academic integrity is required. The college is concerned with developing in its members the ability to use responsible inquiry; effective communication; and the other skills of analysis, understanding, and transmittal. For that development to occur, each individual must use his or her own resources; each must develop his or her own talents in cooperation with others; each must be honest with him or herself as well as with others in assessing and presenting the skills that have been developed and the information that has been accumulated. Only in this way will the maximum growth in ability occur, and only in this way will a true community of learning flourish.

Practicing, condoning or even ignoring academic dishonesty must result from a radical misunderstanding of or disagreement with the very nature of the academic community at Ripon College. Academic dishonesty frustrates the growth, undermines the development, mocks the community and thwarts the advancement of learning. Therefore, each member of the community has a responsibility to one’s self and to others to do all possible to maintain the highest possible level of academic integrity on campus. As much as possible, faculty members have the responsibility to design courses and assignments within courses which require the development of skills of analysis and understanding and which limit opportunities for dishonest responses. Students have the responsibility to take their own development and achievement with sufficient seriousness that they work for honest growth rather than dishonest appearances. Members of the faculty, the administration and the student body have the further responsibility to utilize
available opportunities to present their convictions about academic integrity, to encourage others to support academic integrity and to dissuade, by penalty if necessary, any and all instances of academic dishonesty.

The Academic Honor Code

The Academic Honor Code reflects Ripon College's strong commitment to academic integrity. Ripon College students have the right to live and study in a community that upholds the highest standards of academic honesty, and we expect all members of this community to adhere to those standards.

The expectations of the Honor Code are that each student has the responsibility to:

1. Strive to maintain the highest level of academic integrity.
2. Encourage others to support academic integrity and discourage acts of academic dishonesty.
3. Understand and support the protected nature of intellectual property.
4. Present his or her own work on all assignments and examinations and properly cite the work of others.

If a student is in need of clarification about any aspect of the Honor Code, he or she is encouraged to consult with a member of the Joint Judiciary Committee.

Credit

Credits Earned at Ripon

One-half of the credit hours required for a major or a minor must be taken at Ripon.

A maximum of 16 Military Science credits can be counted towards the degree. A maximum of four MUS 103 (Group Jazz Improvisation) and a maximum of eight MUS 190 (Performance Organizations) can be counted towards the degree.

The senior year is to be completed at Ripon College except under the following conditions: students having a cumulative average of 3.00 in at least 96 credit hours taken at Ripon may petition to substitute one year of work in a professional school for the senior year at Ripon. If the petition is approved by the major advisor and the associate dean of faculty, the student will, upon successful completion of the year of professional study, receive an A.B. from Ripon.

Students attending an institute of technology for study of engineering after three years at Ripon will receive the A.B. degree from Ripon College when they have finished the second year of professional study and have received their engineering degree. Students who hope to take advantage of this arrangement must file petitions with the associate dean of faculty before May 1 of their junior year.

Seniors who are within four credit hours of graduation at the end of their seventh semester, or within eight credit hours of graduation at the end of their eighth semester, may, with the consent of their major advisor and the registrar, complete their work in absentia. Students who do not meet these stipulations may petition the associate dean of faculty for a waiver of the senior residence rule. Normally, a petitioner should have a cumulative average of at least 2.50, have completed 96 credit hours of work at Ripon, be within eight credit hours of having completed a major and the distribution requirements, have the petition approved by the major advisor and the courses to be taken elsewhere approved by the departments concerned and have a compelling reason for wishing to complete degree requirements at another institution.
Academic Policies

Credit Loads
In order to accumulate the 124 credit hours required for graduation in eight semesters, students must average 15.5 credit hours per semester. Those enrolling in fewer than 12 credit hours are not considered to be full-time students and are classified as special students. Students may enroll in no more than 19 credits in any one semester unless the request to do so is supported by the academic advisor and approved by the associate dean of faculty. Credits for music lessons, music ensembles and theatre production do not count against this limit.

Auditing
Students may, by agreement with the instructor, register to audit a course and in such cases are not necessarily responsible for writing papers or taking examinations. The minimal requirement for an audit is regular class attendance. Further requirements, such as participation in required activities and keeping up on assigned readings, may be established by the instructor of the course, through prior arrangement with the student. The instructor may drop a student from auditing status in a course if convinced that the minimal or agreed requirements are not being met. An audited course, which is entered on a student's permanent record as such, fulfills no requirement and does not count toward graduation or a major. Because no grade is given, a student's cumulative average is not affected by auditing a course. Changing to or from auditing status is a change in registration; therefore, the restrictions and deadlines for changes of registration apply.

Off-Campus Credit

Transfer Credit
All courses taken elsewhere for transfer credit must be approved in advance in writing by the advisor and the department concerned. Written approval will constitute assurance that credit toward fulfillment of course requirements for graduation will be granted for any course in which a student earns a grade of C- or better. Should a student earn a D in the first semester of a two-semester course but a C- or better in the second semester, both semesters will fulfill course requirements although only the credits of C- or better will count toward graduation. Grades earned elsewhere are not considered in computing a student's Ripon average. Students are reminded that one-half of the credit hours required for their major or minor must be taken at Ripon. A maximum of 12 credits will transfer from online, hybrid, e-learning, blended or comparable courses taken at accredited institutions. No credit will be given for correspondence courses.

Summer School Credit
Ripon College will grant a maximum of one credit hour per full-time week of summer school; for instance, a student attending a six-week summer session can transfer to Ripon College no more than six credit hours of work. That work must be in courses approved by an accredited college or university. Course approval forms for summer school are available in the registrar's office and should be completed prior to the end of the spring semester. Regulations governing transfer credits, stated in the preceding section, also cover summer school credits.
Grading System

Ripon College uses a 12 point grading scale from A to F; all grades on this scale except F are passing grades. The grades on this scale are:

- A
- B-
- A-
- B+
- B
- C-
- C
- D+
- D
- D-
- F

Other symbols on permanent records are:

- I Incomplete
- P Pass
- S Satisfactory
- U Unsatisfactory
- W Withdrew with permission
- * Course dropped after third week of semester

“Incomplete” is given only for work missed because of illness or other valid cause, and not because of failure to complete work on time. If an “Incomplete” is not altered by the deadline announced in the calendar, the registrar will record an “F”

Any student who withdraws or is dismissed from the College later than the last day for course withdrawal will receive an “F” in any course which the student is failing at the time of withdrawal. In extenuating circumstances, the associate dean of faculty may authorize the recording of “W” rather than “F.” “W” is also given in those courses from which a student withdraws by permission of the associate dean of faculty before the end of a semester. (See “Withdrawal from the College” in this section of the Catalog.)

A student may repeat any Ripon course at Ripon College at any time if it is still offered; this policy does not apply to Catalyst courses, which may not be repeated once credit has been earned. If not offered, an acceptable substitute may be approved in advance by the appropriate department chair or the dean of faculty. A student may repeat a course at any time. The first grade will be retained on the transcript with a parentheses around the credit earned. The second grade (whether higher, lower, or the same) will be recorded, with an R following the grade, in the semester in which the course is repeated, and the student’s cumulative average is re-computed such that the new grade replaces the previously earned grade in the calculation. Courses originally taken for regular grades may not be retaken on an S-U basis.

If a student fails in a course, credit for it can be gained only by repeating the course. In no case, however, is the original grade deleted from the permanent record.

Pass-Fail

The following courses are graded Pass-Fail: Art 250; Biology 310; Communication 550; Educational Studies 320, 421, 431, 435, 441, 451, 461, 471, 481; Exercise Science 111, 112; Global Studies 551, 552; Interdisciplinary Courses 113, 114, 170, 225; Music 010; Applied Music 050, 160, 190; and Theatre 200, 210, 212. Such courses may carry credits but not grade points. A grade of Pass indicates work of A through D- quality. No courses other than those mentioned above may be graded Pass-Fail.

Satisfactory- Unsatisfactory Option

The purpose of this option is to encourage students to explore areas outside their major fields and to elect courses in which they are interested but may have little previous training.

All students who are not on academic probation may elect courses on a Satisfactory-Unsatisfactory basis. Students may not take more than one such course in a single semester or more than four in all four years combined. Courses offered only on an S-U basis are
not counted under the S-U option.

Students electing a course under this option will receive a grade of “S” for work of A through C- caliber and will receive credits toward graduation. Students earning a grade of “U” for work of D+ through F caliber will not receive credits. Neither grade will affect the student's semester or cumulative average and no course taken under the S-U option can be counted in the numerical total required for a major or a minor. Catalyst courses and courses taken to fulfill distribution requirements may not be elected on an S-U basis. Courses for which a student has received a regular grade may not be repeated under the S-U option. Students planning on graduate work are cautioned against taking on an S-U basis courses required for admission to graduate school.

At registration students will fill out a special form for any course they wish to take on an S-U basis. A student may change to or from an S-U basis at any time prior to the date listed on the College calendar.

S-U students will be treated like regular students in a course: they will be responsible for the same assignments, examinations, term papers, and so forth; will be graded by the same standards; will be subject to the same attendance regulations; and may be held to the same course prerequisites.

At the end of the semester, instructors will submit the usual letter grades (A-F) to the registrar and these will be converted to “S” (for letter grades A through C-) or “U” (for letter grades D+ through F) for recording on student permanent records. The original letter grades will be kept on file in the registrar's office, but will not be made available to graduate schools or prospective employers. Students may, however, choose at any time before graduation to convert the “S” or “U” into the regular letter grade assigned by the instructor.

Except by permission of the dean of faculty, no course may be offered solely on an S-U basis. When the course is offered solely on an S-U basis, the instructor submits only an “S” or “U” grade, and the restriction against counting toward a major or toward a graduation requirement does not apply.

Credit-No Credit Option for First Year Coursework

After final grades are posted, students may petition to change eligible course grades to the Credit-No Credit (i.e., CR-NC) option. Eligible course grades include all Catalyst courses in addition to no more than 12 credits of non-Catalyst courses taken during a student's first two completed semesters in attendance at Ripon College. Transfer students who enter with first year or sophomore class standing can utilize this policy in their first two semesters at Ripon College. Transfer students who enter with junior or senior class standing cannot utilize this policy for non-CTL coursework. Courses offered only under the Pass-Fail or S/U option may not be changed to the CR-NC option.

Students who complete a course under this option will receive a grade of “CR” for work of A through D- caliber and will receive credits toward graduation. Students earning a grade of “NC” for work of F caliber will not receive credits. Neither CR-NC grade will affect a student's semester or cumulative grade point average, and no course taken under the CR-NC option can be counted in the numerical total required for a major or a minor. Courses may not be repeated under the CR-NC option. Students who utilize the CR-NC option may change back to the usual A-F system at any time. Students planning on graduate work are cautioned against selecting or changing courses to CR-NC if
they are required for admission to graduate school.

Grade Reports and Transcripts
Grades are recorded at the end of each term, and a grade report is available for each student on the MyRipon portal. Federal law sets some conditions of further distribution. A student may request additional grade reports from the office of the registrar. Transcripts of grades are not issued unless clearance has been sent by the business office to the registrar. Upon graduation, students are sent without charge one transcript their college record. Each additional transcript costs $4. Transcripts are withheld for students who have outstanding financial obligations to the College.

At midterm grading period, temporary D and F grades are reported to the registrar and distributed to advisors and the students.

Adding and Dropping Courses
Students may change their registration in courses within the deadlines published in the official College calendar. For all changes, the signature(s) of the student’s academic advisor is required.

Adding Courses - During the first three days of classes, students may add a class if space is available and if the student has fulfilled the prerequisites. The instructor’s signature constituting notification is required. After the first three class days, the instructor must approve adding the course and will do so by virtue of the signature on the form.

Dropping Courses – Courses dropped after the third full week of classes will appear on the student’s transcript with an asterisk in the grade column signifying dropping the course with permission. Changing from regular to audit status will require dropping the course for regular credit and adding the course as an audit; the instructor must approve audit status.

In all cases the student should contact the office of the registrar to obtain the appropriate forms and to ensure accurate records. Requests for exceptions should be addressed to the associate dean of faculty.

Class Attendance
1. The College expects students to attend all classes. However, illness and problems requiring personal attention may interfere with a student’s best intentions to fulfill this requirement. Students who miss classes, for any reason, are responsible for the work missed. At the earliest possible time, students shall seek out their professors to obtain information about the assignment(s) they missed. Professors are not required to duplicate class experiences missed by absent students.

2. Professors will establish individual attendance policies in consideration of the extent to which attendance itself constitutes a part of the learning experience and contributes to the educational integrity of a particular course. Students must be excused from classes for college-sanctioned activities (e.g., so that they may participate in field trips for their other courses and athletic events). Students who will miss class due to college-sanctioned activities must notify their professors in advance to arrange for makeup work.

3. Professors whose attendance policies impose penalties for absences must provide each student with a written copy of their policies within the first week of the semester. If an attendance policy provides for assigning a grade of F or U for excessive absences, the professor must inform the student in writing, with a copy to the registrar,
at the point in the semester when the failing grade is earned. A failing grade based on excessive absences may not be recorded by the registrar's office until after the last day for course withdrawals.

**Academic Honors**

*Graduation Honors:* The designations *summa cum laude*, *magna cum laude*, and *cum laude* are awarded to graduating students who have completed at least 90 credit hours at Ripon College. Transfer students presenting for graduation between 60 and 89 Ripon credit hours must present among them a last full term of undergraduate study at Ripon. To receive *summa cum laude*, the student must have a cumulative average of 3.90; *magna cum laude*, 3.70; *cum laude*, 3.40.

*Honors in the Major:* Students whose grades in all courses which can be counted toward a specific major average 3.50 or better will, upon graduation, be awarded honors in that major (e.g., “Honors in Biology, Honors in Business Management, Honors in Music”). In the determination of honors in a major, all courses taken which can apply to that major will be included in computing honors. Exceptions are prerequisite courses outside the major, courses which do not receive conventional grades (A, B, C, etc.), and those courses in the department or major which do not count toward the major (e.g., 401 courses).

*Dean’s List:* At the end of each semester, students who have earned a 3.40 average or better are placed on the Dean’s List. In order to qualify for the Dean’s List, a student must complete 12 credits of regular grade work (work graded A, B, C, etc.), and may have no U or I.

**Phi Beta Kappa**

Phi Beta Kappa is the nation’s oldest academic honor society. It was founded in 1776 at the College of William and Mary in Williamsburg, Virginia, and a second chapter was founded at Harvard three years later. Phi Beta Kappa stands for freedom of inquiry and expression, disciplinary rigor, breadth of intellectual perspective, wide knowledge, the cultivation of skills of deliberation and ethical reflection and the pursuit of wisdom. A liberal arts society at its core, Phi Beta Kappa has granted charters for local chapters at less than ten percent of colleges and universities across the nation. Consistent with national criteria, the guidelines for initiation into Ripon College’s chapter include: a broad liberal arts education within all of the divisions of study (humanities, behavioral and social sciences, natural sciences and mathematics, and the fine arts), education in a foreign language to at least the intermediate (courses at or above 211) level, at least one course in college-level mathematics, logic or statistics, a minimum GPA of 3.6, diverse extra-curricular and/or community involvement, and strong character. Membership in Phi Beta Kappa remains one of the most prestigious undergraduate honors in the nation.

Election to Phi Beta Kappa is made in the spring of each year from members of the senior class who have demonstrated superior scholarship. The number elected is limited to a small fraction of the senior class.
Academic Standing

A student’s academic standing is computed by dividing cumulative credit hours into honor points. A credit hour normally equals one hour of recitation or lecture or two to four hours of laboratory per week per semester. Honor points are determined by the grade earned:

- A 4 honor points per credit hour
- A- 3.67 honor points per credit hour
- B+ 3.33 honor points per credit hour
- B 3 honor points per credit hour
- B- 2.67 honor points per credit hour
- C+ 2.33 honor points per credit hour
- C 2 honor points per credit hour
- C- 1.67 honor points per credit hour
- D+ 1.33 honor points per credit hour
- D 1 honor point per credit hour
- D- .67 honor points per credit hour
- F No honor points per credit hour

Thus, a student who carries 16 credit hours in a semester and receives an A in every course will earn 64 honor points and a 4.00 or straight A average for the semester. A student’s cumulative average is computed by dividing total credit hours cumulated into total honor points earned. Both semester and cumulative averages are computed at the end of each semester. Courses in which a student receives I, P, S, U, or W do not affect semester or cumulative averages.

At the end of each semester, the associate dean of faculty will review the records of all students falling into the following categories:

1. Failure to achieve the following cumulative averages:
   - End of one semester: 1.70
   - End of two semesters: 1.80
   - End of three semesters: 1.90
   - End of four or more semesters: 2.00

2. For full-time students except first-term, first-year students:
   a. Failure to earn an average of 12 credits per semester;
   b. Two consecutive semesters with fewer than 10 credits earned in each;
   c. A semester grade point average of 1.00 or less.

Students in categories 1 or 2 will be dismissed from the College for unsatisfactory performance or placed on academic probation for the next semester. No restrictions are imposed on students who are placed on academic probation. However, being placed on academic probation is formal notification that an improvement in performance must be achieved in order to remain enrolled at Ripon.

If a student is academically eligible to remain at Ripon College, he or she is meeting satisfactory progress guidelines for financial aid.

Liberal Arts In Focus

In addition to the two standard semesters, Ripon College’s calendar includes two short, intensive terms of three weeks. One term precedes matriculation in the fall semester; the other follows Commencement at the end of spring semester. On occasion, an In Focus course may be offered during the winter recess if approved by the dean of faculty. Together, these two terms constitute the Liberal Arts in Focus program.

The In Focus program is optional for students, faculty, and departments. No course required for a major is offered exclusively during In Focus terms. Students may not take more than one course during a single In Focus term.

Taught in short, intensive blocks, In Focus courses offer a beneficial alternative and valuable supplement
to courses offered during the regular semester. Courses are immersion experiences that provide a bridge between the theory and content of disciplines and their applications to problem-solving, creative work and practical experience. In doing so, they serve a set of unique purposes, such as:

- Deepening and extending academic study and/or creative work;
- Strengthening the foundation for graduate and professional degrees;
- Establishing experiential pathways for work in the profit and non-profit sectors, including volunteer opportunities.

Sample courses require students' full and undivided attention and should include at least one of the following components: off-campus experiences; service learning; internships; field work; practical community engagement; performance; an emphasis on project-based learning; an emphasis on scholarly research or artistic products and/or advanced methods; an emphasis on interdisciplinary study and/or research; and an emphasis on mentoring and making connections with experts from outside of the campus community.

In summary, the *In Focus* program clarifies and sharpens the connection between our mission, curriculum and outcomes. It accomplishes this by giving students practice in applying liberal learning to the challenges of advanced academic study, artistic activity, and professional life after graduation. *In Focus* courses thus affirm and strengthen the relationship between a Ripon education and lifelong opportunities as professionals, citizens and learners.

**Three-Year Bachelor of Arts Degree**

This program is designed for highly motivated and able students who wish to accelerate their undergraduate education in order to enter graduate school or their career a year early. There are no special entrance requirements for secondary school students, and the first-year student academic program is the same for both three- and four-year degree candidates. But in their second and third years, three-year degree candidates must elect more courses and achieve higher grade point averages.

To qualify for a three-year A.B., a student must earn at least 112 credit hours with a 2.75 average or higher, complete all graduation requirements and complete the requirements for a major. All credit hours must be earned on the Ripon College campus; transfer credits, retroactively granted credits in foreign languages, credits from off-campus programs (such as ACM, Bonn, or RAYA), summer school credits, IBNA credits and CEEB Advanced Placement Examination credits may not be counted in the 112 credit hours total, and transfer or summer school credits may not be used toward the satisfaction of any requirements.

In order to enter and remain in the program, a student must have earned at least 32 credit hours and a 2.50 average or higher after two semesters, at least 52 credit hours and a 2.60 average after three semesters, at least 72 credit hours and a 2.70 average after four semesters and at least 92 credit hours and a 2.75 average after five semesters. Any student who fails to meet these requirements must drop out of the program and cannot be readmitted. Three-year degree candidate students may not take more than four courses under the S-U option or more than one S-U course in a single semester. Students who wish to enroll in
the three-year program should indicate their tentative intention of doing so at the time of preregistration for their third semester. After second semester grades have been recorded and averages computed, students with a cumulative grade point average of less than 2.50 or fewer than 32 credit hours will be declared ineligible. At final registration for the third semester, all students who have a cumulative two-semester average of 2.50 or higher in at least 32 credit hours of work must declare their candidacy for the three-year degree if they wish to participate.

Academic Advising

The purpose of the advising system at Ripon College is to support and enrich the liberal arts educational experience of students.

The advising system is organized under the following general structure to introduce students to Ripon College’s academic opportunities and responsibilities.

Incoming first-year students will be assigned to an academic advisor. Flexibility is maintained for advisory groups to meet cooperatively and for necessary individual adjustments.

Each student will be expected to decide on an area of major interest and obtain a major advisor by the spring semester registration period of the junior year. Students are reminded that for several majors offered at the College, entry later than the start of the sophomore year is difficult. All students should be continuously aware of the educational concerns involved in the development of their academic program. Students must have an academic advisor in the department of each declared major or minor.

It is the obligation of all students to know and observe all the regulations which apply to their program(s).

Advisors assist, but final responsibility rests with students.

Eligibility for Extracurricular Activities

All full-time students are eligible to participate in extracurricular activities and intercollegiate athletics, subject only to the resident regulations established for athletes by the Midwest Conference and the National Collegiate Athletic Association Division III.

Withdrawal from the College

Students withdrawing from the college for any reason, including participation in off-campus programs, are required to report to the associate dean of faculty for instructions concerning proper withdrawal procedure. If this is not done, no refund will be made of any portion of semester charges paid, and any amount unpaid for the semester will become due in full; furthermore, students may be given failing grades in their courses. The official date of withdrawal is the date on which the associate dean of faculty is notified in writing. The financial liabilities of a withdrawing student are explained in the “Expenses” section of this Catalog.

Readmission

Students who leave Ripon College for any reason must have their return approved by the associate dean of faculty. Students who have been dismissed from the College will ordinarily not be considered for readmission until the lapse of at least one semester.
Registration
All students are expected to register at the time designated. Course changes may not be made after the deadlines specified in the College calendar. No credit is given for any work for which the student is not registered.

Students must secure the signatures of all academic advisors on registration and course change forms.

Transfer Students
Transfer students must complete a minimum of 32 credit hours at Ripon, including at least one-half the credit hours required for any major or minor and must meet all the requirements for a Ripon College degree, including the senior residence requirement. Credit for work done elsewhere is granted only for courses in which a grade of C- or better has been earned. Whether courses at other institutions meet Ripon distribution requirements is decided by the registrar, in accord with guidance from academic departments. A “Pass” grade is not transferable unless the original college certifies that the student did work of C- or higher quality. Transfer grades are not included in computing a student's average at Ripon. Articulation agreements negotiated between Ripon College and other institutions supersede these policies on transfer credit, when in conflict.

A.B. Degree
Ripon College awards a bachelor of arts degree. Because the college is one of only a few in the country that holds to the venerable academic tradition of awarding degrees written in Latin, it formally abbreviates the Latin name of its degree (Artium Baccalaureus) as A.B. This abbreviation reflects the conventional word order of Latin diplomas, whereas the degree abbreviation B.A. follows the word order of Bachelor of Arts as contained in diplomas written in English.
Courses of Study

Course numbering guidelines: These are meant to be general guidelines. Specific course prerequisites should be listed at the end of individual course descriptions:

- The 100-level course numbering designation should indicate introductory courses, topic courses without prerequisites or broad survey courses. A 100-level course should assume no prerequisite knowledge or skills beyond that of a typical first-year Ripon student.
- The 200-level course should assume a moderate level of academic maturity and experience. Depending on discipline, a 200-level course may or may not also assume an intermediate level of discipline-specific content or methodological knowledge.
- The 300-level course should assume a fairly high level of academic maturity and experience. Depending on discipline, a 300-level course also may assume a fairly high level of discipline-specific content or methodological knowledge.
- The 400-level course numbering designation should indicate advanced topic courses in a major. A 400-level course should assume deep content and methodological knowledge in a discipline and probably will be accessible to majors or students with significant previous coursework in the major.
- The 500-level course numbering designation is reserved for senior seminars. Conversely, all senior seminars should have a 500-level course designation. When course numbers are separated by a comma (i.e., PSC 211, 212), the first semester (PSC 211) is prerequisite to the second semester (PSC 212).

Dual-numbered courses numbered with a slash (i.e., CLA 226/326), offer qualified students an opportunity for study of the course topic in greater depth and breadth.

Course cancellation: A course in which fewer than six students are enrolled may be canceled.

Individualized Learning Experiences

Ripon College offers three distinct Individualized Learning Experiences: directed research, independent study and internship. All Individualized Learning Experiences will require the submission of a contract approved by the student, faculty mentor, department chair and the dean of faculty.

Directed Research: A directed research project is appropriate for a student who wishes to conduct original research, either as an independent researcher or as part of an ongoing research project led by a faculty member. Directed research projects are grounded in the established practices of a discipline and culminate in or contribute to the creation of an original scholarly or artistic product. Projects may include, but do not require, regular teaching procedures, class meetings or assignments.

Directed research should be numbered 197, 297, 397 or 497 in accordance with the course numbering guidelines. All directed research courses are variable credit.

Independent Study: An independent study is appropriate for a student who wishes to increase their understanding of a topical area outside of or beyond the content of any course normally offered at Ripon. Independent study projects culminate in a substantial paper or other scholarly or artistic product that demonstrates increased breadth and depth of understanding of this topical area. Projects may include, but do not require, regular teaching procedures, class meetings or assignments.

Independent study should be numbered 198, 298, 398 or 498 in accordance with
the course numbering guidelines. All independent study courses are variable credit.

**Internship:** An internship is appropriate for a student who wishes to engage in directed work-study with an approved employer or agency. All internships taken for credit at Ripon College shall include, at the minimum, a paper written by the student or a presentation by the student that will be evaluated by the member of the academic department that approved the internship. In the case of interdisciplinary internships, the faculty sponsor for the internship will evaluate the paper or presentation (vF; 04.02.03). Internships may include, but do not require, regular teaching procedures, class meetings or assignments.

Internships should be numbered 199, 299, 399 or 499 in accordance with the course numbering guidelines. All internship courses are variable credit.

**American Studies**
Associate Professors Jacqueline S. Clark, Henrik M. Schatzinger, Mary I. Unger; Assistant Professor Sarah K. Frohardt-Lane (Coordinator)

**Program Mission Statement:** The American Studies minor prepares students to better understand American experiences through multiple disciplinary approaches to the study of culture and society by critically engaging major texts, theories and concepts related to American Studies.

**Requirements for a minor in American Studies:** 20 credits of study from the following list of approved courses covering at least three departments and including at least one 300-level class. Additional topic classes may count with the coordinator’s approval.

- CMM 336: Social Movement Communication
- CMM 352: Political Communication
- ENG 246: The American Experience
- ENG 260: Topics in Cultural Identity: The Harlem Renaissance
- ENG 260: Topics in Cultural Identity: Coming of Age in Multicultural America
- ENG 300: Departmental Studies: Gender and Sexuality
- ENG 300: Departmental Studies: The Lost Generation
- ENG 324: Period Studies: Modernism
- ENG 340/WOM 300: Major Author, Toni Morrison. Same as WOM 300.
- ENG 340/WOM 300: Major Author, Zora Neale Hurston. Same as WOM 300.
- HIS 241: The United States, 1815-1914
- HIS 242: The United States, 1914-Present
- HIS 262: American Race Relations
- HIS 264: Immigration and Ethnicity in American History
- HIS 360: Topics in African American History: 20th-Century African-American Thought and Culture
- HIS 370: Topics in American Social and Cultural History: Film
- HIS 371: American Lives: Biographical and Autobiographical Approaches to American History
- HIS 372: Topics in Twentieth-Century American History
HIS 375: United States and Latin America
MUS 112: Topics: American Music in the Twentieth Century
MUS 112: Topics: Jazz History
MUS 200: Music and War
MUS 333: History of Twentieth-Century Musical Styles
POL 220: American Politics and Government
POL 222: Media, Politics and Personal Power
POL 231: American Political Thought
POL 246: Morality and Public Policy
POL 320: Topics in American Politics
POL 323: Interest Groups and Money in US Politics
POL 324: Campaigns and Elections
POL 335: Congress and the Presidency
POL 343: U.S. National Security Policy
POL 381: United States Foreign Policy
POL 385: Terrorism and Intelligence
POL 412: Constitutional Law I: Landmark Decisions
POL 413: Constitutional Law II: The Bill of Rights
SOC 201: Social Problems
SOC 204: Sociology of Jobs and Work
SOC 301: Social Movements
SOC 304: Sociology of Inequalities
SOC 306: Criminology
SOC 309: Sociology of Religion
WOM 202: Introduction to Women’s and Gender Studies

**Ancient, Renaissance and Medieval Studies**

Professors Kenneth L. Hill, Sarah Mahler Kraaz, Eddie R. Lowry Jr., Diane L. Mockridge, Dominique A. Poncelet, Brian H. Smith;

*Associate Professors* Paul F. Jeffries, Travis E. Nygard, Ann Pleiss Morris (*Coordinator*)

**Program Mission Statement:** The interdisciplinary minor in Ancient, Renaissance, and Medieval Studies (ARMS) brings together various course offerings from the departments of art, English, foreign languages and cultures, history, music, philosophy and religion, theatre and women’s and gender studies. The program of study is Western in focus, beginning in time with the innovations of antiquity, continuing to the medieval era and ending with the Renaissance. The minor aims to enrich student understanding of ideas and developments shaping Western civilization and culture through a multi-disciplinary lens.

**Requirements for a minor in Ancient, Renaissance and Medieval Studies (ARMS):** 20 credits, including HIS 210: Introduction to Ancient, Renaissance and Medieval Studies (4 credits). The additional 16 credits will be selected from the electives listed below, from at least three disciplines, with at least two courses at the 200-level or above. Off-campus study would count as a discipline. Appropriately focused special topics courses also can be used as electives at the discretion of the program coordinator.
Courses of Study

Art
- ART 171: Global Art History: Ancient to Medieval
- ART 172: Global Art History: Renaissance to Today
- ART 334: Topics in Western Spirituality. Same as REL 334 and HIS 334.
- ART 383: Mapping the World. Same as HIS 383.

Classics
- All Greek and Latin courses

English
- ENG 251: Foundations of English Literature
- ENG 340: Major Author: Shakespeare
- Other English courses focused on the period. Courses include: ENG 300 Special Topics: Shakespeare and Pop Culture; ENG 300 Special Topics: The Business of Early Modern Theater

Foreign Languages and Cultures
- GRK 111, 112, 211, 212, 320 (all Greek language instruction courses)
- LAT 111, 112, 211, 212, 320, 430 (all Latin language instruction courses)
- SPA 321: Voces españolas I

History
- HIS 214: Greek and Roman Society
- HIS 220: Nonconformity and Deviance in Medieval and Early Modern Europe
- HIS 221: The Medieval World: Faith, Power, Order
- HIS 222: The Uses of Arthurian Legend. Same as ENG 200.
- HIS 281: World History I. Same as GLB 281.
- HIS 330: Women and Family in Medieval and Early Modern Europe. Same as WOM 330.
- HIS 334: Topics in Western Spirituality. Same as REL 334 and ART 334.
- HIS 383: Mapping the World. Same as ART 383.

Music

Religion
- REL 121: Introduction to the Hebrew Scriptures.
- REL 122: Introduction to the Christian Scriptures
- REL 220: Jesus of Nazareth - God or Man
- REL 231: History of Christian Theology and Ethics
- REL 334: Topics in Western Spirituality. Same as HIS 334 and ART 334.

Theatre
- THE 231: Theatre and Drama I: Ancient through Renaissance. Same as ENG 231.
- THE 232: Theatre and Drama II: Renaissance through Romantic. Same as ENG 232.

Women’s and Gender Studies
- WOM 330: Women and Family in Medieval and Early Modern Europe. Same as HIS 330.
Off-Campus Study: Courses taken while on off-campus study programs could count upon approval by the director of the minor. Courses might come from some of the following programs: In Focus Old Italy, New Italy; ACM London-Florence Program; ACM Florence Program; University of MN Montpellier, France; AYA Paris, France; AYA Madrid, Spain; Center for Cross-Cultural Study Seville, Spain; University of MN Toledo, Spain.

HIS 210. Introduction to Ancient, Renaissance and Medieval Studies

Mockridge

4 credits
An introduction to the many approaches scholars use to study the diverse peoples and cultures of Western civilization during the ancient, medieval and early modern eras. The course will give an overview of each time period and examine the various ways scholars from different disciplines (art, English, global studies and languages, history, music, philosophy, religion, theater and women's and gender studies) approach these eras. Through this multi-disciplinary approach, students will gain an understanding of the key ideas and developments that shaped western civilization and culture. Course open to all students.

See Sociology and Anthropology

Art and Art History

Associate Professors Travis E. Nygard, Mollie Oblinger (Chair of the department), Rafael F Salas

Departmental Mission Statement: The Department of Art and Art History prepares students to understand historical and contemporary currents in visual literacy in terms of art production and its analysis. This includes knowledge of studio practices, methodologies, theories and history. The department prepares students to enrich their communities by engagement with the visual arts on personal and professional levels.

Communicating Plus - Art and Art History: Students completing a major in art and art history develop skills in the four Communicating Plus areas as they progress through courses in the department — written communication, oral communication, critical thinking and problem solving. Students write and give formal and informal presentations in virtually all classes in the art department. Additionally, students develop skills in critical thinking and problem-solving as they learn to analyze, critique, create and support artistic thought.

Requirements for a major in studio art: 48 credits.
Three of the following four sequences: ART 120 and 222; ART 130 and 240; ART 190 and 292, or ART 180 and 282.
ART 171 and 172, plus either ART 274, ART 374 or another 200- or 300-level art history course, taken by consent of the chair.
ART 400, which can be repeated for credit, usually taken in the junior year in anticipation of the Senior Studio Project.
Note: to reach the 48-credit minimum for this major, at least one elective course in art is needed.

The senior capstone for studio art majors: comprises two courses: 1) ART 500 for four credits, where senior studio majors are required to produce and
exhibit a body of high quality work which, in the opinion of the art faculty, is both significant and substantial.

2) ART 570 for two credits, where seniors present a thesis paper based on research related to the student's art production.

Students are encouraged to participate in off-campus programs, but preferably in the junior year.

**Requirements for a major in art history:** Forty credits.

ART 171, 172. Four 200- or 300-level art history courses chosen from ART 270, 273, 274, 276, 277, 278, 334, 335, 370, 374, 376, 377, 379, 383; CLA 250/350; HIS 214; or other courses as approved by the department.

Studio courses are required, including one four-credit 2D course such as ART 120, 130 or 153, and one four-credit 3D course such as ART 180 or 190.

ART 570, a four-credit capstone experience which involves a thesis paper and oral presentation.

An internship for two to four credits is recommended but not required. Note: if you choose to not do a four-credit internship, then to reach the 40-credit minimum for this major, at least one elective course in the arts is needed. Art history majors are strongly advised, though not required, to enroll in two full years of college-level language study if they are considering graduate school, and to participate in an off-campus program in the arts during their junior year.

**Requirements for PK-12 licensure in art education:** Students must complete general education requirements for licensure, the requirements for a major in studio art (above) and the following: EDU 190, 242, 250, 260 and 270. Students must work with the art advisors to arrange to take teaching methods coursework and clinical experiences (Sec. Ed. 366) through the University of Wisconsin-Oshkosh. In addition, each student must qualify for and satisfactorily complete EDU 320 and a semester of student teaching (EDU 491* and 571) at Ripon College. Students seeking licensure in art may complete the Educational Studies minor by adding EDU 316 and EDU 344 to their programs. EDU 242: Arts Integration is recommended as a supporting course for the art education program.

Please note that DPI content standards for art educators includes the requirement that future teachers be exposed to specific forms of art not covered in all departmental offerings. Please see your art advisor for assistance in course selection to meet these requirements.

**Languages and off-campus study:** All majors are encouraged to participate in off-campus programs. Art history majors and minors are strongly encouraged to study a language to the 211-level and beyond.

**Requirements for a minor in studio art:** 20 credits, including ART 171 and 172, one 200-level and one 400-level studio art course and at least four additional elective credits.

**Requirements for a minor in art history:** 20 credits, including ART 171 and 172, and at least 12 additional elective credits.

**Note on majoring and minoring:** Students who opt to both major and minor within the department must have their program approved by the chair of the department.
120. **Drawing I**  
**Salas**  
Four credits.  
Basic drawing is an introduction to line, value and composition. This course is intended to strengthen drawing from observation as well as foster a deeper understanding of form and visual organization. Students are given traditional methods and materials that will be used in building formal skills which they then will use to create artworks of their own conception. Field trips may be required.

130. **Painting I**  
**Salas**  
Four credits.  
This course is an introduction to the oil painting medium using historical and contemporary approaches. Students will investigate technical and creative problems in paint and examine the nature of color as it relates to observation, science and psychology. Field trips may be required.

153. **Digital Art I**  
**Staff**  
Four credits.  
This course is an investigation into the possibilities of computer-generated art. Industry standard programs from the Adobe Creative Suite, including Photoshop and Illustrator, will be used to manipulate photos and create digital imagery. Students will gain facility with the technical aspects of computer imaging and assignments will emphasize creativity. Field trips may be required. May be cross-listed with THE 202 as Digital Art I-Design and 3-D Printing.

160. **Intro to Design: Fundamentals and Function**  
**Oblinger**  
Four credits.  
This studio art course is a broad introduction to the field of design. Students will learn about and explore the technical and aesthetic fundamentals of design as applied to fields such as graphic, interior and industrial design. Students will explore solutions to design problems in both traditional and digital media. Presentations and readings on the history of design and contemporary trends will complement the hands-on work. Field trips may be required.

171. **Global Art History: Ancient to Medieval**  
**Nygard**  
Four credits.  
This course covers art, architecture and visual culture from ancient times until the 15th century CE. Major works of secular and sacred art from Africa, the Americas, Asia and Europe are treated critically by placing them within their original cultural contexts. The enduring importance of these objects for later generations is also addressed. Topics discussed include Egyptian pyramids, Olmec heads, Spanish mosques, Greco-Roman statuary, Medieval churches and Afghan gold work. Foundational skills for analyzing art and thinking historically are provided. The course format includes lectures, discussions and tests. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. The course can be taken before or after ART 172. Field trips may be required.

172. **Global Art History: Renaissance to Today**  
**Nygard**  
Four credits.  
This course continues ART 171 by covering art, architecture and visual culture from the 15th century CE to the present. Major works of art from Africa, the Americas, Asia and Europe are treated critically by placing them within their original cultural contexts. The enduring importance of these objects for later generations also is addressed. Topics addressed include African sculpture, Renaissance masterpieces, abstract imagery and conceptual art.
Courses of Study

Foundational skills for analyzing art and thinking historically are provided. The course format includes lectures, discussions and tests. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. The course can be taken before or after ART 171. Field trips may be required.

180. Ceramics I
Oblinger
Four credits.
An introduction to various hand-building techniques for making sculptures in clay. Surface treatments and glaze application will be explored as emphasis is placed on both the conceptual development of ideas and the physical crafting process. Historical and contemporary ceramics are introduced in presentations. Field trips may be required.

190. Sculpture I
Oblinger
Four credits.
This course is an introduction to the various technical, aesthetic and conceptual issues of sculpture. Traditional and contemporary processes will be explored in a wide range of media. Presentations and readings will address the history and recent development in the field of sculpture. Field trips may be required. Same as ENV 190.

200. Topics
Staff
Variable credit course, 1-4 credits.
Special subjects in art not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

222. Drawing II
Salas
Four credits.
This course is a deeper investigation into the techniques and possibilities of drawing. A primary focus will be the integration of conceptual concerns with technical skills. The possibilities of drawing will be explored through a variety of approaches: approximately half the class time will be spent working from the figure, the rest on other assignments. Field trips may be required. Prerequisite: ART 120 or consent of the instructor.

240. Painting II
Salas
Four credits.
Painting II is a continuation of basic painting with an emphasis on color theory, painting from life and interpretation. Field trips may be required. Prerequisite: ART 130 or consent of the instructor.

254. Digital Art II
Staff
Four credits.
A continuation of Digital Art I, with continuing emphasis on design and composition and a further investigation of the conceptual possibilities inherent in the medium. Course uses Adobe Illustrator, Photoshop and other software. Field trips may be required. Prerequisite: ART 153.
270. Department Studies - Art History

Four credits.
Special subjects in art history not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

273. Great Discoveries of Ancient Art

Four credits.
This course covers major discoveries of ancient art across the world. We will look at the lives and motives of romantic explorers, academic archaeologists and treasure hunters who found objects such as the Terra-cotta Army of Emperor Qin Shi Huang, the death mask of Pharaoh Tutankhamen and the sarcophagus of King K'inich Janaab' Pakal. In doing so, we will critically examine the concepts, values and biases behind discovery and the making of history. Ultimately, you will learn the importance of ancient art in the past and present. The format includes lectures, discussions, papers, projects and presentations. Field trips may be required.

274. Modern Art

Four credits.
This course will address critical issues in modern art, architecture and visual culture beginning with the industrial revolution of the 19th century. It will devote special attention to the work of Realists, Impressionists, Expressionists, Cubists, Surrealists, Abstract Expressionists and Pop artists. Because this was an era of increasing globalization, the course will examine how art was used to exchange ideas world-wide. The course also provides students with strategies for thinking about art in terms of politics, gender, sexuality, class, race and psychology. The course format includes lectures, discussions, projects, presentations, papers and tests. Field trips may be required.

276. Arts of Asia

Four credits.
In this course students learn about the history, theory and practices of art-making in Asia. Topics covered include the visual arts of painting, sculpture, architecture, calligraphy, printmaking, decorative objects and popular art, set within a cultural context that includes cultural history and performing arts of music, theater and film. The course includes lectures, discussions, videos and readings, and students will complete papers, presentations, projects and tests. No prior understanding of art history is required to succeed in this course. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. No prerequisites.

277. The History and Theory of Design and Decoration

Four credits.
Artists can be problem-solvers. Whether making a textile, a poster, a shoe, a building or a teapot, they think through many possibilities, both good and bad before arriving at a solution that best meets the needs of the people at a historically specific moment in time. While such work often is beautiful, it transcends being merely decorative so that it may serve a greater purpose. In this course we will focus on creative design in order to better understand how artists resolve dilemmas. We'll look at traditional decorative arts as well as daring creative experiments. Ultimately, this course focuses on how functional art adorns and changes our world. The course format includes lectures, discussions and readings paired with papers, projects, presentations and tests. Field trips may be required. No prerequisites.
278. Indigenous Art of the Americas

Four credits.
This course focuses on the art, architecture and visual culture of native peoples from North, South and Central America. It includes case studies of creative expression that span ancient times to today. Some art studied will be traditional in form and subject matter and some will be produced by artists who experiment with new techniques and ideas. The format includes lectures, discussions, exams, papers and projects. Field trips may be required. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. No prerequisites.

282. Ceramics II

Four credits.
Further development of the skills and methods of ART 180. The course continues the focus of creating ceramic sculpture and introduces wheel throwing. Field trips may be required. Prerequisite: ART 180 or consent of the instructor.

292. Sculpture II

Four credits.
Continuation of concepts and methods of ART 190 which may include welding, bronze casting or wood construction. A wider range of personal experimentation with form and content will be encouraged. Visual presentations, demonstrations and readings. Field trips may be required. Prerequisite: ART 190 or consent of the instructor.

322. Drawing III

Variable credit course, 1-4 credits.
Drawing III is a continuing investigation into the formal and conceptual possibilities of the drawing medium. Students produce projects that build on expertise developed in earlier courses. Students in Drawing III may work in parallel with projects in Drawing II and continue to expand their projects independently. A portion of the course will be independently researched projects. Field trips may be required. Prerequisite: ART 120 and 222, and consent of the instructor.

334. Topics in Western Spirituality

Four credits.
Focusing on Christianity from its early days through the early modern era, this course will explore various topics in western spirituality. Topics include various beliefs and practices, including Gnosticism, mysticism, asceticism, monasticism, pilgrimage and eucharistic devotion. The lives of various men and women also will be explored, including saints, anchorites and mendicants. Also central to the course is an examination of the use of material objects and artistic images in religious devotion. The course has no prerequisites, but students will find it helpful to have had some background in medieval history and/or Christianity. Same as HIS 334 and REL 334.

335. Renaissance Florence: Politics, Art and Intellectual Life

Four credits.
An in-depth study of the Italian Renaissance, focusing on the political, intellectual and artistic achievements of the city that witnessed the flowering of the Renaissance: Florence, Italy. Among the topics examined will be the political power of the Medici family, key thinkers such as Dante, Petrarch and Machiavelli and important works of art such as the Michelangelo’s “David.” Central to this course is the idea that intellectual endeavors and artistic works are a
product of the times and reflect the issues and concerns of their political milieu. In exploring these issues, this course will examine the documents of the time (primary sources) as well as recent historical interpretations (secondary sources) of the period. Same as HIS 335.

340. Painting III

Salas

Variable credit course, 1-4 credits.

Painting III is a continuing investigation into the formal and conceptual possibilities of the painting medium. Students produce projects that build on expertise developed in earlier courses. Students in Painting III may work in parallel with projects in Painting II and continue to expand their projects independently. A portion of the course will be independently researched projects. Field trips may be required. Prerequisite: ART 120 and 240, and consent of the instructor.

370. Advanced Departmental Studies - Art History

Staff

Variable credit course, 3-4 credits.

Special subjects in advanced art history not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

374. Art Now

Nygard

Four credits.

Artists working today have adopted new technologies, embraced identity politics, questioned what counts as art, struggled with censorship and established themselves as cultural commentators. Their subject matter ranges from the deeply personal to the highly political. In this course, you will learn about this generation of creative people and the institutions that support them. You will think critically about the production, display and reception of art and you will become familiar with common approaches to art criticism. The format includes lectures, discussions, papers, oral presentations and tests. Field trips may be required.

376. Visual Studies

Nygard

Four credits.

Are our emotions, beliefs and actions manipulated by the pictures we see? Many artists and art historians believe so. In this course, you will learn how vision shapes the human experience by examining imagery, the properties of light, the anatomy of eyes and the experience of seeing. You will be exposed to the disciplines of art history, anthropology, biology, communication, film, psychology, philosophy and physics. Case studies will include “high” arts of painting and sculpture, “low” arts of pop culture and non-art such as diagrams and illusions. The format includes lectures, discussions, papers, projects, presentations and tests. Field trips may be required.

377. Arts Management

Oblinger

Four credits.

This course is designed for students considering a career working in an art gallery or museum. Students have hands-on experience preparing art department exhibitions in areas of exhibit design, preparation, curation and publicity. Prerequisite: consent of the instructor.
379. **Art Fakes, Frauds and Heists**  
Nygard  
Four credits.  
Making forgeries, misrepresenting art and stealing masterpieces are three of the greatest taboos in the art world. This course will include case studies of the notorious people who have done these things along with analysis of those works of art. We will discuss how experts scrutinize art using visual analysis, microscopy, ultraviolet fluorescence, X-rays, carbon dating, and dendrochronology to reveal the true histories of objects. Ultimately by focusing on instances of deviance, you will learn how art is produced, controlled and valued. The format includes lectures, discussions, papers, projects, presentations and tests. Field trips may be required.

382. **Ceramics III**  
Oblinger  
Variable credit course, 1-4 credits.  
This course will require students to do research at the advanced level catered to their interests and goals. If a student repeated the course, they would do so while completing new projects and learning new skills so it would not be a redundant experience. **Prerequisites: ART 180 and ART 282.**

383. **Mapping the World**  
Bockelman  
Four credits.  
Every map is simultaneously a work of art, a product of geographical knowledge, and a record of how its maker and audience view the world — or would like to. This interdisciplinary course examines the many different kinds of maps that have been made throughout human history, emphasizing the relationship between their contents — places and spaces, projections, toponyms, symbols, illustrations, legends and borders — and the artistic, scientific, political and cultural contexts in which they were created and used. Topics rotate, but often include: what (and who) makes a map a map; the ancient and medieval roots of modern mapping; cartographic fantasies, silences and “lies”; mapmaking and the representation of nature; the role of maps and atlases in exploration; imperialism, nationalism and tourism; counter-mapping and alternative cartographies; and the rise of thematic mapping as an artistic challenge and scientific tool. Students will also learn how they can incorporate maps and digital mapping resources into research projects in history, art history and other humanities fields. Same as HIS 383.

400. **Departmental Studies - Studio Art**  
Oblinger/Salas  
Four credits.  
This course is designed to explore aspects of art not covered in other courses. It is also an opportunity for advanced students to participate in special projects and workshops with faculty and guest artists. Seniors are strongly urged to use this course as a means of concentrated preparation for ART 500. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. This course can be repeated for credit as topics change. Field trips may be required. **Prerequisite: a 100-level studio art course or consent of the instructor.**

500. **Senior Studio Project**  
Salas/Oblinger  
Four credits.  
This course is taken the semester before the student plans to graduate. Students work in the area and medium of their expertise and pursue a concentrated, narrow studio research activity which is meaningfully related to their major area of interest in art. Students meet on a regular basis with their advisor, receive critiques from the staff and are expected to produce a significant body of work for the senior show. Field trips may be required.
570. Senior Seminar in Art

Nygard

Variable credit course, 2-4 credits.
In the year before graduation, seniors in the department undertake individualized projects and professional development activities. Senior studio majors take the course for two credits, while art and art history majors enroll for four credits. All students present their work publicly. Field trips may be required.

Biography

Professors Mark S. Kainz, Robert L. Wallace;
Associate Professors Memuna Z. Khan (Chair), Barbara E. Sisson;
Adjunct Professor David Goodspeed;
Assistant Professor Robin M. Forbes-Lorman;
Biology Laboratory Coordinator Dana C. Moracco

Departmental Mission Statement: The Biology Department provides an intellectually challenging learning environment for students of the life sciences. In laboratory, field and discussions, students come to understand the foundations and diversity of life by posing meaningful biological questions, answering these questions through observation and experimentation, and presenting their findings to a wide audience. These experiences prepare students to make informed decisions in their daily life, work in a range of careers and pursue advanced professional programs.

Communicating Plus - Biology: In accordance with the College’s emphasis on enhancing our student’s ability to communicate what they have learned, all biology courses highlight the four skills embodied in the Communicating Plus program: written communication (esp. BIO 200), oral communication, critical thinking and problem-solving. The biology curriculum has three levels at which the Communicating Plus skills are addressed. Important skills are introduced in BIO 121 and 200 and further developed in the subject-specific courses. Finally, students have opportunities to perfect and demonstrate their mastery of discipline-specific content and the Communicating Plus skills in BIO 501 and 502.

Requirements for a major in biology: A student majoring in biology will earn 33 credits in biology which much include the four core courses; at least one course each in cell and molecular, organismal, and ecology and evolutionary biology; and at least 9 additional elective credits. At least two courses toward the major must be taken at the 300 level. In addition to courses in biology, two chemistry courses (CHM 111, 112) and one course in statistics (MTH 120 or PSC 211) are required for biology majors.

Core Courses: 121, 200, 501, 502
Organismal: 206, 211, 215, 216, 226, 227, 312, 314
Cell & Molecular: 219, 314, 327, 328, 329

No more than four credits of directed research (BIO x97), independent study (BIO x98), or internships (BIO x99) may be counted toward the major. BIO 110, 310 and 400 will not count toward any major or minor in biology.

Students planning on graduate work in biology or health professions should consider additional courses in chemistry, one year of physics, mathematics through
Courses of Study

calculus, and computer science. For further information on preparing for a career in the health profession consult Dr. Barbara Sisson.

Requirements for a minor in biology: BIO 121 and 19 additional credits in biology courses approved by the department.

Requirements for a minor in environmental biology: ENV 120, BIO 121 and 247, plus 11 additional credits in biology courses approved by the department.

Courses taken through the SEA or SES programs may be used to fulfill certain requirements for the major and minor.

Requirements for a teaching major in biology: 33 credits of biology with the following courses being required: BIO 121, 200, 219, 247, 501, 502 and one course from each of the following areas: zoology (215, 216); physiology (211, 314, 327); MTH 120; and one year of college chemistry. Majors must elect a minimum of two courses at the 300 or 400 level. BIO 400 is required for teacher licensure, but it will not count toward the major. Students planning to take the Praxis II exam are advised that they will need knowledge of chemistry, physics and geology.

Requirements for a teaching minor in biology: ENV 120, BIO 121, 211, 219, 247, and 215 or 216. BIO 400 is required for teacher licensure, but it will not count toward the minor.

110. Topics in Biology

Staff

Variable credit course, 2-4 credits. May be offered as a half-semester course. Designed to acquaint the student with some of the historical and present-day biological topics that relate to humans and their environment. Students can repeat the course for credit when the topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Lecture, reading, discussion, laboratory, required field trips depending on the nature of the topic.

121. Introductory Biology

Staff

Four credits. Three basic concepts of biology are explored, emphasizing laboratory work and exploration. The major topic areas of the course are cell biology, genetics and evolution. Laboratory class size will be small to facilitate discussion and analysis of laboratory work. Lecture, reading, discussion, laboratory, required field trips. This course is a prerequisite for all biology courses numbered 200 and above.

200. Scientific Writing and Communication

Staff

Four credits. The writing of scientific papers in a biological context. Consideration of the historic and modern role of writing primarily for an audience of scientists is examined in a variety of ways. Students will prepare a research paper based on an inquiry based project implemented by the class and by finding, reading, and synthesizing primary literature sources into their own writing. Research papers will be written in a style acceptable for publication in professional journals. Additionally, students will write a research proposal. Peer review and revisions will be practiced. Proper format, data interpretation and presentation, writing style, and methods of literature review will be covered. Oral and poster presentation techniques will be covered. Formal papers written for biology courses will follow this style. Lecture, discussion. Prerequisites: BIO 121; CTL 110; sophomore standing; or consent of the instructor.
206. **Ornithology**

Four credits.

Study of the biology of birds including their evolution, unique morphology, physiological adaptations, migratory behavior and mating systems. Laboratories will include examining preserved specimens, identifying local bird species by sight and sound and becoming acquainted with ornithological field methods. Lecture, laboratory, required field trips.

*Prerequisite: BIO 121 or consent of instructor.*

210. **Topics in Biology**

Variable credit course, 2-4 credits. May be offered as a half semester course. Designed to acquaint the student with contemporary topics that are not covered by regular courses. Students can repeat the course for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Lecture, reading, discussion, laboratory, required field trips depending on the nature of the topic.

211. **Human Anatomy and Physiology I:**

Support, Movement and Integration

Four credits.

Introduction to the structure and function of the human body with an emphasis on the integumentary, skeletal, muscular, nervous and endocrine systems. This course examines these systems from cellular to organismal levels, emphasizing correlations between structure and function. Anatomical and physiological changes occurring in diseased states also are discussed. An integrated laboratory includes study of general physiology, muscle contraction, nerve transmission, the special senses and gross anatomy of relevant structures. Lecture, laboratory, discussion. *Prerequisite: BIO 121.*

215. **Invertebrate Zoology**

Four credits.

Comprehensive study of the biology of invertebrate animals. Ecology and systematics of the invertebrate fauna from local habitats are emphasized on field trips. Live, preserved and fossilized specimens are studied in the laboratory; emphasis is given to parasitic forms and species of significant economic and ecological importance. A collection trip to fossil-bearing strata is conducted. Lecture, laboratory, discussion, required field trips. *Prerequisite: BIO 121.*

216. **Vertebrate Zoology**

Four credits.

Study of vertebrate diversity in morphology and physiology as a result of these organisms’ evolutionary history, biogeography and ecology. This course will acquaint the student with anatomy, systematics, life history and adaptive strategies of the vertebrate groups. Laboratories include dissections of selected vertebrate groups and identification and field study of local species. Lecture, laboratory, discussion, required field trips. *Prerequisite: BIO 121.*

219. **Genetics**

Four credits.

Study of heredity, structure and function of genes. Classical, molecular and population genetics are discussed in lecture. Laboratories include mapping and study of gene interaction in eukaryotes, an introduction to recombinant DNA techniques, mutagenesis and approaches to screening and selecting mutants. Lecture, laboratory. *Prerequisites: BIO 121 and CHM 111.*
58 Courses of Study

220. Department Seminar

One credit.
Selected topics in the biological sciences presented by faculty, Ripon College seniors and visiting scholars. This course is open to first and second-year students. Grading is S-U. Prequisite: BIO 121.

226. Plant Anatomy and Physiology

Four credits.
The anatomy of flowering plants as it relates to the physiological phenomena of nutrition, water relations, photosynthesis, development and physiological ecology. Lecture, laboratory, discussion, required field trips. Prerequisite: BIO 121.

227. The Biology of Plants

Four credits.
A comprehensive study of the kingdom Plantae. Emphasis on the morphology, reproduction and evolution of the algae, bryophytes, ferns and seed plants. Lecture, laboratory, discussion, required field trips. Prerequisite: BIO 121.

247. General Ecology

Four Credits
Interaction of aquatic and terrestrial plants and animals with their environment. Emphasis is placed on community structure, energy flow, nutrient cycling, competition, niche development, population dynamics and the concept of ecosystem services. Lecture, laboratory, discussion, required field trips. Same as ENV 247. Prerequisite: BIO 121.

259. Evolution

Three credits.
The theory of evolution unifies the biological sciences. Species diversity, organismal body plans, behavior, physiology and developmental patterns are all products of evolution. Learn how molecular and phylogenetic techniques are used to reconstruct the evolutionary relationships among organisms. By reading some of the original writings of Charles Darwin in tandem with the textbook and primary literature, you will learn about the mechanisms of evolutionary change, mutation, recombination, stochastic events and natural selection. The dynamic nature of evolutionary research will be a recurring theme. Lecture, discussion, virtual labs. Prerequisite: BIO 121

300. Departmental Studies

Variable credit course, 2-4 credits. Offered on demand.
Special subjects in biology not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Prerequisites: BIO 121 and consent of the instructor.

305. The Biology of Cancer

Three credits.
Study of the nature and causes of cancer from a biological viewpoint. Lectures and discussion will examine what happens within cells to cause them to become cancerous and why the consequences are so often disastrous, as well as how cancer can be prevented, detected and treated. A student project is included, as are opportunities for service learning. Prerequisites: BIO 121 and one course in organismal or cell biology.
310. **Laboratory Assistant**  
Staff  
One credit.  
Participation as a laboratory assistant for the Department of Biology. Selection for positions will be determined by the biology staff and will depend on prior performance in classes and/or as an assistant. Duties will vary depending on the semester and experience of the student. A limited number of credits may be counted toward graduation. Will not count toward fulfilling major requirements. Grading is Pass-Fail. **Prerequisite: consent of the department chair.**

312. **Human Anatomy and Physiology II:**  
Forbes-Lorman  
*Maintenance and Continuity*  
Four credits.  
Introduction to the structure and function of the human body with an emphasis on the respiratory, digestive, cardiovascular, immune, urinary and reproductive systems. This course examines these systems from cellular to organismal levels, emphasizing correlations between structure and function. Anatomical and physiological changes occurring in diseased states are also discussed. An integrated laboratory includes study of respiration, digestion, blood, circulation, the heart, metabolism, urine formation and gross anatomy of relevant structures. Lecture, laboratory, discussion. **Prerequisites: BIO 211 and CHM 111. Prerequisite or corequisite: CHM 112.**

314. **Microbiology**  
Kainz  
Four credits.  
Morphology and physiology of viruses, bacteria and other microorganisms. Current research on pathogenic forms involved in infectious diseases, recent advances in microbial genetics and microbes of economic significance are stressed. Aseptic technique, safety, culture methods, microbial metabolism and bacterial identification are emphasized in laboratory. Lecture, laboratory. **Prerequisites: BIO 121 and CHM 111. Prerequisite or corequisite: CHM 112.**

327. **Cell Biology**  
Sisson  
Four credits.  
Study of the structure and function of cells, particularly of the cytoplasmic structures of eukaryotic cells. Topics include enzymatic function, structure and function of membranes, motility, cell division, signaling and cancer as a cellular disease. Laboratories introduce important techniques such as phase, interference contrast microscopy, spectrophotometry, protein electrophoresis, cell fractionation, cell culture and immunocytology. Lecture, laboratory. **Prerequisites: BIO 121 and CHM 111.**

328. **Molecular Biology and Bioinformatics**  
Kainz  
Four credits.  
Study of the principles of molecular biology including the organization of genomes, DNA replication, transcription, translation and regulation of gene expression. Use of the primary scientific literature and the critical evaluation of experiments and their results are emphasized in lecture. Laboratories focus on the use of modern molecular techniques to address open questions in molecular biology. Lecture, discussion, laboratory. **Prerequisites: BIO 219 and CHM 111.**

329. **Developmental Biology**  
Sisson  
Four credits. Offered in 2018-19 and alternate years.  
Study of biological systems that change in structure or function. Lectures include descriptive accounts of embryological development of plants and animals. Concepts of determination, dif-
ferentiation, long term regulation of genes and pattern formation are discussed as well as recent studies on the effects of developmental processes on evolution. Laboratory exercises may include experimental manipulation of a variety of developing systems from the algae, fungi, vascular plants, invertebrates and vertebrates. Lecture, laboratory, discussion. 

Prerequisites: BIO 216 or 219; CHM 111 and 112.

337. Terrestrial Ecology

Staff

Four credits.

Study of the ecology of the terrestrial ecosystems of central Wisconsin. Emphasis will be placed on the natural history of plant communities of the natural areas near Ripon. Field trips to prairies, savannas, woodlands and forests will demonstrate firsthand the range of communities in this part of Wisconsin. Lecture, laboratory, required field trips. Prerequisite: BIO 247.

338. Aquatic Ecology

Wallace

Four credits.

Study of the ecology of aquatic ecosystems, both inland waters (lotic and lentic) and the world’s oceans and estuaries. Topics include the following: plate tectonics, basin origin and morphology, properties of drainage systems, physical and chemical properties, flora and fauna, lake aging, cultural eutrophication, fisheries biology, aquaculture and abuse of the environment. Lecture, laboratory, required field trips. (This course is designed as a prerequisite to BIO 450 and must be taken prior to the In Focus field trip for that course.) Prerequisites: BIO 247 and a college-level course covering inorganic chemistry.

339. Behavioral Ecology

Khan

Four credits.

Study of the reproductive and survival consequences of animal behavior. We will examine the diversity of behavioral tactics used by animals to improve their chances of survival and reproduction within the context of their ecology (where they live, what they eat, what eats them). Lecture topics include foraging behavior, predator-prey interactions, group living, mating systems, parental behavior and cooperative behavior. Laboratories consist of conducting short field and lab experiments to illustrate principles covered in the text. Lecture, discussion, laboratory, required field trips. Same as ENV 339. Prerequisites: BIO 121 or PSC 110, and BIO 200 or PSC 211.

341. Animal Behavior

Khan

Four credits.

Animals display tremendous diversity in behaviors to obtain food, communicate and reproduce. Students will develop an understanding of how an animal’s behavior is a product of physiological mechanisms, evolutionary history and environmental context. We will accomplish this goal through textbook and outside readings, discussion and laboratory exercises. Prerequisites: BIO 121 or PSC 110 and BIO 200 or PSC 211.

400. The Teaching of Biology

Staff

Two credits. Offered on demand.

Designed to acquaint the prospective teacher with special techniques, procedures and resources useful in teaching biology at the secondary level. Students interested in a biology major or minor for teaching certification should consult the chair of the department. Lecture, discussion, laboratory rotation, required field trips. Will not count toward the major or minor. Prerequisites or corequisites: BIO 121, EDU 344, and sophomore standing or higher.
410. **Advanced Seminar in Biology**  
Variable credit course, 2-3 credits.  
Journal readings and discussions on issues of current interest in the biological sciences. Seminar topics will vary. Can be repeated for credit. **Prerequisites:** BIO 121, sophomore standing, and consent of the instructor.

450. **Intensive Field Studies**  
Variable credit depending on topic.  
Offered on a rotational basis as an *In Focus* course. An extensive field trip off campus to one of several study regions. Topics will vary from year to year, but may include the following: Desert and Montane Field Ecology; Field Geology and Physical Geography of Wisconsin; Field Ornithology; Marine Field Ecology; Plant Evolution and Systematics. This course is highly selective. Selection to participate is based, in part, on performance in other courses taken at Ripon. Same as ENV 450. **Prerequisites:** variable depending on the topics, but always requiring consent of the instructors. It also is recommended that courses in invertebrate zoology (BIO 215), vertebrate zoology (BIO 216) or ecology (BIO 247) be taken prior to this course. Same as ENV 450.

501, 502. **Senior Studies**  
Two credits per semester.  
Will emphasize the importance of reading, writing and oral communication in biological research. A senior thesis will be researched and written, then presented as a talk at a spring symposium. During the fall semester, students will begin their research projects and work on completing their portfolio. Under certain circumstances, students may register for BIO 501 or 502 without the necessary prerequisites, but will not receive credit for either course until all prerequisite courses have been completed successfully. **Prerequisites:** 20 credits in biology; BIO 200, MTH 120 or PSC 211; and CHM 111 and 112.

---

**Business Management**  
See Economics, Business Management and Finance

**Chemistry**  
*Professors* Colleen M. Byron (*Chair, on leave fall 2018*), Dean A. Katahira;  
*Associate Professor* Joseph D. Scanlon;  
*Assistant Professor* Patrick H. Willoughby;  
*Stockroom Supervisor* Mary Ann Douglas

**Departmental Mission Statement:** Modern chemistry is the study of matter and its transformations. Our department presents the theories, concepts and laboratory experiences of chemistry in an intimate environment that allows for the personal professional development of students through individual and team-based approaches. The department's program is framed within the liberal arts model where we consider multiple perspectives to enhance our understanding of phenomena. Throughout the chemistry curriculum, students advance in their problem solving, critical thinking, laboratory safety, communication and ethical skills and become prepared for careers as productive scientists and for lives as responsible citizens.  
**Communicating Plus - Chemistry:** Students completing a major in chemistry develop skills in the four Communicating Plus areas — written communication, oral communication, critical thinking and problem-solving — in required and elective
course work in the discipline. Numerical, graphical, visual, oral and written modes of communication are integral to chemistry courses and to the discipline. Laboratory reports in the 100 level courses are a combination of observations, calculations, and explanations. As data analysis and problem solving skills are developed in the 200-level courses, detailed documentation and oral and written reports of laboratory work improve the student's scientific communication skills. In the 300-and 400-level and capstone courses, students are engaged in individual and team-oriented research projects and report on a required senior research thesis. These culminating experiences allow students to further develop and demonstrate their mastery of disciplinary content and of the Communicating Plus skills.

Requirements for a major in chemistry: CHM 111, 112, 211, 214, 321, 333, 334, 342, three semesters of 501 and one semester of 502, two semesters of physics (131 and 172) and two semesters of calculus (MTH 201 and 202) or a higher calculus course. CHM 111, 112, 211 and 214 constitute an introductory core and should be taken in sequence.

Majors must complete a research project which culminates in a substantial written thesis. Except in unusual circumstances, an experimental project is also required. This thesis project can be initiated after the student's exposure to the introductory core, but must be essentially complete at the end of the fall semester of their senior year. A directed summer research project, be it at Ripon, on another campus, or in an industrial laboratory, can also provide the basis for an acceptable thesis. It is expected that the project will be the equivalent of a minimum of four semester hours of credit.

The major described above, with the addition of CHM 422 and two of the following: 310, 413, 414, 415 or a 3-4 credit 500-level Departmental Studies course, satisfies the minimum standard for a professional degree in chemistry certified by the American Chemical Society. Students planning on obtaining an American Chemical Society degree need to register 400 laboratory hours in courses at the 200-level and higher. Thesis research can be included in this requirement. Students planning to pursue graduate work should select advanced courses and independent study based on their post-graduation interests and also should consider seriously the potential value of linear algebra, differential equations and advanced calculus. Students should discuss the possibilities with members of the department before registration.

Laboratory periods for CHM 100 are two hours per week. All other laboratories are three to four hours, unless otherwise noted.

Requirements for a minor in chemistry: CHM 111, 112, 211, 214, and one elective course selected from CHM 321, 333, 334, 414 or 422.

Requirements for a teaching major in chemistry: CHM 111, 112, 211, 214, 321, 333, 334, 342, 401, 501 (two credits); PHY 131 and 172; MTH 201 and 202; and ENV 120.

Requirements for a teaching minor in chemistry: CHM 111, 112, 211, 214, and 401; either CHM 321, 333, or 334; and MTH 201 and 202.

100. Global Chemistry

Four credits.

Global societal issues such as air and water quality, climate change, use of fossil fuels, fracking and pharmaceutical design are addressed through the understanding of basic chemistry intermixed with discussion of public policy. Weekly laboratory sessions stress how measurements, reactions, data collection and observations inform environmental chemistry
decision-making and include chemical syntheses, exploring the effects of chemical pollutants and the use of instrumentation to characterize chemicals found in the environment.

111. **Organic Chemistry I**  
**Willoughby**  
Five credits.  
Understanding the nature (i.e. physical properties) and tendencies (i.e. chemical properties) of carbon-based chemicals is crucial to the fields of medicine and materials science. The properties of the organic functional groups dictate how molecules such as pharmaceuticals, pheromones, metabolites and fluorophores interact with humans, animals and ecosystems as a whole. This course will first provide an introduction to the language of organic chemistry and how it applies to the aforementioned fields of study. After establishing a foundation in the language of the discipline, the fundamental chemical reactivity of several common organic functional groups will be discussed. The semester will culminate by discussing strategies for synthesizing complex organic molecules that may or may not have ever been discovered. The laboratory will focus on the preparation and purification of organic molecules. *Prerequisite: high school chemistry or consent of the instructors.*

112. **Structure and Reactivity**  
**Katahira**  
Five credits.  
An introduction to the basic principles of chemistry. The structural relationship between the atom and the macroscopic properties of matter is studied through topics such as kinetic molecular theory, gases, quantum theory, molecular orbital theory, intermolecular forces and the solid state. Chemical reactivity is introduced through the study of stoichiometry, kinetics, chemical equilibrium, thermodynamics and electrochemistry. The laboratory includes studies in stoichiometry, qualitative analysis, gas laws, electrochemistry, acid-base equilibrium, kinetics, inorganic syntheses and other topics. *Prerequisite: CHM 111 or high school chemistry and consent of the instructor.*

201. **Departmental Seminar**  
**Staff**  
One credit. Offered both semesters.  
Selected topics presented by students, faculty or visiting researchers and practicing professionals, followed by discussion. This course option is open to first- and second-year students. Grading is S-U.

211. **Analytical Chemistry: Equilibrium and Quantitative Analysis**  
**Byron**  
Five credits.  
An introduction to analytical chemistry with special emphasis on equilibrium-based methods for quantitative determinations. Acid-base, complexation, precipitation and oxidation-reduction equilibria are studied in the classroom and particular attention is paid to the roles of these reactions in biochemical systems. Spectroscopic and chromatographic methods of analysis are introduced in the laboratory. Other laboratory work stresses the development of quantitative techniques, laboratory notebook protocol, the statistical evaluation of data and the carrying out of a group designed analytical research project. *Prerequisite: CHM 112.*

214. **Organic Chemistry II**  
**Willoughby**  
Five credits.  
This course includes an advanced study of the properties of the fundamental functional groups discussed in Chemistry 111. Emphasis will be placed on important chemical reactions of these
Courses of Study

Detailed mechanistic analysis will accompany the study of all new chemical reactions. Additionally, topics in modern spectroscopy (e.g., NMR, IR, UV-Vis) and mass spectrometry (e.g., via LC/MS, GC/MS, Hi-Res MS) also will be discussed and these techniques will be frequently applied to organic structure elucidation. The laboratory will focus on microscale preparation, purification and characterization of complex organic molecules. Prerequisite: CHM 111 and 112 or consent of the instructor.

300. Departmental Studies: Current Topics in Chemical Research

Special subjects in Chemistry not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Prerequisites: CHM 111 and consent of the instructor.

310. Computational Chemistry

This course is designed as an introduction to the many applications of computational chemistry. The background theory of methods will be discussed briefly so that the proper method for each chemical topic can be chosen. The focus of the course will be to showcase how to use computational chemistry to solve chemical problems. To that end, several computational chemistry programs and graphical user interfaces will be utilized along with a basic introduction of UNIX. Prerequisite: CHM 211 or 214 or 321.

321. Descriptive Inorganic Chemistry

The descriptive chemistry of the elements studied with respect to periodic trends. Atomic structure, ionic and covalent bonding, molecular structure, the solid state, solutions, coordination complexes, organometallic chemistry, experimental methods, conductivity and superconductivity in inorganic solids are topics typically studied. In addition, the origin, discovery, isolation and chemistry of selected elements are examined. No laboratory. Prerequisite: CHM 214.

332. Glassworking

Instruction and practice in the elementary operations of glassblowing and their application to the construction of scientific apparatus and art objects. An introduction to glassworking in art and science is included. Studio emphasis may be either in scientific apparatus or art or a combination. Lectures, demonstrations, field trips and studio. Does not fulfill the First-Year Explorations Requirement in the Natural Sciences. Prerequisite: consent of the instructor.

333. Quantum Mechanics

An introduction to quantum mechanics with applications in spectroscopy. Bonding theory, atomic and molecular structure determinations, and quantum chemistry calculations are included. Laboratories are in the area of chemical quantum mechanics calculations, spectroscopy and structure determination. Prerequisites: MTH 202; and PHY 131 and 172 or consent of the instructor.
334. **Thermodynamics and Statistical Physics**  
Scanlon  
Five credits. Offered spring semester yearly.  
The study of chemical and physical thermodynamics and its applications to chemistry, biochemistry and idealized physical systems (power plants and engines). Kinetics of reactions, reaction mechanisms and reaction rate theory also are covered. Laboratories illustrate and test established principles and provide basic experience with measurements yielding quantitative results. Same as PHY 334. **Prerequisites:** MTH 202 and PHY 131 and 172, or consent of the instructor.

342. **Advanced Laboratory**  
Katahira/Willoughby  
Four credits.  
A study of the preparation, isolation and characterization of compounds. Where possible, the emphasis is on the techniques involved and the range of their applicability to either inorganic or organic systems. The quantitative aspects of separation and characterization will be emphasized. Includes discussions of the chemical literature and the effective written and oral communication of experimental results. Two laboratories and two discussions per week. **Prerequisite:** CHM 214 or consent of the instructor.

401. **The Teaching of Chemistry**  
Staff  
Two credits.  
Methods of the teaching of chemistry in secondary schools. The development of the chemistry curriculum, lectures, problem assignments, evaluation instruments, demonstrations, laboratories and laboratory safety will be covered. Required for teaching certification in chemistry. Does not count for the major.

413. **Advanced Organic Chemistry**  
Willoughby  
Three credits.  
Advanced topics in organic chemistry with special emphasis on mechanism and theory, including polymers and other commercially important organic compounds. No laboratory. **Prerequisite:** CHM 214 or consent of the instructor.

414. **Chemical Instrumentation**  
Byron  
Four credits.  
Designed to promote an understanding of instruments used for chemical and biochemical characterization with primary emphases on mass spectroscopy and on spectroscopic methods. Student research interests govern the direction of the course while flexible laboratory exercises explore instrument optimization and chemical characteristics that influence instrumental design. **Prerequisite:** CHM 211.

415. **Advanced Inorganic Chemistry**  
Katahira  
Three credits.  
Advanced topics in inorganic chemistry selected with reference to student backgrounds and interests. Topics include introduction to symmetry and group theory; the structure, stability and electronic spectra of classical transition metal complexes; descriptive applications of molecular orbital theory; conductivity and superconductivity in solids; the metal-metal bond in transition metal clusters and multiple metal bonds; key reactions of organometallic compounds; experimental methods. No laboratory. **Prerequisite:** CHM 321 or consent of the instructor.
422. **Biochemistry**  
Byron  
Four credits.  
An introduction to biochemistry with an emphasis on the structure and function of molecules found in living cells and on the energetics and dynamics of biochemical reactions. The use of online databases for biochemical information is included throughout. No laboratory. **Prerequisite:** CHM 214 or consent of the instructor.

501, 502. **Departmental Seminar**  
Staff  
One credit.  
Selected topics presented by students, faculty or visiting researchers and practicing professionals, followed by discussion. This course is required of junior and senior chemistry majors. Grading is S-U for Section 501. **Prerequisite:** CHM 211 or 214 or 321.

521, 522. **Departmental Studies**  
Staff  
Variable credit course, 1-5 credits.  
Individual preparation in special phases of chemistry not covered in regular courses, with regular discussion periods. **Prerequisite:** consent of the instructor.

---

**Chemistry-Biology**

*(Co-Coordinators)*

*Professors* Colleen M. Byron (on leave fall 2018), Robert L. Wallace

*Associate Professor* Barbara E. Sisson;

*Assistant Professor* Patrick H. Willoughby

The chemistry-biology major is an interdisciplinary program designed for students interested in the health sciences, molecular and cell biology, environmental disciplines such as ecotoxicology, and any other field in which a good preparation in both chemistry and biology is needed. All chemistry-biology majors must take a basic core of courses in science and math. Beyond this basic core, they must elect a course of study that emphasizes either a molecular-biochemical or an environmental concentration. Students who elect the chemistry-biology major may not elect a major or minor in either chemistry or biology.

**Core requirements for a major in chemistry-biology:** The basic core of required courses includes BIO 121; CHM 111, 112, and 211; PHY 131 and 172; MTH 201 or higher level calculus; and BIO 501,502 or CHM 501,502. A senior thesis is required. For students electing to take BIO 501 and 502, MTH 120 or PSC 211 and BIO 200 or PSC 211-212 are prerequisites. For students electing to take CHM 501 and 502, one writing prerequisite course is required from among the following: BIO 200; PSC 212; CHM 333, 334, 342, or 414; or another course approved by the instructor.

**Molecular-biochemical emphasis:** BIO 219 and three courses in biology selected from the following: BIO 211, 216, 226, 312, 314, 327, 328, and 329. Two of the following courses: CHM 214, 321, and 333 or 334. Students who plan to attend graduate school in biochemistry are advised to take CHM 333 and 334 as well as CHM 422.

**Environmental emphasis:** ENV 120; BIO 247 and two additional courses in biology including one of the following: BIO 314, 339 and 450. Two of the following courses: CHM 214, 321, and 333 or 334.
Classical Studies
See Foreign Languages and Cultures

Communication
Professor Jody M. Roy;
Associate Professor Steven E. Martin (Chair of the department, on leave spring 2019)

Departmental Mission Statement: The Ripon College Department of Communication empowers students to become agents of change within society. We develop students' critical thinking, problem-solving, and oral and written communication skills by challenging them to apply historical, theoretical and critical approaches to the study of public communication.

Communicating Plus - Communication: Students majoring in communication develop written communication, oral communication, problem-solving and critical-thinking skills as they progress through courses in the department. Students write formally and give both formal and informal oral presentations in virtually all classes in the communication department. Additionally, students develop skills of critical thinking and problem-solving as they learn to analyze, create and support arguments in such areas as policy-making, theory-building and critical evaluation of communication.

Requirements for a major in communication: 32 credit hours in communication, including CMM 215, 348, either 336 or 352, 415, 515; and 12 additional credit hours in communication of which at least eight must be at or above the 200-level.

Requirements for a minor in communication: 20 credit hours in communication, including CMM 215, 348, 415, and eight additional credit hours in communication of which at least four must be at or above the 200 level.

Communication majors are strongly encouraged to plan an internship in some area of communication during their junior or senior year at the College. Some recent internships have included the areas of advertising, sales, personnel management, news broadcasting, public relations and journal editing.

112. Issues in Communication Staff
Variable credit course, 2-4 credits.
Consideration of significant issues in society as they intersect with the field of communication. Students will be exposed to basic concepts of communication analysis as they investigate such topics as: Communicating Identity, Unity and Diversity; Communication and Youth Music Subcultures; and Autobiographical Communication: The Impact of Personal Stories in American Society.

215. Public Speaking Staff
Four credits.
Students in Public Speaking develop skills as public advocates by researching current issues of significance, constructing and evaluating arguments, and adapting style and delivery techniques to the needs of various types of audiences. Students receive feedback from peers, the instructor, and, when appropriate, from community audience
members representing local organizations, businesses, government agencies and other groups with vested interest in the students' topic areas. In addition to preparing for and engaging in public speeches, students will prepare formal, written self-assessments and audience-response assessments. *Prerequisite: CTL 120, CMM 115 (until 2020-2021) or consent of Instructor.*

### 220. Communication and Sports in American Society

Roy

Four credits.
Consideration of the relationship between language functions, media and sports in American culture. Topics include: myth, narrative structures and characterization of sports coverage in the media; stereotyping of male and female athletes; the creation of cultural icons and roles models; and fanaticism and the notions of propaganda.

### 236. Communication and the Environment

Martin

Four credits.
The role of communication as it relates to the environment, focusing on communication strategies by institutions, corporations, environmental movement leaders, scientific experts, politicians and the public to describe and influence human interactions with the environment. Same as ENV 236.

### 248. Communication, Media, and Technology

Martin

Four credits.
This course investigates how mediated forms of communication impact human persuasion. Theories of traditional mass media (i.e., radio, television, print) as well as new, emerging and "social media" will be explored.

### 255. Crime, Incarceration and Communication

Roy

Four credits.
This course explores the ways in which people communicate about crime and incarceration and how that communication affects attitudes and behaviors. Special attention will be paid to: communication tactics as criminal behavior; recruiting by and organizational communication within gangs; communication practices of law enforcement and corrections personnel and systems; and impacts of media coverage of crime and incarceration.

### 315. Speech Practicum

Staff

One credit.
Students enrolled in CMM 315 work with the instructor to devise an individualized learning plan for the semester, including specific learning goals and a scheduled series of actual public speaking engagements through which those goals will be realized and assessed. Speaking forums and formats will vary for each student; some students may serve as informational or special event speakers for local community organizations, others may advocate on behalf of nonprofit groups, and more advanced students may work as speech consultants/trainers for representatives of community or educational groups. Note: In addition to work with local groups, students enrolled in CMM 315 may partner with The Huntington's Disease Society of America or The National Association of Students against Violence Everywhere, both national nonprofit corporations. *Prerequisite: CMM 215.*

### 336. Social Movement Communication

Roy

Four credits.
The role of rhetoric in the development, maintenance and decline of social movements and the impact of social movements on American ideology. Taught through examination of extended
case studies of movements and counter-movements.

348. Theories of Public Communication  Roy
Four credits
Students explore the historical development of theories of public communication, from classical rhetorical theory to contemporary theories of media in order to develop a better understanding of the dynamic interactions among changes in society, advancements in theory and the practices of public communication. Students apply theoretical concepts to both historical and contemporary examples of public communication to build their knowledge of influential public discourse of the past and to develop the skills necessary to analyze and evaluate the impacts of public communication on contemporary society.

352. Political Communication  Martin
Four credits.
The role of communication in contemporary politics. Emphasis on social movements, political advertising, political campaigns, political journalism and presidential and congressional rhetoric.

401. Teaching of Speech  Staff
Two credits. Offered on demand.
A theory and practice course for the classroom teacher. Philosophy of speech communication education is stressed with content and teaching skills, methods and techniques. Students planning to pursue graduate work in communication are strongly encouraged to enroll. Prerequisite: consent of the instructor; to be taken concurrently with CMM 402.

402. Directing Debate and Forensic Activities  Staff
Two credits. Offered on demand.
A theory and practice course involving organization and administration of competitive speech and debate programs at both the high school and college levels. Focus on philosophies and methods of coaching, tournament management, travel management, budgeting, recruiting and program development. Prerequisite: consent of the instructor; to be taken concurrently with CMM 401.

415. Applied Communication Practicum  Roy
Four credits.
Working in project teams, students analyze communication problems facing nonprofit organizations and/or local communities; student teams develop and formally propose solution strategies informed by theory and the best practices in the field. Students apply theory to the analysis of problems to evaluate competing solutions on grounds of feasibility and consideration of both the ethical implications and potential effects for all stakeholders. Students devise implementation plans and, where applicable, train community members to carry out that implementation. Prerequisites: CMM 348 and junior or senior standing.

420. Applied Communication: Leadership Practicum  Roy
Two credits.
This course will be taught concurrently with CMM 415: Applied Communication Practicum. Students enrolled in CMM 420 will have already completed a full version of CMM 415, and will thus engage in advanced skills-development and applied project leadership alongside the work of the students in CMM 415. Under faculty supervision, students enrolled in CMM 515 will mentor applied communication project teams in CMM 415, provide theory-driven
Courses of Study

feedback on the teams’ processes and concepts, lead simulated communication experiences, such as formal presentations and mock interviews and serve as consultants to the CMM 415 students as they develop written and oral presentations. Prerequisites: CMM 348, CMM 415 and senior standing as a communication major or minor.

505. Rhetorical Criticism-Senior Thesis

Four credits.
Theories and methods of rhetorical criticism. Detailed critical analysis of historical and contemporary rhetoric. Students will apply theory through written and oral projects culminating in the Senior Thesis and formal oral presentation of the thesis to the department. Prerequisites: senior-standing in the communication major or consent of the instructor.

505. Rhetorical Criticism-Senior Thesis

Martin

The study of criminal justice provides an interdisciplinary perspective on deviance, crime and the criminal justice system. It enables students to understand how deviance and crime are defined and interpreted, to understand the parts of the criminal justice system and their respective roles, to develop a theoretical understanding of deviance and crime and to investigate ethical issues related to the criminal justice system.

Requirements for a minor in Criminal Justice: 20 credits, including SOC 110, 205 and 306. Eight additional credits to be selected from CMM 255, EXS 232, HIS 220, PSC 221, PSC 242, and POL 212. Internship is strongly recommended.

Economics, Business Management and Finance

Professors Paul J. Schoofs, Soren Hauge (Chair);
Assistant Professors Tom Hamami, Fan Zhang;
Instructor Thomas M. Keuler

Departmental Mission Statement: The Ripon College Department of Economics and Business Management prepares students to inform and lead organizations in making and carrying out effective decisions. We collaborate on defining goals and solving problems of resource use in business, non-profit organizations and government agencies. We integrate approaches from the field of economics and across the liberal arts spectrum in the study of fundamentals, diverse applications, research, internships and other organizational experiences. These open doors to advanced study, lifelong learning and productive and rewarding careers.

Communicating Plus – Economics and Business Management: Students completing a major in economics, business management or finance develop skills in the four Communicating Plus areas — written communication, oral communication, critical thinking and problem solving — in both required and elective courses. Early courses in each major’s curriculum address the central problem of economics—the scarcity of resources relative to unlimited material wants. Students then practice problem solving by working through both quantitative and qualitative problems and
reflecting upon difficult choices. Critical thinking is essential as students consider competing explanations and solutions to problems in business and financial management and public policies. Students can expect to encounter an array of writing assignments such as essay exams, formal research papers, business plans and financial analyses. Students engage in small group discussions, dialogues with guest speakers, as well as formal group and individual presentations. In the interdisciplinary business management major, students are given the chance to hone in their communication technique, analytic tools and modes of thinking. In the senior capstone courses, students integrate the skills they have developed throughout their coursework in the completion of individual projects that require research, data analysis, critical thinking and oral and written presentations of information and ideas.

Economics

Requirements for a major in economics: MTH 120; ECO 211, 212, 241 (or courses in calculus and probability approved by the major advisor), 350, 311 or 352, and 380; six more credits of elective economics courses numbered above 400 and seven more credits of economics courses numbered 300 or above. Students may include either ECO 361 or 461, but not both. If a student is majoring in economics and business management, any credits counted for the economics major will not be counted for the business management major. Likewise, credits to be counted towards the business management major can not be counted again for the economics major.

Students who plan to pursue graduate study for masters or doctoral degrees in economics, business, public policy, health administration or other similar professional fields are advised to take additional courses in statistics, calculus and linear algebra.

Requirements for a teaching major in economics: BSA 231; ECO 211, 212, 241, 311, 350, 352, 380, and 452; one of the following: ECO 313, 332, 361, 412, 446, 461; 472, or 500; and HIS 401.

Requirements for an economics minor: at least 19 credits including ECO 211 and 212; 350 or 352; and seven additional credits of elective economic courses numbered 300 or above.

Requirements for a teaching minor in economics: ECO 211 and 212; and 14 additional credit hours chosen from 311, 313, 332, 350, 352, 361, 380, 412, 446, 452, 461; 472, or 500; and HIS 401.

Broad Field Social Studies Teacher Licensure Options: Students seeking licensure at the Early Adolescence/Adolescence (Grades 6-12) levels in the social science disciplines (economics, history, politics and government, psychology and sociology) may choose one of the options listed below to add endorsements in fields outside their major. Students may complete a minor in a discipline outside the social sciences or the broad field licensure program outlined below. Broad field licensure prepares teachers to teach in general social studies classes in grades 6-9. They will also be licensed to teach the specific discipline of their two concentrations at the high school level. Given the very difficult job market for social studies teachers, students should consider one of these options to strengthen their employment options.

Option 1 – Major/Minor Program - The first option open to students majoring in
a social studies discipline is to complete a minor in another social studies discipline or a subject outside the social sciences. Recent examples of programs designed on this model are a history major with an English minor and a politics and government major with an English minor. In this case, the student would student teach and be fully licensed to teach both subjects.

Option 2 – Social Studies Major with Broad Field Social Studies Licensure - As part of their program of study, students must complete the following:

1. A major in a social science discipline,
2. Concentrations, as defined in the chart below, in two other social science disciplines, only one of which may be in history,

3. At least one course in each of the following disciplines: economics, history, politics and government, psychology and sociology.

4. One of the courses which address geography as a factor that influences human interactions and society from the following list: HIS 281, HIS 282, ECO 332 or 361, or POL 112. This course may also count toward fulfillment of criteria 1-3.

Students are encouraged to extend the breadth of their social science background by also taking courses in anthropology, global studies, Latin American and Caribbean studies and religion.

For interdisciplinary courses cross-listed in economics, the total number of credits counting toward an economics major or minor may be less than the total number of credits for the course, as announced in the course description.

110. Topics in Economics

Variable credit course, 1-4 credits.

Special subjects in economics not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

211, 212. Principles of Economics

Four credits each semester.

Fundamental economic principles and their application to public policy, business management and personal decisions. Macroeconomics (ECO 211) addresses the economy as a
whole: the growth and fluctuations of total production, employment and prices. Microeconomics (ECO 212) addresses the decisions of individual households and businesses, and their interactions through markets. The course sequence is normally taken in the sophomore year, though first-year students with strong academic backgrounds, especially in mathematics, may also enroll by permission of the department, preferably beginning in the spring semester. ECO 211 is normally taken first, followed by ECO 212, since the overall introduction to economics that begins each course is extensive in ECO 211 and only briefly reviewed in ECO 212.

241. Quantitative Methods for Business and Economics

Hamami

Four credits.
The course provides the necessary training in mathematics for the study of economics and business beyond the introductory level. The approach of this course is heavily technique-oriented and is explicitly designed for application to problems in business and social science. Course content begins with fundamental mathematical concepts (sets, functions, graphing on a two-dimensional plane) and progresses to more advanced techniques that involve basic differential calculus and unconstrained optimization. Content also includes exposure to elementary probability theory and a conceptual introduction to the ideas of regression and causal inference. Same as BSA 241.

300. Departmental Studies

Staff

Variable credit course, 2-4 credits.
Special subjects in economics not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. Prerequisite: consent of the instructor.

311. Money and Banking

Zhang

Four credits.
Financial markets and instruments. The role of money and depository financial institutions in economic activity. The Federal Reserve System, instruments and objectives of monetary policy and the implementation and evaluation of these policies. This course also covers monetary theory. Prerequisites: ECO 211 and 212, or consent of the instructor.

313. Corporation Finance

Zhang

Four credits.
Analysis of business financial policies and problems consistent with the objective of maximizing shareholders’ wealth in an individual corporation. This is the basic financial management course introducing students to such essential financial concepts as the analysis of financial statements, the time value of money, stock and bond valuation, risk and return, capital budgeting and the cost of capital. Same as BSA 313. Prerequisites: ECO 211 and 212 and ECO/BSA 241. Prerequisite or corequisite: BSA 231.

321. Economics of Professional Sports

Schoofs

Four credits.
An examination of key economic issues in the major professional team sports (baseball, football, basketball and hockey). These include labor-management relations and the frequency of strikes and lockouts, salary cap agreements and other restrictions on player earnings, revenue and cost analysis of a typical team, how leagues function as monopolies, new stadium/arena construction and governmental financing, expansions of leagues to new cities vs.
creation of new leagues and competition vs. cooperation between teams. \textit{Prerequisite: ECO 212 or consent of the instructor.}

332. Resource and Environmental Economics  
\textbf{Hauge}  
Four credits. Offered in 2019-20 and alternate years.  
The theoretical framework for the analysis of environmental pollution and renewable and nonrenewable resource management. Topics include public goods and common-property resources; private cost, social cost, externalities and market failure; designing and implementing environmental policies; benefit-cost analysis; and the global environment. Same as ENV 332. \textit{Prerequisite: ECO 212 or consent of the instructor.}

350. Price Theory  
\textbf{Staff}  
Four credits.  
Theories of the behavior of individual economic units: consumers, businesses and resource owners. The processes of valuation, production and distribution characteristic of a market system are considered as well as implications for welfare and public policy. Concepts of game theory and behavioral economics are introduced and used in the analysis in addition to traditional economic theory. \textit{Prerequisites: ECO 212 and ECO/BSA 241 or consent of the instructor.}

352. Intermediate Macroeconomic Theory  
\textbf{Hauge}  
Four credits.  
Analysis of growth and fluctuation of total production and employment, as well as prices and interest rates, primarily with neoclassical and Keynesian theories. Effects of government monetary, fiscal and other policies on growth and stabilization. Draws on current events and debates and macroeconomic history, from the U.S. and abroad. \textit{Prerequisites: ECO 211 and ECO/BSA 241 or consent of the instructor.}

354. Managerial Economics  
\textbf{Schoofs}  
Four credits.  
Principles and cases of management decision making and policy formulation within the business firm, including applications in the areas of marketing and finance. Aspects of price theory are applied to questions regarding risk and profitability, forecasting demand and costs, pricing strategies, capital budgeting and investment decisions, advertising and other non-price competition, employment practices and inventory management. \textit{Prerequisite: ECO 350.}

361. Development Economics I  
\textbf{Hauge}  
Four credits. Offered in 2018-19 and alternate years.  
Major analytical and policy issues facing the “less developed” nations — 3/4 of the world’s people. Global issues: defining development; its global patterns and historical process; theories of growth and underdevelopment; role of the state in industry, finance and trade; population and migration. Applications to selected topics, such as: poverty and inequality; agriculture and the environment; women and health; education and employment; multinational corporations and international institutions including the World Bank, IMF and WTO. Students select countries for research. An interdisciplinary survey of the primary issues studied by development economists and faced by practitioners. Same as ENV 361. Meets with ECO 461. \textit{Prerequisite: ECO 211 or consent of the instructor.}
380. History of Economic Thought
Schoofs
Four credits.
The development of economic inquiry up to the present, from the mercantilists through Smith, Ricardo, Mill, Marx, Marshall, Keynes, the Chicago School and others. Prerequisites: ECO 211 and 212.

412. Investment Analysis
Zhang
Four credits.
Analysis of investment and portfolio management. Topics include asset pricing theory; investment techniques; and analysis and management of common stocks, bonds and financial derivatives. The course also focuses on the application of financial theory and investment techniques to contemporary financial practice. Same as BSA 412. Prerequisites: MTH 120 and ECO/BSA 313.

446. Game Theory for Business and Economics
Hamami
Four credits.
Strategic interaction is a part of everyday life, and so are the situations that can be explained using game theory. Game theory deals with decision problems in a competitive environment where conflict, risk and uncertainty are often involved and are powerful tools for understanding individual actions and social institutions in economics, business and politics. The course focuses not only on the underlying theory, but on providing applications to the social, economic and political problems which abound. Topics include Nash equilibrium, subgame perfection, auctions and incomplete information. In-class games are used to illustrate the concepts. Prior knowledge and understanding of basic probability theory is essential to success. Same as BSA 446. Prerequisites: ECO 212 and ECO/BSA 241.

452. International Economics
Hauge
Four credits.
International trade in goods and services, and its effects on national welfare and economic structure. International flows of financial assets and their effects on total production, prices and interest rates. International and U.S. laws and systems shaping both. Fundamental theories applied to policies regarding international trade, finance, economic integration and related labor and environmental issues. Prerequisite: ECO 350 or consent of the instructor.

461. Development Economics II
Hauge
Four credits. Offered in 2018-19 and alternate years.
Theoretical foundations of development policy. Meets with ECO 361 and for additional sessions. (See ECO 361.) Same as ENV 461. Prerequisite or corequisite: ECO 350.

472. Industrial Organization Economics
Hamami
Four credits.
The course focuses mainly upon the theory of the firm and the industry, with significant emphasis upon oligopoly theory as well as empirical applications of the theory. The course focuses upon market structure, firm conduct and economic performance of industries. Of special interest is firms’ strategic behavior in price and non-price competition. Game theory is used to analyze oligopoly pricing and production, strategic entry deterrence, location strategies, product differentiation, advertising and research and development. Same as BSA 472. Prerequisite: ECO 350.
500. Senior Seminar

Variable credit course, 2-4 credits.
A capstone course intended to allow students to apply the knowledge developed in other classes and acquire more advanced economic research tools and techniques to analyze real-life and simulated situations. A semester-long group project integrates knowledge from previous courses across different aspects of a simulated business environment. In an individual written project, students develop advanced methods and apply them to a topic approved by the instructor. The group project is presented orally in stages with group discussion; the individual project culminates in a written report and a brief oral presentation. Credits depend on the extent to which economic or business research methods are used in the individual project: if only economic methods, 4 credits; if only business methods, 2 credits; if a mixture of methods, 3 credits. For a finance major, the individual project must address a topic in finance and contributions and the group project must include financial analyses. Students concurrently enrolled in BSA 500, with which this class meets, complete extra individual projects in economics. Prerequisite: senior standing or consent of the instructor.

Business Management

Requirements for a major in business management: BSA 110, 231 and 500; ECO/BSA 241 (or courses in calculus and probability approved by the major advisor; students interested in graduate school are advised to take calculus); ECO/BSA 313; ECO 211, 212 and 350; PHL 202, 241 or 245 or BSA 223 or 227; and an individual focus comprised of at least four elective courses totaling at least 12 credits which meet the criteria below.

- No more than one course may be at the 100-level, and no more than two courses may be at the 200-level or below.
- No more than four credits may be from courses listed in business management, and no more than four credits may be from economics.
- At least three courses must be taken after declaration of the major and approval by the program director or other business management advisor of a proposal written by the student. The proposal explains how the courses selected serve the student's business study goals and form a cohesive whole.
- An appropriate semester of off-campus study may be counted as one course (four credits), and foreign language study is also advised.
- Internships in areas of interest may be included, as approved by the supervising faculty members, and they are strongly encouraged.

Subject to these conditions, students may propose individual focus courses from any discipline. Students who want to focus on a specific area of business (marketing, entrepreneurship, human resources, arts management, etc.) may choose courses appropriate for their interests. Students with other majors may also build their interests in those areas into their business management major, with two exceptions. Students may not major in both business management and finance and students majoring in business management and economics must choose elective courses for the economics major that are not required or chosen as elective courses in the business management major.

Suggested course sequence for a major in business management:
The years in which courses are listed reflect when they are most suitable for most students; they may be taken in other years. Many other elective courses could be chosen for the individual focus in each year.
First Year: BSA 110 (required); PSC 110; SOC 110 or 116 (electives); MTH 120.
Second Year: BSA 231; ECO 211 and 212; ECO/BSA 241; PHL 202, 241 or 245 (required); BSA 208, 223, 225 or 227; CMM 215 or 248; SOC 204 (electives); MTH 220.

Third Year: ECO/BSA 313; ECO 350 (required); BSA 309, 310, 315 or 322; ECO 354 or 311; CMM 352; PSC 313 (electives)

Fourth Year: BSA 500 (required); BSA 413; ECO/BSA 412, 446 or 472 (electives).

Requirements for a minor in business management: 20 credits. ECO 211 and 212 and three additional business management courses of the student’s choice. At least two of the courses must be numbered 300 or above. The following courses may be substituted for one of the 100 or 200-level business management courses: PHL 202 or MTH 220.

Requirements for a minor in entrepreneurship: 20 credits. ECO 211 and 212, BSA 413, and eight credits selected from any of the following: PHL 202; PSC 110; CMM 215; BSA 110, 208, 227, 309 or 315.

Requirements for a minor in nonprofit management: 20 credits. ECO 211 and 212, BSA 310, and eight credits selected from the following: PHL 202; PSC 110; SOC 110 or 201; CMM 215; BSA 110, 208, 223, 309 or 315. Up to four credits of internship earned during the ACM Urban Studies Program also could be used for this minor.

110. Introduction to Management
Four credits. Offered in 2019-20 and subsequent years.
Introduction to the process of problem solving, innovation and collaboration required to create, grow and operate business and non-profit organizations in their social and economic environment. Practice in real-life and simulated situations, analysis of existing organizations, and an overview of fields of business functions and work.

208. Introduction to Marketing
Four credits.
An introduction to the study of marketing in business and other organizations. Topics include: the marketing environment, marketing ethics and marketing strategies and decision-making.

223. Business and Society
Four credits.
A review of business and its relationship to society as a whole. Corporate social responsibility including corporate philanthropy, employee relations, environmental responsibility and business ethics will be the primary focus of the course. The role of government in its relationship to large corporations will also be reviewed. Case studies will be used, and students will develop projects that will help to build ethical leadership skills.

225. Human Resource Management
Four credits.
Examines research and practices applied to employee selection, performance and evaluation. Related topics included are: applied research designs and methods, institutional research, job analysis, stress management, employee assistance programs, compensation, motivation, morale and job satisfaction.
227. Business Law

Four credits.

Explores the relationship between business, government and labor. This course will examine the foundation of business law contracts and the fundamental concept of the legal prerequisites of the business world including sales, agency, employment relations, government regulations and other related topics. Further, this course will evaluate the nature and limits of the legal system in the world of business with special emphasis on ethics and the related moral principles of prudence, fortitude, temperance, charity and justice.

231. Financial Accounting

Keuler

with Spreadsheet Applications

Four credits.

This course introduces students to the accounting principles and requirements for measurement, recording and reporting of business transactions encompassed in the accounting cycles for enterprises in service and merchandising industries. The course applies business concepts to developing financial information for analytical decision-making for sole proprietorships and corporations through presentation in Excel worksheet applications as well as focusing on the interrelationships of component items on business financial statements. 

Prerequisite: BSA 110 or consent of the instructor.

241. Quantitative Methods

Hamami

for Business and Economics

Four credits.

The course provides the necessary training in mathematics for the study of economics and business beyond the introductory level. The approach of this course is heavily technique-oriented and is explicitly designed for application to problems in business and social science. Course content begins with fundamental mathematical concepts (sets, functions, graphing on a two-dimensional plane) and progresses to more advanced techniques that involve basic differential calculus and unconstrained optimization. Content also includes exposure to elementary probability theory and a conceptual introduction to the ideas of regression and causal inference. Same as ECO 241.

300. Departmental Studies

Staff

Variable credit course, 1-4 credits.

Special subjects in business management not covered by regular courses. This course may be repeated for credit when topics change. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. 

Prerequisite: consent of the instructor.

309. Social Entrepreneurship and Innovation

Blumer

Four credits.

Social entrepreneurship may be defined as creating successful organizations for stockholders, and non stockholders. Resources available to address all manner of global problems, including social, environmental and others are limited. Organizations that are effective at building capacity through efficiency and collaboration will be the successful, world changing organizations of the future. Through service and the creation of social initiatives, students will learn how to use business tools to achieve benefits for society. 

Prerequisite: junior standing or consent of the instructor.
310. Nonprofit Organization Management
Blumer
Four credits
A study of the world of philanthropy including history and current practices, an introduction to the world of nonprofit organizations (their purposes, opportunities and challenges) and the application of business and entrepreneurial models to community problems and the needs of nonprofit organizations. Prerequisite: junior standing or consent of the instructor.

313. Corporation Finance
Zhang
Four credits.
Analysis of business financial policies and problems consistent with the objective of maximizing shareholders’ wealth in an individual corporation. This is the basic financial management course introducing students to such essential financial concepts as the analysis of financial statements; the time value of money; stock and bond valuation; risk and return; capital budgeting; and the cost of capital. Same as ECO 313. Prerequisites: ECO 211, 212 and 241. Prerequisite or corequisite: BSA 231.

315. Strategic Management
Hamami
Four credits.
An introduction to the study of management in business and other organizations. This course will cover the essential concepts in management which provides a sound foundation for understanding key issues in today’s global economy. An emphasis will be placed on studying management from the perspective of the top management of leading United States and global organizations. Prerequisite: junior standing or consent of the instructor.

322. Managerial Accounting with Spreadsheet Applications
Keuler
Four credits.
This course further develops the accounting concepts utilized by decision-makers in planning, implementing and monitoring operations in various management and business environments. The course broadens the student’s understanding of the statement of cash flows and financial statement analysis. Students are introduced to job costing and process costing of manufacturing enterprises. The course includes the use of Excel spreadsheets to explore the concepts of differential analysis, capital investment analysis and activity-based costing. Prerequisite: BSA 231. Prerequisite or corequisite: ECO 212.

412. Investment Analysis
Zhang
Four credits.
Analysis of investment and portfolio management. Topics include asset pricing theory, investment techniques and analysis and management of common stocks, bonds and financial derivatives. The course also focuses on the application of financial theory and investment techniques to contemporary financial practice. Same as ECO 412. Prerequisites: MTH 120 and ECO/BSA 313.

413. Entrepreneurship and Small Business Management
Sensenbrenner
Four credits.
Introduction to the opportunities, risks, and rewards found in the ownership of a small business. Concentrates on the effective management of small firms to include: planning and organizing the new company, financial and administrative controls, franchising, and purchasing an existing business. Reviews the role of small business in American society.
Courses of Study

Prerequisites: BSA 110 and senior standing, or consent of the instructor.

446. Game Theory for Business and Economics

Hamami

Four credits.

Strategic interaction is a part of everyday life, and so are the situations that can be explained using game theory. Game theory deals with decision problems in a competitive environment where conflict, risk and uncertainty are often involved and is a powerful tool for understanding individual actions and social institutions in economics, business and politics. The course focuses not only on the underlying theory, but also providing applications to the social, economic and political problems which abound. Topics include Nash equilibrium, subgame perfection, auctions and incomplete information. In-class games are used to illustrate the concepts. Prior knowledge and understanding of basic probability theory is essential to success. Same as ECO 446. Prerequisites: ECO 212 and ECO/BSA 241.

472. Industrial Organization Economics

Hamami

Four credits.

The course focuses mainly upon the theory of the firm and the industry, with significant emphasis upon oligopoly theory as well as empirical applications of the theory. The course focuses upon market structure, firm conduct and economic performance of industries. Of special interest is firms’ strategic behavior in price and non-price competition. Game theory is used to analyze oligopoly pricing and production, strategic entry deterrence, location strategies, product differentiation, advertising, and research and development. Same as ECO 472. Prerequisite: ECO 350.

500. Senior Seminar

Zhang

Four credits.

A capstone course intended to allow students to apply the knowledge developed in other classes and acquire more advanced economic and business research tools and techniques to analyze real-life and simulated situations. A semester-long group project integrates knowledge from previous courses across different aspects of a simulated business environment. In an individual written project, students develop advanced methods and apply them to a topic approved by the instructor. The group project is presented orally in stages with group discussion; the individual project culminates in a written report and a brief oral presentation. Credits depend on the extent to which economic or business research methods are used in the individual project: if only business methods, 4 credits; if only economic methods, 2 credits; if a mixture of methods, 3 credits. Students concurrently enrolled in ECO 500, with which this class may meet, complete extra individual projects in economics. Prerequisites: senior standing and completion of or concurrent enrollment in all other courses required for the major.

Finance

Requirements for a major in finance: ECO 211, 212 and 500; BSA 231 and 322; ECO/BSA 241 (or courses in calculus and probability approved by the major advisor; students interested in graduate school should take calculus), and 313; PHL 202, 241 or 245 or BSA 223 or 227; one elective with substantial finance content, as approved by the major advisor; and one elective focused on management and strategy, as approved by the major advisor. Students may not major in both finance and business management, and students majoring in both finance and economics may apply only one economics major elective toward the requirements for the finance major.
Educational Studies

Associate Professors. Matthew D. Knoester, T. Hervé Somé (Chair); Assistant Professor Nicholas J. Eastman; Director of Teacher Education Jean M. Rigden; Cooperating Teachers in Area School Districts

Departmental Mission Statement: The Department of Educational Studies promotes the disciplined study of education as a social institution that serves both collective and individual aspirations and needs. The department also is dedicated to the preparation of knowledgeable, effective and reflective teachers for Pre K-12 classrooms in public and private schools in the United States and around the globe.

Overview of Departmental Programs: Courses in the Department of Educational Studies are offered for students pursuing teaching licensure and students who have an academic interest in education. The department offers students several options: course work to earn teacher licensure, an educational studies major or minor or a combination of licensure and a major or minor. Students also may take some courses in educational studies as electives. Student teaching and clinical blocks are restricted to students who are completing licensure programs.

Communicating Plus - Educational Studies: The Communicating Plus Program at Ripon College emphasizes students’ development of skills in four areas: written communication, oral communication, critical thinking and problem-solving. The major and minor in educational studies treats education as a social, political and intellectual process. To varying degrees, all of the courses in educational studies address the development of skills and abilities in written and oral communication, critical thinking and problem-solving. However, the core set of courses taken by all students completing a major or minor in educational studies includes special emphases on instruction and assessment in these areas, and students document mastery of these skills in their professional development portfolios. Departmental faculty regularly review this cluster of courses to ensure that the Communicating Plus student learning goals are addressed substantially in them.

Educational Studies Major or Minor: The Department of Educational Studies and the Ripon College faculty have reasoned that education is a field of study independent of other disciplines. However, because of the liberal arts emphasis of the College and the philosophy of the department, the social phenomenon of education is best understood in its relationship to another discipline. Therefore, each departmental program requires students to complete a major in a discipline outside education. Since some students’ interest in education may lie outside the scope of PK-12 classroom teaching (e.g., preparation for careers in preschool education, museum education or community education), student teaching is not a requirement for the educational studies major or minor.

Early Childhood Education Minor: This minor is designed for students who want to work in child care centers, preschool programs and early childhood education programs. The minor alone does not qualify individuals for licensure through the Wisconsin Department of Public Instruction (WI-DPI) or for teaching in most early childhood programs offered through public school districts.

Teacher Licensure: Ripon College offers programs leading to licensure at these levels: early childhood through middle childhood (EC/MC ages birth-11 years); middle childhood through early adolescence (MC/EA ages 6-12/13); and early
Courses of Study

adolescence through late adolescence (EA/A ages 11-21). Programs leading to PK-12 licensure in Spanish, art, music, physical education, physical education and health, and theatre also are available. Licensure in English as a Second Language can be added to any teacher licensure program.

Students seeking licensure will complete: 1) the College's Catalyst Curriculum and specific general education requirements for teacher licensure; 2) a subject area major; 3) an optional subject area minor and/or broad field program (social studies only); and 4) a sequence of educational studies courses and clinical experiences, including a full semester of student teaching. Licensure programs at Ripon meet standards set by the Wisconsin Department of Public Instruction. Students who complete the requirements of a licensure program are eligible for a provisional Wisconsin teaching license. Most other states accept the Wisconsin teaching license, and faculty advisors are prepared to help students identify and plan to meet requirements for states outside Wisconsin.

Professional Development Portfolio: All teacher candidates at Ripon College are required to develop and present for review a digital professional development portfolio to qualify for student teaching. Portfolios include samples of classroom and clinical work chosen to demonstrate professional competence with respect to The 10 Wisconsin Teaching Standards (INTASC 2013). Course work in the department requires that students also develop abilities to plan instruction that addresses The Wisconsin K-12 Model Academic Standards or national subject area academic standards and the Common Core Standards for the subject area/s and level/s of licensure being sought.

Teacher Performance Assessment: Students obtaining teacher licensure after Aug. 31, 2016, must complete and receive a passing score in an appropriate content area of the Teacher Performance Assessment (edTPA). This performance-based assessment of teaching skills will be completed during the student-teaching semester. A modified version of the edTPA will be completed during the clinical block experience (EDU 320) to prepare students for the assessment during student teaching.

Foundations of Reading Test: Students seeking licensure to teach as generalists in elementary school classrooms (EC/MC or MC/EA) must earn a passing score on the Foundations of Reading Test (FORT). Information concerning this exam is available from educational studies advisors.

World Language Proficiency Tests: Students seeking licensure to teach Spanish or French must earn ratings of intermediate-high on the appropriate ACTFL Oral Proficiency interview (OPI) and Written Proficiency Test (WPT). Information concerning these exams is available from educational studies advisors and through Language Testing International (languagetesting.com).

Advising: Students interested in teacher licensure must have two academic advisors: one in the department of the academic major/minor and one in the educational studies department. New students will be contacted about their interest in education prior to the fall semester advising period and assigned an educational studies advisor. Notices of advising assignments are sent out prior to the advising period each semester.

Requirements for Admission to the Teacher Education Program: Prior to EDU 320, students must complete the following requirements to be officially accepted into the teacher education program: 1) complete an Application for Entry to the Teacher Education Program; 2) have a cumulative GPA of 2.5 or better for all course work
completed thus far in your academic programs and grades presented for courses in the subject area major and minor and teacher education must be C- or above; earned grade of C- or better in three of the following courses: EDU 190, 250, 260, or 270; and 3) provide proof of successful completion of at least 30 hours of clinical work.

**Requirements for Approval for Student Teaching:** Approval for student teaching is based on the following factors: 1) previous admission to the teacher education program; 2) a cumulative grade point average 2.75 or better; 3) demonstrate competency in content knowledge in areas of licensure with a GPA of 3.0 or higher in major/minor content area for licensure or provide passing score(s) on the appropriate Praxis II or ACTFL Content Knowledge (exams); 4) documentation of successful participation in 100 hours of clinical experiences; and 5) endorsement of the candidate's application for student teaching by the department chair and advisor in the teaching major/minor and educational studies. The complete, signed application for student teaching must be filed with the educational studies department by the Friday before midterm break of the semester prior to student teaching. Students also may be required to complete separate applications for student teaching by the schools and districts in which they are being placed. Students must also complete the separate application for off-campus student teaching programs.

**Background Checks:** Prior to their placement for the pre-student teaching clinical block course (EDU 320) and student teaching, students must give permission for the department to conduct a criminal background check using state and federal law enforcement databases. Some schools and preschool programs may request permission to do their own background checks and also may require students to have a TB test prior to beginning a clinical or student-teaching experience.

**Requirements for Approval for a Teaching License:** Upon successful completion of student teaching, students may submit an application for licensure. Approval of these applications requires a full review of the student's file, successful completion of the edTPA, final review of the professional development portfolio, and receipt of all forms documenting the successful completion of all student-teaching placements. Students seeking EC/MC or MC/EA licensure also must present documentation of a passing score on the Foundations of Reading Test.

**Teacher Education Handbooks:** The standards and procedures for all program requirements are detailed in the *Teacher Education Handbook* and the *Student Teaching Handbook*. These are available on the Department of Educational Studies page of the Ripon College website.

**Post-Baccalaureate Teacher Education Program:** Individuals who hold a bachelor's degree from Ripon College or another institution may complete teacher licensure at Ripon. Candidates for this program must submit a transcript for review by the chair of the Department of Educational Studies and by the chair of the teaching major department. Based on analysis of this transcript, a program of study leading to licensure will be developed. A GPA of 3.0 or above, two letters of recommendation, and passing scores on the ACT or Praxis Core Test are requirements for entry into this program. All requirements specified above for approval for program entry, student teaching and licensure also apply to post-baccalaureate teacher candidates.

**Student teaching and clinical experiences:** Each student enrolled in a licensure program at Ripon College will complete a minimum of 100 clock hours of approved
clinical experiences prior to student teaching. These hours will be completed in
conjunction with courses in the licensure curriculum.

Student teaching may be completed during the senior year or during a ninth
semester. Student teaching is a full-day, full-semester experience following the
semester calendar and daily schedule of the cooperating school. Students enrolled in
student teaching may not enroll in other courses during that semester. All students
must apply and be approved for student teaching before they can formally register
for this course. (See Requirements for approval for student teaching section above for
more information about this process).

**International Student Teaching:** Ripon College allows students to complete one
of their two nine-week student teaching placements in an international placement
through the Indiana University Global Gateway Program. Special fees are required to
student teach through this program. Information about this program is available from
Associate Professor of Educational Studies Hervé Somé.

**American Indian Reservation Student Teaching:** Ripon College students may
complete their student teaching on the Navajo reservation in Arizona, Nevada or
Utah. This program is offered in conjunction with Indiana University. Special fees
are required to student teach through this program. Further information about this
program is available from Associate Professor of Educational Studies Hervé Somé.

**Urban Student Teaching:** Ripon College allows students to complete their student
teaching through the Teach Chicago! Program of the Chicago Center for Urban Life
and Culture. Special fees are required to student teach through this program.
Information about this program is available from Professor Nicholas Eastman.

**Ninth Semester Student Teaching Program:** Ripon College has established a
reduced tuition for students returning for a ninth (or later) semester to complete
their student teaching within the service area of the Department of Educational
Studies (roughly within 40 miles of the campus). The ninth semester program should
be considered by students who wish to complete a double major, a teaching major
and minor, or an off-campus semester. Students must complete four full-time
semesters at Ripon immediately prior to the student-teaching semester to be eligible
for this program.

**Student Teaching Service Area:** Student teaching placements are made within a
service area that includes the following school districts: Berlin Area School District,
Fond Du Lac School District, Green Lake School District, Markesan School District,
Neenah Joint School District, Oshkosh Area School District, Princeton School
District, Ripon Area School District or Rosendale-Brandon School District. Students
who elect to complete their student teaching outside this service area will be
responsible for added costs for supervision of their experience.

**Program Changes:** The requirements for teacher licensure specified in this cata-
log, the Teacher Education Handbook, the Student Teaching Handbook and other Col-
lege and departmental publications are subject to change by action of the educational
studies faculty or mandates from the Wisconsin State Legislature or the Wisconsin
Department of Public Instruction. Educational studies department faculty members
are able to advise students about the implications of such changes for their individual
programs.

**Requirements for a major in educational studies (Early Childhood through
Middle Childhood - EC/MC - ages birth-11):** In addition to an approved major in a
liberal arts discipline outside of educational studies and general education
requirements for licensure, each student must complete EDU 190, 245, 250, 260, 270, 275, 281, 338, 348. EDU 320 and student teaching (EDU 435, 441* and 571) must be completed to qualify for teacher licensure. EDU 150 also is required to qualify for licensure. PSC 235 is recommended as a supporting course for this major.

**Requirements for a major in educational studies (Middle Childhood through Early Adolescence - MC/EA - ages 6-11/12):** In addition to an approved major in a liberal arts discipline outside of educational studies and general education requirements for licensure, each student must complete EDU 190, 245, 250, 260, 270, 281, 316, 338, 348. EDU 320 and student teaching (EDU 441, 451* and 571) must be completed to qualify for teacher licensure. EDU 150 also is required to qualify for licensure. PSC 235 is recommended as a supporting course for this major.

**Requirements for a minor in educational studies (EA-A - grades 6-12 and PK-12 in Art, Music, Physical Education, Health, Spanish, French, or Theatre):** In addition to an approved major and general education requirements for licensure, each student must complete EDU 190, 250, 260, 270, 311, 316, 344, and the instructional methods course/s in their teaching major/s and minor/s. EDU 320 and student teaching (EDU 451, 461*, and 571) must be completed to qualify for teacher licensure. PSC 242 is recommended as a supporting course for this program. EDU 242: Integrated Arts Education is recommended as a supporting course for the Art, Music and Theatre education programs.

**Requirements for PK-12 licensure in art education:** Students must complete general education requirements for licensure, the requirements for a major in studio art (see notes on the major in the art section of the catalog), and the minor in educational studies. Students must work with the art advisors to arrange to take teaching methods course work (ART 354 and 356) and clinical experiences (Sec. Ed. 366) through the University of Wisconsin-Oshkosh. In addition, each student must qualify for and satisfactorily complete EDU 320 and a semester of student teaching (491* and 571) at Ripon College. EDU 242: Integrated Arts Education is recommended as a supporting course for the art education program.

**Requirements for PK-12 licensure in music education:** Students must complete general education requirements for licensure, the requirements for a teaching major in music (choral, instrumental or general) and the minor in educational studies. In addition, each student must qualify for and satisfactorily complete EDU 320 and a semester of student teaching (EDU 421* and 571).

**Requirements for PK-12 licensure in physical education and health:** Students must complete general education requirements for licensure, the requirements for a teaching major in exercise science, school-based physical education and the minor in educational studies. In addition, each student must satisfactorily complete EDU 320 and a semester of student teaching (EDU 431* and 571). Completion of a teaching minor in health is recommended.

* Students may substitute EDU 481 for 6 credits/nine weeks of their student teaching placement.

**Requirements for certification in English as a Second Language (ESL):** In addition to an approved major, each student must complete a licensure program; and EDU 329, 330, 331 and LIN 332. In addition, one of the two student-teaching placements must be completed in an ESL setting.

**Broad Field Programs** in social studies is available for students certifying at the early adolescence through adolescence level in a related field. The requirements for
these programs are listed in the catalog section for each major.

150. **Structures of Mathematics**  
Rigden  
Four credits.  
Students will work on problem-solving and mathematical discourse while studying topics chosen to foster a clearer and deeper understanding of the mathematical concepts underlying the school mathematics taught particularly in grades K-8. Enrollment priority will be given to teacher candidates.

151. **Colloquium in Educational Policy**  
Staff  
Variable credit course, 1-4 credits.  
The Colloquium on Educational Policy examines the changing landscape of educational policy in local, state, national and international environments. Through readings, simulations, screenings and discussions with each other and guest facilitators, students will engage in the examination and critique of policy initiatives and their effects on students, teachers and other education stakeholders. Field trips and site visits may be required. May be repeated for up to 4 credits toward graduation.

190. **School and Society**  
Somé/Eastman  
Four credits. Offered both semesters.  
This introductory course in the social foundations of education engages students in the study of historical and contemporary perspectives on the role of education in society. Special emphasis is given to understanding the development of PK-12 education and the teaching profession in the United States. Students will engage in a substantial research project.

200. **Topics**  
Staff  
Variable credit course, 1-4 credits.  
Special subjects in educational studies not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

242. **Integrated Arts Education**  
Staff  
Four credits.  
A study of the theory and practice of working with classroom teachers to integrate music, art, theatre and dance into teaching throughout the K-12 curriculum. Students will study various theories of arts integration and develop multiple lessons and projects that apply these concepts to teaching in curriculum areas such as reading, math, science, social studies and health. *Pre-requisite or corequisite: EDU 250.*

245. **Children's Literature**  
Eastman  
Four credits. Offered in the spring semester.  
Survey and study of literature written for and read by children and young adolescents. Substantial reading in a variety of genres is required. Students will engage in critical evaluation of a wide range of texts and consider how children's literature can be integrated across the curriculum. *Required for students seeking elementary teacher licensure through the EC/MC or MC/EA educational studies majors.*
250. Psychological Foundations of Education

   Four credits. Offered both semesters.
   An examination of theories and principles of psychology as they apply to the teaching-learning
   process. Major course topics are human development, learning theory, classroom management,
   instructional techniques and assessment. This course includes a clinical experience.

260. Diversity in American Education

   Three credits. Offered both semesters.
   An exploration of the significance of race, ethnicity, gender, socioeconomic status, language
   and sexual preference in schooling in the United States. Students participate in exercises,
   presentations and simulations to learn how responses to individual and group differences can
   shape the teaching-learning process. This course includes a clinical experience.

270. Differentiated Instruction: Approaches for the Classroom Teacher

   Three credits. Offered spring semesters.
   An introduction to special education for classroom teachers. Students will study the
   professionally defined categories of exceptional learners, discuss policies and procedures for
   identifying and serving special needs children and youths, and practice strategies for adapting
   instruction to meet the needs of diverse learners. This course includes a clinical experience.
   Prerequisite: EDU 250.

275. Theory and Practice of Early Childhood Education

   Four credits. Offered fall semester.
   An introduction to the field of early childhood education. The course examines theories of
   child development, learning and the concept of developmentally appropriate practice for
   working effectively with children from infancy through grade 2. Students will become familiar
   with different types of early childhood programs and engage in planning instruction across the
   age/grade range. EDU 275 will lay the foundation for further work on curriculum planning
   and teaching in upper division teaching methods courses. This course includes a clinical
   component.

281. Teaching Content in Elementary Classrooms

   Four Credits. Offered spring semester.
   A study of theories and practices associated with a variety of pedagogical methods
   (e.g., inquiry, direct instruction, project/problem-based learning, simulations, active learning
   strategies and discussion) that can be used to teach social studies, science, fine arts, physical
   education and health in elementary classrooms. An emphasis on integration of learning
   experiences across disciplinary boundaries is a feature of the course. Students will engage in a
   variety of hands-on learning experiences, standards-based instructional and assessment
   planning, and microteaching. Prerequisite EDU 270.

300. Departmental Studies

   Variable credit course, 1-3 credits.
   Special subjects in education not covered by regular courses. This course may be repeated for
   credit when topics change. Please see the pertinent schedule of courses for the listing of
   topics courses and possible prerequisites. Some topics may count toward the global and
   cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies
   Requirement section for more information. Prerequisite: consent of the instructor.
311. Literacy Development in Middle/Secondary Schools
Knoester
Two credits. Offered fall semester.
A discussion of methods and strategies content area teachers (English/language arts, science, mathematics, social studies, physical education and health, and fine and performing arts) can use to support students’ literacy development in middle and high school. Students will practice lesson-planning strategies, identify and analyze instructional materials and discuss the role of content teachers in school-wide efforts to improve students’ literacy skills. Prerequisite: EDU 270. Corequisites: EDU 320 and EDU 344.

314. Seminar on Classroom Management and Discipline
Staff
Two credits.
A seminar designed to engage students in investigation into a variety of classroom management theories and approaches. Students will discuss case studies of classroom management issues and review scholarly articles and professional resource materials related to those cases. Members of the class will interview practicing teachers to learn about options available to classroom teachers to effectively create a climate conducive to learning for all students in an inclusive classroom.

316. Middle School Education
Knoester
Two credits. Offered fall semester.
A study of the distinguishing characteristics of education in a middle school setting. Major course topics include: 1) the developmental characteristics of young adolescent learners, 2) the history and organization of the middle school, and 3) teaching methods and assessments for the middle school setting. Visits to area middle school programs are a feature of this course. Prerequisite: EDU 270.

320. Clinical Block: Student Practicum in Teaching
Somé
Two credits. Offered fall semester.
Observe classroom instruction, review materials, methods and planning for instruction, and prepare and teach a variety of lessons. Students will spend approximately four hours per week in an area classroom and one hour per week in an on-campus seminar. Campus supervisors will observe each student teaching at least twice during the semester. In preparation for student teaching, students will complete a modified edTPA during this experience. Enrollment is limited to students seeking teacher licensure. Grading is Pass-Fail. Prerequisites: junior status, admission to the teacher education program, and criminal background check.

327. Education in Developing Countries
Somé
Three credits.
This course surveys the global phenomenon of the expansion of mass formal education (public schooling). The primary focus is on developing countries, with special emphases on Latin America and Africa. Topics include: competing theories of the causes, purpose and effects of schooling; the impact of global forces (economic, political and cultural) on education systems; varying models of schooling; and how factors of gender, race and class affect access to education. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. Prerequisites: EDU 190 and 260 or consent of the instructor.
329. Meeting the Needs of English as a Second Language Student

Three credits.
An introduction to the teaching of English as a Second Language (ESL). Students will investigate the hypotheses of first and second language learning acquisition; techniques and procedures in second language teaching; and differences between children and adults in second language acquisition. Students also will survey the theoretical underpinnings of language learning such as behaviorism, direct method, natural method, situational-functional approach to language teaching, suggestopedia, role-plays and communicative methods and their rationale. Listening, speaking, reading and writing as they apply to ESL students will receive significant attention. Prerequisites: LIN 332 and the equivalent of 2 semesters of high school world language. Recommended: EDU 250.

330. Methods and Materials for English as a Second Language Instruction

Three credits.
This course provides an overview of second language (L2) methods and materials, focusing specifically on the teaching and learning of L2 literacy skills: reading and writing. Additional attention will be given to vocabulary and grammar. Class sessions will focus on theory and practice related to these four important components of language learning. In addition, students will critique popular L2 textbooks currently in use around the world; evaluate already developed lesson plans; develop lesson plans of their own; engage in short demonstration lessons that showcase state-of-the-art teaching techniques; and complete a literature review on a topic of personal interest. Prerequisite: EDU 329.

331. English as a Second Language Assessment

Three credits.
This course is designed to develop student language assessment skills in the teaching of English as a Second Language. Students will learn the principles behind the evaluation of ESL and of English Language Learning and will be able to structure their own assessments, taking into account alternative/authentic testing. Students will develop assessment tools that are their own and learn to develop rubrics. At the end of the course, students will appropriate language assessment concepts and terminology. Emphasis will be placed on acquiring language assessment terminology and concepts. Students will review language assessment dilemmas in order to improve student learning. Prerequisite: EDU 329.

338. EC/MC Teaching: Mathematics

Rigden
Four credits. Offered fall semester.
Students will hone their own mathematical knowledge and skills as they learn how the EC/MC mathematics curriculum is and can be organized. Students will: review a variety of mathematics curricula; practice lessons; participate in unit planning and assessment strategies; organize a resource file; and participate in microteaching experiences. Prerequisites: EDU 150 and EDU 270 or permission of the instructor. Corequisites EDU 320 and EDU 348.

344. Theory and Practice of Secondary School Teaching

Somé
Two credits. Offered fall semester.
Study of general principles and procedures for classroom teaching in middle and secondary schools. Topics include the history, curriculum and functions of middle and secondary education; curriculum development; unit and lesson planning; basic teaching strategies; evaluation and assessment; and classroom organization and management. Prerequisite: EDU 270. Corequisites: EDU 311 and EDU 320.
Courses of Study

348. Integrated Approaches to Reading and Language Arts Instruction
Knoester

Four credits. Offered fall semester.
A study of theories and pedagogical practices related to teaching an integrated reading/language arts curriculum in grades Pre K-8. Students will engage in the study of research related to effective reading/language arts pedagogy, develop instructional plans and materials based on validated best practices in this area of the curriculum, practice strategies for assessing students’ progress in all areas of language development and review concepts and research in the field to prepare for the Foundations of Reading Test (FoRT). Prerequisite: EDU 245. Corequisites: EDU 320 and EDU 338.

350. Seminar on Intercultural Teaching
Staff

Two credits.
Readings, discussions, simulations and field trips will focus on development of the knowledge, skills and understandings required to teach effectively across cultural boundaries. Students who intend to student teach through any of the intercultural student-teaching programs may take this course prior to their student-teaching semester. Students interested in teaching through alternative licensing or ESL programs may enroll in the course with the instructor's permission. Prerequisites: junior level standing and EDU 190 or permission of the instructor.

425. Teaching Practicum: Early Childhood Education
Knoester

Variable credit course, 1-6 credits.
A capstone experience for the early childhood minor. This course is a supervised clinical experience in an early childhood educational setting. Working under the supervision of experienced staff, the student will assume responsibilities for teaching and program administration as agreed to by the agency and the supervising staff member at Ripon College. Prerequisites: completion of coursework and clinical experiences in the early childhood minor and approval by the faculty of the educational studies department.

ENROLLMENT IN STUDENT TEACHING IS LIMITED TO THOSE STUDENTS WHO HAVE BEEN APPROVED FOR STUDENT TEACHING BY THE FACULTY OF THE EDUCATIONAL STUDIES DEPARTMENT.

421. Student Teaching: Music

Six or twelve credits.

431. Student Teaching: Physical Education/Health

Six or twelve credits.

435. Student Teaching: Early Childhood

Six credits.

441. Student Teaching: Elementary

Six credits.

451. Student Teaching: Middle School

Six credits.

461. Student Teaching: Secondary

Six credits.
481. **Intercultural Student Teaching**

Six credits.

491. **Student Teaching: Art**

Six or twelve credits.

Student teaching is a full-time, full-semester teaching experience that follows the daily time schedule and semester calendar of the district or school in which the student is working. All students must complete 12 credits of student teaching during the student-teaching semester. Students must complete the edTPA during the first student-teaching placement. Grading is Pass-Fail. *Corequisite: enrollment in EDU 571.*

571. **Student Teaching Seminar**

Two credit.

Rigden

A seminar devoted to discussion and analysis of student-teaching experiences and guidance in completion of the edTPA and preparation of job search materials. The course also includes discussion of issues such as school administration, governance and finance, guidance services, teacher organizations, education for employment, drug and alcohol abuse, and the legal obligations of teachers. Grading is Pass-Fail. *Corequisite: enrollment in student teaching.*

580. **Research Presentation**

Staff

Variable credit course, 1-2 credits.

A self-designed research project that addresses a specific aspect of the teaching-learning process in the grade level and/or subject area the student is preparing to teach. The student is responsible for this project through all phases of its development to its presentation to the college community. *Prerequisite: approval of project topic and design by the faculty of the education department.*

**Special Education Collaborative Teacher Licensure Program**

**Ripon College and University of Wisconsin Oshkosh**

Areas of Licensure:

Cross-Categorical Special Education Grades 1-8 (UW-O)

Middle Childhood/Early Adolescent Teaching Grades 1-8 (Ripon College)

Ripon College has joined with the University of Wisconsin Oshkosh to offer a collaborative program leading to dual teacher licensure in cross-categorical special education and elementary/middle level classroom teaching for grades 1-8. Ripon students who meet the testing, GPA and program requirements for entry into the teacher education program at Ripon College will automatically be admitted to the special education program, usually in the junior or senior year. The program consists of five components: 1) completion of Catalyst courses and the general education requirements for teacher licensure, 2) completion of the MC/EA Educational Studies major, 3) completion of a Ripon College major or minor outside of the Educational Studies Department, 4) completion of all courses in the special education program, and 5) completion of a full-semester of student teaching with placements in regular and special education classrooms.

Students enrolled at Ripon College will complete their special education coursework via synchronous distance learning with Saturday sessions at UW Oshkosh each semester. Special education courses will be offered in the evening.
and Ripon will provide instructional technology to support student participation in all class sessions. Students enrolled in the special education course sequence may simultaneously take courses at Ripon College to complete their program and degree requirements.

There will be no extra tuition or fees charged for participation in this program. Students who complete special education coursework during a fifth year of study will maintain their eligibility for Ripon College financial aid and for the reduced tuition program for their MC/EA student teaching. The cost of special education student teaching credits will be set by UW Oshkosh.

Sequence for Special Education Coursework:

**Semester 1 - Fall - Junior or Senior Year**
- EDU 370 Practicum (100 hours)* 4 credits
- EDU 353 Collaborative Approaches to Teaching Students with Communication and Motor Needs 3 credits
- EDU 380 Inclusive Curriculum and Instruction 3 credits
- EDU 406 Technology in Special Education 3 credits; 406

**Semester 2 - Spring**
- EDU 370 Practicum (100 hours)*
- EDU 381 Introduction to Behavior Management and Instruction 3 credits
- EDU 414 Advocacy, Family Empowerment, and Special Education Law 3 credits
- EDU 463 Teaching Students with Significant Disabilities 3 credits
- EDU 470 Assessment for Special Education 3 credits

**Semester 3 - Fall - Senior or Fifth Year**
- EDU 401 Practicum (100 hours) 2 credits
- EDU 472 Assessment for Program Planning in Special Education 3 credits
- EDU 480 Research-based Instruction Strategies 3 credits
- EDU 482 Advanced Behavior Management and Instruction 3 credits

**Semester 4 - Spring**
- EDU 485 Seminar in Cross Categorical Special Education Teaching – MC/EA 1-2 credits
- EDU 486 Student Teaching and Seminar Special Education (9 weeks) 6 credits

*The grade and credits for EDU 370 are recorded at the conclusion of the spring semester.

353. **Collaborative Approaches to Teaching Students with Communication & Motor Needs**

This course provides information about typical and atypical language, communication and motor development in students ages birth to 21 years. Course topics include typical language, communication and motor development and characteristics of specific language, communication, and motor disorders. A focus that highlights the work of related service providers such as occupational, physical and speech therapies for individuals with disabilities serves as the context for the course. Recommended approaches that support individuals with communication and/or physical disabilities such as basic sign language, sensory integration,
communication strategies, lifting and positioning, promoting student control and involvement in self-care, encouraging independence, designing classrooms and physical access are explored. Same as UW-Oshkosh course Spec Ed 353. **Prerequisite:** 2.75 **GPA.**

**370. Practicum Experience in Special Education**

Four credits.

This is a series of two 4 week, full day, supervised field placements within public school institutions which deal with students with disabilities, including learning and cognitive disabilities and emotional/behavioral disorders. This course is designed to provide students in special education the opportunity to observe classroom interactions, to participate in instructional planning, and to teach students on an individual, small group, and large group basis. This is the first of several pre-service teaching experiences. Same as UW-Oshkosh course Spec Ed 370. **Prerequisite:** Admission to teacher education program at Ripon College.

**380. Inclusive Curriculum and Instruction**

Three credits.

Students will be introduced to factors that influence curriculum content, scope and sequence, preparation and evaluation of curricular strategies and materials and environments. A major focus of this course will be extensive student involvement in curriculum planning and development, implementation and evaluation in conjunction with state and national standards. Same as UW-Oshkosh course Spec Ed 380. **Prerequisite:** EDU 353 (may be taken concurrently).

**381. Introduction to Behavior Change and Management**

Three credits.

This course focuses on the theoretical and practical understanding of methods used in classroom management and when modifying challenging behavior that inhibits learning. Methods of supporting positive behavior will be drawn from research and applied to the classroom. Approaches are introduced to anticipate, inhibit, prevent and redirect challenging behavior through techniques which have high probability of encouraging the total learning process. Data collection procedures and analyses to support an understanding of behaviors are explored. Same as UW-Oshkosh course Spec Ed 381.

**401. Advanced Practicum Experience in Special Education**

Two credits

This is a field-based experience where special education majors will directly work with children and youth with disabilities birth to age 21. Special education majors will receive experience in assessment and instructional remediation practices. Registration will be concurrent with a special education methods course. This field-based experience will occur one or two terms prior to student teaching. Pass/Fail course. Same as UW-Oshkosh course Spec Ed 401. **Prerequisite:** EDU 480, and admission to teacher education program at Ripon College.

**406. Technology in Special Education**

Three credits

This course addresses assessment, evaluation, acquisition, implementation and appropriate use of technology across environments related to individuals with disabilities, such as assistive and adaptive technology, and alternative and augmentative communication. The course addresses
Universal Design for Learning and strategies for building on students' strengths and abilities to enhance access to the general education curriculum. The course addresses legal issues related to the provision of technology. Same as UW-Oshkosh course Spec Ed 406.

414. Advocacy, Family Empowerment and Special Education Law

Three credits
This course addresses four interrelated topics: (1) the role and responsibility of special education professionals to serve as advocates for students with disabilities and their families, (2) the knowledge, skills and dispositions needed by special education professionals to effectively support, collaborate with and empower diverse families (exceptionality, socioeconomic status, race, sex, ethnicity, sexual orientation and gender identity) of students with disabilities, (3) conflict resolution, and (4) special education and legislation and litigation. Same as UW-Oshkosh course Spec Ed 414.

463. Teaching Students with Significant Disabilities

Three credits
This course describes history and philosophical tenets related to least dangerous assumption, partial participation, general education curricular access and full adult living. Person-centered planning and various assessments for curricular development will be examined. Practical implementation of strategies to enhance communication, general education participation and adult living (including self-advocacy, employment, supported living and relationship development) are explored. This course also addresses various types of support. Same as UW-Oshkosh course Spec Ed 463.

470. Assessment for Special Education Eligibility

Three credits
This course addresses issues for special education eligibility. The emphasis of this course is on making eligibility rather than instructional planning decisions. Students gain an understanding of and familiarity with a range of assessment techniques and measures. The course familiarizes students with basic assessment philosophies, terminologies and principles as well as various tests measuring achievement, aptitude, behavior and social skills. Also addressed in this course are alternative ways of assessing students with significant and/or multiple disabilities.

472. Assessment for Program Planning in Special Education

Three credits
Two main components within this course are assessment and Individualized Education Program (IEP) development. First, students are provided with an overview of assessment strategies including formative, benchmark and summative that can be used at a variety of levels (e.g., individual, classroom, district, state). Formal, informal and teacher created assessments are investigated, as are accommodations, progress monitoring and connections to Response to Intervention (RtI). Students collect, analyze, interpret and report K-12 student data. Second, students develop IEPs based on the data collected. Same as UW-Oshkosh course Spec Ed 471.

480. Research-based Instructional Strategies

Three credits
This course focuses on a variety of research-based strategies and methodologies for special education instructional practice. Topics covered will include principles of design,
implementation and delivery of effective instructional interventions. This course should be taken in the last term prior to student teaching. Same as UW-Oshkosh course Spec Ed 480.

**482. Advanced Behavior Management and Instruction**

Staff

Three credits

This course builds upon evidence-based behavior management and instruction concepts, principles and techniques. Course emphasis is on understanding the process of Functional Behavioral Assessment (FBA), Behavioral Intervention Plans (BIP), instructional classroom management, self-management strategies, crisis intervention, mental health issues and metacognitive strategies. Same as UW-Oshkosh course Spec Ed 481. Prerequisites: EDU 480 (may be taken concurrently) and EDU 381.

**485. Seminar in Cross Categorical Special Education Teaching – MC/EA**

Staff

One-Two Credits

This course will deal with the problems associated with teaching students in cross categorical special education programs (middle school through early adolescence) (students labeled as learning disabled, emotionally/behaviorally disordered, and/or mentally retarded/cognitively disabled). Innovative programs and intervention strategies will be discussed and analyzed. Same as UW-Oshkosh course Spec Ed 485. Prerequisite: concurrent enrollment in EDU 486.

**486. Student Teaching in Cross Categorical Special Education – MC/EA**

Staff

Six credits

Observation, participation and responsible teaching experience under supervision in cross categorical special education in a class at the middle childhood through early adolescence level (learning disabilities, emotional/behavioral disorders, and/or mental retardation/cognitive disabilities). Prerequisite: Admission to student teaching, restricted to special education licensure candidates, and concurrent enrollment in Special Education 485.

---

**English**

Professor Robin Woods;
Associate Professors Ann Pleiss Morris (Chair), Mary I. Unger (on leave fall 2018);
Assistant Professor Megan M. Gannon (on leave fall 2018)
Adjunct Professor Mary K. Pleiss

**Departmental Mission Statement:** The mission of the English department is to prepare students to become part of the larger critical conversation that takes place among students, teachers, critics and texts. We seek to enhance their critical understanding of the discipline, to help them express their own ideas and respond to those of others, and to enable them to formulate and engage in critical argument.

**Communicating Plus - English:** The Communicating Plus Program at Ripon College emphasizes students’ development of skills in four areas: written communication, oral communication, critical thinking and problem solving. The English department focuses each course and the department offerings overall on developing the student’s abilities to analyze critically, to respond sensitively, to understand broadly, and to express oneself effectively in oral and written forms. The regular or core courses for the major or minor give extended attention to the development of these skills through instruction, practice and assessment by oneself,
Courses of Study

peers, and faculty. Each graduating class reviews with the faculty their individual development and the strengths of the major in the senior portfolio course.

**Requirements for a major in English:** 36 credits which must include: ENG 101, 246, 251, 330, 440, and 530. One course outside the English department, if approved by the chair, may substitute for up to four credit hours of electives. Off-campus programs (such as the Newberry Library Program) provide significant opportunities for work relevant to the English major. The chair of the English department will determine how the off-campus courses will substitute in the major. Grades earned in all English courses are counted in computing departmental honors.

**Requirements for a minor in English:** 20 credits including: ENG 101, 246, 251, and 330.

**Requirements for a teaching major in English:** 36 credits including: ENG 101, 246, 251, 330, 360, 530; at least one of the following: ENG 211, 310, 311, 312; a course that includes a representative sample of world literature, including western and non-western texts (students should consult with their English advisor in selecting this course).

The following courses are required for teacher licensure but do not count toward the major: CORE 110, ENG 402, and one of the following: CMM 215 or THE 248.

**Note:** Students completing licensure programs in Early Childhood/Middle Childhood (Ages 0-11; Birth - Grade 5) or Middle Childhood/Early Adolescence (Ages 6-12/13; Grades 1-8) are exempt from ENG 402.

---

101. **Introduction to the Literary Conversation**  
Four credits.  
This course is a way to enter into the greater conversation of literary studies by increasing your exposure to literary works. It will help you build the vocabulary, analytic tools, and written and oral skills you need to participate in the field of literary studies. You will expand your understanding not only of literature, but also of others’ views of and comments about that literature so that you will become an active and valued participant of this community. This course includes frequent writing assignments.

200. **Topics in Literature**  
Variable credit course, 2-4 credits.  
The study of a characteristic theme, genre, or period in literature. These courses are taught at the introductory level and are open to all interested students. They offer students the opportunity to study literary topics not offered in the regular curriculum. Different courses under this number may be repeated for credit. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

211. **Creative Writing: Poetry**  
Four Credits. Offered in 2019-20 and alternate years.  
Introduction to the art and craft of poetry writing. Regular reading and writing assignments and a major project are required. Enrollment limited to 16 students.
213. Creative Writing: Fiction  
Gannon
Four Credits. Offered in 2018-19 and in alternate years.  
Introduction to the art and craft of fiction writing, concentrating on the short story. Regular reading and writing assignments and a major project are required. Enrollment limited to 16 students.

231. Theatre and Drama I: Ancient through Renaissance  
Pleiss Morris
Four credits. Offered in fall 2018 and alternate years.  
The dramatic literature, history and production practices of ancient Greece, Rome, medieval Europe and the Renaissance. Understanding dramatic structure, metaphoric significance and thematic content in historical context is emphasized. Lectures, group discussion, play script analysis, readings in theatre history, reading response assignments, research and creative projects/papers. Field trip fee range: $0 - $40. Same as THE 231.

232. Theatre and Drama II: Restoration through Contemporary  
K. Hill
Four credits. Offered in fall 2019 and alternate years.  
The course encompasses the dramatic literature, history and production practices from the Restoration through contemporary theatre. Understanding dramatic structure and thematic content in historical context is emphasized. Lectures and group discussions, play script and theatre history readings, reading response assignments, research and creative projects/papers. Field trip fee $25. Same as THE 232.

243. Women's Literature  
Staff
Four credits.  
Works in various genres by women writers. Attention to issues surrounding women's writing, possibly including the following: how and why has women's writing been marginalized? Is there a style of writing that is essentially female? How do women's texts handle the issue of oppression? To what extent is feminist criticism a useful tool for studying literature? For comparison, the course may include writings by men, but the main focus will be the work of women. Same as WOM 243.

246. Early American Literature  
Unger/Gannon
Four credits.  
An examination of the characteristics of the American tradition. Three topics are of special importance: American nature, the relationship between the individual and larger society and the differences between the American multicultural experience and the white European experience. Readings cover a historical range from Puritan to modern times, with an emphasis on texts written before 1900.

251. Foundations of English Literature  
Pleiss Morris
Four credits.  
Major works from Beowulf to Paradise Lost. The course will give attention to the development of lyric poetry, the transition from romance to epic and the emergence of drama. Works studied will be viewed in relation to the historical and social contexts, the major literary movements that characterize each age and the development of the language from Old to Middle to Modern English.
260. Topics in Cultural Identity

Four credits.

Different courses under this number may be repeated for credit. A slot to be filled by various courses which examine themes of cultural identity: the ways in which major cultural entities or currents within cultures define themselves or interact with other cultures in their literature. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

300. Departmental Studies

Four credits.

Special subjects in English not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

310. Advanced Creative Writing: Poetry

Four credits. Offered in 2019-20 and alternate years.

Continuing work in poetry writing. Students will produce a term project in poetry. Frequent writing and regular workshop discussions of works in progress are required, along with readings and other class activities. Enrollment limited to 16 students. Prerequisite: ENG 211 or 213 or consent of the instructor.

312. Advanced Creative Writing: Fiction

Four credits. Offered in 2018-19 and alternate years.

Continuing work in fiction writing. Students will produce a term project in fiction. Frequent writing and regular workshop discussions of works in progress are required, along with readings and other class activities. Enrollment limited to 16 students. Prerequisite: ENG 211 or 213 or consent of the instructor.

320. Period Studies

Four credits.

This course focuses on a specific literary period, with emphasis on crucial literary trends and developments taking place during this period; on historical and social contexts for this period; and on how this and other literary eras are defined. Period studies courses that have been offered in the past include Modernism, Romanticism, and Victorian Literature.

330. Literary Theory

Four credits.

Analysis of literary works from several critical perspectives. The course explores different critical approaches to literature in order to illustrate how the approach can change our understanding and appreciation of a literary text. Prerequisite: ENG 101 or consent of the instructor.

360. Shakespeare

Four credits.

Study of the drama and poetry of William Shakespeare and its lasting influence. This course includes study of the early modern theater and the socio-political history of late sixteenth- and early seventeenth-century England. At the same time, students will examine Shakespeare's texts as twenty-first century readers, considering Shakespeare's central place in criticism, classrooms, and popular forms of entertainment.
402. English Teaching Methods

Staff

Two credits.

Study of the methods of teaching Language Arts in middle school and high school. The course examines things like curricular planning, modes of presentation and teaching composition. Does not count toward a major. **Prerequisite: junior standing.**

440. Major Author

Staff

Four credits.

Different courses under this number may be repeated for credit. A slot to be filled by various courses focusing on a single major author. Attention to the arc and scope of the whole career, the accompanying critical tradition and the literary/historical context. Authors selected for coverage will meet all or most of these requirements: they will have produced a substantial body of work; demonstrated ambition and range of imaginative scope; acted as a significant influence upon other writers; attracted substantial critical attention; and will have been widely understood to be of major significance. Offerings will vary. **Prerequisite: ENG 101 or consent of the instructor.**

530. Senior Seminar

Staff

Four credits. Offered each term.

A sustained exploration of a literary topic such as a period or a genre. Students will undertake an independent research project and develop it into a major paper through a collaborative writing process. **Prerequisites: ENG 101; senior standing and permission of the chair of the department.**

**Environmental Studies**

Professors Colleen M. Byron, Soren Hauge, Robert L. Wallace;
Associate Professors Paul F. Jeffries; Memuna Z. Khan;
Assistant Professor Sarah Frohardt-Lane (Director);

**Director of Sustainability** Alice Reznickova

**Departmental Mission Statement:** The major in environmental studies is an interdisciplinary program of study that transcends traditional disciplinary boundaries. The core includes an introductory course and courses in chemistry, ecology, philosophy and environmental economics. The program also requires the student to take advanced courses in disciplines such as the natural sciences and mathematics, social sciences, art and the humanities. Environmental studies majors do a senior project and complete an individualized learning experience or off-campus experience. The core courses provide the necessary background for environmental decision-making. The elective courses provide exposure to a knowledge base that will allow students greater insight into important environmental issues.

**Communicating Plus:** Developing one's skills in communicating whether in oral or written form is essential to career advancement. With that in mind, the environmental studies major addresses practical aspects of communication needed to successfully function in this interdisciplinary major. These practical aspects are characterizing the critical elements of environmental problems, posing realistic solutions to those problems and effectively communicating proposed solutions to a diverse audience. The environmental studies curriculum has three levels at which the Communicating Plus skills are addressed. Important skills are introduced in ENV
Courses of Study

100 and they are developed further in subject-specific courses. Students have opportunities to perfect and demonstrate their mastery of discipline specific content and their communication skills in the senior capstone course, ENV 500.

**Requirements for a major in environmental studies:**
The three elements of the major (core courses, elective courses, and completion of an Individualized Learning Experience or off-campus experience) are described below.

1) Complete the following required core courses:
   - ENV 120, 243, 247, 332, and 500
   - CHM 100 or 111 or 112
   - MTH 120 (or PSC 211)

2) Complete 10 elective credits OR three courses from among the following courses. Students must take at least one course from two of the following three categories*:

<table>
<thead>
<tr>
<th>Natural Science &amp; Mathematics</th>
<th>Social Sciences</th>
<th>Arts and Humanities</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO 339, 450</td>
<td>ANT 222</td>
<td>ART 190</td>
</tr>
<tr>
<td>CHM 211</td>
<td>ECO 361 or 461</td>
<td>CMM 236</td>
</tr>
<tr>
<td><em>Selected course in mathematics</em>*</td>
<td>SOC 116</td>
<td>HIS 248, 285, 385</td>
</tr>
<tr>
<td></td>
<td></td>
<td>PHL 353</td>
</tr>
</tbody>
</table>

*This table of elective courses is not exhaustive. Departmental studies or special topics courses that have a significant component that explores environmental issues may also be counted in any of these areas. Students should consult with the director of the major for details on how to include other relevant courses in their program of study.

**With permission of the director, students may also count these courses.

3) Complete an in-depth program of study, either through Individualized Learning Experiences (ILE), a substantial Off-Campus Experience (OCE), or an In Focus course that has a substantial environmental component:
   - An ILE may be accomplished by completing at least 4 credits ILE work: i.e., Directed Research, Independent Study, and/or Internship. (Consult the Independent Study section of the College Catalog for a description of these opportunities. Regardless of the field of study the ILE must be approved by the director and a faculty mentor from within the Environmental Studies major also is required.)
   - Acceptable OCE programs include programs with which Ripon is associated such as Italy: Earth and Environment via Luther College; SEA semester at the Sea Education Association at Woods Hole, MA; Semester in Environmental Science via the Marine Biology Laboratory at Woods Hole, MA.
   - Certain In Focus courses offered by Ripon College will also count for this component of the major. (Consult the director for additional information.)

Students wishing to pursue graduate work in environmental studies are encouraged to take additional courses in an area of specialty such as anthropology, biology, chemistry, economics, mathematics, politics and government or sociology.
116. Consumer Culture

Four credits.
This course will examine consumer behavior from a sociological perspective. It will focus on the study of American consumption patterns and compare them to those in other places around the world. It will also examine the consequences of consumerism, including the effects on personal and national debt, as well as the impact that consumer behavior has on the environment. Same as SOC 116.

120. Environmental Studies

Four credits.
Study of the interrelationships of ecological, ethical, political, legal, economic, social and historical aspects of the environment. Lecture, discussion, projects, required field trips.

190. Sculpture I

Four credits.
This course is an introduction to the various technical, aesthetic and conceptual issues of sculpture. Traditional and contemporary processes will be explored in a wide range of media. Presentations and readings will address the history and recent development in the field of sculpture. Field trips may be required. Same as ART 190.

200. Topics

Variable credit course, 2-4 credits.
Designed to acquaint the student with a topic not covered by regular courses. Students can repeat the course for credit when the topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. May be counted as elective credits within the appropriate category as designated by the director.

222. Anthropology and Contemporary Global Issues

Four credits.
An analysis of the impact of global changes on societies in Africa, Asia, Latin America and the Pacific Islands. The course will address the following issues: the spread of global capitalism, modernization, urbanization, poverty, detribalization, terrorism, disease, cultural survival and immigration. May count toward the Global and Cultural Studies Requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. Same as ANT 222.

236. Communication and the Environment

Four credits.
The role of communication as it relates to the environment, focusing on communication strategies by institutions, corporations, environmental movement leaders, scientific experts, politicians and the public to describe and influence human interactions with the environment. Same as CMM 236.

243. Philosophy and the Environment

Four credits. Offered in 2014-15 and alternate years.
Exploration of the relationship of human beings to the natural world. Consideration of the conflicting claims about how we are interconnected with the rest of nature and also separate from it. An examination of such contested issues as what responsibilities, if any, do we have to the rest of nature and how can we wisely weigh competing claims about natural resources. Same as PHL 243.
Courses of Study

247. General Ecology Wallace
   Four credits.
   Interaction of aquatic and terrestrial plants and animals with their environment. Emphasis is placed on community structure, energy flow, nutrient cycling, competition, niche development, and population dynamics. Lecture, laboratory, required field trips. Same as BIO 247. Prerequisite: BIO 121 or equivalent.

248. U.S. Environmental History Frohardt-Lane
   Four credits.
   How have Americans changed the natural world? How has the non-human world shaped the course of U.S. history? These two questions are at the center of this introduction to the field of environmental history. The course proceeds chronologically and spans the history of the United States from the colonial era to the present day. Through texts and films, we will examine a range of topics from wilderness preservation and the creation of national parks, to air pollution, commercial agriculture and the rise of the environmental movement. Same as HIS 248.

285. Global Environmental History Frohardt-Lane
   Four credits.
   An introduction to the history of humans’ interactions with nature in a global context. The course examines how people have transformed, and been transformed by their environments through a range of topics from the rise of agricultural societies to industrialization, conservation and climate change. Same as HIS 285.

300. Departmental Studies Staff
   Variable credit course, 2-4 credits. Offered on demand.
   Special subjects in environmental studies not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. May be counted as elective credits within the appropriate category as designated by the director.

332. Resource and Environmental Economics Hauge
   Four credits. Offered in 2019-20 and alternate years.
   Theoretical framework for the analysis of environmental pollution and renewable and nonrenewable resource management. Topics include public goods and common-property resources; private cost, social cost, externalities, and market failure; designing and implementing environmental policies; benefit-cost analysis; and the global environment. Same as ECO 332. Prerequisite: ECO 212 or consent of the instructor.

339. Behavioral Ecology Khan
   Four credits.
   Study of the reproductive and survival consequences of animal behavior. We will examine the diversity of behavioral tactics used by animals to improve their chances of survival and reproduction within the context of their ecology (where they live, what they eat, and what eats them). Lecture topics include foraging behavior, predator-prey interactions, group living, mating systems, parental behavior and cooperative behavior. Laboratories consist of conducting short field and lab experiments to illustrate principles covered in the text. Lecture, discussion, laboratory and required field trips. Same as BIO 339. Prerequisites: BIO 121 or PSC 110, and BIO 200 or PSC 211.
353. Human Rights
Jeffries
Four credits.
An examination of the concept of human rights in historical perspective in both Western and Eastern thought. Also, an exploration of some contemporary issues in human rights, including the rights of minority peoples and the relationship between human rights and the natural environment. Same as PHL 353. Prerequisite: four credits in philosophy.

361. Development Economics I
Hauge
Four credits. Offered in 2018-19 and alternate years.
Major analytical and policy issues facing the “less developed” nations — 3/4 of the world’s people. Global issues: defining development; its global patterns and historical process; theories of growth and underdevelopment; role of the state in industry, finance and trade; and population and migration. Applications to selected topics, such as: poverty and inequality; agriculture and environment; women and health; education and employment; multinational corporations and international institutions including the World Bank, IMF and WTO. Students select countries for research. An interdisciplinary survey of the primary issues studied by development economists and faced by practitioners. Same as ECO 361. Meets with ECO 461. Prerequisite: ECO 211 or consent of the instructor.

385. Natural Disasters in World History
Frohardt-Lane
Four credits.
From flash floods to forest fires, Hurricane Katrina to the Zika virus, natural disasters make headlines for the devastation they cause. This course goes beyond the headlines and uses case studies to examine natural disasters from around the world in the last two centuries. How have societies tried to prevent and predict natural disasters? Do communities come together to support one another after an earthquake or other devastating event? Do they become divided over how to allocate government aid? What role have humans played in causing events that we often consider to be the work of nature? Using primary and secondary texts, images and films students will investigate these questions and more. Same as HIS 385.

450. Intensive Field Studies
Staff
Variable credit depending on topic.
Offered on a rotational basis as an In Focus course. An extensive field trip off campus to one of several study regions. Topics will vary from year to year, but may include the following: Desert and Montane Field Ecology; Field Geology and Physical Geography of Wisconsin; Field Ornithology; Marine Field Ecology; Plant Evolution and Systematics. This course is highly selective; selection to participate is based, in part, on performance in other courses taken at Ripon. Same as ENV 450. Prerequisites: variable depending on the topics, but always requiring consent of the instructors. It also is recommended that courses in botany (BIO 226, 227), invertebrate zoology (BIO 215), vertebrate zoology (BIO 216) or ecology (BIO 247) be taken prior to this course.

461. Development Economics II
Hauge
Four credits. Offered in 2018-19 and alternate years.
Theoretical foundations of development policy. Meets with ECO 361 and for additional sessions. (See ECO 361.) Same as ECO 461. Prerequisite or corequisite: ECO 350.

500. Senior Studies
Staff
Two credits.
A senior capstone experience. Students in this seminar will (1) meet weekly for discussion on topics of current environmental concern, (2) prepare a portfolio of their studies, (3) write a substantial paper on an environmental issue of their choosing, and (4) present a public talk
about that issue. The assignments also will include readings, short papers, oral reports and possible field trips. (The portfolio comprises samples of a student's work from all courses counted for the major.) Normally, students will have completed their capstone project for environmental studies prior to enrolling in ENV 500. Prerequisites: senior standing and declared environmental studies major, or consent of the instructor or the Director of Environmental Studies.

**Exercise Science**

*Professors* Richard H. Coles, Ronald L. Ernst;

*Associate Professors* Catherine E. Austrauskas, Mark E. Cole (*Chair*);

*Assistant Professor* Britany N. Followery;

*Athletic Trainers* Brian Azinger, Sami M. Woolson

**Departmental Mission Statement:** The mission of the exercise science department is to prepare, educate and empower students in their individual journeys toward becoming critical practitioners skilled at evaluating, deconstructing and addressing the problems and issues central to the narrower topic of sport, as well as the broader issue of physical activity across the lifespan. By blending scholarly study and professional practice, department faculty create learning opportunities and experiences that nurture students’ exploration of the physical, psychological, social-humanistic and professional aspects of physical activity, and their associated impact on health, society and quality of life.

**Communicating Plus - Exercise Science:** The student learning goals of the Communicating Plus Program are emphasized across the classroom portion of the exercise science major's curriculum. However, two classes have been designed specifically to begin and conclude the major with emphasis on the Communicating Plus skills areas. All exercise science majors begin their coursework with EXS 201 which emphasizes the skills of writing, speaking, critical thinking, and problem-solving. Students conclude the major with EXS 500 where they demonstrate their mastery of the exercise science education knowledge base and competence in the Communicating Plus student learning goals through completion of a semester long, faculty-directed research project.

**Individualized Learning:** Directed research, independent study, and internships are available through the department. See the Individualized Learning Experiences section of the Ripon College Catalog or contact the department chair for more details.

**Graduate Study:** Students anticipating graduate study for advanced academic or professional degrees in the exercise sciences and many similar fields are advised to take additional courses in statistics, chemistry, human development and physics. See the Pre-Professional Section of the Ripon College Catalog or contact the department chair for more details.

**Multiple Majors:** Students who elect majors in exercise science-athletic training, -human performance or -physical education may not elect an additional major from the remaining areas. For example, electing an exercise science-human performance forbids one from adding an exercise science-athletic training major. Contact the department chair for more details.

**Majors**

**Requirements for a major in Exercise Science - Athletic Training Emphasis:** 45 credits including: EXS 211, 333, 352, 361, 362, 399*, 426, 432, 450, 499*, 500,
and BIO 312. In addition, a student majoring in exercise science - athletic training should consider completing clinical work under the direct supervision of an athletic trainer. For more information, students should contact the department chair.

**Requirements for a major in Exercise Science - Human Performance:** 45 credits including: EXS 211, 220, 286, 333, 340, 352, 353, 399*, 426, 432, 499*, 500. BIO 211 is a prerequisite for EXS 333 and 432.

**Requirements for a major in Exercise Science - Physical Education:** 41 or 45 credits, including EXS 211, 220, 251, 252, 253, 333, 352, 399*, 426, 432, 450, 499* (and 500 if not student teaching). BIO 211 is a prerequisite for EXS 333 and 432.

**Requirements for a major in Exercise Science - Sports Management:** 40 credits including: EXS 220, 353, 399*, 421, 450, 499*, 500; BSA 131; ECO 212; plus two courses from the following, at least one of which must be at the 300 level or higher: BSA 208, 222, 225, 310, 315, 325, 413; ECO 211, 321, MTH 120, EXS 352.

*EXS 399 and 499 - For more information, please see the Individualized Learning Experiences information at the beginning of the Courses of Study section of this catalog.

**Minors**

**Requirements for a minor in Adapted Physical Education:** 20 credits including: EXS 340, 352, 353, 426, plus choose 4 elective credits selected from EXS 281, 381, 432, 450; PSC 234, 235, 242, or 313. Other credits as approved by department chair.

**Requirements for a minor in Coaching:** 22 total credits; including EXS 181, 245, 246, 281, 352, plus 4 credits selected from EXS 321, 322, 323, and at least 4 credits selected from CMM 215, 220; MTH 120; PHL 241; PSC 224, 242; REL 321; SOC 304; EXS 211, 286, 287, 321, 322, 323, 353, 381.

**Requirements for a minor in Health:** 20 total credits, including 16 credits in the department, including: EXS 232, 253, 286, 342 and 4 elective credits with approval of the minor advisor. Potential courses include ANT 232, EXS 211, 352, 353, MTH 120, PSC 110, SOC 110, 302, 304.

**Requirements for a minor in Strength and Conditioning:** 22 total credits, including 18 credits in the department, including: EXS 181, 281, 286, 287, 381, plus 4 elective credits with approval from the minor advisor. Potential courses include EXS 211, 245, 246 333, 340, 352, 353, 362, ECO 321.

**111, 112. Wellness Activities**

**Staff**

Wellness Activities Staff

One credit each semester.

Activities include badminton, basketball, exercise programs, handball, golf, jogging, racquetball, swimming, tennis, volleyball, weight training, aerobic dance and line dancing. Development of skill and acquisition of related knowledge are basic objectives in each activity. No activity which has been passed may be repeated for credit. Grading is Pass-Fail. Please note that some activities classes require the purchase of equipment at the student’s expense.
Courses of Study

181. Resistance Training

Two credits.
Course will familiarize students with the discipline, methods and benefits of resistance training. Course will develop students' competence with strength training machines and free weights, as well as methods for enhancing strength, reducing injury, and improving lean body mass. Special attention will be given to proper safety, lifting and spotting techniques in accordance with NSCA standards.

211. Prevention and Care of Athletic Injuries

Azinger
Four credits.
Introduction to athletic training and sports medicine including the occurrence of injury and the process of healing. Special emphasis will be given to common injuries to the leg, foot, hip, shoulder and head. Assessment and injury evaluation are also included. American Red Cross adult CPR certification is included. Activity fee will be applied to the CPR section of the course.

220. Foundations of Exercise Science

Staff
Four credits.
Survey of the scientific, historical, psychological and sociological bases of exercise science. Additional emphasis is placed on career and professional opportunities across the breadth of the exercise sciences.

232. Personal and Community Health Problems

Astrauskas
Four credits.
Personal and public health concerns promoting healthy living. Course will develop a global view of health, problems and potential solutions offered by evidence-based health education.

245. Theories of Coaching I

Coles
Two credits.
First of two course series examining coaching theory and practice. Course will provide best practices in coaching philosophy, athletic skill development, strategies and tactics, player safety, scouting, practice and game management, program and personnel evaluation, professional development and rules and regulations. Special emphasis will be given to the differences in coaching team and individual sports.

246. Theories of Coaching II

Coles
Two credits.
Second of two course series examining coaching theory and practice. Course will provide best practices in coaching philosophy, athletic skill development, strategies and tactics, player safety, scouting, practice and game management, program and personnel evaluation, professional development and rules and regulations. Special emphasis will be given to the differences in coaching team and individual sports.

251. Teaching the Fundamentals of Target/Net/Wall Games

Staff
Two credits.
This course is designed for prospective physical education teachers and sport coaches and presents an opportunity for students to apply their didactic understanding to their chosen field of physical education. Students will go beyond developing their content knowledge of target/net/wall games by applying, analyzing, synthesizing and evaluating their personal cycles of effective teaching of physical education.
252. Teaching the Fundamentals of Invasion & Fielding Games  
Staff

Two credits.
This course is designed for prospective physical education teachers and sport coaches and presents an opportunity for students to apply their didactic understanding to their chosen field of physical education. Students will go beyond developing their content knowledge of invasion and fielding games by applying, analyzing, synthesizing and evaluating their personal cycles of effective teaching physical education.

253. Teaching Lifetime Physical Activity and Fitness  
Staff

Four credits.
This course is designed for prospective physical education teachers and sport coaches and presents an opportunity for students to apply their didactic understanding to their chosen field of physical education. Students will go beyond developing their content knowledge of physical literacy and lifetime physical activity by applying, analyzing, synthesizing and evaluating their personal cycles of effective teaching physical education.

281. Essentials of Strength and Conditioning  
Cole

Four credits.
Course will promote understanding of the various terms, concepts, principles, physiological benefits of resistance training and program design. Special emphasis will be placed upon applying the basic scientific principles of effective programs; physiologic benefits of resistance training; movement analysis; administration and evaluation of physiologic tests; and elementary training program prescription, design, and evaluation.

286. Nutrition  
Staff

Four credits.
Develops an understanding and appreciation for basic principles of human nutrition related to maintenance of optimum nutritional status. Students will apply nutritional knowledge to educate clients on food choice strategies directed at training goals, recognizing signs of maladaptive eating behaviors, and integrating knowledge on the effects, risks, and alternatives to performance enhancing substances. The students will be able to describe the functions of various nutrients and the basic digestive, absorptive and metabolic processes that the nutrients undergo in the body. We will also explore and understand the significance of energy balance in weight control, including caloric consumption and energy expenditure and be able to describe the essentials for an adequate weight loss diet.

287. Functional Anatomy  
Staff

Four credits.
Focuses on applied musculoskeletal identification and testing. Content will emphasize surface musculoskeletal origins, insertions, actions, innervations and manual muscle tests.
Prerequisite: BIO 211 or consent of instructor

300. Departmental Studies  
Staff

Variable credit course, 1-4 credits.
Special subjects in exercise science not covered by regular courses. This course may be repeated for credit when topics differ. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Prerequisite: six hours of credit in exercise science or consent of the instructor.
108 Courses of Study

321. The Coaching of Football and Wrestling  Coles
Two credits.
Comparative analysis of offensive and defensive systems in football and expansion of techniques used in counter and combination wrestling. Prerequisite: EXS 252 or consent of the instructor.

322. The Coaching of Basketball and Baseball  Staff
Two credits.
Critical examination of offensive and defensive strategies and systems as they relate to various coaching situations. Prerequisite: EXS 251 or consent of the instructor.

323. The Coaching of Swimming and Track and Field  Staff
Two credits.
Specific techniques in the coaching of each sport. Detailed procedures for the development of teams at various levels of competition are included. Prerequisite: EXS 251 or consent of the instructor.

333. Physiology of Exercise  Staff
Five credits.
Includes an in-depth survey of the neuromuscular, metabolic cardiorespiratory and hormonal responses to acute exercise and the physiological adaptations to chronic exercise. Topics include thermoregulation, ergogenic aids, body composition, sport training and aging. The student learns basic skills relevant to an exercise physiologist through observation and hands-on opportunities during structured weekly activities. Prerequisite: BIO 211.

340. Adapted Physical Education  Cole
Four credits.
The physical, mental and emotional disabilities which affect the performance of children in public school programs. Implications for physical education programming are included. Off-campus experience required.

342. School Health Curricula  Austrauskas
Four credits.
Organization of school health education, curriculum, evaluation and services. Emphasis will be placed on designing and implementing age-appropriate research-based comprehensive health programming.

352. Psychological Aspects of Physical Activity  Cole
Four credits.
Familiarize students with the personal and situational influences on individual and group performance across domains. Develop abilities for analyzing common performance constructs such as motivation, arousal, stress, anxiety, personality, cohesion, leadership, cooperation, competition, feedback, and reinforcement. Cultivate the selection and transferring of extant research on arousal regulation, performance confidence manipulation, adherence, staleness/burnout, and mental skills training into applied practice strategies and tactics. Prerequisites: PSC 110 or consent of instructor.
353. Sociological Aspects of Physical Activity  
Cole  
Four credits.
This course explores the ways in which sports are entangled in social, cultural, political and economic forces operating at many different levels. On one hand the course deals with the multiple ways in which individuals are involved in sports organizations and activities, including our participation in sport for purposes of recreation and leisure, sports participation as self-expression and personal fulfillment, and participation as spectators of sports and consumers of sports as entertainment commodities. On the other hand, we examine the industrialization of sport and sports organizations as social organizations that can be analyzed in terms of goals and norms, social roles, and manifest and latent functions, as well as the social dynamics that characterize other social organizations, such as stratification (e.g., by race, class, and gender). The course will also deal with the political economy of big time sports, including major university and professional sports and their contradictory relationships to their institutional settings.

361. Recognition and Evaluation of Athletic Injuries  
Azinger  
Four credits.
Advanced principles of athletic training, injury evaluation and assessment. Emphasis given to systematic evaluation using evidenced-based assessments of the back, abdominal region, shoulder, arm and head. Prerequisites: EXS 211

362. Therapeutic Rehabilitation  
Woolson  
Four credits.
Application of anatomic and physiologic principles to the phenomenon of rehabilitation. Emphasis will be given to the use of therapeutic modalities, physical agents and fundamental therapeutic exercises in the healing, treatment and return to play of athletic injuries. Prerequisites: EXS 211 and BIO 211 or junior status.

381. Advanced Concepts of Strength and Conditioning  
Cole  
Four Credits.
Students will apply scientific principles of anatomy, physiology, biomechanics, bioenergetics, neuroendocrine function and psychology to enhance training and performance for a range of populations. Emphasis will be placed on designing the most effective health, wellness, performance, and fitness programs for individuals and groups in accordance with professional standards of practice while taking into consideration age, ability and disease state. Prepares students to assess nutritional behaviors, recognize signs of maladaptive eating behaviors and performance enhancing substance use, and refer clients as necessary. Familiarizes students with discipline-specific ethical and professional obligations, including the recognition and referral of maladaptive eating and performance enhancing substance use. The course prepares a student to pass a national post-graduate certification exam (e.g., NSCA-CSCS, ACSM-PT) and succeed in the expanding personal training/health/wellness/fitness industry. Prerequisite: EXS 281, BIO 211 or consent of instructor

421. Sports Law  
Ernst  
Four credits.
This course examines the legal, financial and policy issues and disputes that arise in the world of amateur and professional sports. The course includes an overview of the legal system, its terminology and principles as applied to professional and amateur sports, as well as an introduction to the case method of legal study. Emphasis is placed on relevant sport legal issues including contracts, labor law, antitrust law, amateurism, regulation, collective bargaining, negotiations, arbitration and representation of the professional athlete, the
ramifications of these issues, and the means of limiting the liability of sport organizations.

426. Motor Learning
Cole
Four credits.
The study of the process and factors related to motor skill acquisition and performance including motor learning (the relatively permanent change in performance of a motor skill resulting from experience and/or practice), motor development (the aspects of motor skill acquisition and performance resulting from heredity) and motor control (the cognitive basis of motor skill acquisition and performance and the organization and application of these during controlled, skilled movement). **Prerequisite of junior standing or consent of instructor**

432. Biomechanics
Followay
Four credits.
To familiarize the student with mechanical and anatomical concepts as they relate to human movement in sport, exercise, work and activities of daily living. Identify and evaluate mechanical factors involved with different movements and the relationship of those factors to the overall goal of movement performance. Translates knowledge of mechanics and mechanical concepts to movement situations directed at the analysis of movement performance, optimizing technique, maximizing training, and/or preventing injury. **Prerequisites: junior standing and BIO 211.**

450. Administration in Physical Education, Athletics and Recreation
Staff
Four credits.
The study and discussion of administrative and management practices common across exercise science settings. Special attention will be given to facility design, budgeting, scheduling, risk management and human resource practices. **Prerequisite: junior status**

500. Senior Seminar in Exercise Science
Cole
Four credits.
Introduction to the research process and methods, including a detailed exploration of an exercise science topic of the student's choosing. Each student will conduct independent research on a proposal topic, culminating in oral and written presentations presented at an exercise science symposium at the end of the semester.

Foreign Languages and Cultures

*Professors* Eddie R. Lowry Jr., (Classical Studies), Dominique A. Poncelet (French), Lorna J. Sopcak (German);
*Associate Professors* Geoff W. Guevara-Geer (Spanish), Timothy P. Reed (Spanish, *Chair*);
*Assistant Professor* Jean-Blaise Samou (French)

Departmental Mission Statement - Romance Languages: The romance languages programs develop students' understanding of and appreciation for the world through the study of foreign languages, literatures, linguistics and cultures. Students gain skills that allow them to communicate with native speakers, learn critical and theoretical approaches to texts and build cross-cultural perspectives from which to evaluate global issues.

Departmental Mission Statement - Classical Languages: The classical languages program develops students' understanding of and an appreciation for the world and
engages them in the study of cultures and languages some two or three millennia earlier than their own. Students enter the earlier cultures with sensitivity and sympathy and interact with them. Students gain skills in critical reading, artistic and artful language, the development and analysis of argumentation and the evaluation of unstated assumptions.

The Foreign Languages and Cultures Department encompasses study in the following areas: majors in foreign languages and in Spanish; and minors in classical studies, French, Francophone studies and Spanish. Requirements are detailed in the sections below.

**Language Placement:** Placement in French and Spanish courses is determined by an online evaluation that may be taken at any time, preferably before registration. Contact the Department of Foreign Languages and Cultures or the Office of the Registrar for information. Placement in Latin is determined by high school language experience and consultation with classics faculty.

**Advanced Placement:** Four college credits will be granted on the basis of a score of four or better on the CEEB Advanced Placement Examinations in a second language. A score of 630 or higher on the reading test in any foreign language offered by SAT II will fulfill the Global and Cultural Studies requirement.

**Retroactive Credit:** Students whose high school or other background permits them to enroll in a foreign language course above 111 will, after completing the course with a grade of B or above, receive credit for previous courses in the sequence. The maximum credit granted retroactively shall be 12 credits for any one language; credit may be earned for more than one language. Retroactive credits will not carry a grade but count toward the degree: four retroactive credits may count toward a major or minor in the department.

**Study Abroad:** See the Off-Campus Study: Programs Abroad section of this catalog for information about Ripon programs in Paris, Montpellier, Madrid, Toledo, Seville, Alicante, Costa Rica and Córdoba, Argentina.

**Communicating Plus—Foreign Languages:** To enhance our students’ understanding of themselves as world citizens, our courses reveal telling connections between languages and cultures. Students studying foreign languages practice the four Communicating Plus skills areas — written communication, oral communication, critical thinking and problem-solving — embedded within cultural contexts from the earliest levels of language study. Studying a foreign language necessarily deals with all aspects of communication and with the analysis of culture and civilization and thus provides students with opportunities to think and communicate differently. Analyzing how language functions from linguistic and cultural points of view also helps students improve their communication and thinking skills in their native language. We encourage our students to study abroad during their undergraduate career and to consider their foreign language studies as complementary to a second major in another area.

**The Foreign Languages Major:** This major is intended for the student who prefers an orientation toward language and linguistic study rather than literary history and analysis. Comprising the study of two languages of the student’s choosing, it is described in the Courses of Study (Foreign Languages) section of this catalog.
Classical Studies

Classical studies courses require no prior study of Latin or Greek, and all primary texts are read in English translation.

Dual-numbered courses (i.e. CLA 110/310) offer qualified students an opportunity for study of the course topic in greater depth and breadth. In selecting the higher-level course, a student will follow the basic syllabus but will enlarge it with supplementary readings leading to occasional essays and class presentations. The higher-level option is recommended for students who already have had courses in Latin, Greek or classical studies, and especially for those students undertaking a major or minor in the field.

Requirements for a minor in classical studies: 20 credits in coursework distributed as follows: HIS 214; four credits of Greek or Latin at the 112 or higher level; two classical studies courses, of which one must be at the 300-level; one course selected from ART 171, HIS 210, THE 231, REL 121 or 122, LIN 332.

Students who desire a major centered upon the classical languages or the ancient world may define such a course of study according to their needs and interests under the College’s option for self-designed majors described in the Academic Policies section of this catalog.

110/310. Foundations of the Western World Lowry
Four credits.
A chronological study of the art, literature, religion and statecraft of the civilizations that formed Western culture and values: Mesopotamia, Egypt, Israel, Greece and Rome. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

200. Topics in Classical Studies Lowry
Variable credit course, 2-4 credits.
Special subjects in classical studies not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

220/320. Greek and Roman Mythology Lowry
Four credits.
An introduction to the principal myths of the Greeks and Romans, approaches to their interpretation, and their influence on the art and literature of the Western world. Some treatment of myths from the Ancient Near East for comparative purposes.

248/348. Mediterranean Adventures: Heroes in Their Epics Lowry
Four credits.
Careful readings of Homer’s Iliad and Odyssey, Apollonius’ Argonautica, and Vergil’s Aeneid. The historical and cultural context of each epic – Archaic Greece, Hellenistic Alexandria, and Augustan Rome – will be considered for an understanding of changes in the concept of heroism according to time and place. This course may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.
250/350 Rome’s Rise to World Power
Lowry
Four credits.
A survey of the history, literature, art and architecture of Rome from the beginnings to the second century C.E. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

252/352. Emperors, Entertainments and Edifices
Lowry
Four credits.
This course will examine the history of the ancient Roman Empire beginning with its first emperor, Augustus, in the first century B.C. through the so-called “period of crisis” in the third century A.D. Topics to be covered include the lives of the emperors, literature produced under the Empire such as Vergil’s epic poem the Aeneid, imperial entertainment such as gladiators and chariot-racing, Greece under Rome, fine art such as mosaics and the imperial building program with a survey of archaeological remains. The course also will consider the place of this period of Roman history in the modern imagination. This course may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

260/360. Etymology: Skills to Enlarge English Vocabulary
Lowry
Four credits.
A study of Greek and Latin elements in the English language designed to improve students’ abilities to comprehend derivatives from the classical languages in bioscientific writings and traditional literature. Special emphasis is placed on words that illuminate the culture and values of ancient Greece and Rome and on elements found in words likely to be tested on such standardized examinations as the GRE, MCAT and LSAT.

300. Departmental Studies in the Classics
Lowry
Variable credit course, 1-4 credits. Offered on demand.
Special subjects in classical studies not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

430. Variable Topic Seminar
Lowry
Variable credit course, 2-4 credits. Offered on demand.
Thorough study of a topic in classical studies with a substantial amount of independent writing and research.

560. Classics for the Foreign Language Capstone
Staff
Four credits.
This course is an option for the capstone of the foreign language major for students who have an interest in or knowledge of classical Greek and Latin and who wish to use that base either to consider the heritage of the classical languages in the romance languages or to explore Indo-European linguistics, culture, or ideology. A project may be designed that encompasses both. The student attends CLA 360 but moves beyond that course by independent study designed in consultation with the instructor that will culminate in a creditable capstone project. Prior knowledge of classical languages is desirable but not required.
Greek

111. Elementary Greek I
Lowry
Four credits. Offered on demand.
Development of a foundation for reading classical Greek.

112. Elementary Greek II
Lowry
Four credits. Offered on demand.
A continuation of GRK 111. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. \textit{Prerequisite: GRK 111 or the equivalent.}

211. Intermediate Greek I
Lowry
Four credits. Offered on demand.
Systematic review of grammar; exercises in vocabulary development; readings from adapted and authentic classical Greek texts chosen for their insights into Greek literature and culture. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. \textit{Prerequisite: GRK 112 or the equivalent.}

212. Intermediate Greek II
Lowry
Four credits. Offered on demand.
A continuation of GRK 211. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. \textit{Prerequisite: GRK 211 or the equivalent.}

320. Readings in Greek Literature
Lowry
Four credits. Offered on demand.
Advanced readings organized by theme, author or genre. Repeatable when subtitle and content changes. \textit{Prerequisite: GRK 212.}

Latin

111. Elementary Latin I
Poncelet
Four credits.
Development of a foundation for reading classical Latin. Special attention is given to the Latin element in English vocabulary and to Latin grammar in relation to the structure of English.

112. Elementary Latin II
Poncelet
Four credits.
A continuation of LAT 111. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. \textit{Prerequisite: LAT 111 or the equivalent.}

211. Intermediate Latin I
Lowry
Four credits.
Systematic review of grammar; exercises in vocabulary development; readings from adapted and authentic Latin texts chosen for their insights into Latin literature and Roman civilization. May count toward the global and cultural studies requirement; refer to the Academic Policies:
Global and Cultural Studies Requirement section for more information. **Prerequisite: LAT 112 or the equivalent.**

**212. Intermediate Latin II**

Lowry

Four credits.

A continuation of LAT 211. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. **Prerequisite: LAT 211 or the equivalent.**

**320. Readings in Latin Literature**

Lowry

Four credits.

Advanced readings in a particular author or genre (epic, drama, history, philosophy). Repeatable when subtitle and content changes. **Prerequisite: Latin 212, the equivalent in secondary school, or permission of the instructor.**

**430. Variable Topic Seminar**

Lowry

Four credits. Offered on demand.

Thorough study of a period, author, genre or topic in linguistics with a substantial amount of independent writing and research.

**French**

The French minor is designed for students with an interest in French and Francophone people and organizations. It provides students with the skills needed to communicate with native speakers of French at least at the mid-intermediate range. All students are encouraged to develop a more advanced level of proficiency by taking more courses than the minimum required and by studying in a French-speaking country through an approved study-abroad program or an In Focus program. Individual courses provide students with opportunities to connect with French-speaking cultures through texts and other documents, and interact with each other and with native speakers of French using technology and the social media. In addition to a linguistic competence in the French language, the minor in French gives students a cultural understanding of the French-speaking world and its diversity and introduces them to current international issues. The topics examined in French courses can appeal to students interested not only in international affairs, but also in business, medicine, law, women's studies, history, education, literature, cinema, the arts and environmental issues.

**Requirements for a minor in French:** 20 credits in coursework in French above FRE 111, starting with the course in which students are placed by the online placement evaluation. FRE 111 does not count toward the French minor. Students majoring in French must take at least one 300-level course taught entirely in French and are strongly encouraged to take more than one of these courses.

Course work completed in a French-speaking country, either through an In Focus course or a Ripon College-approved study-abroad program, may be applied toward the French minor upon approval by the members of the French program. Students should consult with their advisor in French before departure about possible courses of study.

Dominique Poncelet is the advisor for the minor in French.

**Study Abroad:** See the Off-Campus Study: Programs Abroad section of this catalog.
116 Courses of Study

for information about Ripon programs in Paris and Montpellier.

111. Elementary French I

Four credits.
Elements of grammar, composition, oral communication and reading within cultural frameworks. Cultural activities supplement in-class and e-learning. Conducted in French.

112. Elementary French II

Four credits.
Continued introduction to elements of grammar, composition, oral communication and reading within cultural frameworks. This course begins where FRE 111 finishes in the fall. Cultural activities supplement in-class and e-learning. Conducted in French. Prerequisite: FRE 111 or permission of the instructor.

211. Intermediate French I

Four credits.
A study of different aspects of contemporary life in the French-speaking world and discussions on current issues with extensive work in grammar, vocabulary acquisition and composition. Prerequisite: FRE 112 or placement at the FRE 211 level.

222. Intermediate French II

Four credits.
A continuation of FRE 211. A study of different aspects of contemporary life in the French-speaking world and discussions about current issues with extensive work in grammar, vocabulary acquisition and composition. Prerequisite: FRE 211 or placement at the FRE 222 level.

300. Departmental Studies in French

Variable credit course, 1-4 credits.
Special subjects in French not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses.

307. Advanced Composition and Conversation

Four credits.
Emphasis on refining students' writing and speaking skills through discussions and compositions on a variety of political, social, cultural and literary topics. Prerequisite: FRE 222 or its equivalent or recommendation of the instructor.

308. Introduction to French and Francophone Literature

Four credits.
Introduction to literature and advanced training in written and spoken French. Reading of various theories and critiques, as well as literary analysis of texts from different genres including, but not limited to, advertisement, journal articles, short stories, fairy tales, poetry, novel, theatre and film. Prerequisite: FRE 222 or its equivalent or recommendation of the instructor.
309. Love, Passion and Breakups in French Literature  
Four credits  
This course examines works of French literature in which love plays a major role, from courtly love in the Middle Ages to the sexual revolution of the 20th and 21st centuries. Through close analysis of novels, plays, poems and films, we will discuss how the very definition of love evolves, as well as the nature of the relationships between men and women, how social conventions rule human passions and why happy endings are so elusive in literature. Taught in English with a component in French. Counts for the French minor. **Prerequisite for students minoring in French: FRE 222 or its equivalent or recommendation of the instructor.**

315. French Theatre Workshop  
Four credits.  
Introduction to the basics of acting through dramatic readings in French, exercises in speech and corporal expression, and written analyses of the works studied. Final project is the preparation and performance of a French play. **Prerequisite: FRE 222 or its equivalent or recommendation of the instructor.**

322. Business French  
Four credits.  
Covers general economic concepts as they relate to the modern business world. Students learn current commercial vocabulary regarding money, publicity, office and telephone etiquette, buying and selling, customs and banking, and then apply these concepts to a simulated business in a Francophone country. **Prerequisite: FRE 307 or consent of the instructor.**

329. Contemporary French Issues  
Four credits.  
Examines and debates social, cultural and political issues in contemporary France and the Francophone world. Students pursue research in the media (magazines, newspaper articles, TV news, internet) and select issues they wish to study more in depth through oral presentations and written work. **Prerequisite: FRE 307 or permission of the instructor.**

331. Francophone African Cinema  
Four credits.  
This course is an exploration of African cinematic expressions. It seeks to understand the ways in which filmmakers from various parts of the continent represent Francophone identities, and examine the historical, political, social and cultural determinants of African subjectivities. The course also will explore the strategies used to overcome various challenges relating to language, identity, power, resistance, the body, sexuality and gender in African Francophone societies. Among the themes to be treated are the historical and political contexts surrounding the birth of African Francophone cinema and fiction as a tool for political subversion and social transformation. **Prerequisite: FRE 222 or its equivalent or recommendation of the instructor.**

332. French Cinema  
Variable credit course, 2-4 credits.  
Introduction to the different movements in French cinema. Films from different time periods will be examined from various perspectives such as: narrative differences in films from France and North America; the role of the film industry; the challenges of adapting literature to cinema, the importance of cinema in the building of a cultural and/or national identity; and how films address social and political problems and reflect the structure and values of a particular society. **Prerequisite: FRE 222 or its equivalent or recommendation of the instructor.**
Courses of Study

333. Wars, Rebellions and Revolutions in French Cinema  
Poncelet

Four credits
A study of classic and recent French films about the I and II World Wars, colonial wars and the numerous revolts and revolutions that cross French history. In addition to the historical and cultural background of each film, class discussions will focus on how directors shape, praise, criticize, or simply try to make sense of traumatic events in their history. The videos and DVDs are subtitled. Taught in English with a component in French. Counts toward the French minor. 
Prerequisite for students minoring in French: FRE 222 or its equivalent or recommendation of the instructor.

337. Grammar Workshop  
Poncelet/Samou

Two credits.
Intensive review of advanced French grammar through written and oral exercises. 
Prerequisite: FRE 222 or its equivalent or recommendation of the instructor.

338. Writing Workshop  
Poncelet/Samou

Two credits.
Intensive practice of written French. Students will write and edit a variety of documents, including but not limited to, academic papers, film reviews, letters and formal email messages and short stories. 
Prerequisite: FRE 222 or its equivalent or recommendation of the instructor.

339. Conversation and Pronunciation Workshop  
Poncelet/Samou

Two credits.
Intensive practice of conversation in French through discussions and debates on a variety of contemporary topics. Introduction to the phonetics of standard French as well as dialectal pronunciations and vocabulary. 
Prerequisite: FRE 222 or its equivalent or recommendation of the instructor.

340. The Francophone World: Immigration, Identity and Culture  
Samou

Variable credit course, 2-4 credits.
This course provides an overview of the Francophone world (Europe, Africa, the Middle East, South East Asia, North America and the French Caribbean) and incorporates digital storytelling and social media as resources for academic learning. The objective of the course is twofold: first, students will engage with and respond to the debates on immigration and identity that continue to heat up the relationships between France and its former colonies; the second objective is to strengthen students’ confidence by helping them acquire and use more advanced and complex grammar structures in oral and written French. At the end of the course, students will be able to discuss, make presentations and write papers in French, communicate by using complex grammatical structures and use digital storytelling and social media for communication and e-learning. 
Prerequisite: FRE 222 or its equivalent or recommendation of the instructor.

341. Literature, Cinema and Society in Francophone Africa  
Samou

Four credits.
Using literary, cinematic and digital expressions, this course will study how history (colonization, decolonization and globalization) affects African Francophone societies. Some of the questions addressed are the relationship between literature and cinema, the colonial heritage and the construction of national identities, class and gender struggles and the influence of digital media on African Francophone societies. At the end of the course, students
should be able to 1) describe historical, political and social issues pertaining to African Francophone writing and filmmaking; 2) describe how literature, cinema and digital media contribute to shaping identities, beliefs and social practices in Francophone Africa.

Prerequisite: FRE 222 or its equivalent or recommendation of the instructor.

342. Critical Perspectives on Africa and its Diaspora
Samou
Four credits
Africa often is portrayed in the media as the continent of dictatorship, civil wars, poverty, pandemic diseases, starvation, etc. This course purports to develop a balanced understanding of Africa and Africans. Students will learn about the African continent, from the pre-colonial days to our modern era, through the study of literature, films, songs and other artistic works produced by Africans from within the continent and from the diaspora. Throughout the semester, students will be required to remain informed about current events in Africa. Taught in English with a component in French. Counts toward the French minor.

Prerequisite for students minoring in French: FRE 222 or its equivalent or recommendation of the instructor.

343. Environmental Issues in the Contemporary Francophone World
Samou
Four credits
Over the past decade, numerous issues of global interest – global warming, the Keystone XL Pipeline Project, the oil spill in the Gulf of Mexico, tsunamis and massive floods, and the increase of nuclear threat – clearly highlight the importance of environmental consciousness in international relations. This course examines how environmental issues are represented in fiction, cultural productions and media. Students will learn how to analyze those issues from an ecocritical perspective. The course will concentrate on aesthetic forms and structures while taking into account different contexts (historical, sociocultural, economic, ethical, political and geostrategic) that inform artistic creation. A variety of genres, narratives and forms will come into play, including poems, short stories, novels, songs, video clips, films and media. Taught in English with a component in French. Counts toward the French minor.

Prerequisite for students minoring in French: FRE 222 or its equivalent or recommendation of the instructor.

344. Identity, Community and Diversity
Samou
Four credits
Innumerable events on the world stage in recent years – the genocide in Rwanda, the 9/11 attacks, the earthquake in Haiti, Boko Haram in Nigeria, the Quebec Charter of Values – make it clear that multicultural competence and interfaith discourse are no longer a luxury. Rather, they should be considered essential for our common life in the 21st century. Focusing on concepts such as place, race, language, gender, age, sexual orientation, cultural behaviors and religious beliefs that nurture our sense of identity and belonging, this course increases facility with multiculturalism and interfaith communication in order to enhance professional competency and collaboration. The exploration of the culture, beliefs and traditions of other people around the world will offer an opportunity for participants to reflect on their own culture, beliefs and traditions, in an attempt to contribute to a peaceful and sustainable future for the human family. Taught in English with a component in French. Counts toward the French minor.

Prerequisite for students minoring in French: FRE 222 or its equivalent or recommendation of the instructor.

345. Francophone Media and Culture
Samou
Four credits
This course will introduce students to Francophone cultures through the study of popular media. It will analyze the issues, aesthetics, concepts and debates that influence the
120 Courses of Study

production and consumption of popular culture. Through the reading of different types of production such as songs, cartoons, advertisements, films, printing and electronic press, radio, television and social media, students will discuss the importance of popular culture in shaping beliefs, identities and social practices. Taught in English with a component in French. Counts toward the French minor. **Prerequisite for students minoring in French:** FRE 222 or its equivalent or recommendation of the instructor.

346. Ecocriticism and Francophone Fiction Samou
Four credits
This course will examine how environmental issues are represented in Francophone fiction and cultural productions. Students will learn how to analyze fiction from an ecocritical perspective. The course will concentrate on aesthetic forms and structures while taking into account different contexts (historical, sociocultural, economic, ethical, political and geostrategic) that inform artistic creation in the Francophone world. A variety of genres, narratives and forms will come into play, including poems, short stories, novels, songs, video clips and films. Taught in English with a component in French. Counts toward the French minor. **Prerequisite for students minoring in French:** FRE 222 or its equivalent or recommendation of the instructor.

365. Engaged Writers and their Fights Poncelet
Four credits.
Examines how French and Francophone writers involved themselves in the social, political and cultural debates of their times, personally and/or through their literary productions. The course focuses on past and present issues such as the death penalty, women's equality, modern architecture, the Second World War and immigration. **Prerequisite:** FRE 222 or its equivalent or recommendation of the instructor.

370. Tell Me What You Eat... Poncelet
Variable credit course, 2-4 credits.
Examination of the role of food in French-speaking cultures, from the Middle Ages to contemporary times, through literary and non-literary texts, as well as in films and paintings. In the films and literary texts, food will be viewed as a metaphor and studied in its historical contexts. This course also will debate cultural habits, problems or disorders related to food, the evolution of the “ideal” diet, and how typical dishes can become cultural icons. **Prerequisite:** FRE 222 or its equivalent or recommendation of the instructor.

402. The Teaching of Modern Languages Poncelet
Variable credit course, 2-4 credits.
Exploration of the most recent theories about foreign language methodology and acquisition with practical applications for use in the classroom. This course is designed for prospective teachers of French or Spanish and does not count toward the major or minor. Same as SPA 402. Taught in English. **Prerequisites or corequisites:** EDU 250 and 344 or permission of the instructor.

Francophone Studies
Because of its association with language and global issues, the Francophone Studies minor opens a window on the Francophone world, which includes French-speaking Africa, the Caribbean, North America, Europe and East Asia. Courses offered in Francophone Studies help students acquire a basic cultural competency of the Francophone world through the study of topics related to literature, history,
global studies, art, politics and environmental studies. This program provides a better understanding of the tensions that divide the contemporary world, as well as an appreciation for the diversity of our global society.

**Requirement for a minor in Francophone Studies:** 20 credits including a minimum of four credits and a maximum of 12 credits of courses in French beyond FRE 111, starting with the course in which students are placed by the online placement evaluation. Depending on the number of credits taken in French language courses, between 8 and 16 credits of courses in Francophone Studies are required. Students who register for a minor in Francophone Studies are not allowed to pursue a minor in French at the same time.

Course work completed in a French-speaking country, either through an In Focus course or a Ripon College-approved study-abroad program, may be applied toward the French minor upon approval by the members of the French program. Students should consult with their advisor in Francophone Studies before departure about possible courses of study.

Jean-Blaise Samou is the advisor for the minor in Francophone Studies.

**Study Abroad:** See the Off-Campus Study: Programs Abroad section of this catalog for information about Ripon programs in Paris and Montpellier.

109. Love, Passion and Breakups in French Literature  
**Poncelet**  
Four credits.

This course examines works of French literature in which love plays a major role, from courtly love in the Middle Ages to the sexual revolution of the 20th and 21st centuries. Through close analysis of novels, plays, poems and films, we will discuss how the very definition of love evolves, as well as the nature of the relationships between men and women, how social conventions rule human passions, and why happy endings are so elusive in literature. Taught in English and counts toward the Francophone Studies minor. May be taught with a component in French and count toward the French minor. **Prerequisite for students minoring in French:** FRE 222 or its equivalent or recommendation of the instructor.

133. Wars, Rebellions and Revolutions in French Cinema  
**Poncelet**  
Four credits.

A study of classic and recent French films about the first and second World Wars, colonial wars, and the numerous revolts and revolutions that cross French history. In addition to the historical and cultural background of each film, class discussions will focus on how directors shape, praise, criticize, or simply try to make sense of traumatic events in their history. The course will be taught in English, and the videos and DVDs are subtitled. Counts toward the Francophone Studies minor. May be taught with a component in French and count toward the French minor. **Prerequisite for students minoring in French:** FRE 222 or its equivalent or recommendation of the instructor.

142. Critical Perspectives on Africa and its Diaspora  
**Samou**  
Four credits

Africa often is portrayed in the media as the continent of dictatorship, civil wars, poverty, pandemic diseases, starvation, etc. This course purports to develop a balanced understanding of Africa and Africans. Students will learn about the African continent, from the pre-colonial days to our modern era, through the study of literature, films, songs and other artistic works produced by Africans from within the continent and from the diaspora. Throughout the semester, students will be required to remain informed about current events in Africa. Taught in English and counts toward the Francophone Studies minor. May be taught with a
122 Courses of Study

component in French and count toward the French minor. Same as GLB 142. Prerequisite for students minoring in French: FRE 222 or its equivalent or recommendation of the instructor.

143. Environmental Issues in the Contemporary Francophone World  Samou
Four credits
Over the past decade, numerous issues of global interest – global warming, the Keystone XL Pipeline Project, the oil spill in the Gulf of Mexico, tsunamis and massive floods, and the increase of nuclear threat – clearly highlight the importance of environmental consciousness in international relations. This course examines how environmental issues are represented in fiction, cultural productions and media. Students will learn how to analyze those issues from an ecocritical perspective. The course will concentrate on aesthetic forms and structures while taking into account different contexts (historical, sociocultural, economic, ethical, political and geostrategic) that inform artistic creation. A variety of genres, narratives and forms will come into play, including poems, short stories, novels, songs, video clips, films and media. Taught in English and counts toward the Francophone Studies minor. May be taught with a component in French and count toward the French minor. Prerequisite for students minoring in French: FRE 222 or its equivalent or recommendation of the instructor.

144. Identity, Community and Diversity  Samou
Four credits
Innumerable events on the world stage in recent years – the genocide in Rwanda, the 9/11 attacks, the earthquake in Haiti, Boko Haram in Nigeria, the Quebec Charter of Values – make it clear that multicultural competence and interfaith discourse are no longer a luxury. Rather, they should be considered essential for our common life in the 21st century. Focusing on concepts such as place, race, language, gender, age, sexual orientation, cultural behaviors and religious beliefs that nurture our sense of identity and belonging, this course increases facility with multiculturalism and interfaith communication in order to enhance professional competency and collaboration. The exploration of the culture, beliefs and traditions of other people around the world will offer an opportunity to participants to reflect on their own culture, beliefs and traditions in an attempt to contribute to a peaceful and sustainable future for the human family. Taught in English and counts toward the Francophone Studies minor. May be taught with a component in French and count toward the French minor. Prerequisite for students minoring in French: FRE 222 or its equivalent or recommendation of the instructor.

245. Francophone Media and Culture  Samou
Four credits
This course will introduce students to Francophone cultures through the study of popular media. It will analyze the issues, aesthetics, concepts and debates that influence the production and consumption of popular culture. Through the reading of different types of production such as songs, cartoons, advertisements, films, printing and electronic press, radio, television and social media, students will discuss the importance of popular culture in shaping beliefs, identities and social practices. Taught in English and counts toward the Francophone Studies minor. May be taught with a component in French and count toward the French minor. Prerequisite for students minoring in French: FRE 222 or its equivalent or recommendation of the instructor.

246. Ecocriticism and Francophone Fiction  Samou
Four credits
This course will examine how environmental issues are represented in Francophone fictions and cultural productions. Students will learn how to analyze fiction from an ecocritical perspective. The course will concentrate on aesthetic forms and structures while taking into
account different contexts (historical, sociocultural, economic, ethical, political and geopolitical) that inform artistic creation in the Francophone world. A variety of genres, narratives and forms will come into play, including poems, short stories, novels, songs, video clips and films. Taught in English and counts toward the Francophone Studies minor. May be taught with a component in French and count toward the French minor. Prerequisite for students minoring in French: FRE 222 or its equivalent or recommendation of the instructor.

315. Postcolonialism: Nation, Migration, Integration

Samou

Four credits

This course will study how globalization and its corollaries, especially as they are related to imperialism, colonialism and their aftermaths, have raised major political, cultural, economic and security concerns in many Western countries that now are forced to welcome large groups of immigrants. Drawing on thoughts from fields as diverse as history, geography, political philosophy, literary and cultural studies, the course also will attempt to investigate ways to address questions of diversity and integration in a multicultural community. Under the generalized rubrics of "nation," "immigration" and "integration," some of the themes that will be explored include: a) imperialism, colonialism and decolonization; b) displacement, diaspora and homelessness; c) minorities, race and racism; d) integration, multiculturalism and cosmopolitanism. Taught in English and counts toward the Francophone Studies minor. Does not count toward the French Minor.

Spanish

Requirements for a major in Spanish: 36 credits in coursework beyond the 100-levels including SPA 280, LIN 332, one survey course (SPA 321, 322, 331 or 332) and a 400-level seminar with a capstone project. Spanish majors also should consider taking courses in anthropology, art history, history, Latin American studies, literary theory, and politics and government.

Study Abroad: All majors are strongly encouraged to study abroad for a semester in an approved program, for no other path to fluency is so thorough. Students who choose to study-abroad may apply 16 credits of approved course work toward the major. Approved study abroad programs include ASA in Madrid, Spain, the University of Minnesota program in Toledo, Spain and the SSA programs in Seville, Alicante and Córdoba. While abroad, students are encouraged to further study in Spanish as a discipline; majors and minors in other fields may further those studies as well.

Teaching Licensure: Those seeking teacher licensure must complete 36 credits in coursework beyond the 100-levels, including SPA 280 and LIN 332. A residential immersion experience with native speakers, or an approved study-abroad program is also required and SPA 402 is required, but no credit is given toward the major.

Requirements for a minor in Spanish: 22 credits in Spanish beyond the 100-levels, including SPA 280 and one survey course (SPA 321, 322, 331 or 332).

Study Abroad: All minors are strongly encouraged to study abroad for a semester in an approved program. Students who choose to study abroad may apply 10 credits of approved coursework toward the minor. Approved study-abroad programs include ASA in Madrid, Spain, the University of Minnesota program in Toledo, Spain, and the SSA programs in Seville, Alicante or Córdoba. While abroad, students are encouraged to further study in Spanish as a discipline; majors and minors in other fields may further those studies as well.

Teaching Licensure: Those seeking teacher licensure must complete 22 credits
Courses of Study

in coursework beyond the 100-levels, including SPA 280 and LIN 332. A residential immersion experience with native speakers, or an approved study-abroad program is also required and SPA 402 is required, but no credit is given toward the minor.

111. Elementary Spanish I

Four credits.
An introduction to elements of Spanish grammar, oral communication, pronunciation and reading. Conducted in Spanish.

112. Elementary Spanish II

Four credits.
A continuation of the introduction to elements of grammar, composition, oral communication and reading. Topics/vocabulary depend upon textbook adopted. This course begins where Spanish 111 finishes. Conducted in Spanish. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. Prerequisite: SPA 111, placement into 112 or above, or permission of the instructor.

211. Intermediate Spanish

Four credits each semester.
Extensive work in grammar, conversation and composition while studying aspects of contemporary life in the Spanish-speaking world. Completes the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. Prerequisite: SPA 112, placement into 211 or above, or permission of the instructor.

280. Advanced Composition and Conversation

Four credits.
Intensive practice in reading, writing and speaking. Also development of vocabulary, perfection of advanced grammar and presentation of oral discussion topics in preparation for survey courses. Current topics from Peninsular and Spanish American writings (short stories, selections from novels, journals, newspapers, etc.) Conducted in Spanish. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. Prerequisite: SPA 211, placement above 211, or permission of the instructor.

285. Traducción / Translation

Four credits.
Develops the skill of translating, with precision and sensitivity, texts between Spanish and English. We will study practical translation skills, culture awareness as it informs translation, what translation theory tells us about how languages and cultures work, and the critique of several literary translations. We will balance translation theory and practice and see how they inform each other. After this course, a successful student will be prepared to translate texts with a better understanding of technical issues, cultural considerations, and how translation is, itself, a vibrant discipline in the humanities. Course texts in Spanish and English. Discussion and lectures in Spanish. Prerequisite: SPA 280.
300. Spanish Departmental Studies

Variable credit course, 1-4 credits. Offered on demand. Special subjects in Spanish not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. **Prerequisite: SPA 280 or consent of the instructor.**

308. Civilizaciones hispanas

Four credits. Offered on demand. Exploration of Spain and Spanish-American civilizations through the analysis of art, literature, history and film from both Spain and Latin America. Conducted in Spanish. **Prerequisite: SPA 280 or consent of the instructor.**

309. Spanish for Business

Four credits. Offered on demand. Designed for students who are interested in studying Spanish in the context of activities related to business and finance. As emphasis is on specialized and technical vocabulary necessary to function in many areas of the business world, students are expected to have a solid working knowledge of Spanish grammar. **Prerequisite: SPA 280 is strongly advised or consent of the instructor.**

310. In Focus Spain: Sevilla

Three credits. An 18-day intensive study-abroad experience at the Center for Cross-Cultural Study (CC-CS) in Seville, Spain. The May intensive term in Seville offers students an excellent opportunity to improve their language skills and experience the culture and beauty of this charming and historic city. Students will live with host families, take cultural excursions and attend classes Monday through Friday for a total of 45 contact hours. **Prerequisites: two semesters of college Spanish or equivalent, and a 3.0 GPA.**

314. Conversación avanzada

Reed/Guevara-Geer

Four credits. Intensive advanced conversation designed to improve communication skills. Expands vocabulary, reviews grammar, strengthens speaking ability and informs students about contemporary issues in the Hispanophone world. Activities will include oral presentations, role-playing, debates, collective problem-solving, interviews and oral exams. Topics will vary according to textbook adoption, but may include current events, technology and progress, diversity and prejudice, immigration, relationships, the arts, politics, problem-solving, traveling and the economy, among others. **Prerequisite: SPA 280 or consent of the instructor.**

315. Hispanic Theatre Workshop

Reed

Four credits. Introduction to Hispanic theatre through dramatic readings, exercises in speech and corporal expression, and written analyses of the works studied. Final project is the preparation and performance of a Hispanic play or short one-act plays. **Prerequisite: SPA 280 or recommendation of the instructor.**
126 Courses of Study

317. Hispanic Theatre Workshop

Variable credit course, 1-2 credits.
Same as Spanish 315 but designed for the student who wants to repeat the theatre experience. Possibilities include acting, student directing, stage managing, etc. Prerequisite: SPA 315 or recommendation of the instructor.

321, 322. Voces españolas I and II

Reed

Four credits.
Survey of Spanish Peninsular Literature from the early jarchas (love poems of the 10th century) and epic poetry, to the pre-modern period with emphasis on Golden Age literature on up to the 21st century. All genres are included. Class readings, discussions and assignments are conducted entirely in Spanish. Prerequisite: SPA 280.

331, 332. Voces hispanoamericanas I and II

Guevara-Geer

Four credits.
Literary and cultural history of Spanish-America from the Colonial period on up to 20th-century Spanish-American modernismo, and the writers of the “Boom” and “Post-Boom” eras. Class readings, discussions and assignments are conducted entirely in Spanish. Prerequisite: SPA 280.

402. The Teaching of Modern Languages

Staff

Variable credit course, 2-4 credits. Offered spring 2019 and alternate years.
Exploration of the most recent theories about foreign language methodology and acquisition with practical applications for use in the classroom. This course is designed for prospective teachers of French or Spanish and does not count toward the major. Lectures, readings and demonstration teaching. Open to second-semester juniors and seniors. Same as FRE 402. Taught in English. Prerequisites or corequisites: EDU 250 and 344 or permission of the instructor.

Spanish majors who need to complete a capstone project may sign up for the following courses at the 500 level. All other students should sign up for the class at the 400 level.

410/510. El cuento hispanoamericano

Guevara-Geer

Four credits.
Fosters the appreciation of a genre of major importance in Spanish America: the short story. We will study its history and consolidation as a literary genre in Spanish. While reading some masterly examples, we will elaborate a rough aesthetics and poetics of the Spanish-American short story. After this course, each student will recognize many of the grand writers of Spanish America and, since their contributions have been so decisive, will be able to appreciate trends in world literature and world thought. Course texts in Spanish and English. Discussion and lectures in Spanish. Prerequisite: SPA 280.

415/515. La ficción de García Márquez

Guevara-Geer

Four credits.
Examination of the work of Gabriel García Márquez, with a focus on his fiction. We will consider the issues of author-centered study, his influences, filmic adaptations of his writing, his critical reception, his association with magical realism and the “Boom”, the politics of his art, the breakthroughs of Cien años de soledad, and the aesthetics of his writing in general. Assessment will include exams, presentations, oral contributions to class sessions and the preparation of a conference-style paper. Conducted in Spanish. Prerequisite: SPA 280.
420/520. El realismo mágico y otros realismos excéntricos

Guevara-Geer

Four credits.

Examines some Spanish-American reactions to realism, with special emphasis on so-called “magical realism.” Taking the realism of the 19th century as a point of departure, we study how its conventions have been stretched, adapted and undone in Spanish-American literature of the 20th century. We study related literary phenomena, like the mythic, the surreal and science fiction. Ours will be a critical approach to this phenomenon, since the use and abuse of the term has sparked heated debates among many readers, critics and writers. Is it a quaint nod in the direction of less reasonable cultures — or is it a viable mode of thought, an alternative to dominating conventions? Each student should leave the course with an appreciation for texts that advance other realisms, of their literary-cultural contexts, and some ideas about how these conventions are, or are not, representative of Spanish America.

Prerequisite: SPA 280.

425/525. Cuba: Su revolución y sus artes

Guevara-Geer

Four credits.

Examination of the complex dynamics between the arts — literature, film, music, theatre and the plastic arts — and the Cuban Revolution. After historicizing the Revolution and its promise for Latin America, we will consider art, policy and history to ask the following questions: How do socialist liberation and artistic liberation work together? When does writing for a revolution become programmatic or censored? Can socialist poetics build a better human being, a more ethical citizen? Can dissident art resist oppressive solidarity? Assessment will include exams, presentations, oral contributions to class sessions, and the preparation of a conference-style paper. Conducted in Spanish. Prerequisite: SPA 280.

435/535. Julio Cortázar y sus perseguidores

Guevara-Geer

Four credits.

Examination of the fictional work of Julio Cortázar and those who follow him. We consider the issues of author-centered study, Cortázar’s influences, the open promise of modernism across the arts, productive problems with gender and genre, his critical reception, his knotty Euro-Latin lifestyle, the politics of his prose, the innovations of Rayuela and his legacy. The course concludes with a series of readings from men and women working through his tradition. Assessment will include exams, presentations, oral contributions to class sessions, and the preparation of a conference-style paper. Conducted in Spanish. Prerequisite: SPA 280.

440/540. Cervantes: Don Quijote

Staff

Four credits.

An intensive analysis of Cervantes’ masterpiece from several critical perspectives. Seminar format. Conducted in Spanish. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. Prerequisite: SPA 321 or consent of the instructor.

450/550. Variable Topic Seminar

Staff

Four credits. Offered on demand.

Thorough study of a period, writer or topic in criticism, literature or linguistics, with a substantial amount of independent writing and research. May be taken three times for credit as long as a different topic is selected. Prerequisite: SPA 280.
Courses of Study

455/555. 19th- and 20th-Century Peninsular Literature  Reed

Overview of the literature of 19th- and 20th-century Spain through the study of unabridged works. Literary movements include Neoclassicism, Romanticism, Realism, Naturalism, the Generation of '98, the Generation of '27, the Post-War Novel and the post-Franco era. Activities include exams, oral presentations, critiques of peer-reviewed articles and the composition and presentation of a conference-length final paper. Conducted in Spanish.  Prerequisite: SPA 280.

465/565. Literature and Film of the Spanish Civil War  Reed

Examination of a variety of literary works, plays, historical documents, paintings and films related to the Spanish Civil War (1936-1939). Assessment includes exams, oral presentations, critiques of peer-reviewed articles and the composition and presentation of a conference-length final paper. Conducted in Spanish.  Prerequisite: SPA 280.

470/570. Post-Franco, Post-Modern: the Literature of Democratic Spain  Reed

Examination of the literary production of Spain from the fall of the dictatorship (1975) to the present. Themes and genres studied include meta-fiction, feminism, post-modernity, generation "X", historical novels and mass culture. Conducted in Spanish.  Prerequisite: SPA 280.

Foreign Languages Major

The Foreign Languages major enables students to compare the structure and function of different languages. It differs from a single language major in which textual analysis, literary history and culture are studied in considerable depth. The Foreign Languages major will enrich the liberal arts experience by enabling students to communicate in two languages, to satisfy graduate school requirements and to acquire transferable skills that will facilitate the study of other languages unavailable at Ripon.

Requirements for the revised major:

• Minimum number of credits required for major: 36
• 16 credits in French or Spanish at the 211-level or higher starting at level of placement
• 16 credits in another language at the 112-level or higher starting at level of placement
• 4 credits of either LIN 532 (Introduction to Linguistics) or CLA 560 (Etymology) in which a student completes a capstone project whose breadth and depth go beyond normal course requirements and which will be designed and executed in consultation with the instructor.

Linguistics

332. Introduction to Linguistics  Poncelet

A survey of the major aspects of theoretical and applied linguistics. Emphasis is placed on the study of language structure and patterns of language use. Recommended for students seeking teacher licensure in English. Required for students seeking teacher licensure in a foreign language. Required for majors in Spanish. Required for the certification in English as a Second
Language (ESL). Prerequisite: open to sophomores, juniors and seniors or permission of the instructor.

532. Linguistics: Senior Seminar in Foreign Languages

Staff

Four Credits.

A survey of the major aspects of theoretical and applied linguistics. Emphasis is placed on the study of language structure and patterns of language use. Foreign Languages majors must register for either LIN 532 or CLA 560 as a senior seminar. In LIN 532 students attend LIN 332 and complete a capstone project that goes beyond normal course requirements in breadth and depth, which will be designed and executed in consultation with the instructor. Prerequisite: open to juniors and seniors.

All majors are encouraged to study abroad in an approved program. Students who desire a study of foreign language in a literary framework that includes analysis, culture and history should consider the standard Spanish major or self-designed majors either in French or in Classical Studies; such students should not pursue the Foreign Languages major.

French

See Foreign Languages and Cultures

Global Studies

(Assistant Professor Jean-Blaise Samou, Coordinator)

The interdisciplinary major in global studies provides an understanding and appreciation of the full breadth of challenges and opportunities offered by the accelerating interdependence of nations and peoples in today’s world. Students are encouraged to begin with the two-semester core course sequence in their first year at the College. They gain depth of understanding through foreign language study, study abroad, the completion of a coherent concentration within the major and the preparation and defense of a senior thesis. Graduates will possess the knowledge and skills needed to function effectively in foreign lands as well as to serve as responsible and effective global citizens and as leaders in our increasingly interdependent world.

Communicating Plus - Global Studies: Global studies majors address many of the Communicating Plus student learning goals through course work in other departments. Nevertheless, these goals have also been integrated into all global studies courses. Close, critical analysis of global studies texts is a major part of every classroom course. A multistage writing process is emphasized, so that student essays—from short pieces to the required senior thesis — are planned, written and revised with instructor guidance. Students make use of on-line databases and other technological resources in their research and writing. Oral communication skills are addressed through a variety of active/critical listening activities, group discussions and presentations. Throughout the program, students think critically about a wide variety of approaches and perspectives on globalization and consider the various types of problems that must be addressed by the international community. Students work to define and consider solutions to these problems in a variety of individual and group projects.
Requirements for a major in global studies: GLB 111, 112, 500.

Foreign language: completed coursework or demonstrated competence through a fifth semester of college work. All language courses must be passed with a grade of C- or better. Those studying a foreign language other than their primary foreign language as part of a study-abroad program may count that experience as their fifth semester of foreign language work.

Study Abroad: at least one semester in a study-abroad program endorsed by Ripon College or approved by the coordinator of global studies.

Electives: completion of at least four courses chosen from one of the following concentrations (note that some of these courses have departmental prerequisites):

Cultures and Civilizations
- ANT 224: Gender, Sex and Sexuality: Cross-Cultural Views (same as WOM 224)
- ANT 232: Medical Anthropology
- ANT 241: Societies of Africa
- ANT 314: Religion, Magic and Witchcraft
- ANT 327: Global Youth Cultures
- ANT 335: Urban Anthropology
- ART: All art history courses numbered 200 and above
- EDU 260: Diversity in American Education
- EDU 327: Education in Developing Countries
- EDU 329: Meeting the Needs of English as a Second Language Students
- HIS 264: Immigration and Ethnicity in American History
- HIS 269: How Latin America Fell Behind
- HIS 270: Modernizing Latin America
- HIS 281: World History I (same as GLB 281)
- HIS 282: World History II (same as GLB 282)
- HIS 330: Women and Family in Medieval and Early Modern Europe (same as WOM 330)
- HIS 334: Topics in Western Spirituality (same as ART 334 and REL 334)
- HIS 335: The Renaissance in Western Europe (same as ART 335)
- HIS 360: Topics in African American History
- MUS 112: Selected Topics in Music: World Music
- MUS 231/331: History of Baroque and Classical Musical Styles
- MUS 232/332: History of Romantic Musical Styles
- MUS 333: History of 20th century Musical Styles
- PHL 222: Religion, Different Religions, and the Truth
- PHL 241: Ethics
- REL 221: Comparative World Religions
- REL 332: Comparative Religious Ethics
- REL 442: The Problem of God in Comparative Perspective

Language and Literature
- CLA: All classical studies courses numbered 200 and above
- ENG 243: Women's Literature (same as WOM 243)
- ENG 251: Foundations of English Literature
- ENG 260: Topics in Cultural Identity
- ENG 320: Period Studies: Modernism
- FRE: All French literature courses numbered 300 and above
- GLB 180: Survey of World Cinema (same as POL 180)
HIS 276: Latin America at the Movies: History and Film
SPA: All Spanish literature courses numbered 300 and above
THE 231: Theatre and Drama I: Ancient and Renaissance (same as ENG 231)
THE 232: Theatre and Drama II: Restoration through Contemporary (same as ENG 232)
Global Political Economy
ANT 222: Anthropology and Contemporary Global Issues (same as ENV 222)
ECO 321: Economics of Professional Sports
ECO 346: Game Theory for Business and Economics (same as BSA 346)
ECO 361: Development Economics I
ECO 452: International Economics
ECO 461: Development Economics II
ECO 481, 482: History of Economic Thought
POL 272: Development and Change in Latin America
POL 273: China in Transition
POL 276: Politics of Contemporary Europe
War, Peace and Diplomacy
CMM 248: Communication, Media and Technology
CMM 336: Social Movement Communication
CMM 352: Political Communication
HIS 236: Europe in the Contemporary World
HIS 262: American Race Relations
HIS 264: Immigration and Ethnicity in American History
HIS 269: How Latin America Fell Behind
HIS 270: Modernizing Latin America
HIS 351: World War I: Causes, Conduct and Consequences
HIS 353: British Empire After 1783
HIS 354: Modern Germany
HIS 360: Topics in African American History
HIS 362: Topics in History of the Modern Middle East
HIS 375: United States and Latin America
HIS 377: Dirty Wars in Latin America
PHL 353: Human Rights (same as ENV 353)
POL 273: China in Transition
POL 280: Introduction to International Relations
POL 343: U.S. National Security Policy
POL 380: Topics in International Politics
POL 381: United States Foreign Policy
POL 385: Terrorism and Intelligence
REL 321, Ethics and International Affairs (same as IDS 321 and POL 383)
REL 322, Religion and Politics in Comparative Perspective (same as IDS 322 and POL 375)
SOC 315: Sociological Theories
Science, Technology and Environment
BIO 247: General Ecology (same as ENV 247)
BIO 314: Microbiology
BIO 337: Terrestrial Ecology
BIO 338: Aquatic Ecology
Courses of Study

BIO 339: Behavioral Ecology (same as ENV 339)
CHM 100: Global Chemistry
ECO 332: Resource and Environmental Economics (same as ENV 332)
ENV 120: Environmental Studies
ENV 243: Philosophy and the Environment (same as PHL 243)
ENV 332: Resource and Environmental Economics (same as ECO 332)
MTH 146: Computer Modeling*
MTH 246: Mathematical Modeling*

Please note that a student may not use the same study-abroad experience to satisfy requirements for both the global studies major with a concentration in science, technology or the environment and the environmental studies major.

*For credit toward the global studies major individual student projects in these courses must deal with global or trans-national phenomena, as determined by the course instructor in consultation with the global studies program coordinator.

**Other courses offered under this number may or may not count toward the Global Studies concentration, depending on the content of the course. The decision will be made by the coordinator of the global studies program in consultation with the coordinator of the environmental studies program.

111. Global Political Culture

Staff

Four credits. First half of the required core course for the global studies major.

Defines political culture and examines its dynamics at various levels in today's world, from the local to the global. Specifically examines ways in which history, language, religion, literature, ethnicity and tradition affect identity formation and its correlation in today's world. May count toward the global and cultural studies requirement; refer to the Academic Policies: global and cultural studies requirement section for more information. Same as POL 111. Open to first-year and sophomore students only, except by permission of instructor.

112. Global Political Economy

Staff

Four credits. Second half of the required core course for the global studies major.

Defines political economy and examines its manifestations in today's increasingly interdependent world. Specific issues include population, resources, environmental protection, trade and development, trends toward democratization, human rights and new and enduring sources of conflict and cooperation. Same as POL 112. Open to first-year and sophomore students only, except by permission of instructor.

142. Critical Perspectives on Africa and its Diaspora

Samou

Four credits

Africa often is portrayed in the media as the continent of dictatorship, civil wars, poverty, pandemic diseases, starvation, etc. This course purports to develop a balanced understanding of Africa and Africans. Students will learn about the African continent, from the pre-colonial days to our modern era, through the study of literature, films, songs and other artistic works produced by Africans from within the continent and from the diaspora. Throughout the semester, students will be required to remain informed about current events in Africa. Taught in English and counts toward the Francophone Studies minor. May be taught with a component in French and count toward the French minor. Same as FRS 142. Prerequisite for students minoring in French: FRE 222 or its equivalent or recommendation of the instructor.
180. **Survey of World Cinema**

Katahira

Two credits.

An introduction to contemporary trends in international feature films. The craft of film criticism also will be studied and practiced. Requirements include viewing all films in the International Film Series, attending weekly 50-minute discussion sessions and writing a critique of each film. May be repeated for credit. May count toward the global and cultural studies requirement, refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. Same as POL 180.

200. **Topics**

Staff

Variable credit course, 2-4 credits.

Designed to acquaint the student with a topic not covered by regular courses. Students can repeat the course for credit when the topics change. Please see the pertinent schedule of courses for the listing of topics courses.

253. **Modern Africa**

Staff

Four credits.

An introduction to all aspects of African history since 1800. We will examine African history before, during and after the era of European colonial rule over Africa. Political, economic, religious and cultural issues will be discussed. We also will look at the historic roots of current problems in Africa as well as African success stories. Same as HIS 253.

281. **World History I**

Staff

Four credits.

This course focuses on developing a global perspective and the capacity to appreciate how different cultures have perceived similar historical phenomena. Students will seek to understand the variety of cultures that coexisted and often interacted from the earliest civilizations until 1500. Students seeking a history teaching major will be given preference in enrollment. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. Same as HIS 281.

282. **World History II**

Staff

Four credits.

This course focuses on developing a global perspective and the capacity to appreciate how different cultures have perceived similar historical phenomena. Students will look at some of the key themes in world history during the past 500 years, such as world exploration and trade, nation building, education, imperialism and decolonization. Students seeking a history teaching major will be given preference in enrollment. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. Same as HIS 282.

288. **Soccer In World History:**

Bockelman

**Between Nationalism and Globalization**

Four credits.

Since its creation in the mid-19th century, soccer — better known around the globe as football — has become the world’s most popular sport and one of the great spectacles of modern mass culture. Never just a game, soccer has long stood at the crossroads of money, politics and identity, making it an ideal subject to observe the dynamics of two contending forces in world history: nationalism and globalization. This course will examine how the sport has both
shaped and reflected the political, economic and cultural history of the globe since 1850, beginning with its origins in the British empire and ending with recent controversies over the decline of “home-grown” players in international soccer. Other topics to be considered include imperialism and the diffusion of sports; soccer wars and other sectarian conflicts; the identity politics of fandom and hooliganism; the soccer game as a historical event; the World Cup and nationalism; and American ambivalence about “the beautiful game.” Counts toward Global/Cultural Studies requirement. Same as HIS 288. **Prerequisite: sophomore standing or consent of the instructor.**

### 300. Departmental Studies

Variable credit course, 1-4 credits.

Special subjects in global studies not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

### 500. Global Studies Senior Seminar

Four credits.

A one semester capstone seminar. Students will make presentations on readings and other materials designed to integrate their work in global studies. They also will develop, research, write and present orally a senior thesis on a contemporary issue in global studies chosen by them with the approval of the instructor.

*Professors Rebecca R. Matzke,* Barbara A. McGowan,
Diane L. Mockridge;

*Associate Professors* Brian S. Bockelman (*Chair*),
Assistant Professor Sarah K. Frohardt-Lane

**Departmental Mission Statement:** The Department of History seeks to develop students’ abilities to analyze evidentiary material in a disciplined and methodical manner, to synthesize information gained from such analyses into larger structures of knowledge, to understand various interpretations and conceptualizations of historical development and to fit their own synthetic structures into such interpretations, and to communicate complex ideas both orally and in written form to both professional and lay audiences. At the same time, the department seeks to broaden students’ abilities to understand cultures and societies other than their own.

**Communicating Plus - History:** Students completing a history major develop skills in the four Communicating Plus skills areas — written communication, oral communication, critical thinking and problem-solving — in required and elective coursework in the discipline. All department courses address most of the Communicating Plus student learning goals. The history department emphasizes
critical analysis of significant aspects of the past (which entails solving important historical problems) using a variety of primary and secondary sources. Historical interpretation does not occur apart from communicating one’s ideas to others. Thus, teaching students to articulate and communicate their interpretations in written and oral forms is central to the teaching of history. During the senior seminar, students’ work is assessed to determine their growth toward mastery of the central concepts, interpretive frameworks, and analytical tools of history as a discipline. Their competence with respect to the Communicating Plus student learning goals also is assessed.

Requirements for a major in history: 32 credits in history. At least 12 credits from courses numbered in the 300s; HIS 295; and senior seminar (HIS 590) are required. (HIS 401 does not count toward the major.) HIS 101 is strongly recommended as an introduction to the major. A sophomore or junior beginning a history major should start with any 200-level course.

Requirements for a minor in history: 22 credits in history. At least eight credits from courses numbered in the 300s. HIS 101 is strongly recommended as an introduction to the minor. A sophomore or junior beginning a history minor should start with any 200-level course.

Requirements for students majoring in history and seeking teaching licensure in history for middle childhood through early adolescent or early adolescence through adolescence level ("Teaching Major in History"): 32 credits in history. At least 12 credits from courses numbered in the 300s; HIS 295; and senior seminar (HIS 590) are required. Among the courses counting toward the history major, the following are required: HIS 281, 282 and 590. In addition, students must take any two of the following courses: HIS 240, 241, 242, 262, 263 or 264. (Also required for licensure are ENV 120 and HIS 401; but those courses do not count toward the 32 credits needed for a history major.)

Requirements for students minoring in history and seeking teaching licensure in history for middle childhood through early adolescent or early adolescence through adolescence level ("Teaching Minor in History"): 24 credit hours including HIS 281 or 282 and any one of the following: HIS 240, 241, 242, 262, 263 or 264; at least eight credits from courses numbering in the 300s. (HIS 101 is recommended but not required.) ENV 120 and HIS 401 also are required but do not count toward the 24 credits for the minor.

Broad Field Social Studies Teacher Licensure Options: Students seeking licensure at the Early Adolescence/Adolescence (Grades 6-12) levels in the social science disciplines (economics, history, politics and government, psychology and sociology) may choose one of the options listed below to add endorsements in fields outside their major. Students may complete a minor in a discipline outside the social sciences or the broad field licensure program outlined below. Broad field licensure prepares teachers to teach in general social studies classes in grades 6-9. They also will be licensed to teach the specific discipline of their two concentrations at the high school level. Given the very difficult job market for social studies teachers, students should consider one of these options to strengthen their employment options.

Option 1 – Major/Minor Program - The first option open to student majoring in a social studies discipline is to complete a minor in another social studies discipline or a subject outside the social sciences. Recent examples of programs designed on this model are a history major with an English minor and a politics and government
major with an English minor. In this case, the student would student teach and be fully licensed to teach both subjects.

Option 2 – Social Studies Major with Broad Field Social Studies Licensure - As part of their program of study, students must complete the following:
1. A major in a social science discipline.
2. Concentrations, as defined in the chart below, in two other social science disciplines, only one of which may be in history.

3. At least one course in each of the following disciplines: economics, history, politics and government, psychology and sociology.
4. One of the courses that address geography as a factor that influences human interactions and society from the following list: HIS 281, HIS 282, ECO 332 or 361 or POL 112. This course also may count toward fulfillment of criteria 1-3.

Students are encouraged to extend the breadth of their social science background by also taking courses in anthropology, global studies, Latin American and Caribbean studies, and religion.

101. Introduction to the Study of History

Four credits.
An introduction to the approaches and methods by which historians reach an appreciation and understanding of the past and its relevance to contemporary society. Special attention will be given to history as a process of social and cultural change. Students also will be introduced to the skills involved in the analysis of historical secondary sources (such as biography, essays and texts) and of primary sources (such as personal letters, contemporary fiction, political tracts, and film). HIS 101 is open only to first-year students.

200. Departmental Studies

Variable credit course, 2-4 credits.
Special subjects in introductory level history not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.
210. **Introduction to Ancient, Renaissance, and Medieval Studies**  
Mockridge  
Four credits.  
An introduction to the many approaches scholars use to study the diverse peoples and cultures of Western civilization during the ancient, medieval and early modern eras. The course will give an overview of each time period and examine the various ways scholars from different disciplines (art history, English, history, music, philosophy, religion, foreign languages and cultures, and theatre) approach these eras. Through this multi-disciplinary approach, students will gain an understanding of the key ideas and developments that shaped Western civilization and culture. Course open to all students.

214. **Greek and Roman Society**  
Mockridge  
Four credits. Normally offered every other year.  
A topical approach to ancient Greek and Roman society. Particular attention will be paid to classical ideals and institutions that have made a significant impact on the formation of Western society and values. The course will be organized thematically, and topics include: ancient religions, classical philosophy and the idea of rationality, political and judicial systems, social classes and the role of women. Artifacts from the Ripon College Classical Antiquities Collection will be used in class projects.

220. **Nonconformity and Deviance in Medieval and Early Modern Europe**  
Mockridge  
Four credits. Normally offered every other year.  
Participation in medieval and early modern European society often was mediated by membership in a group — a town, a guild, a religious order. Those nonconformists who fell outside the dominant groups, whether by conviction, occupation or circumstance, often constituted communities of their own. This course explores the social and cultural dynamics of Europe in the medieval and early modern period by examining the ways people perceived as deviants were excluded from power, and the consequences of that exclusion and marginalization. The course also will examine what kinds of groups and people were marginalized, and to what extent and how those groups created and sustained their own communities. Some of the groups examined include: lepers, prostitutes, transvestites, heretics and witches.

221. **The Medieval World: Faith, Power, Order**  
Mockridge  
Four credits. Normally offered every other year.  
A topical introduction to the European Middle Ages. This course focuses on medieval society and its key institutions and structures of power. In particular, emphasis will be placed on understanding the role of religion, the military and the hierarchical social class system in shaping the medieval world. While exploring the importance of faith, power and social order during this time period, this course also will look at the role that gender played in creating this unique medieval world view. The course will cover a range of texts, including saints’ lives, 12th-century romance, and films like *Kingdom of Heaven*.

222. **The Uses of Arthurian Legend**  
Mockridge  
Four credits. Normally offered every other year.  
A topical and chronological approach to the legends of King Arthur from the sixth to the 21st centuries. This course will explore not just the legends of King Arthur, but the ways in which these legends reflect and articulate the changing historical values and ideas of the cultures that have produced and continue to produce them. Why have these stories continued to appeal to writers and audiences over the centuries? What does King Arthur mean to us, and what do
we use him to say? This course will cover a range of texts including 12th-century romance, Malory’s *Morte D’Arthur*, Tennyson’s *Idylls of the King*, modern novels like White’s *Once and Future King*, and films like Antoine Fuqua’s *King Arthur* and Edel’s *Mists of Avalon*. Same as ENG 200.

**236. Europe in the Contemporary World**

Matzke

Four credits.

Introduction to the history of Europe’s political, social, economic and cultural institutions from the late 1800s to the present. The evolution and revolutions in socio-economic forces, political ideologies and forms, and cultural movements that have shaped modern Europe and our Western world all will receive attention. Topics covered will include imperialism and decolonization, classical liberalism and its critiques (including socialism, communism and fascism) and evolution toward democracy; causes, conduct and consequences of the two World Wars and the Cold War; and nationalism in its many forms, among others. Emphasis on primary source readings for insight into different periods, events and phenomena.

**240. Colonial America and the Early U.S. Republic, 1600-1815**

Frohardt-Lane

Four credits.

This course examines the political, social and cultural history of British North America from the colonial period through the creation of an independent United States. Topics include encounters between Native Americans and European settlers, immigration and migration, Atlantic slavery and the slave trade, religious revivalism, the American Revolution, nation-building in the early Republic, and the War of 1812. As we study this history, we also will consider how historians use sources to learn about the past and make interpretations.

**241. The United States, 1815-1914**

Frohardt-Lane

Four credits.

This survey explores the political, social and cultural history of the United States from the end of the War of 1812 to the beginning of World War I. Topics include the market revolution, Indian removal, slavery, the Civil War, Reconstruction, industrialization, imperialism and the Progressive Era. As we study this history, we also will explore how historians use sources to learn about the past and make interpretations.

**242. The United States, 1914-Present**

Frohardt-Lane

Four credits.

This course investigates the political, social and cultural history of the United States from World War I to the present day. Topics include U.S. involvement in conflicts from World War I to the War on Terror, the Great Depression and economic recessions, anticommunism, social movements of the 1960s and 1970s and culture wars of the late 20th century. A major theme will be how Americans have understood the concept of freedom, and how freedom expanded and contracted for different groups of Americans during the 20th and early 21st centuries. As we study this history, we also will consider how historians use sources to learn about the past and make interpretations.

**248. U.S. Environmental History**

Frohardt-Lane

Four credits.

How have Americans changed the natural world? How has the non-human world shaped the course of U.S. history? These two questions are at the center of this introduction to the field of environmental history. The course proceeds chronologically and spans the history of the United States from the colonial era to the present day. Through texts and films, we will
examine a range of topics from wilderness preservation and the creation of national parks, to air pollution, commercial agriculture and the rise of the environmental movement. Same as ENV 248.

253. Modern Africa
Staff
Four credits.
An introduction to all aspects of African history since 1800. We will examine African history before, during and after the era of European colonial rule over Africa. Political, economic, religious and cultural issues will be discussed. We also will look at the historic roots of current problems in Africa, as well as African success stories. Same as GLB 253.

262. American Race Relations
Frohardt-Lane
Four credits.
An introduction to the study of the history of the relations between African Americans and European Americans. This course will use primary documents and the work of other historians to examine the main topics in race relation history: slavery; the era of legal segregation; and the Civil Rights movement. Some consideration also will be given to race relations in post-Civil Rights era, including the meaning of the election of an African-American president.

263. Women in American History
McGowan
Four credits.
The relationship between women and American history is one that has undergone many changes, especially in the 40 years since the sexual and gender revolution of the 1960s. This course will focus on both the history of women in America and the ways in which that history has been described, debated and uncovered. To do this, the course will use both conventional and unconventional sources and require students to work on an individual project. Same as WOM 202.

264. Immigration and Ethnicity in American History
Frohardt-Lane
Four credits.
A survey of some key topics in the history of the formation of America’s pluralistic society: the immigration to the United States of peoples from Europe, Asia and other American societies since the 17th century; the experiences of immigrants and their descendants in the United States; changes in attitudes toward immigrants and changes in immigrant policy; and the impact of immigration and ethnicity on U.S. society and culture. Reading and discussion of both primary and secondary historical sources.

268. Colonial Latin America: Conquerors, Rebels and Slaves, 1400-1700
Bockelman
Four credits.
A survey of Latin American history from the expansion of the Aztec and Incan empires in the 15th century to the height of Spanish and Portuguese rule in the early 18th century. Major topics will include: the dynamics of conquest and colonization; the clash of European, native and African cultures in the New World; the impact of colonialism and slavery on economic, social and cultural life; the visual culture of an empire; and the changing nature of colonial riots and rebellions. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.
269. How Latin America Fell Behind: War and Upheaval, 1700-1900

Bockelman

Four credits.

An investigation of the crucial “middle period” in Latin American history, when locals fought for and won their independence from Spain and Portugal, only to experience a long-term decline relative to the United States and Western Europe. The course will seek to explain this paradox by examining the impact of late colonial reforms on the region; the nature, causes and extent of Latin American independence; the development of caudillismo and other characteristic features of regional politics; the dynamics of war, revolution, race and nation-building in the 19th century; and the cultural dimensions of Latin America’s unique experience of modernity. May count toward the Global and Cultural Studies Requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

270. Modernizing Latin America: Revolution and Reaction Since 1900

Bockelman

Four credits.

An introduction to modern Latin American history from 1900 to the present. We will look at how individual countries (e.g., Mexico, Argentina, Brazil, Bolivia, Cuba) and Latin Americans of various backgrounds (women, men, natives, Africans, mestizos, workers, elites, soldiers, intellectuals) have sought to achieve national integration, economic independence, political stability, social justice and cultural recognition despite lingering problems of inequality, discrimination, authoritarian rule, uneven development, cultural dependency and foreign intervention. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

276. Latin America at the Movies: History and Film

Bockelman

Four credits.

By exploring the relationship between history, film and film history, this survey course will examine major developments in Latin American politics, culture and society, since 1492. Topics will vary but could include: the conquest and its aftermath; the frontier in Latin American history; Catholicism and creole culture; Latin American revolutions since 1810; the origins of the Latin American film industry; Hollywood and Latin America; city, suburb and slum in Latin American film; the trauma of dictatorship and state violence; globalization and the new Latin American cinema. Reading and writing intensive. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

281. World History I

Staff

Four credits.

This course focuses on developing a global perspective and the capacity to appreciate how different cultures have perceived similar historical phenomena. Students will seek to understand the variety of cultures that coexisted and often interacted from the earliest civilizations until 1500. Students seeking a history teaching major will be given preference in enrollment. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. Same as GLB 281.

282. World History II

Staff

Four credits.

This course focuses on developing a global perspective and the capacity to appreciate how different cultures have perceived similar historical phenomena. Students will look at some
of the key themes in world history during the past 500 years, such as world exploration and trade, nation-building, industrialization, education, imperialism, decolonization and globalization. Students seeking a history teaching major will be given preference in enrollment. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. Same as GLB 282.

285. Global Environmental History

Frohardt-Lane

Four credits.

An introduction to the history of humans' interactions with nature in a global context. The course examines how people have transformed, and been transformed by, their environments through a range of topics from the rise of agricultural societies to industrialization, conservation and climate change. Same as ENV 285.

288. Soccer in World History: Between Nationalism and Globalization

Bockelman

Four credits.

Since its creation in the mid-19th century, soccer — better known around the globe as football — has become the world's most popular sport and one of the great spectacles of modern mass culture. Never just a game, soccer has long stood at the crossroads of money, politics and identity, making it an ideal subject to observe the dynamics of two contending forces in world history: nationalism and globalization. This course will examine how the sport has both shaped and reflected the political, economic and cultural history of the globe since 1850, beginning with its origins in the British empire and ending with recent controversies over the decline of “home-grown” players in international soccer. Other topics to be considered include: imperialism and the diffusion of sports; soccer wars and other sectarian conflicts; the identity politics of fandom and hooliganism; the soccer game as a historical event; the World Cup and nationalism; and American ambivalence about “the beautiful game.” May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. Same as GLB 288. Prerequisite: sophomore standing or consent of the instructor.

295. History and Historians

Staff

Four credits.

Why study the past? How do we know what happened? What counts as a historical event? Whose history should we tell? What does it mean to think historically? This course will introduce students to the major debates about the study of history and the research methods historians use to investigate and reconstruct the past. While learning about the philosophy and politics of historical thinking, the disagreements historians have about how to interpret the past, and the wide variety of approaches to history as a field of inquiry, students also will gain practical research and writing experiences through a series of hands-on assignments designed to highlight the role of archives, primary sources and historiography in the creation of historical knowledge. Prerequisite: HIS 101 or one 200-level history course.

300. Advanced Departmental Studies

Staff

Variable credit course, 1-4 credits.

Selected subjects in history not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. Open only to sophomores, juniors and seniors.
330. Women and Family in Medieval and Early Modern Europe
Mockridge
Four credits. Normally offered every other year.
This course will focus on gender roles in European history, from the late Middle Ages through the Early Modern era. The course will explore the different roles women and men played within the family as that institution evolved during this time period. The course also will explore the opportunities and restrictions placed on women by the major religious, cultural and social institutions of the time. The course will examine the impact of class on women's opportunities as well. Different times and places will be highlighted, including 12th-century France, 15th-century Venice, 16th-century Nuremberg and 17th-century Belgium. Same as WOM 330.

334. Topics in Western Spirituality
Mockridge
Four credits.
Focusing on Christianity from its early days through the early modern era, this course will explore various topics in western spirituality. Topics include various beliefs and practices, including Gnosticism, mysticism, asceticism, monasticism, pilgrimage and eucharistic devotion. The lives of various men and women also will be explored, including saints, anchorites and mendicants. Also central to the course is an examination of the use of material objects and artistic images in religious devotion. The course has no prerequisites, but students will find it helpful to have had some background in medieval history and/or Christianity. Same as REL 334 and ART 334.

335. Renaissance Florence: Politics, Art and Intellectual Life
Mockridge
Four credits.
An in-depth study of the Italian Renaissance, focusing on the political, intellectual and artistic achievements of the city that witnessed the flowering of the Renaissance: Florence, Italy. Among the topics examined will be the political power of the Medici family, key thinkers such as Dante, Petrarch and Machiavelli, and important works of art such as the Michelangelo's David. Central to this course is the idea that intellectual endeavors and artistic works are a product of the times and reflect the issues and concerns of their political milieu. In exploring these issues, this course will examine the documents of the time (primary source) as well as recent historical interpretations (secondary sources) of the period. Same as ART 335.

351. World War I: Causes, Conduct, and Consequences
Matzke
Four credits.
World War I destroyed the 19th-century European world. This course examines the long-term and immediate political, social and cultural causes of World War I; the disastrous way in which it was carried out; and its revolutionary consequences. Themes to be investigated include the building of nation-states, the shifting balance of power, the diplomatic and military systems of the 19th and 20th centuries, the development of mass mobilization and mass violence, and the global breadth of the war. The course is not confined to the war itself, but is designed to familiarize students with the broad sweep of European history in the late 19th and early 20th centuries and the historiography of the war — that is, the accumulated and various ways in which scholars have examined the war. We will be considering not only military and political/diplomatic history but cultural and social history as well, since all are necessary for understanding the war. The course has no prerequisites, but students will find it helpful to have had some experience with the basics of modern European history.
353. **British Empire After 1783**

Matzke

Four credits.

At the height of its power, Great Britain ruled one-fourth of the world’s population, controlled one-fifth of its dry land, and commanded all of its oceans. This course will consider British overseas expansion in all its forms (territorial and otherwise) from the loss of the 13 American colonies through the 20th century, when Britain “decolonized.” We will study the empire as a broad, trans-cultural phenomenon, investigating the history of both imperial Britain itself and its many overseas possessions, looking at conquest, settlement, collaboration, resistance and cultural exchange. We also will be attentive to the historiography of the empire, recognizing that “the British Empire” has had different meanings at different times, and using primary and secondary sources to think about the nature of imperialism, economic connections, culture, race, modernity and “globalization.” There are no prerequisites for the course, but students will find it helpful to have taken some modern European or world history. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

354. **Modern Germany**

Matzke

Four credits.

This course examines Germany from its unification in 1871 to the present. It will explore the unification process and its consequences for the character of the new German state and it will examine Germany’s role in World War I. It also will discuss the consequences of the peace, including revolution, economic collapse and the rise of National Socialism. The course will cover Germany in World War II and the Nazi perpetration of the Holocaust and it will compare the experiences of East and West Germany as they are created following the war. It will end by exploring the fall of communism in East Germany after 1989 and the continuing effects of the hurried reunification process. The class will tend to focus more on political and diplomatic history, but cultural and social history will play a part as well. The course has no prerequisites, but students will find it helpful to have some experience with the basics of modern European history. Knowledge of the German language is not necessary.

360. **Topics in African American History**

Frohardt-Lane

Variable credit course, 1-4 credits.

Intensive study of one aspect of the African American experience. Emphasis on reading, discussion and analysis of key secondary and primary sources. Possible topics include: the urban experience, slavery, the intellectual and cultural tradition, and the Civil Rights Movement. Students may repeat course for credit when topics change.

362. **Topics in History of the Modern Middle East**

Matzke

Four credits.

This course will discuss topics in the modern Middle East since the beginning of the 19th century. It is designed to provide an understanding of the historical roots of many present concerns. Topics may include reform efforts to meet the European challenge; the Middle Eastern experience with colonialism and imperialism; the rise of Arab nationalism, Jewish Zionism and nation-building; Iran’s place in the region and the Islamic Revolution there; development strategies of socialism and capitalism; the Israeli-Palestinian conflict; the impact of oil; modernism and traditional societies; Islam and its forms; and Iraq. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. First-year students with permission of instructor only.
365. **World War II-Home Fronts**  
Frohardt-Lane  
Four credits.  
This course studies the effects of World War II on home life and civilian society. The first half of the course focuses on the United States home front and how World War II transformed the lives of Americans, with particular emphasis on how race, class and gender shaped Americans’ experiences at home during the war. The second half of the course examines the World War II home front in the USSR, Great Britain, France, Germany and Japan. We will consider the extent to which World War II was a turning point in history, through the lenses of social, political, economic and environmental history. Some particular themes that we will explore throughout the semester include the use of propaganda to mobilize citizens for war and engage them in the war effort, the notion of sacrifice as essential to victory, and efforts to conserve scarce resources to support the military.

370. **Topics in American Social and Cultural History: Film**  
McGowan  
Four credits.  
This course will employ a number of approaches to the subject of film and history. Some of the more important emphases will be: 1) history of film as an entertainment medium and cultural phenomenon; 2) exploration of the relationship between social realities and cinema messages; and 3) the significance of specific genres, e.g. musical, westerns, screwball comedies, film noir, war films. Throughout, we will consider ways to view films, read about films and evaluate films for content of interest to historians.

371. **American Lives: Biographical and Autobiographical Approaches to American History**  
McGowan  
Four credits.  
From the Puritan era to the present, Americans have been self-conscious about their own personal identities and experiences and concerned about the relationship between individual lives and the national identity. This course will use autobiography, biography, literature, film and journalism to explore the connection between particular life stories and larger themes in American history such as: the definition and importance of success for Americans; the relative importance of the public and private in American life; the role gender, race, ethnicity and region have played in shaping individual stories and perceptions; and the mythic qualities often attributed to the life stories of Presidents. This course carries a heavy reading list and is discussion-based.

372. **Topics in Twentieth Century American History**  
McGowan  
Four credits.  
This course will focus intensively on a particular time period in twentieth century American history, for example, America between the Wars (1920-1940); the Progressive Era (1900-1920); or the 1980s. We will use a variety of sources and approaches to examine the political, social, and cultural significance of the period. Students may repeat course for credit when topics change.

375. **United States and Latin America**  
Bockelman  
Four credits  
The United States and its Latin American neighbors share much more than a common border or hemisphere. Their histories have been intertwined for nearly four centuries, producing frequent comparisons, contrasts, collaborations and conflicts. This course will examine the many-sided relationship between Latin America and the U.S. from the late 18th century to the present, with a focus on three themes: how North Americans and Latin Americans have
defined themselves in relation to one another; how diverging paths of economic development have stimulated various forms of U.S. imperialism and Latin American nationalism; and how global concerns have shaped the history of diplomatic relations within the western hemisphere. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

377. Dirty Wars in Latin America  
Bockelman  
Four credits.  
This course will explore the origins, process, and aftermath of military rule in twentieth-century Latin America, with emphasis on events in Argentina, Brazil and Chile during the 1970s and 1980s. Topics to be discussed include: the role of the armed forces in modern Latin American politics; guerrilla warfare and counterinsurgency operations; social life under the military; torture and disappearances; the struggle for human rights; and the on-going political and cultural effects of the “Dirty Wars” era. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

383. Mapping the World  
Bockelman  
Four credits.  
Every map is simultaneously a work of art, a product of geographical knowledge, and a record of how its maker and audience view the world—or would like to. This interdisciplinary course examines the many different kinds of maps that have been made throughout human history, emphasizing the relationship between their contents—places and spaces, projections, toponyms, symbols, illustrations, legends and borders — and the artistic, scientific, political and cultural contexts in which they were created and used. Topics rotate, but often include: what (and who) makes a map a map; the ancient and medieval roots of modern mapping; cartographic fantasies, silences and “lies”; mapmaking and the representation of nature; the role of maps and atlases in exploration, imperialism, nationalism and tourism; counter-mapping and alternative cartographies; and the rise of thematic mapping as an artistic challenge and scientific tool. Students also will learn how they can incorporate maps and digital mapping resources into research projects in history, art history and other humanities fields. Same as ART 383.

385. Natural Disasters in World History  
Frohardt-Lane  
Four credits.  
From flash floods to forest fires, Hurricane Katrina to the Zika virus, natural disasters make headlines for the devastation they cause. This course goes beyond the headlines and uses case studies to examine natural disasters from around the world in the last two centuries. How have societies tried to prevent and predict natural disasters? Do communities come together to support one another after an earthquake or other devastating event? Do they become divided over how to allocate government aid? What role have humans played in causing events that we often consider to be the work of nature? Using primary and secondary texts and images and films, students will investigate these questions and more. Same as ENV 385.

401. The Teaching of the Social Studies  
Staff  
Two credits.  
Methods of teaching courses in the social studies in the secondary schools. The course does not count toward the major. Required for teacher licensure in history and the social studies.
420. Reading and Research

Four credits.
This seminar allows students to pursue intensive study of a major historiographical problem and undertake a related historical research project. Themes will rotate, and the course may be taken more than once as long as the topic is different each time. In addition to history majors and minors, students in other fields who are interested in adding a historical dimension to their research projects and other studies are welcome to participate. Prerequisite: HIS 295, CTL 220, or consent of the instructor.

570. Classroom Presentation of Undergraduate Research

Variable credit course, 1-4 credits.
For exceptional students. The opportunity to prepare and present materials of study where appropriate in the regular courses of the department’s curriculum. This course is available only to those students who have demonstrated exceptional achievement in their undergraduate studies in history and are selected for eligibility by the department faculty at the end of the junior year of study or after the first semester of the senior year.

580. Classroom Leadership in the Discussion of History

Variable credit course, 1-4 credits.
For exceptional students. The opportunity to prepare and lead discussion of historical topics or themes where appropriate in the regular courses of the department’s curriculum. This course is available only to those students who have demonstrated a superior capacity for participating in and directing discussion of significant historical materials in a mature manner and who are selected for eligibility by the department faculty at the end of the junior year of study or after the first semester of the senior year.

590. Senior Seminar: Historical Research and Writing

Four credits.
Students will select and work on individual research projects and complete a paper by semester’s end. Required of all history majors. Open only to senior majors.

Interdisciplinary Studies

110. Topics in Interdisciplinary Studies

Variable credit course, 1-4 credits each semester.
Special subjects not covered by regular courses. This course may be repeated as the topic changes. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

113. Introduction to Community Engagement

One credit.
This course surveys the essentials of community engagement through the lens of local and global social justice. Students will explore the process of engagement through identification of community need; asset mapping; and models of service through personal, social and community constructs. Students will participate in a community engagement project during the semester. Grading is Pass-Fail.
114. **Service Learning Theory and Practice**  
Staff  
One credit.  
This course introduces students to the theory and pedagogy of service-learning. Students study the history of service-learning in secondary and post-secondary contexts, examine service-learning methods employed by educators in varied disciplines, and identify new approaches to advance this form of academic community engagement. Students will complete a comprehensive written project which applies service-learning theory and pedagogy to a specific course at Ripon College. Grading is Pass-Fail.

175. **Ignite Seminar**  
Staff  
Three credits.  
Develops skills in writing, discussion, presentation and content analysis at the college level by exploring a question or theme in an intensive, short term, integrated seminar. All Ignite Seminars include at least one paper subject to multiple revisions, a presentation and an exam. The seminar content is integrated with co-curricular programming to prepare students for continuing success in college. IDS 175 is only offered in summer as part of the Ignite Academic Immersion Program. Prerequisite: Invitation to the Ignite Academic Immersion Program.

200. **Topics**  
Staff  
Variable credit course, 2-4 credits.  
Designed to acquaint the student with a topic not covered by regular courses. Students can repeat the course for credit when the topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites.

201. **Business Management Projects**  
Staff  
One credit.  
This class, in coordination with interested faculty and student organizations, will focus on community projects that will teach business skills and/or improve the community. Students will assess community development needs and develop projects that will respond to those. Students who are not business majors are especially encouraged to participate in the class. S/U grading. Repeatable for credit; a total of two credits may be earned. Open to sophomores, juniors and seniors.

203. **Catalyst for Change I**  
Young/Messitte  
One credit.  
This course will focus on developing the leadership skills needed to be an effective change-agent in the community. Students will employ a social change model of leadership to design and implement community engagement projects, with the goal of having a marked impact on the local region. Prerequisite: Students must be members of the Presidential Leadership Program to take this course.

204. **Catalyst for Change II**  
Young/Messitte  
One credit.  
This course will focus on developing the leadership skills needed to be an effective change-agent in the community. Students will employ a social change model of leadership to design and implement community engagement projects, with the goal of having a marked impact on the local region. Prerequisite: Students must be members of the Presidential Leadership Program to take this course.
211. Journalism I  
Two credits.
Students are introduced to the fundamentals of journalism, including interviewing, research, news writing, editing, features, columns, ethics, legal constraints and criticism. The focus is on the practice of journalism, and students are graded on the quality of articles submitted.

212. Journalism II  
Two credits.
A continuation of Journalism I, with emphasis on advanced writing and editing, management, public policy, and political reporting. Prerequisite: IDS 211

213. Journalism Workshop  
One credit.
Workshop for students contributing to the College newspaper, to improve production quality and generate better content. Prerequisite: Students must be actively engaged in campus journalism in order to enroll.

225. Mentorship  
One credit.
Basic principles and practices for mentors at Communicating Plus. Grading is Pass-Fail.

300. Departmental Studies  
Two credit.
Special subjects in interdisciplinary studies not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

321. Ethics and International Affairs  
Four credits.
The central question addressed in this course is whether or not ethically motivated action in international affairs is possible. Do the absence of global consensus on moral values and the lack of a world government to impose sanctions mean that nations and trans-national organizations will engage in pursuit of political and economic interests without ethical restraints? The first part of the course will deal with contrasting arguments by political theorists on the role of morality in international relations. The second part focuses on specific issues in contemporary international relations that have moral implications such as: 1) new forms of international warfare; 2) international intervention inside nation-states to stop genocide; 3) the protection of human rights; 4) the legitimacy of international tribunals to punish crimes against humanity; and 5) economic justice for developing countries. Same as REL 321 and POL 383. Prerequisites: junior or senior standing, and POL 111 or 112 or 280.

322. Religion and Politics in Comparative Perspective  
Four credits.
An analysis of the interaction between religious beliefs and practices (Christian, Jewish, Islamic, Hindu and Buddhist), with political dynamics in various countries in the 20th century. Regional areas will include Central and South America, Sub-Saharan Africa, the Middle East, Southern Asia and the United States. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement
The Latin American and Caribbean Studies program is designed to provide students with a broad, interdisciplinary knowledge of the region's history, culture and contemporary affairs. This multifaceted focus emphasizes the diversity of peoples and complexity of issues, both past and present, that have given shape to the American experience beyond the borders of Canada and the United States. The Latin American and Caribbean Studies program also trains students to develop their independent and critical-thinking skills as they tie together multiple intellectual trends and engage in hands-on research in the region.

This interdisciplinary program allows for a variety of research, professional or academic specializations after graduation. The minor allows students with a major in another discipline to broaden their academic scope and demonstrate their varied interests and expertise to the widest range of future employers. Students who seek to pursue advanced study and research in a Latin American or Caribbean field after Ripon may wish to complement their minor with a major in a related subject area such as anthropology, economics, history, religion, foreign languages or politics and government.

**Requirements for a minor in Latin American and Caribbean Studies:**

22 credits total, fulfilling the following requirements:

1) Language ability in Spanish or French, as demonstrated by completion of either Spanish 211 and 280 or French 222 or higher-level courses in these languages.

2) The language requirement alternately can be fulfilled through completion of eight credits of coursework, taught in Spanish or Portuguese, on an approved off-campus study program based in Latin America, such as the Córdoba program at the Universidad Nacional de Córdoba in Argentina.

3) Twelve elective credits, chosen from the list below or approved by the program coordinator. For elective courses that include student-chosen projects, students are expected to focus their work on Latin America or the Caribbean. No more than eight credits can come from courses in a single department.

4) Two credits of LAC 498: Independent Study in Latin American and Caribbean Studies, taught as an independent study.

**Off-Campus Study:** Ripon College offers a variety of interesting study-abroad opportunities in Central America, South America and the Caribbean. These valuable
Courses of Study

research and study experiences are strongly recommended for students planning to
minor in Latin American and Caribbean Studies.

Such options should be explored in close consultation with the coordinator to
determine how courses taken off-campus can be used to satisfy the requirements for
the minor.

201. Introduction to Latin American and Caribbean Studies Staff

Four credits.
An introduction to the many approaches scholars use to study the diverse peoples and cultures
of Latin America and the Caribbean. Among other topics, students will learn about the pre-
colonial and colonial roots of modern Latin America; the politics of race, gender, and religion
in Latin American and Caribbean societies; the social conscience and aesthetic character of the
region’s art and literature; Latin American and Caribbean responses to the current “crisis” of
neo-liberal economics; and how new social movements are shaping the political direction of
the re-emerging Latin American left. May count toward the global and cultural studies
requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section
for more information.

Courses that can be used as electives:
• ART 278: Indigenous Art of the Americas
• ECO 361: Development Economics I (same as ENV 361)
• GLB 111: Global Political Culture or GLB 112: Global Political Economy
• HIS 268: Colonial Latin America: Conquerors, Rebels, and Slaves
• HIS 269: How Latin America Fell Behind: War and Upheaval, 1700-1900
• HIS 270: Modernizing Latin America: Revolution and Reaction Since 1900
• HIS 276: Latin America at the Movies: History & Film
• HIS 375: United States and Latin America, 1776 to the Present
• LAC 201: Introduction to Latin American and Caribbean Studies
• POL 272: Development and Change in Latin America
• REL 322: Religion and Politics in Comparative Perspective (same as IDS 322 and
  POL 375)
• SPA 308: Civilizaciones hispanas
• SPA 331: Voces hispanoamericanas I
• SPA 332: Voces hispanoamericanas II
• SPA 410: El cuento hispanoamericano
• SPA 415: La ficción de García Márquez
• SPA 420: El realismo mágico y otros realismos excéntricos
• SPA 425: Cuba: Su revolución y sus artes
• SPA 435: Julio Cortázar y sus perseguidores

Additional topical courses and seminars related to Latin America and the Caribbean
routinely are offered by the program faculty. Check the departmental course listings
each semester for more information.

Law and Society

Coordinator Steven Sorenson

The minor in law and society provides a network of courses designed to focus the
student’s attention on the role of law and legal structure in a human community. Law
is a primary means of ordering conduct and resolving social conflicts. The minor
seeks to help the student understand the function, nature and limits of law.

The minor is not intended as a pre-professional curriculum for the student interested in a career in law. Rather, it is designed for a wider audience interested in the entire question of the role of law and legal structures in a human community. Students interested in pre-professional preparation for a career in law should see the pre-law advisor.

**Requirements for a minor in law and society:**

- POL 212; 4 credits of independent study at the senior level in a topic in law and society in philosophy, politics and government, sociology or another appropriate department;
- 12 credits selected from among the following courses (no more than eight hours of elective courses from one department may be counted toward the minor):
  - ECO 332: Resource and Environmental Economics (same as ENV 332)
  - ENV 120: Environmental Studies
  - GLB 112: Global Political Economy (same as POL 112)
  - HIS 262: American Race Relations
  - PHL 241: Ethics
  - PHL 353: Human Rights (same as ENV 353)
  - POL 220: American Politics and Government
  - POL 412: Constitutional Law I: Landmark Decisions
  - POL 413: Constitutional Law II: The Bill of Rights
  - SOC 110: Introduction to the Sociological Imagination
  - SOC 306: Criminology, or other law-related courses, with the consent of the coordinator.

**Linguistics**

*See Foreign Languages and Cultures*

**Mathematical Sciences**

*Associate Professors* McKenzie R. Lamb (Chair),
David W. Scott, Andrea N. Young (On leave);
*Visiting Professors* Rajinder Mavi, Eran Crockett

**Communicating Plus - Mathematical Sciences:** Students completing a mathematics major will develop skills in the four Communicating Plus skills areas — written communication, oral communication, critical thinking and problem-solving — throughout all of their courses. Problem-solving is central to the study of mathematics, but it is not enough to solve problems: one must be able to explain one’s work. Consequently, critical thinking about mathematical processes and communication are also central in the mathematics curriculum. The senior capstone experience requires groups of students to work together to learn something in mathematics new to them. The group organizes presentations to teach the new concept to others in the seminar, and each individual prepares a paper addressing the same material in an expository manner. Thus, problem-solving and communication are at the heart of this capstone experience.

**Requirements for a major in mathematics:** MTH 206, 224, 305, 501-502, and at least 16 credits of mathematics courses numbered above 206 (excluding 401), at least eight of which are at the 400 level. Note that while MTH 201 and 202 are not a part of the major, MTH 202 is a prerequisite for several courses in the major,
particularly MTH 206 and 224. Students intending to study mathematics in graduate school should consult with their advisors about appropriate additional courses.

Requirements for a minor in mathematics: Eighteen credits in mathematics courses numbered 201 or higher (excluding MTH 401), at least one of which is numbered 224 or higher. A coherent program of courses should be designed in consultation with the minor advisor.

Students seeking the Early Adolescence/Adolescence (Middle/Secondary) license with a major in mathematics must fulfill the requirements for the math major and must take: MTH 361, either 120, 220 or 432, and 401.

Students seeking the Early Adolescence/Adolescence (Middle/Secondary) license with a minor in mathematics must fulfill the requirements for the math minor and must take: MTH 201-202, 224, either 361 or 422, and 401.

Students seeking middle level/secondary teacher licensure in mathematics also must complete the Educational Studies minor.

The department conducts a colloquium series. These meetings are open to all students; majors are expected to attend.

Many courses are offered on an alternate-year basis. Consult with the department to ascertain the current scheduling.

Departmental assistants are available to help students taking mathematics courses.

All prerequisites for mathematics courses must be passed with a grade of C- or better.

101. Introduction to Programming
Four credits.
Development and implementation of algorithms; structured program design; array manipulation; searching and sorting algorithms; file input and output.

120. Elementary Statistics
Four credits.
Descriptive and inferential statistics. Topics include probability distributions and sampling distributions, regression and correlation, point estimates and confidence intervals, and hypothesis testing.

123. Finite Mathematics
Four credits.
An introductory course in discrete mathematics. Topics selected from set theory, combinatorics, probability, matrices, linear programming, Markov chains, graph theory and other applications. Applications to the life sciences, social sciences and computer science.

130. Mathematical Thinking and Writing
Four credits.
An introduction to mathematics with special emphasis on the development of students' problem-solving and communication skills. Topics will be determined by the instructor.

143. Elementary Models
Four credits.
An exploration of polynomials, exponential and logarithmic functions, power functions and trigonometric functions, viewed as models of real phenomena. Fitting models to data.
Applications. **Prerequisite:** consent of the department.

### 146. Computer Modeling

Four credits.

An introduction to computer simulations and the use of computer models as an aid to decision-making. Examples will be drawn from a variety of disciplines. Students will explore and create models using various software, such as spreadsheets and GIS. Students will work on projects both individually and in small groups. Normally offered in alternate years.

### 150. Structure of Mathematics

Four credits.

A special section of MTH 130 particularly suitable for future teachers. Students will work on problem-solving and mathematical discourse while studying topics chosen to foster a clearer and deeper understanding of the mathematical concepts underlying the school mathematics taught particularly in grades K-8. Enrollment priority will be given to students certifying as teachers.

### 176. The Shape of the Universe

Four credits.

A question that has been posed by many mathematicians and astronomers is “What is the shape of our universe?” Since we cannot see the entire universe at once (nor can we travel to its outermost reaches), we need to develop some tools to understand and answer this question. This course will focus on ideas from the mathematical field of topology, mathematical modeling, and a bit of astronomy. This course also will focus on problem-solving and communication of solutions. Students should be prepared to use their imaginations to visualize that which we cannot see. Topics will include the fourth dimension, fractals, the nature of infinity, non-Euclidean geometry and construction of two-dimensional surfaces.

### 201, 202. Calculus I and II

Four credits each semester.

Analysis of the elementary functions of a single variable including differentiation and integration, techniques of integration, theory of limits, infinite series and applications. **Prerequisite for MTH 201:** MTH 143 or consent of the department. **Prerequisite for MTH 202:** MTH 201 or consent of the department.

### 206. Multiple Variable Calculus

Four credits.

Calculus of functions of several variables; parametric equations; polar coordinates; and applications. **Prerequisite:** MTH 202 or consent of the department.

### 220. Data Analysis

Four credits.

An integrated treatment of statistical procedures as tools for building and testing models of data. Topics include regression, correlation, analysis of variance and analysis of covariance. Normally offered in alternate years. **Prerequisite:** MTH 120.

### 224. Linear Algebra

Four credits.

Matrices, vectors, determinants, vector spaces, linear transformations and applications. **Prerequisite:** MTH 202 or consent of the department.
225. Introduction to Cryptography
   Four credits.
   This course will introduce students to the mathematics of historical and modern cryptography (for example, RSA public key cryptography) and the science of disguising information. 
   Prerequisite: MTH 202 or permission of the department.

232. Topics in Statistics
   Variable credit course, 1-4 credits.
   Advanced topics in statistics. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. This course may be repeated for credit when topics change.

246. Mathematical Modeling
   Four credits.
   An introduction to applied mathematics. Topics chosen by the instructor. With permission of the instructor, this course may be repeated for credit as MTH 346 and 446. Normally offered in alternate years. Prerequisite: MTH 201.

248. Discrete Mathematics
   Four credits.
   Topics chosen from set theory, combinatorics, recurrence relations, graph theory, Boolean algebra and applications. Familiarity with a programming language is desirable. Prerequisite: Any mathematics course numbered above 120, or consent of the department.

250. Topics in Mathematical Sciences
   Variable credit course, 2-4 credits.
   Designed to acquaint the student with contemporary topics that are not covered by regular courses. Students can repeat the course for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

290. Modeling Club
   Two credits.
   Continuous and discrete mathematical models are studied in preparation for the COMAP Mathematical Contest in Modeling. May be counted only once toward major or minor requirements. Grading is S-U.

300. Departmental Studies
   Variable credit course, 1-4 credits.
   Special subjects in mathematics not covered by regular courses. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. This course may be repeated for credit when topics change.

305. Introduction to Mathematical Proofs
   Four credits.
   This course provides a platform for success in proof-based courses by focusing on how to construct and communicate proofs both orally and in writing. Topics will include indirect reasoning, mathematical induction, elementary set theory, equivalence relations and basics of
limits and continuity. **Prerequisite: MTH 202 or its equivalent or permission of the department.**

323. **Number Theory**  
Four credits.  
An introduction to classical number theory with computer applications. Some experience in programming is helpful. Normally offered in alternate years. **Prerequisite: Consent of the department.**

331. **Probability**  
Four credits.  
Probability as a mathematical system, combinatorics, random variables and their distributions, limit theorems and applications. Normally offered in alternate years. **Prerequisite: MTH 202 or consent of the department.**

343. **Differential Equations**  
Four credits.  
Ordinary differential equations, numerical solutions and applications. Normally offered in alternate years. **Prerequisite: MTH 202 or consent of the department.**

361. **Geometry**  
Four credits.  
Topics from modern Euclidean geometry, transformations, projective geometry and non-Euclidean geometry. Normally offered in alternate years. **Prerequisite: Consent of the department.**

401. **Secondary Teaching Methods**  
Two credits.  
Mathematics education methods, materials and philosophies. **Prerequisite: Consent of the department.**

403. **Complex Analysis**  
Four credits.  
Complex numbers, elementary functions, analytic functions, integrals, and mappings. Normally offered in alternate years. **Prerequisites: MTH 206 and one mathematics course numbered 224 or higher.**

405. **Real Analysis**  
Four credits.  
Real numbers, metric concepts and continuity, differentiation and integration of real functions, infinite sequences and series of functions. Normally offered in alternate years. **Prerequisites: MTH 206 and one mathematics course numbered 224 or higher.**

412. **Topology**  
Four credits.  
An introduction to point-set topology. Normally offered in alternate years. **Prerequisite: One mathematics course numbered 224 or higher, but not 232, 246, 290 or 343.**
156 Courses of Study

422. Algebraic Structures

Four credits.
Groups, homomorphisms, isomorphisms, factor groups, rings, fields and polynomials. Normally offered in alternate years. Prerequisites: MTH 224 and one higher-numbered mathematics course.

432. Mathematical Statistics

Four credits.
Correlation and regression, sampling and estimation theory, testing hypotheses and applications. Normally offered in alternate years. Prerequisites: MTH 206 and 331.

501. Senior Seminar I

Two credits.
Selected topics presented by students. Expected of senior majors; open to others by consent of the department. Prerequisite: senior standing and one course in the department at the 300 level or higher, or consent of the department.

502. Senior Seminar II

Two credits.
Continuation of Senior Seminar I. Required of senior majors; open to others by consent of the department. Prerequisite: MTH 501 or consent of the department.

Military Science

Assistant Professor Cpt. Kyle Cordas
Instructor SFC James K. Wilson

The military science program consists of two phases. The first phase is introductory and consists of 100- and 200-level courses that are practical as well as being preparatory for the advanced phase. The first phase consists of MIL 151, 152, 251, and 252. All first-year and sophomore students are encouraged to take lower-level military science classes and acquaint themselves with military vocational opportunities without incurring a service obligation.

The second phase is designed to qualify upper-level students for commissioned officer roles in the Active Army, Army Reserve or the Army National Guard. The advanced phase consists of MIL 301, 302, 401 and 402. Enrollment in the advanced phase is limited to those students who qualify physically and academically and who have completed the introductory phase; Cadet Troop Leadership Training Course (CTLT - a 28-day, four-credit leadership camp attended between the sophomore and junior years); Basic Training and Advance Individual Training; or are currently in either the Army Reserve or National Guard. Advanced phase and ROTC scholarship students are paid $350/400/450/500 (freshman through senior) each month of the school year and participate in leadership laboratories and activities to include a field-training exercise each semester. The 32-day Cadet Summer Training Program (CST) is attended between the junior and senior years. All scholarship cadets receive full tuition, book allowance, and room and board remittance once contracted. Benefits continue through graduation. To be commissioned as an Army officer at graduation, one must successfully complete both phases of the program and fulfill the
professional education requirements that follow.

**Professional Education** Scholarship students are required to take one non-ROTC related course in military history. (Note: Each student schedules courses to satisfy the above requirement with the assistance and approval of the department chair.)

For specific information about ROTC scholarships, programs, camps, extracurricular activities and placement credit, contact the department.

Students considering the ROTC program should be aware that only 16 hours of credit for courses taken in military science may be counted toward the 124 required for graduation. Since more than 16 hours may be required for successful completion of this program, the total hours needed to graduate may accordingly rise above 124.

**Army ROTC scholarship financial assistance** Army ROTC scholarships are offered for four, three and two years and are awarded on merit to the outstanding qualified students who apply.

Four-year scholarships are awarded to students who will be entering college as first-year students. Three- and two-year scholarships are awarded to students already enrolled in college and to Army enlisted personnel. Students who attend the Cadet Troop Leadership Training Course (CTLT) of the two-year program may compete for two-year scholarships while at camp. Army Reservists may compete for a two-year Guaranteed Reserve Dedicated Forces Scholarship.

Each scholarship pays for college tuition and educational fees which are required of all students and provides a fixed amount for textbooks, supplies and equipment. Each scholarship also includes a graduated allowance every year the scholarship is in effect. The total value of a scholarship will depend on the cost of the tuition and other educational expenses at the college or university attended.

The Army gives special consideration for an Army ROTC scholarship to students pursuing degrees in nursing, engineering, the physical sciences and other technical skills currently in demand. Students who receive a scholarship will be required to attain an undergraduate degree in the field in which the scholarship was awarded.

Non-scholarship cadets in the advanced course also receive an allowance for each of the two years as well as pay for attending the five-week CST. Students attending CTLT prior to the two-year program also receive pay for this camp. All ROTC scholarship winners also receive an additional Ripon College scholarship up to the amount of tuition, plus on-campus housing and double occupancy board.

**Requirements for a minor in military leadership:** 21 credits including MIL 151, 152, 251 and 252, or for students who have completed basic training or the Leaders Training Course, MIL 301 and 302; CMM 215; one of the following courses: HIS 242, HIS 282, HIS 351, or another history course with department approval; one of the following courses: ANT 110, SOC 110, ECO 211, GLB 112, POL 280, PSC 110, or a third semester foreign languages course; and one of the following courses: HIS 362, POL 343 or POL 385.

**151. Leadership and Personal Development**

Two credits.

MLS 151 introduces students to the personal challenges and competencies that are critical for effective leadership. Students will learn how the personal development of life skills such as goal-setting, time management, physical fitness and stress management relate to leadership, officership and the Army profession. The focus is on developing basic knowledge and comprehension of Army leadership dimensions while gaining a big picture understanding of
the ROTC program, its purpose in the Army, and its advantages for the student. The lab provides basic instruction on squad movement techniques and the six squad tactical missions of patrolling, attack, defense, ambush, reconnaissance and squad battle drills. Additionally, students learn basic map reading, first aid, physical fitness and military formations to include basic marching techniques. The lab includes a weekend field trip each semester to Fort McCoy, Wisconsin.

152. Introduction to Tactical Leadership

Two credits.
MIL 152 overviews leadership fundamentals such as setting direction, problem-solving, listening, presenting briefs, providing feedback and using effective writing skills. Students will explore dimensions of leadership values, attributes, skills and actions in the context of practical hands-on and interactive exercises.

The lab continues to provide basic instruction on squad movement techniques and the six squad tactical missions of patrolling, attack, defense, ambush, reconnaissance and squad battle drills. Students are introduced to the operations order format. Additionally, students continue to develop basic map reading, physical fitness and basic marching techniques. This lab includes a weekend field trip.

251. Innovative Team Leadership

Three credits.
MIL 251 explores the dimensions of creative and innovative tactical leadership strategies and styles by examining team dynamics and two historical leadership theories that form the basis of the Army leadership framework. Aspects of personal motivation and team building are practiced as well as planning, executing and assessing team exercises and participating in leadership labs. The focus continues to build on developing knowledge of the leadership values and attributes through understanding Army rank, structure and duties as well as broadening knowledge of land navigation and squad tactics. Case studies will provide a tangible context for learning the Soldier's Creed and Warrior Ethos as they apply in the contemporary operating environment.

The lab applies basic leadership theory and decision-making during practical exercises in a field environment. Students continue to develop basic map reading, physical fitness and basic marching techniques. This lab includes a weekend field trip. Prerequisite: MIL 151.

252. Foundations of Tactical Leadership

Three credits.
MIL 252 examines the challenges of leading tactical teams in the complex contemporary operating environment (COE). This course highlights dimensions of terrain analysis, patrolling and operation orders. Continued study of the theoretical basis of the Army leadership framework explores the dynamics of adaptive leadership in the context of military operations. MIL 252 provides a smooth transition into MIL 301. Cadets develop greater self-awareness as they assess their own leadership styles and practice communication and team building skills. COE case studies give insight into the importance and practice of teamwork and tactics in real-world scenarios.

The lab continues to apply basic leadership theory and decision-making during practical exercises in a field environment. Students continue basic map reading, physical fitness and basic marching techniques. This lab includes a weekend field trip. Prerequisite: MIL 152.
301. Adaptive Team Leadership
Four credits.
Students are challenged to study, practice and evaluate adaptive team leadership skills as they are presented with the demands of the ROTC Leader Development and Assessment Course (LDAC). Challenging scenarios related to small-unit tactical operations are used to develop self-awareness and critical-thinking skills. Students will receive systematic and specific feedback on their leadership abilities. The overall objective of this course is to integrate the principles and practices of effective leadership, military operations and personal development in order to adequately prepare students for the summer CST.

The lab reinforces small-unit tactical training while employing the troop-leading procedure to accomplish planning and decision-making. Students continue to learn basic map reading, physical fitness and marching techniques. This lab includes a weekend field trip. Prerequisite: department consent.

302. Leadership in Changing Environments
Four credits.
Students will be challenged to study, practice and evaluate adaptive leadership skills as students are presented with the demands of the ROTC CST. Challenging scenarios related to small-unit tactical operations are used to develop self-awareness and critical-thinking skills. Students will receive systematic and specific feedback on their leadership abilities. The overall objective of this course is to integrate the principles and practices of effective leadership, military operations and personal development to adequately prepare for the summer CST.

The lab continues reinforcing small-unit tactical training while employing the troop-leading procedure to accomplish planning and decision-making. Students also continue basic map reading, physical fitness and basic marching techniques. This lab includes a weekend field trip. Prerequisite: department consent.

401. Developing Adaptive Leaders
Four credits.
MIL 401 develops student proficiency in planning, executing and assessing complex operations, functioning as a member of a staff and providing performance feedback to subordinates. Students are given situational opportunities to assess risk, make ethical decisions, and lead fellow ROTC cadets. Lessons on military justice and personnel processes prepare students to make the transition to becoming Army officers. MIL 401 students will lead cadets at lower levels. Students' classroom and battalion leadership experiences are designed to prepare students for their first unit of assignment. Students will identify responsibilities of key staff, coordinate staff roles and use battalion operations situations to teach, train and develop subordinates. The overall purpose of this course is to provide students guidance and opportunities in planning, analyzing, evaluating and leading ROTC battalion operations in order to develop as an adaptive leader.

The lab sharpens the students' leadership skills as they perform as cadet officers. Students develop and possess the fundamental skills, attributes and abilities to operate as competent leaders in a cadre battalion. They must confidently communicate to subordinate cadets their preparedness to shoulder the responsibilities entrusted to them. This lab includes a weekend field trip. Prerequisite: department consent.

402. Leadership in a Complex World
Four credits.
MIL 402 explores the dynamics of leading in the complex situations of current military operations in the contemporary operating environment (COE). Students will examine differences in customs and courtesies, military law, principles of war and rules of engagement.
in the face of international terrorism. Students also explore aspects of interacting with non-
government organizations, civilians on the battlefield and host-nation support. The course
places significant emphasis on preparing students for branch-specific officer training and their
first unit of assignment. It uses case studies, scenarios and “What Now, Lieutenant?” exercises
to prepare students to face the complex ethical and practical demands of leading as a
commissioned officer in the United States Army.

The lab continues to sharpen the students’ leadership skills. Students normally change
leadership positions to hone their skills, attributes and abilities as leaders. Again, they must
confidently communicate to subordinate cadets their preparedness to shoulder the
responsibilities entrusted to them. This lab includes a weekend field trip. Prerequisite:
department consent.

Music

Professors Kurt R. Dietrich (Chair), Sarah Mahler Kraaz;
Assistant Professor John C. Hughes,
Adjunct Instructors Maria K. Dietrich, Mishan Han,
Melissa M. Huempfner, Cayla Rosche, Matthew Miller, Dylan Chmura-Moore,
William A. Nelson, Sandra J. Polcyn, Charles Stephan, Todd Truesdell

Departmental Mission Statement: The Ripon College Department of Music
works with students as individuals and in groups to develop their performance
skills and knowledge of music theory, history and literature. Music students share a
personal relationship with faculty whose work as teachers, performers and scholars
keeps them and their students in touch with the realities of today's musical world. As
a result of their lessons learned in classes, individual lessons and ensembles,
graduates of the program are well-prepared for graduate study in music, teaching
in K-12 schools, or continued avocational participation in music as members of
ensembles or as individual performers

Communicating Plus - Music: Studies in music embrace many ways of learning
and communicating. Music theory courses primarily are concerned with how music
works. Students in these courses learn appropriate terminology and techniques
and use them to analyze and compose music. Music history courses involve direct
experience with the music of different historical periods and styles. Also important
to this study are the composers who created the music and the cultures in which
they worked. Thus, in music history courses, students write about and discuss the
techniques, stylistic features and historical contexts of Western music. In
conducting courses, students learn to communicate and interpret a composer's
musical ideas to performers and audiences. This is accomplished by means of
gestures and verbal directions. Music education classes are concerned with how to
teach music — performance, style, history and social aspects — in public schools.
Applied music, as taught individually in lessons or in ensembles of a wide variety of
sizes, teaches students to communicate directly through music in a language that is
beyond either the written or spoken word. The multiplicity of learning and teaching
strategies and experiences in music courses reflects the diverse nature of music as an
art and discipline.

Requirements for a major in music: 42 credits in music, including MUS 111,
121, 221; three of the following: MUS 330, 331, 332, 333; MUS 500; seven
credits in performance (MUS 150 or 190); and additional credits, with no more than
six credits in MUS 250, from courses numbered 200 or higher. Students who can
demonstrate adequate proficiency in music theory may be excused from MUS 111.
All music majors must pass a proficiency examination in piano. The examination may
be taken any time before the second semester of the senior year. If the examination is
not passed upon entrance into the program, the student will take either MUS 050.08
or MUS 160 until the required proficiency is achieved. Music majors must pass five
semesters of MUS 010 as well. Students intending to major in music should complete
MUS 221 by the end of the sophomore year.

Students wishing to be licensed by the Wisconsin Department of Public
Instruction to teach music in public schools must have at least 50 credits in music,
with an appropriate methods course (MUS 302, 304 or 306) in place of MUS 500.
Courses for music education students must be carefully worked out with an advisor
to ensure that standards established by the Wisconsin Department of Public
Instruction are met. Contact the education department for additional licensure
requirements. The three basic course outlines for music education licensure are the
following:

  **Instrumental licensure**: MUS 111 and 121, 221, 302, 334, 335, 336, three of the
  following: (MUS 330, 331, 332, 333), MUS 150 (four credits minimum), MUS 260
  sections 1, 3 and 5, and MUS 190 sections 5, 6 and 7 (eight credits total).

  **Choral licensure**: MUS 111 and 121, 221, 304, 334, 335, 336, three of the
  following: (MUS 330, 331, 332, 333), MUS 190 sections 3 and 4 (six credits total),
  MUS 260 sections 2 and 4, and 150 sections 8 (two credits minimum) and 16 (four
  credits minimum).

  **General music licensure**: MUS 111 and 121, 221, 306, 334, 335, 336, three of
  the following: (MUS 330, 331, 332, 333), MUS 150 sections 8 (two credits
  minimum) and 16 (four credits minimum), MUS 190 sections 3, 4 and 7 (six credits
  total), and MUS 260 sections 2 and 4.

**Requirements for a minor in music**: 22 credits in music, including MUS 111 and
121; eight credits selected from MUS 330, 331, 332, 333; three credits in
performance (MUS 150 or 190), and three elective credits chosen from MUS 300,
304, 334, 335, 336, or a styles course not previously taken. Music minors must pass
three semesters of MUS 010.

**010. Performance Seminar**

  **Staff**

  No credit.

  Attendance as auditor and/or participant at six music department concerts including one
  student recital. Duplications for concert attendance required for certain courses will be granted
  with permission of the instructor. Five semesters with the pass grade are required for the
  music major and three for the music minor. Grading is Pass-Fail.

**103. Group Jazz Improvisation**

  **Dietrich**

  One credit.

  Exploration of the traditional elements of improvising (chords, scales, rhythm, etc.) in various
  jazz styles. The class will work on improvising in the context of standard jazz compositions
  and chord progressions, with a “live” rhythm section. Students must have some proficiency
  on an instrument. Intended primarily for students in MUS 190.05 (Jazz Ensemble). May be
  repeated, but only four credits may be counted toward graduation. Grading is S-U.
Courses of Study

111. Foundations in Music  Hughes

Three credits.
The basic elements of the music (melody, harmony, rhythm) introduced by means of lectures and workbook exercises. The development of reading and listening skills also is emphasized. Designed as a gateway course for both majors and non-majors, this course is a prerequisite for MUS 121 and for non-majors who wish to take music styles courses at the 200 level.

112. Selected Topics in Music  Dietrich/Kraaz

Variable credit course, 3-4 credits. May be repeated. Studies in music not covered by regular courses. Designed for the non-major. MUS 111 or some musical experience desirable. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

121. Music Theory I  Hughes

Four credits.
A continuation of MUS 111 with the study of music as found in the standard repertoire of the Western classical tradition. Melodic and harmonic elements are analyzed and practiced. Sight-singing, dictation, keyboard harmony and part-writing are studied, and formal structural principles such as counterpoint and sonata form are introduced. Designed for prospective music majors and minors. Prerequisite: MUS 111.

200. Topics in Music  Staff

Variable credit course, 2-4 credits. May be repeated. Special subjects in music not covered by regular courses. Sometimes taught in conjunction with MUS 300. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

221. Music Theory II  Dietrich

Four credits.
A continuation of MUS 121 with the study of music as found in the standard repertoire of the Western classical tradition. Melodic and harmonic elements are analyzed and practiced. Sight-singing, dictation, keyboard harmony and part-writing are studied, and formal structural principles, such as counterpoint and sonata form, are introduced. Designed for prospective music majors and minors. Prerequisites: MUS 111, MUS 121.

Four credits. Offered in 2018-19 and alternate years. The history of Western music from the early Christian era to 1600. Non-majors may enroll in MUS 230. Majors and minors must take MUS 330. Prerequisite: MUS 111.

231/331. History of Baroque and Classical Musical Styles  Kraaz

Four credits. Offered in 2019-20 and alternate years. The history of Western music from 1600 until 1827. Non-majors may enroll in MUS 231. Majors and minors must take MUS 331. Prerequisite: MUS 111.
### 232/332. History of Romantic Musical Styles

Dietrich

Four credits. Offered in 2019-20 and alternate years.
The history of Western music from the 1820s through the turn of the 20-century. Non-majors may enroll in MUS 232. Majors and minors must take MUS 332. **Prerequisite:** MUS 111.

### 300. Departmental Studies

Staff

Four credits.
Special subjects in music not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. Designed for music majors and minors.

### 302. Instrumental Methods

Polcyn

Four credits. Offered in 2019-20 and alternate years.
Methods, administration, curriculum planning, marching band procedures and instrument repair, grades K-12. Recommended for sophomore or junior year.

### 304. Choral Methods

Hughes

Four credits. Offered in 2018-19 and alternate years.
Methods, administration and curriculum planning for those who plan to teach choral music in the public schools, grades 7-12. Recommended for sophomore or junior year.

### 306. General Music Methods

Staff

Four credits. Offered in 2018-19 and alternate years.
Materials, methods and curriculum planning for those planning to teach general music in the public schools, grades K-12. Recommended for sophomore or junior year.

### 333. History of Twentieth-Century Musical Styles

Staff

Four credits. Offered in alternate years.
The history of Western art music from the end of Romanticism through the present. **Prerequisite:** MUS 111.

### 334. Conducting I

Hughes

Two credits. Offered in 2018-19 and alternate years.
Basic baton technique, orientation to rehearsal techniques and development of proficiency in typical public school-level music. Recommended for sophomore or junior year. **Prerequisite:** MUS 121.

### 335. Conducting II

Dietrich

Two credits. Offered in 2018-19 and alternate years.
Literature, score study and advanced rehearsal techniques. Applied conducting with college instrumental ensembles. Recommended for sophomore or junior year. **Prerequisite:** MUS 334.

### 336. Orchestration

Staff

Two credits. Offered in 2019-20 and alternate years.
Techniques of arranging music from a variety of sources for choral and instrumental ensembles. **Prerequisite:** MUS 122.
Courses of Study

500. Senior Project

Two credits.
A culminating effort such as a full recital or research project for music majors only.

Applied Music

**Tutorial Instruction:** Not all of the areas will be given in any semester. The offerings will be dependent upon student interest and the availability of staff. Students may not take more than two sections of private lessons simultaneously except by special permission of the department chair.

For students who are not music majors or minors, there is a fee of $260 per semester for a half-hour lesson weekly. Students who take private lessons without fee but do not complete the music major or minor at Ripon will be charged retroactively. Music majors or minors who drop private lessons will be billed for lessons at the same rate as non-majors.

The sections below are offered as MUS 050, 150 or 250.

050. Private Lessons

No credit.
Weekly half-hour lessons for students without previous training in a given area. Although the expectation is that students will progress to the 150 level, they may take more than two semesters of the same section of MUS 050 with permission of the instructor. Grading is Pass-Fail.

150. Private Lessons

One credit.
Weekly half-hour lessons for students with previous training. Normally three years of earlier private study will be sufficient to qualify a student for credit. Students registering for MUS 150 for the first time must audition before the music department faculty. Students who have previously received credit for a given section at Ripon College will register for the same section without audition. Hearings are required at the end of each semester as described in the Music Department Handbook. May be repeated.

250. Private Lessons

Two credits.
Weekly hour lessons for music majors intending to present a senior recital as their capstone experience. The semester of the senior recital, students will register for MUS 440 in place of MUS 250. May be repeated. **Prerequisites:** two semesters of MUS 150 and a special audition before the music department faculty.

**Section**

1. Trumpet. Dietrich
2. French Horn. Dietrich
3. Trombone. Dietrich
4. Euphonium. Dietrich
5. Tuba. Dietrich
6. Guitar. Miller
7. Improvisation. Dietrich
10. Violin. Staff
11. Viola. Staff
12. Cello. Stephan
13. String Bass. Stephan
14. Voice. Hughes/Staff
15. Flute. Huempfner
16. Oboe. Polcyn
17. Clarinet. Nelson
10. Organ. Kraaz  
11. Percussion. Staff  
22. Composition. Kraaz

Improvisation prerequisite: MUS 150 in another section. Organ prerequisite: MUS 150, section 8 or permission of instructor. Composition prerequisites: MUS 121 and 122.

Class Instruction: Not all of the areas of instruction will be given in any semester. The offerings will be dependent upon student interest and the availability of staff.

160. Keyboard Proficiency M. Dietrich

One credit.
For music majors who have not passed keyboard proficiency requirements. Instruction is based on scales, arpeggios, melody harmonization, score reading and sight reading at the keyboard. May be repeated. Grading is Pass-Fail.

190. Performance Organizations

One credit.
Membership in the following music organizations is open to all students on the basis of audition. Instruments are available on loan. May be repeated, but only eight credits may be counted toward graduation. Grading is Pass-Fail, except for Section 4, Chamber Singers, which is letter graded.

- Section 1. Chamber Music Ensemble Staff
- Section 3. Choral Union Hughes
- Section 4. Chamber Singers Hughes
- Section 5. Jazz Ensemble Dietrich
- Section 6. Orchestra Chmura-Moore
- Section 7. Symphonic Wind Ensemble Dietrich

260. Techniques

Three credits. Sections 1, 3 and 5. Two credits. Sections 2 and 4.
Primarily for music majors seeking certification as public school music teachers. Some of these courses are required for the various types of certification.

- Section 1. Brass and Percussion Techniques Dietrich/Truesdale
- Section 2. Guitar Techniques Miller
- Section 3. String Techniques Staff
- Section 4. Vocal Techniques Hughes
- Section 5. Woodwind Techniques Polcyn

National Security Studies
Associate Professor Lamont Colucci (Coordinator)

The minor in national security studies provides a focused study of national security issues in an interdisciplinary context. It is designed for those students who wish to pursue in-depth study of issues such as security policy, intelligence issues, energy security policy, economic/trade security issues, terrorism, WMD and policy, and politico-military affairs. It also will be useful for students interested in professionally related careers in governmental or non-governmental organizations.

Requirements for a minor in national security studies: 22 credits chosen from courses listed below (12 credits required, two credits of capstone thesis and eight
credits elective). The two credits of capstone thesis will be on a topic concerning contemporary national security conducted in an appropriate department such as politics and government, philosophy, religion, history or economics. This project normally will consist of a 20- to 25-page paper and a 20-minute oral presentation approved by the national security studies advisor. Students electing a major in politics and government may count no more than eight credits hours from the Department of Politics and Government toward a national security studies minor. Politics majors must take REL 321.

Required Courses for all:
POL 343: U.S. National Security Policy
POL 550: National Security Capstone

Required: 8 credits chosen from the following:
POL 381: United States Foreign Policy
POL 385: Terrorism and Intelligence
REL 321: Ethics and International Affairs (same as IDS 321 and POL 383)

Elective: 8 credits chosen from the following:
ANT 222: Anthropology and Contemporary Global Issues
ECO 361: Development Economics I or ECO 461: Development Economics II
ECO 452: International Economics
HIS 282: World History II (same as GLB 282)
HIS 351: World War I: Causes, Conduct and Consequences (additional offerings in history dealing with diplomacy, war and politics also will be considered)
HIS 362: Topics in History of the Modern Middle East
PHL 353: Human Rights (same as ENV 353)
POL 380: Topics in International Politics: International Relations
REL 322: Religion and Politics in Comparative Perspective (same as IDS 322 and POL 375)

Any two military science courses depending on offering with the consent of the national security studies advisor and ROTC commander. Courses must deal with military policy, history, organization or roles.

Other courses related to national security and security studies as approved by the program coordinator.

Philosophy and Religion
Professor Brian H. Smith (Religion, Chair);
Associate Professor Paul F. Jeffries (Philosophy);
Visiting Professor Steven A. Miller (Philosophy);
Adjunct Professor David F. Brusin (Religion)

Departmental Mission Statement: The Department of Philosophy and Religion aims to enable students to better pursue their own paths to wisdom. They will encounter the best that has been thought and said about basic human concerns throughout civilization by engaging some of the major philosophical, religious and moral traditions of the world. They will be encouraged to see the relevance of these
ideas and practices so that they engage conceptual, social and religious concerns with greater coherence, perspective and responsibility. Most importantly, students should be able to see the relevance of these ideas and use the skills developed to (1) respond to new problems and (2) become responsible citizens who can better relate to the diversity of thought, both religious and non-religious, found in the contemporary world.

**Philosophy**

**Communicating Plus - Philosophy:** Philosophy majors develop skills in the four Communicating Plus skills areas — written communication, oral communication, critical thinking and problem-solving. The central activity of doing philosophy is solving philosophical problems — problems occurring when things don’t make sense because conflicting ideas seem equally reasonable. Developing an understanding of philosophy as a problem-solving activity is the main thrust of the introductory course, with other courses concentrating on particular domains of philosophical issues. Writing is given major attention in all classes because it is especially valuable for describing problems and showing how creative ideas might be applied to solve them. Since the structure of philosophical problems is the same as a dialogue, participation in dialogues is relied on and cultivated in the discussion format of virtually all classes. The philosophy program culminates in a capstone experience in which students develop their own philosophy and dialogue with others in a public presentation of part of that philosophy.

**Requirements for a major in philosophy:** PHL 320, 591, 592 and REL 442; one 300-level additional philosophy course; one religion course at the 200 level or above; and three other courses in philosophy for a total of 32 credits.

**Requirements for a minor in philosophy:** PHL 320; at least one additional course in philosophy at the 300 level; one religion course, and 8 more elective credits in other philosophy courses for a total of 20 credits.

120. **Introduction to Philosophy** *Staff*

Four credits.
Topics may vary from section to section. Sample topics: contemporary moral problems; the meaning of life; philosophy and technology. Consideration of the nature of philosophical thinking, especially with respect to philosophical problems and the role of reasoning in identifying and responding to such problems. The relationship of these problems to one’s ideas of reality, knowledge and value is approached with a goal of developing one’s skills in reading and writing arguments.

175. **Introduction to Philosophy: Variable Topics** *Jeffries/Miller*

Variable credit course, 1-4 credits.
A slightly abridged version of PHL 120: Introduction to Philosophy for first-year students only. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.
200. **Topics**

Variable credit course, 1-4 credits.

Special subjects in philosophy not covered by regular courses. Sometimes taught in conjunction with PHL 300. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

---

202. **Business Ethics**

Jeffries

Four credits.

Consideration of varying topics which involve philosophical questions arising in an economic context, such as: How does business serve individual freedom? Do pressures of economic competition affect one's freedom and responsibilities? The course will identify prominent alternative ethical criteria and consideration of their role in moral reasoning, with application of this reasoning to case studies. Open to sophomores, juniors and seniors.

---

222. **Religion, Different Religions, and the Truth**

Staff

Four credits.

An examination of the nature of religion and the characteristic philosophical problems which emerge in trying to understand the nature and possible existence of the divine and the importance of that for our lives. Critical insight and appreciation will be developed for at least one major Western and one major Eastern religious tradition, along with attention to the problems which result when we become aware of conflicting religious viewpoints. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

---

241. **Ethics**

Jeffries

Four credits.

Examination and development of the major Western historical and contemporary ethical theories, with particular attention to the issues of ethical relativity, ethical motivation and reasoning about ways in which commitment to ethical norms can be supported. Examination of those relationships of conflict and cooperation among individual human beings and between individuals and society that we call moral relationships. Attention will be paid to comparing major approaches in Western and Eastern ethical thought with regard to issues of motivation and evaluation of conduct, with opportunities to examine applications of ethical theory to actual moral issues and problems in contemporary life.

---

243. **Philosophy and the Environment**

Jeffries

Four credits.

Exploration of the relationship of human beings to the natural world. Consideration of the conflicting claims about how we are interconnected with the rest of nature and also separate from it. An examination of such contested issues as what responsibilities, if any, we have to the rest of nature and how we can wisely weigh competing claims about natural resources. Same as ENV 243.

---

245. **Professional Ethics**

Jeffries

Four credits.

An exploration of philosophical issues, with a special emphasis on ethics, as they apply in several professional settings. The course provides a basic overview of standard approaches to ethics and an examination of the concept of a profession. In addition to this theoretical
background, philosophical and ethical issues from specific professions will be studied, primarily from the fields of medicine, law and research at the professional level.

251. Introduction to Philosophy of Science

Four credits.

This course explores the philosophical elements involved in the study of science. Through the examination of historical and contemporary examples, a variety of philosophical concepts will be explored including issues such as the definition of a “science,” the difference between science and pseudo-sciences, the nature of scientific theories, the processes of explanation and justification of scientific theories. The course will also consider how philosophy can illuminate debates about central questions in some of the sciences such as what is a natural law and what is a species. While there is no official prerequisite for the course, it may be helpful to have at least one course in philosophy and/or in a scientific discipline broadly construed. **Prerequisite:** one course in philosophy and/or one course in the natural sciences or instructor’s consent.

281. Human Nature

Four credits.

Exploration of fundamental ideas about ourselves. An examination of different ideas about the nature of the self (including its nonexistence) and the reasoning behind them. The course also will examine different viewpoints with respect to whether we are capable of genuinely free choice, whether we are basically good, whether there is a fixed and common human nature and whether we are ultimately independent as individual persons.

300. Departmental Studies

Variable credit course, 1-4 credits.

Special subjects in philosophy not covered by regular courses. Sometimes taught in conjunction with PHL 200. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. **Prerequisites:** three hours of credit in philosophy and consent of the instructor.

308. Logic

Four credits.

Expansion of the logical techniques introduced in PHL 120, and an examination of philosophical issues associated with the development of logic, to include the relationships between ordinary language and logical symbolism, the development of inference rules and proof techniques, and the nature of the problems of consistency and completeness within a system of axioms. **Prerequisite:** four credits in philosophy.

320. History of Philosophy: Major Philosophers

Four credits.

Examination of the history of philosophy by examining major philosophers from across several philosophical periods. Some key primary texts will be studied, along with attention to major issues, thinkers and ideas in the development of philosophy as well as to the question, “What does it mean to say that philosophy has a history?” **Prerequisite:** Two courses in Philosophy or consent of the instructor.
Courses of Study

353. Human Rights  
Four credits.  
An examination of the concept of human rights in historical perspective in both Western and Eastern thought. Also, an exploration of some contemporary issues in human rights, including the rights of minority peoples and the relationship between human rights and the natural environment. Same as ENV 353. Prerequisite: four credits in philosophy.

390. Reality and Knowledge  
Four credits.  
An introduction to the ways in which philosophers have understood the fundamental nature of reality (metaphysics) and how, if at all, we might come to know about it (epistemology). Classical and contemporary efforts from Western and Asian traditions will be examined. Prerequisite: two courses in philosophy or approval of instructor.

591. Senior Statement I  
Two credits. Fall semester.  
Students work at analyzing a particular philosophical problem of interest to them (fall) and on articulating their own systematic philosophy (spring). Attention will be given to consistency and coherence, the latter in the sense of an integration of the various aspects of philosophy. Reflective critiques of alternative positions will be expected, as well as an awareness of historical roots of one’s ideas. Prerequisites: 12 credits in philosophy and senior standing.

592. Senior Statement II  
Two credits. Spring semester.  
Students will build upon the work begun in the fall semester with a focus on both developing one’s own philosophical commitments and developing a presentation to be delivered publicly to the Ripon College community at the end of the semester. Prerequisite: PHL 591.

Religion

Requirements for a major in religion: 32 credits including REL 121, 122, 221, 442, at least one of the indicated philosophy courses at the 200-level or above (PHL 202, 241, 281, 320, 353) and the senior capstone seminar (550, or 551 and 552). An additional 8 credits may be constituted from any other religion or philosophy courses or from the following courses in other departments: ANT 314, CLA 100/310, 220/320; HIS 221, 334; SOC 303, 309.

Requirements for a minor in religion: 20 credits including REL 121 or 122, 221, 442 and one philosophy course. The other 4 credits may be constituted from any other religion or philosophy courses or from the following courses in other departments: ANT 314; CLA 100/310, 220/320; HIS 221, 334; SOC 303, 309.

121. Introduction to the Hebrew Scriptures  
Four credits.  
This course is an introduction to the collection of literature known as The Hebrew Bible. No prior knowledge and no particular religious commitments are presumed. Actually, we will put all religious preconceptions and beliefs aside as we try to confront the biblical text on its own terms. Our central concern is not to arrive at a definitive understanding of the texts we examine; rather, it is to appreciate the genius and timelessness of the biblical writers and of biblical themes and motifs. There is a vast and growing body of scholarship focused on
analyzing and interpreting the Hebrew Bible from very different points of view. We will familiarize ourselves with some of these trends, and consider the arguments of some of these biblical scholars. Still, our primary objective will remain the same: to understand and appreciate the perspectives of the biblical writers, to do our best to grasp what they were trying to say, and to allow ourselves to respond to it, each in his or her own way. The Department of Religion thanks the Jewish Chautuaqua Society for its support of this course.

122. **Introduction to the Christian Scriptures**  
Smith  
Four credits.  
The main foci of the course will include the major themes in Jewish culture and religion in the centuries just before and after Jesus’ life, the method and contributions of historical criticism to an understanding of the Bible and the structure and theology of the Acts of the Apostles, the Synoptic Gospels (Matthew, Mark, and Luke), the Gospel of John, selected Pauline epistles (I Corinthians, Galatians and Romans), and Revelation.

204. **“Am I my brother’s keeper?”**  
Brusin  
How to Answer Cain’s Question  
Four credits.  
“And Cain rose against Abel his brother and killed him” [Genesis 4:8]. Why? And why do so many people act violently against others? The story of Cain and Abel is a profoundly contemporary story, specifically about family violence, something so counter-intuitive yet too often the lead story of the day’s news. The story is also about the loss of self-control, posing the question of our ability to act freely and rationally when passions crouch like demons within us. In this sense, the story presents a direct challenge: can we control ourselves or are we doomed to succumb to our violent impulses? And, of course, the biblical story is about sibling rivalry, an archetype that suggests a frightening reality: the first homicide is fratricide. It is hardly surprising that as each generation struggles with these issues, it often revisits the paradigmatic story of Cain and Abel. Our study will include the attempts of biblical scholars to understand and interpret the story. We will also view and consider Elia Kazan’s film, East of Eden, based on John Steinbeck’s novel of the same name; finally, we’ll examine several classic artistic depictions of the story, as well as some of the many poems written in response to the deed itself or its consequences.

210. **Joseph: A Biblical Psychological Thriller**  
Brusin  
Four credits.  
We will engage in a close reading of a very complicated and subtle text, the biblical story of Joseph [Genesis 37 – 50], paying careful attention to critical biblical motifs and themes such as dreaming and dream-interpretation, sibling rivalry, honesty, real power, and impotence. The course will challenge students to approach the Joseph narrative open to the treasures that come through a fresh encounter with a biblical text unencumbered by religious assumptions or baggage. Like other biblical stories, the Joseph narrative is a composite of multiple authors. Yet it is also the longest, most intricately constructed, integrated and sustained of all the patriarchal and matriarchal histories. Our primary objective will be to make sense of the psychological and dramatic twists and turns Joseph’s life takes in his relations with his brothers and father, his Egyptian wife, and Pharaoh and his court. Counts towards Global/Cultural Studies requirement. Same as ENG 200.

217. **Humanitarianism and Violence in Religious Traditions**  
Smith  
Martyn Smith (Lawrence Univ.)  
Four credits.  
This course will examine the conditions when religious groups embrace international norms like human rights and when they promote violence. We will examine liberation theology in
Courses of Study

Latin America and the writings of Muslim extremist Sayyid Qutb. Much of the class will focus on case studies (such as Myanmar’s Rohingya crisis) where religion, immigration/refugees and international norms are all in play. This will be taught as hybrid and will include significant online interaction along with face-to-face meetings. Travel to local places of worship will be part of course. Enrollment will be limited to 10 students from Ripon College and 10 students from Lawrence University above first-year standing.

220. Jesus of Nazareth: God or Man?  
Brusin
Four credits.
It is impossible to understate the importance of the life and teachings of Jesus of Nazareth. But what do we really know about him? And how do we know what we think we know about him? Do the sources provide a consistent and clear picture of Jesus? What other sources can we turn to? Everyone interested in the historical Jesus agrees that he was a Jew. What, then, do we know about first century Judaism and how might it help us in describing the religious outlook and experiences of Jesus? Did Jesus believe he had to die and, if so, what did he think his death would accomplish? What was Jesus trying to say by riding into Jerusalem on a donkey? Why did he overturn the tables in the Jerusalem temple? How reliable are the earliest reports of his resurrection? Did Jesus believe he was the messiah? Did he believe he was divine? When did others begin to believe he was? Several controversial attempts have been made in recent years to answer these and related questions. One recommends reading the New Testament alongside other early Christian documents discovered in Nag Hammadi, Egypt, in 1945—the so-called Gnostic Gospels—regarded as heretical and, for that reason, not included in the New Testament canon. Other approaches confront these questions more directly by asking how we know anything at all about Jesus of Nazareth and how we reconcile conflicting accounts and stories about him. Our task will be to engage in close textual analysis in order to understand why we think the way we do about Jesus and believe what we think we believe about him.

221. Comparative World Religions  
Smith
Four credits.
This course focuses on the origin and development of several world religions, including primal religions (in Africa and the United States), Hinduism, Buddhism, Confucianism, Taoism, Judaism, Christianity, and Islam. Basic texts of these religions will be analyzed as well as the historical evolution of the beliefs and practices of the respective adherents (and major subgroups) over time. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

231. History of Christian Theology and Ethics  
Smith
Four credits.
An historical survey of the major themes in Christian religious and moral teachings from biblical times to the mid-20th century. Special attention will be given to how changes in Christian teaching have occurred in response to new intellectual developments in the Church and to new cultural and political challenges in secular society.

300. Departmental Studies  
Staff
Variable credit course, 2-4 credits.
Special subjects in religion not covered sufficiently by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.
321. Ethics and International Affairs

Four credits.
The central question addressed in this course is whether or not ethically motivated action in international affairs is possible. Do the absence of global consensus on moral values and the lack of a world government to impose sanctions mean that nations and trans-national organizations will engage in pursuit of political and economic interests without ethical restraints? The first part of the course will deal with contrasting arguments by political theorists on the role of morality in international relations. The second part focuses on specific issues in contemporary international relations that have moral implications such as 1) new forms of international warfare; 2) international intervention inside nation states to stop genocide; 3) the protection of human rights; 4) the legitimacy of international tribunals to punish crimes against humanity; and 5) economic justice for developing countries. Same as IDS 321 and POL 383. Prerequisites: junior or senior standing, and POL 111 or 112 or 280.

322. Religion and Politics in Comparative Perspective

Four credits.
An analysis of the interaction between religious beliefs and practices (Christian, Jewish, Islamic, Hindu, and Buddhist), with political dynamics in various countries in the 20th century. Regional areas will include Central and South America, Sub-Saharan Africa, the Middle East, Southern Asia and the United States. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. Same as IDS 322 and POL 375. Prerequisite: POL 111 or 112 or 280, or REL 221.

332. Comparative Religious Ethics

Four credits.
An outline of various moral theories and what religious faith adds to ethical reflection. The religious traditions covered are: Judaism, Christianity, Hinduism, Buddhism, and Islam. The current problems facing religious ethical reflection covered in the course include human sexuality, abortion, euthanasia, gender and racial justice, protection of the environment and capital punishment. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

334. Topics in Western Spirituality

Four credits.
Focusing on Christianity from its early days through the early modern era, this course will explore various topics in western spirituality. Topics include various beliefs and practices, including Gnosticism, mysticism, asceticism, monasticism, pilgrimage, and eucharistic devotion. The lives of various men and women will also be explored, including saints, anchorites and mendicants. Also central to the course is an examination of the use of material objects and artistic images in religious devotion. The course has no prerequisites, but students will find it helpful to have had some background in medieval history and/or Christianity. Same as HIS 334 and ART 334.

340. The Book of Genesis: Where It All Begins

Four credits.
The Hebrew Bible is ancient literature that has greatly influenced the development of Western civilization and its most important writers and thinkers for more than two millennia. It gave rise to three monotheistic religions: Judaism, Christianity, and Islam. This course will study Genesis, the first book of the Hebrew Bible, in depth. The approach will be primarily literary, but we will also consider some classical and medieval commentaries. Despite the fact that
modern scholars hear the voices of many different authors in the text, there is a distinctly unified theme throughout Genesis: the birth of a people and a nation with a unique understanding of its role in history and its relationship with God. Our central concern is to appreciate the genius and majesty of the writer(s) and the major biblical themes and ideas.

**362. The Arab-Israeli Conflict: Moral and Political Dimensions**  
Brusin  
Four credits.  
How can we explain the persistent and relentless antagonism between Jews and Arabs, both in Israel and in neighboring Arab countries and lands? Though we will begin our study in ancient times, the focus of this course will be the 20th century and our own. In addition to trying to understand the ongoing conflict from both the Arab/Palestinian and Jewish/Israeli perspectives, we will frame our discussions around several interconnected questions or issues. Is it a religious conflict between Islam and Judaism in which both sides are motivated by deep-seated suspicions and hatreds that ultimately rest on divine mandates or revelations? Is the conflict in essence the collision of two sets of historical and moral claims to the same land? Is it a war of self-defense in which a new state is defending itself against its neighbors whose objective is to destroy it? Is it a war of territorial expansion in which one state seeks to expand its borders at the expense of its neighbors? These questions don’t have easy answers. But understanding their role in events unfolding in the Middle East is crucial if there will ever be some measure of peace and stability in the region and between the Israelis and Palestinians in particular. Counts toward the Global and Cultural Study Requirement. Same as HIS 200 and POL 362.

**442. The Problem of God in Comparative Perspective**  
Smith  
Four credits.  
This course will explore the meaning of transcendence/God in various religious traditions, including the primal religion, Judaism, Christianity, Islam, Hinduism and Buddhism. It will also examine the challenges to religious belief articulated by classic proponents of atheism in the modern Western world - including Hume, Feuerbach, Marx, Freud, and Darwin. It will also assess the grounds for religious faith presented by some modern Western religious scholars, such as Wiesel, Barth, Tillich, Niebuhr, Gutierrez and Bonhoeffer, and explore through film some contemporary problems of religious faith. **Prerequisites: junior or senior standing and PHI 120 or REL 221.**

**550, 551, 552. Senior Seminar**  
Smith  
Four credits (450) or two credits per semester (451, 452).  
Preparation of a major research paper by religion majors on a theme or author(s) that synthesizes what the student has learned over the two or three years of concentration in religion. This paper must cover an issue in three parts: (1) how the scriptures of one or more religions deal with this issue; (2) the historical importance of the issue in one or more religions; and (3) the contemporary relevance of the topic. **Prerequisites: Religion major of junior or senior standing.**

**Physical Science**  
(Prerequisites)  
*Professors* Colleen Byron (*on leave fall 2018*), Dean Katahira;  
*Associate Professor* Brett E. Barwick

The physical science major is an interdisciplinary program designed for students
interested in material science, engineering, science teaching and any other field in which a good background in both physics and chemistry is required. Physical science majors must also take basic courses in mathematics (see requirements below) with MTH 206 recommended. Students interested in material science should consider taking CHM 321.

Requirements for a major in physical science: PHY 131, 172, 251; four additional credits in physics chosen from 330, 340, or 412; CHM 111, 112, 211, 214 and 334; MTH 202 or higher; two credits of seminar (PHY 500 and CHM 505). A senior thesis is required. Students majoring in physical science may not major or minor in chemistry or physics.

Requirements for a teaching major in physical science: all courses for the physical science major listed above including the senior thesis, plus the course Teaching of Physical Science (PHY 401 and CHM 401) and BIO 121.

Requirements for Broad Field Sciences Teacher Licensure (Grades 6-12/EA-A Licensure): students are required to complete distribution requirements, a minor in educational studies and either the 1) chemistry-biology major plus the following courses; PHY 251, either BIO 219 or BIO 247 (depending on the emphasis in the major), or 2) the physical science major plus the following courses: BIO 121, 219, 247; either BIO 211 or BIO 216; and BIO 400 and PHY/CHM 401. Teaching methods course work (PHY/CHM 401 and BIO 400) is required for licensure but will not count toward the major.

**Physics**

*Associate Professors* Brett E. Barwick (Chair), Christina M. Othon

**Departmental Mission Statement:** The Ripon College physics department engages students in the understanding of the physical world and enhances students’ awareness of the critical role of physics in modern society. The Physics Department equips students to identify and effectively implement the scientific method, critically analyze scientific arguments, identify and solve analytic problems, synthesize complex information and communicate effectively both orally and in writing through the study of physical phenomena.

**Communicating Plus - Physics:** Students completing a major in physics develop skills in the four Communicating Plus areas: problem solving, written communication, oral communication and critical thinking. These skills are developed in all courses required for the major and are refined with experience. Solving problems systematically is a significant component of each physics course, and the mathematical sophistication of problem solutions is part of written assignments. Laboratory work increases from first-year work to sophomore and junior courses exposing students to numerical techniques and data analysis. Students are given opportunities to apply use of numerical methods and computer modeling as well as differential and integral calculus, algebra, and analytic geometry to the solution of problems. Error analysis is a vital part of laboratory work from the very beginning. By the time students are working in the modern physics or other advanced laboratory settings, they are expected to apply their understanding of error analysis to experimental design. Most written communication requires the integration of mathematical expressions, figures, tables and other graphics into text.
Students are expected to practice combining these elements not only in extensive written laboratory reports, in the advanced laboratory courses, but also in problem solution papers and as a means of reflection to gauge the accuracy/applicability of a model. As students progress from first-year to more advanced courses, their reports increase in length, detail and mathematical sophistication. More emphasis is placed on derivations as well as on literature searches for background. Critical thinking is central to effective experimental design. Oral communication in beginning courses occurs mostly among peers during group laboratory and problem-solving sessions. Power Point presentations of projects in advanced courses help develop both oral communication and graphics skills. All of these skills are brought to bear on the senior thesis project that involves both written and oral presentations of an individually designed research project that must involve literature searches and project design.

**Requirements for a major in physics:** PHY 131, 172, 251, 330, 340, two semester of physics seminar (PHY 501, 502), plus eight additional credits in courses numbered above 300 (excluding 401), with four of those credits from an experimental or laboratory course. In senior seminar students will complete a substantial research project that culminates in a written thesis as well as a seminar presentation. Students majoring in physics may not major in physical science.

**Students seeking the Early Adolescence/Adolescence (Middle/Secondary) license with a major in physics must fulfill the requirements for the physics major, take PHY 401 and complete the Educational Studies minor.**

Students seeking to participate in a 3-2 Dual Degree program in engineering with a major in physics must fulfill the requirements for the major and additionally, must complete MTH 206, MTH 343, CSC 101 and CHM 111 (or CHM 112) to be eligible for the program. Students majoring in physics may not major in physical science. The requirement of two semesters of physics seminar (PHY 501, 502) is waived for students who enroll in a 3-2 program for their 4th year.

**Requirements for a minor in physics:** 22 credits in physics including PHY 131, 172 and 251 and eight additional credits in physics courses numbered above 300 with at least four credits coming from a non-experimental/non-laboratory course. Cross listed courses cannot count towards the physics minor. Students majoring in chemistry, which requires PHY 131 and PHY 172 can still count those credits towards the physics minor.

**Note:** students interested in broad field sciences licensure with an emphasis in physics should refer to the information on physical science.

100. Topics in Physics

Variable credit course, 1-4 credits. May be offered as a half-semester course. Designed to acquaint the student with contemporary topics that are not covered by regular courses. Students can repeat the course for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.
120. **Astronomy**  
Staff  
Four credits.  
This course offers a brief historical development of astronomy and explores the properties of light and light sources, astronomical instrumentation, properties of stars, stellar evolution, galaxies and cosmology. The course includes laboratory introduction to telescopes, optical spectra and the night sky. Activities include lecture, laboratory and projects.

131. **General Physics I: Mechanics**  
Othon  
Five credits. Offered fall semester yearly.  
Calculus based. Mechanics: linear and rotational motion, forces, momentum, work and energy. Lecture, laboratory, and problem-solving sessions. **Co-requisite: MTH 201 or consent of the instructor.**

152. **Introductory Physics II: Electricity, Magnetism and Waves**  
Barwick  
Four credits. Offered spring semester yearly.  
Shared lectures and laboratories with PHY 172, however, all homework, quizzes, exams and laboratory activities will only require mathematics covered through MTH 201. Electrostatics and magnetostatics, electromagnetic induction, Maxwell's equations, electromagnetic waves, and the characterization of energy and momentum in the electromagnetic field. Also the basic properties of waves in general: wave kinematics, standing waves, resonance, and the Doppler effect. Lecture and laboratory.

172. **General Physics II: Electricity, Magnetism and Waves**  
Barwick  
Five credits. Offered spring semester yearly.  
Calculus-based. Shared lectures and laboratories with PHY 172. Electrostatics and magnetostatics, electromagnetic induction, Maxwell's equations, electromagnetic waves, and the characterization of energy and momentum in the electromagnetic field. Also the basic properties of waves in general: wave kinematics, standing waves, resonance and the Doppler effect. Lecture, laboratory and problem solving sessions. **Prerequisite: PHY 131, MTH 201 or consent of instructor. Corequisite: MTH 202 or consent of the instructor.**

251. **General Physics III: Modern Physics, Optics and Thermodynamics**  
Barwick  
Four credits. Offered fall semester yearly.  
Introduction to quantum mechanics, structure and behavior of atoms, nuclei and solids, special and general relativity, quantum statistics and thermodynamics. Optics, including the properties of lenses, mirrors, and optical instruments. **Prerequisites: PHY 172 and MTH 202, or consent of the instructor.**

300. **Departmental Studies**  
Staff  
Variable credit course, 2-4 credits.  
Special subjects in physics not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. **Prerequisites: PHY 172 and consent of the instructor.**

330. **Advanced Mechanics**  
Othon  
Four credits. Offered spring 2017.  
Topics include kinematics and dynamics of particles and rigid bodies, oscillations, central-force motion, rockets, collisions, Lagrangian mechanics. Lecture, problem-solving sessions and projects. **Prerequisites: PHY 251 and MTH 206, or consent of the instructor.**
334. Thermodynamics and Statistical Physics

Scantlon

Five credits. Offered spring semester yearly.
The study of chemical and physical thermodynamics and its applications to chemistry, biochemistry and idealized physical systems (power plants and engines). Kinetics of reactions, reaction mechanisms and reaction rate theory also are covered. Laboratories illustrate and test established principles and provide basic experience with measurements yielding quantitative results. Same as CHM 334. Prerequisite: MTH 202 and PHY 131 and 172, or consent of the instructor.

340. Electricity and Magnetism

Othon

Four credits. Offered Spring 2019 and alternate years.
Electromagnetism, development and application of Maxwell’s equations to systems including wave optics. Lecture, problem-solving sessions, individual and group projects. Prerequisite: PHY 172, MTH 206 or consent of the instructor.

401. The Teaching of Physics

Staff

Two credits. Offered as needed.

412. Quantum Mechanics

Barwick

Four credits. Offered Fall 2018 and alternate years.
Solutions of the Schrodinger Equation for physical systems including atoms and nuclei. Properties of operators, commutation relationships and the Heisenberg Uncertainty Principle. Properties of wave functions. Lecture, problem sessions, and problem-solving projects. Prerequisite: PHY 251 and MTH 206 or consent of the instructor.

440. Advanced Laboratory and Computational Physics

Barwick

Four credits.
Laboratory and computational projects to investigate complex physical systems and learn to use new laboratory instruments and data analysis techniques. Experimental design and mathematical modeling using Matlab. Introduction to numerical methods and application of numerical models to explore a variety of physics problems. Prerequisite: PHY 251 or consent of the instructor.

441. Experimental Laser Optics

Othon

Four credits. Offered Spring 2019 and alternate years.
A project-oriented laboratory course in laser optics. Students will complete a variety of experiments chosen from areas such as ultrrafast lasers, fiber optics, holography, quantum optics, geometrical optics, interference and diffraction. Prerequisite: PHY 251 or consent of instructor.

501, 502. Senior Seminar

Staff

Two credits each semester. May be taken twice for credit.
Students will complete a substantial research project that culminates in a written thesis as well as a seminar presentation. Grading is S-U. Prerequisite: PHY 251, senior standing, consent of the department chair, and 12 credits toward the major.
Departmental Mission Statement: Politics and humanity are inseparable. There is no civilization, society or community without politics. Politics affects our lives whether it is in the formal environment of Congress or the informal environment of our office, student groups or other social associations. The Department of Politics and Government at Ripon College seeks to provide students with the knowledge and experience required to play an active and vital role in their local, state, national, and international communities.

Communicating Plus - Politics and Government: Politics and government majors address the four Communicating Plus skills areas — written and oral communication, problem-solving and critical thinking — throughout the major. Politics is about the search for answers to problems affecting society; thus political science seeks to identify and propose solutions to these problems. In all politics courses, the often volatile and emotional issues of political life are subjected to rigorous rational analysis that is, critical thinking is applied to the “stuff” of politics. Because political effectiveness depends on the ability to communicate accurately and persuasively, written and oral communication are significant components of most departmental courses. The culmination of the program is a year-long senior seminar, in which students identify, research and analyze a contemporary political problem and draft, revise and publicly present and defend their conclusions. During this process, they utilize the Communicating Plus skills to demonstrate the knowledge they have gained throughout their study of politics and government.

Requirements for a major in politics and government: POL 110, 220; one of the following: POL 111, 112 or 280; four elective courses (up to two of the electives may be pre-approved courses in other departments or in off-campus programs such as the Washington Semester program); POL 501 and 502.

Requirements for a minor in politics and government: POL 110 and 220; 12 additional credits of which 4 credits must be 300-level or higher. Students considering American government and politics for graduate school also should take a social sciences statistics course. Students considering a career in international relations should take POL 280.

Requirements for a teaching major in politics and government: POL 110, 220, 280, 231 or 324, 335, 381, 501-502; and HIS 401.

Requirements for a teaching minor in politics and government: POL 110, 220, 280, 335 or 341; HIS 401; and other courses agreed upon by student and advisor to total 22 hours, excluding HIS 401.

Broad Field Social Studies Teacher Licensure (Early Adolescence/Adolescence (Grades 6-12): Students seeking licensure at the levels in the social science disciplines (economics, history, politics and government, psychology, and sociology) may choose one of the options listed below to add endorsements in fields outside their major. Students may complete a minor in a discipline outside the social sciences or the broad field licensure program outlined below. Broad field licensure prepares teachers to teach in general social studies classes in grades 6-9. They also will be licensed to teach the specific discipline of their two concentrations at the high school level. Given the very difficult job market for social studies teachers, students
Courses of Study

should consider one of these options to strengthen their employment options.

Option 1 – Major/Minor Program: The first option open to student majoring in a social studies discipline is to complete a minor in another social studies discipline or a subject outside the social sciences. Recent examples of programs designed on this model are a history major with an English minor and a politics and government major with an English minor. In this case, the student would student teach and be fully licensed to teach both subjects.

Option 2 – Social Studies Major with Broad Field Social Studies Licensure: As part of their program of study, students must complete the following:
1. A major in a social science discipline,
2. Concentrations, as defined in the chart below, in two other social science disciplines, only one of which may be in history,

<table>

3. At least one course in each of the following disciplines: economics, history, politics and government, psychology and sociology.
4. One of the courses that address geography as a factor that influences human interactions and society from the following list: HIS 281, HIS 282, ECO 332 or 361, or POL 112. This course also may count toward fulfillment of criteria 1-3.

Students are encouraged to extend the breadth of their social science background by also taking courses in anthropology, global studies, Latin American and Caribbean studies, and religion.

110. Introduction to Politics

Colucci

Four credits.
An introduction to the study of political ideas, institutions and procedures. Provides the theoretical foundation for the discipline in the works of thinkers including Plato, Aristotle, Machiavelli, Hobbes, Locke, Rousseau, Montesquieu, the American framers, Marx and Mill. Important contemporary applications of these ideas also are considered.

111. Global Political Culture

Staff

Four credits.
Defines political culture and examines its dynamics at various levels in today's world, from the local to the global. Specifically examines ways in which history, language, religion, literature, ethnicity and tradition affect identity-formation and its correlates in today's world. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. Same as GLB 111. Open to first-year and sophomore students only, except by permission of instructor.
112. **Global Political Economy**  
Staff  
Four credits. 
Defines political economy and examines its manifestations in today’s increasingly interdependent world. Specific issues include population, resources, environmental protection, trade and development, trends toward democratization, human rights, and new and enduring sources of conflict and cooperation. Same as GLB 112. *Open to first-year and sophomore students only, except by permission of instructor.*

200. **Departmental Studies**  
Staff  
Two credits. 
Special subjects in politics and government not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

212. **Introduction to Law**  
Staff  
Four credits. 
Examines the role of legal institutions in contemporary society. Topics include private law, criminal law and social deviance, civil rights and liberties, and the theories of justice.

220. **American Politics and Government**  
Schatzinger  
Four credits. 
Analysis of American political institutions as processes, including the constitution, political culture, civil liberties and rights, federalism, Congress, the presidency, the federal courts, public opinion, political parties, interest groups, campaigns and elections, and the media and public policy. Discussion of contemporary and controversial issues in American politics. Emphasis on placing current issues in comparative and historical perspective where relevant.

222. **Media, Politics and Personal Power**  
Schatzinger  
Four credits. 
Examines the interplay of the U.S. media, the American public and the governing process. Emphasis will be placed on learning how to use media in a sophisticated and useful manner. Explores media effects on individuals, groups and society in general in light of the major technological developments that are changing the news media scene. *Prerequisite: sophomore standing or consent of the instructor.*

227. **Political Psychology: Citizens, Movers and Shakers**  
Schatzinger  
Four credits. 
Political psychology studies human nature so as to understand politics. We explore what psychology tells us about people as political citizens and as leaders. Specific course topics include: attitude formation, attitude change, decision biases, group decision-making, personality, social identity, political leadership, voting behavior, public opinion and media framing. The course pays special attention to the powerful roles that emotions play in all aspects of politics. *Prerequisite: sophomore standing or consent of the instructor.*

231. **American Political Thought**  
Staff  
Four credits. 
This course will explore the philosophical foundations of American politics in depth. An emphasis will be placed on over-arching themes that have shaped and continue to shape
American history, politics and society. Students will be exposed to a variety of thinkers that have influenced American political thought such as John Locke, Adam Smith, Thomas Jefferson, John Adams and James Madison. Themes such as natural law, natural rights, American exceptionalism, manifest destiny, New Jerusalem, liberty vs. the state, political conflict, and the philosophic roots of American liberalism, libertarianism and conservatism will be highlighted.

232/332. Conservative Political Thought, Ideas and Policy  
Colucci
Four credits.
This course is a survey of the political tradition of conservatism. We will analyze the philosophical foundations of conservatism and the various theories of conservatism. The course will address historical, thematic, philosophical and policy issues and concepts. Questions that we will explore are: Is conservatism an ideology, tradition or perspective? Are the different schools of conservatism more unified or disparate? How has conservatism changed and what is the future of the conservative movement? Prerequisite: for POL 332 the prerequisite is POL 110.

246. Morality and Public Policy  
Schatzinger
Four credits.
The goals of the course are two-fold: first we examine how moral judgments arise based on various theories, including evolutionary and anthropological approaches. After we understand the origins of moral politics, we debate some of the social and moral issues that have become politically divisive in the United States. We also will discuss the emergence and growth of social movements around these issues, and the ways in which battles over morality continue to shape our society. Prerequisite: sophomore standing or consent of the instructor.

250. Comparative Politics: The U.S. and the Rest of the World  
Staff
Four credits.
This course introduces students to the field of comparative politics, which tries to increase our understanding of politics by comparing political systems in different countries. Why do some countries have similar political systems, while others have different ones? Why are some countries more democratic than others? How has the political system promoted or undermined the economic situation in different countries? Students will learn research methods necessary for answering these types of questions.

268. Diversity and American Politics  
Schatzinger
Four credits.
An accessible overview of the historical and contemporary political experience of women, the LGBTQ community, and major ethnic/racial groups—African Americans, Latinos, Asian Americans, and American Indians—in the United States. Explores the similarities and differences in these groups' representation and participation in politics and government. Discusses the challenges of integrating and governing a modern, heterogeneous society in a global era. Contemporary debates and challenges include immigration, voting rights, political representation, media coverage, poverty, violence and criminal justice policies.

272. Development and Change in Latin America  
Staff
Four credits.
Individual countries considered as examples to illustrate or contradict overall patterns of politics and government in Latin America. The course stresses the influence of particular forms of political development, foreign economic dependence, frequent military interventions and a revolutionary heritage. Student politics and inter-American relations also are considered.
May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

273. **China in Transition**  
Staff  
Four credits.  
Begins with analysis of the traditional Chinese system and its breakdown, leading to four decades of political strife and the victory of the Communist party in 1949. The bulk of the course examines politics since the death of Mao, with specific reference to the contradictions between economic reform and political stagnation. Concludes with an assessment of the prospects for a democratic transition in the 1990s. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

276. **Politics of Contemporary Europe**  
Staff  
Four credits.  
Examination of the governments and politics of Europe today. Domestic issues and trends are linked to regional and global developments, especially in the post-Cold War context. Transnational institutions such as the European Union are examined with respect to Europe’s providing an alternative to Pax Americana. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

280. **Introduction to International Relations**  
Colucci  
Four credits.  
This course will explore international relations in both theory and practice. Throughout the semester we will consider how various actors — nation states, multi-national corporations, individuals, sub-national groups, trans-national groups and international organizations — use political, military, economic and cultural power in pursuit of their interests. This course will serve as a foundation for understanding international affairs and foreign policy for the student who is majoring in the field as well as those who simply want a way to conduct an educated analysis of the subject.

288. **International Law**  
Colucci  
Four credits.  
This course will examine the role of international law in international relations. We will explore issues such as sovereignty, territoriality, jurisdiction, treaties, the sanction of force, human rights and the role of international institutions. A particular focus on the United States and international law will be considered. **Prerequisite: sophomore standing or consent of the instructor.**

300. **Departmental Studies**  
Staff  
Variable credit course, 1-4 credits.  
Special subjects in politics and government not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent Schedule of Courses for the listing of topics courses and possible prerequisites. Some topics may count toward the Global and Cultural Studies Requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.
320. Topics in American Politics

Staff

Four credits.
Special subjects in American politics not covered by regular courses. This course may be
repeated for credit when topics change. Please see the pertinent schedule of courses for the
listing of topics courses and possible prerequisites. Some topics may count toward the global
and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies
Requirement section for more information. Prerequisite: POL 220 or consent of the instructor.

323. Interest Group Politics

Schatzinger

Four credits.
Examines the ways that citizens, firms and institutions struggle to gain representation through
organized interest groups in the United States. Special attention is given to interest group
formation and maintenance, legislative and executive branch lobbying, and the impact of
interest groups on legislative behavior in light of theories of representation. Prerequisite: POL
220 or consent of the instructor.

324. Campaigns and Elections

Schatzinger

Four credits.
Analyzes presidential and congressional primaries as well as general election campaigns and
outcomes. Some attention also will be given to state and local campaigns. Examines the rules
governing process, the role of money and interest groups in campaigns, media coverage and
campaign strategy. Explores the effect of campaigns on voter participation and vote choice, but
also other predictors of electoral outcomes. Uses current events to better understand course
content. Prerequisite: sophomore standing or consent of the instructor.

335. Congress and the Presidency

Schatzinger

Four credits.
Examines patterns of cooperation and conflict between the two branches of government and
their impact on the formulation and implementation of public policy. The course first focuses
on theories of congressional representation, the history of Congress, institutional rules,
committee, and party leadership. Students then will explore the development and modern
practice of presidential leadership and other issues such as presidential selection, decision-
making, and the relationship of the presidency with the executive branch, courts, the press
and the public. Prerequisite: POL 220 or consent of the instructor.

341. American Public Policy:

Schatzinger

Process, Promise and Performance

Four credits.
This course provides an overview of the policy process and an examination of specific policy
areas in the American political system. Each student will explore one policy issue area in depth
and also write several policy memos on the chosen issue. We will focus on what constitutes
public policy and basic aspects of the policy process, including agenda-setting,
implementation, and policy evaluation. The course also will provide us with an opportunity to
consider the various ways knowledge about particular issues is put to use by academics, policy
advocates, policy makers, and others. Prerequisite: POL 220 or consent of the instructor.

343. U.S. National Security Policy

Colucci

Four credits.
Provides an overview of U.S. national security policy, with special attention to the sources of
threats to U.S. national security, approaches to national security strategy, the role of
conventional military force and nuclear weapons, and actors in the policy making process. In addition, we will investigate several current debates affecting national security policy making in the United States. **Prerequisite: POL 280 or consent of the instructor.**

362. **The Arab-Israeli Conflict: Moral and Political Dimensions**  
Brusin  
Four credits.  
How can we explain the persistent and relentless antagonism between Jews and Arabs, both in Israel and in neighboring Arab countries and lands? Though we will begin our study in ancient times, the focus of this course will be the 20th century and our own. In addition to trying to understand the ongoing conflict from both the Arab/Palestinian and Jewish/Israeli perspectives, we will frame our discussions around several interconnected questions or issues. Is it a religious conflict between Islam and Judaism in which both sides are motivated by deep-seated suspicions and hatreds that ultimately rest on divine mandates or revelations? Is the conflict in essence the collision of two sets of historical and moral claims to the same land? Is it a war of self-defense in which a new state is defending itself against its neighbors whose objective is to destroy it? Is it a war of territorial expansion in which one state seeks to expand its borders at the expense of its neighbors? These questions don’t have easy answers, but understanding their role in events unfolding in the Middle East is crucial if there will ever be some measure of peace and stability in the region and between the Israelis and Palestinians in particular. Counts toward the Global and Cultural Study Requirement. Same as HIS 200 and REL 362.

370. **Topics in Comparative Politics**  
Staff  
Four credits.  
Exploration and analysis of problems of contemporary concern in comparative politics. This course may be repeated for credit when topics change. Please see the pertinent Schedule of Courses for the listing of topics courses and possible prerequisites. Some topics may count toward the Global and Cultural Studies Requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

375. **Religion and Politics in Comparative Perspective**  
Smith  
Four credits. Offered in spring 2018 and alternate years.  
An analysis of the interaction between religious beliefs and practices (Christian, Islamic, Hindu), with political dynamics in various countries in the 20th century. Regional areas will include Central and South America, Sub-Saharan Africa, the Middle East, Southern Asia and the United States. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. Same as IDS 322 and REL 322. **Prerequisite: POL 280 or REL 221.**

380. **Topics in International Politics**  
Colucci  
Four credits.  
Exploration and analysis of problems of contemporary concern in international politics. Special emphasis on how to go about conducting research and writing a research paper in international politics. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

381. **United States Foreign Policy**  
Colucci  
Four credits.  
This course will explore the role of the United States in the world. The class will follow a
Courses of Study

historical model of diplomatic history and politics from the American Revolution to the present. Prerequisite: POL 280 or consent of the instructor.

383. Ethics and International Affairs

Four credits.
The central question addressed in this course is whether or not ethically motivated action in international affairs is possible. Do the absence of global consensus on moral values and the lack of a world government to impose sanctions mean that nations and trans-national organizations will engage in pursuit of political and economic interests without ethical restraints? The first part of the course will deal with contrasting arguments by political theorists on the role of morality in international relations. The second part focuses on specific issues in contemporary international relations that have moral implications such as 1) new forms of international warfare; 2) international intervention inside nation states to stop genocide; 3) the protection of human rights; 4) the legitimacy of international tribunals to punish crimes against humanity; and 5) economic justice for developing countries. Same as IDS 321 and REL 321. Prerequisites: junior or senior standing, and POL 111, 112 or 280.

385. Terrorism and Intelligence

Four credits.
Focuses on the misunderstood topic of terrorism and the neglected area of intelligence. The first half of the course deals with the issue of terrorism. This section identifies the fundamental and underlying reasons why America is a target for terrorists as it compares and contrasts various international terrorist groups and their respective ideologies. The second section will deal with intelligence, exploring the organization and functions of the U.S. Intelligence Community, its interaction with national security policy makers, key issues about its workings and the challenges it faces in defining its future role. Prerequisite: POL 280 or consent of the instructor.

412. Constitutional Law I: Landmark Decisions

Four credits.
An introduction to the United States Constitution and issues of federal constitutional law as developed in landmark Supreme Court decisions. Major topics will be judicial review; the scope of federal legislative and presidential powers under the Constitution; and the Equal Protection and Due Process Clauses of the Fourteenth Amendment. Focus also will be placed on current cases and controversies before the Supreme Court. Prerequisite: POL 212 or 220, or consent of instructor.

413. Constitutional Law II: The Bill of Rights

Four credits.
An examination of constitution law focusing on the Bill of Rights and its interpretation as reflected in landmark decisions. Strong emphasis will be placed on the study of the freedoms contained in the First Amendment and their development throughout United States history. Significant attention will be devoted to current civil liberties cases and controversies. Prerequisite: POL 212 or 220, or consent of instructor.

501. Senior Seminar

Four credits.
In the fall semester, students will develop significant understanding of the subfields of political science by reviewing the research literature in each area. Concurrently, they will begin to research and draft a research project on a topic chosen in consultation with their thesis supervisor. In the spring semester, students continue to refine their research and revise their projects into final form. The senior seminar culminates in a public presentation of the research
projects. Students on off-campus programs during the first semester of their final year may present a project incorporating substantial independent research undertaken in connection with the off-campus program to fulfill the POL 501 requirement, and must demonstrate knowledge of the subfields of political science. They remain responsible for completing 502 in the second semester. \textit{Prerequisite: major in politics and government or consent of instructor.}

502. **Senior Seminar**
Schatzinger
Four credits.
Continuation of POL 501: Senior Seminar. \textit{Prerequisite: POL 501 or consent of instructor.}

550. **National Security Capstone**
Colucci
Two credits.
Under the direction of the national security studies advisor, a capstone thesis will be developed on a topic concerning contemporary national security. The research will result in a paper and an oral presentation.

**Psychobiology**
(Co-Coordinators)
Professor Mark Kainz;
Associate Professors Memuna Khan, Kristine Kovack-Lesh;
Assistant Professor Julia E. Manor

The psychobiology major is an interdisciplinary program of study in the behavioral and biological sciences. It is designed for those students who are interested in such fields as animal behavior, behavior genetics, cognitive neuroscience, physiological psychology, psychopharmacology, neurobiology and developmental psychobiology.

A basic core of required courses will expose the student to the fundamental knowledge and methodological skills peculiar to this broad area of study. Beyond these general requirements, the student may select a course of study which emphasizes either a behavioral or physiological concentration. Students who elect the psychobiology major may not elect a major or minor in either psychology or biology.

**Requirements for a major in psychobiology:** The basic core of required courses includes BIO 121, BIO 219, PSC 110, PSC 211, 212, PSC 339, CHM 111, CHM 112, one or two credits of independent study or internship and either (a) BIO 501 and 502 or (b) PSC 523. Beyond the core requirements, students are required to take at least two elective courses, one from each of the department listings below:

**Biology**
A&P I (BIO 211)
Invertebrate Zoology (BIO 215)
Vertebrate Zoology (BIO 216)
Ecology (BIO 247)
A&P II (BIO 312)
Cell Biology (BIO 327)
Developmental Biology (BIO 329)
Behavioral Ecology (BIO 339)

**Psychology**
Infant Development (PSC 234)
Child Development (PSC 235)
Adolescence (PSC 242)
Physiological Psychology (PSC 324)
Sensation and Perception (PSC 328)
Cognitive Neuroscience (PSC 342)

All psychobiology students are strongly urged to take course work in mathematics through calculus and PHY 131 and 172.
Psychology

Professor Joe W. Hatcher (Chair);
Associate Professor Kristine A. Kovack-Lesh;
Assistant Professor Julia E. Manor;
Visiting Professor Ellen Morgan Lee

Departmental Mission Statement: The Department of Psychology seeks for its students an understanding of the place of psychology within the liberal arts canon; the attainment of broad knowledge of the field and specific knowledge within areas that comprise the field itself; and the development of the analytical, logical and organizational skills necessary to conduct good research in our field. Specifically, throughout the course of their education in psychology, we expect students to develop the ability to successfully meet the following educational objectives:

- assess published literature in domains of psychology
- articulate the seminal theories and findings of the field
- understand the complexity of causal relations in behavior
- apply knowledge of the field to contemporary issues
- use statistics to test hypotheses within an area
- relate the field of psychology to other sciences
- propose, conduct, report and defend independently designed ethical research
- sustain an individualized intellectual curiosity about the field

Communicating Plus - Psychology: Psychology majors address the four Communicating Plus skills areas — written and oral communication, problem-solving, and critical thinking — throughout the major. In early classes, students study how psychologists frame, solve and express their answers to problems. They begin to collaborate in solving problems and designing research. Students in 200-level classes develop tools to evaluate, discuss and write about theory and research, and they learn to do several styles of background research. In 300-level courses, students refine their methodological and laboratory skills and develop their communication skills through oral reports and research papers. Senior-level students complete a capstone research project. They collaborate in planning research; conduct it and report it orally and on paper; and critique others work. Seniors also critically analyze controversial texts and evaluate them through discussion and papers. The capstone project allows faculty to evaluate students’ understanding of psychology as a discipline and competence in the Communicating Plus skills areas.

Requirements for a major in psychology: PSC 110, 211 and 212, 523, 524 and at least four other psychology courses selected from the following: classes numbered at or above 200, two of which must be selected from 300, 310, 313, 324, 328, 339 and 342, and each of which must carry a minimum of four credits or receive the approval of the departmental chair. All courses in the department may be counted toward the psychology major, provided they are consistent with the requirements specified above. The grades received in all psychology courses will be used in the determination of departmental honors.

PSC 110 and PSC 211 and 212 or the consent of both the instructor and chair of the department are prerequisite for all courses numbered at or above 300. Consult course descriptions for prerequisites for classes numbered in the 200s. Seniors majoring in psychology are expected to present at the annual Research and Scholarship Symposium.
Requirements for a minor in psychology: Eighteen credits in psychology beyond PSC 110, all approved by the department chair. Each class contributing to the minor must carry a minimum of two credits.

Requirements for a teaching major in psychology: 37 credits in psychology including PSC 110, 211 and 212, 232, 523 and 524; two of the following: 221, 224, 234, 235, 242; two of the following: 300, 310, 313, 324, 328, 339, 342.

Requirements for a teaching minor in psychology: PSC 110, 211 and 212; three courses chosen from the following (one of which must be 313): 224, 234, 235, 242, 313, 339 and 342.

Broad Field Social Studies Teacher Licensure Options Early Adolescence/Adolescence (Grades 6-12): Students seeking licensure at the levels in the social science disciplines (economics, history, politics and government, psychology and sociology) may choose one of the options listed below to add endorsements in fields outside their major. Students may complete a minor in a discipline outside the social sciences or the broad field licensure program outlined below. Broad field licensure prepares teachers to teach in general social studies classes in grades 6-9. They also will be licensed to teach the specific discipline of their two concentrations at the high school level. Given the very difficult job market for social studies teachers, students should consider one of these options to strengthen their employment options:

Option 1 – Major/Minor Program: The first option open to student majoring in a social studies discipline is to complete a minor in another social studies discipline or a subject outside the social sciences. Recent examples of programs designed on this model are a history major with an English minor and a politics and government major with an English minor. In this case, the student would student teach and be fully licensed to teach both subjects.

Option 2 – Social Studies Major with Broad Field Social Studies Licensure: As part of their program of study, students must complete the following:
1. A major in a social science discipline;
2. Concentrations, as defined in the chart below, in two other social science disciplines, only one of which may be in history;

<table>

3. At least one course in each of the following disciplines: economics, history, politics and government, psychology and sociology;
4. One of the courses that address geography as a factor that influences human interactions and society from the following list: HIS 281, HIS 282, ECO 332 or 361, or POL 112. This course also may count toward fulfillment of criteria 1-3.

Students are encouraged to extend the breadth of their social science background
by also taking courses in anthropology, global studies, Latin American and Caribbean studies and religion.

100. **Topics in Psychology**  
Staff  
Variable credit course, 1-4 credits.  
Special topics in psychology not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses. *No prerequisites.*

110. **General Psychology**  
Staff  
Four credits.  
An introductory course which considers principles, methods, theories and problems of psychology. Among the topics considered are perception, learning, human development, personality, psychopathology, thought processes, social determinants of behavior and the physiological basis of behavior. Class includes occasional laboratory demonstrations and independently designed student projects.

200. **Topics in Psychology**  
Staff  
Variable credit course, 1-4 credits.  
Special topics in psychology not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. *Prerequisite: PSC 110.*

210. **Practicum in Clinical/Counseling Psychology**  
Hatcher  
Variable credit course, 1-2 credits.  
Students will participate in on-site experiences relevant to clinical/counseling psychology. Weekly logs and a final paper are required. Repeatable to a maximum total of four credits. Grading is S-U. *Prerequisites or corequisites: PSC 110 and consent of instructor.*

211, 212. **Research Design and Statistics**  
Staff  
Four credits each semester.  
A two-semester sequence which integrates methods of data description and statistical inference with methods of designing and conducting valid and reliable research projects ranging from naturalistic observations to experiments. Lectures and laboratory. An independently designed experiment is conducted and reported each semester. Successful completion of PSC 211 is expected prior to enrollment in PSC 212. *Prerequisite: PSC 110.*

221. **Psychopathology**  
Hatcher  
Four credits.  
Description and analysis of causative factors (both psychological and biological), symptoms, and therapeutic measures taken with respect to various patterns of deviant behavior. Students learn to diagnose by examining and discussing published cases. *Prerequisite: PSC 110.*

224. **Theories of Personality and Counseling**  
Hatcher  
Four credits.  
This course examines the major theories of personality and, where possible, the counseling traditions associated with them. Major theories covered include biological, Freudian and neo-Freudian, behavioral and cognitive-behavioral, and humanistic. Therapeutic approaches arising from these views are examined with the help of class role-play and video resources. The interaction between culture and personality are also explored. *Prerequisite: PSC*
232. History and Systems of Psychology  
Staff
Four credits.
A survey of Western psychology from its origins in Greek philosophy and biology to the present. The more significant movements, schools and systems within psychology are considered and their interrelationships discussed. **Prerequisite:** PSC 110.

234. Infant Development  
Kovack-Lesh
Four credits.
This course explores development in the first two years of life. Topics such as prenatal development, early perceptual and cognitive development, development of emotional expression and recognition and early development of social bonds and interactions are examined. Emphasis is placed on theories of infant development and the validity of research evidence. The course format includes lectures and discussions. **Prerequisite:** PSC 110.

235. Child Development  
Kovack-Lesh
Four credits.
A survey of research and theoretical literature dealing with the development of the human organism from conception to the onset of adolescence. Emphasis is placed on physical, motor, perceptual, language, cognitive, personality and social development. **Prerequisite:** PSC 110.

242. Adolescence and Emerging Adulthood  
Kovack-Lesh
Four credits.
Developmental processes associated with the period of adolescence and emerging adulthood. Emphasis is placed on physical, cognitive, personality and social changes. **Prerequisite:** PSC 110.

300. Departmental Studies  
Staff
Variable credit course, 1-4 credits.
Special subjects in psychology not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. **Prerequisites:** PSC 110, 211 and 212.

310. Advanced Clinical/Counseling Psychology  
Hatcher
Four credits.
Provides an in-depth look into aspects of clinical and counseling psychology. Included in the class will be readings and lectures concerning the understanding and treatment of severe mental illnesses, the place of tests and measurements in their diagnosis, and the present state of the field. The course is designed for those who are considering applying for graduate study in this area. Labs will include outside experiences in clinical settings. **Prerequisites:** PSC 110, 211 and 212, 221 and 224.

313. Social Psychology  
Hatcher
Four credits.
The manner in which the individual is influenced by others. Major topics include conformity, attitudes, pro-social behavior and aggression. Lectures and laboratory. **Prerequisites:** PSC 110, 211 and 212.
324. Physiological Psychology, Manor
Four credits.
The biochemical and physiological processes which underlie the behavior of organisms. The basis of perceptual and motor functions, learning, neurological disorders, language, sleep, pleasure, and hunger are among the topics discussed. Laboratory projects include dissection of an animal brain and administration of a neuropsychological test. Lectures and laboratory. **Prerequisites:** PSC 110, 211 and 212.

328. Sensation and Perception, Manor
Four credits.
An examination of the means by which organisms come to represent their environments perceptually. Topics include sensory systems, perceptual coding, perceptual illusions, tests for visual and auditory disabilities, and perceptual development. Laboratories include direct investigation of perceptual phenomena. **Prerequisites:** PSC 110, 211 and 212.

Four credits.
An examination of the bases of human thought. Topics include attention, varieties of memory, concept formation, executive processes, problem-solving, decision-making and language. Lectures and laboratory. **Prerequisites:** PSC 110, 211 and 212.

342. Cognitive Neuroscience, Staff
Four credits.
An introduction to the theories, methods and findings of the interdisciplinary field known as cognitive neuroscience. Both behavioral research and studies of brain activity informs topics such as selective attention, language, cerebral lateralization, perceptual functions, motor control, executive functions and consciousness. Laboratories will focus on cognitive and perceptual processes. Lectures and laboratory. **Prerequisites:** PSC 110, 211 and 212.

401. Teaching of Psychology, Staff
Two credits.
An introduction to the teaching of psychology in high school. Focus will be on the development of useful pedagogical tools for the teaching of psychological principles in the classroom. A syllabus will be developed and, when possible, the student will give lectures in a high school class. **Prerequisite:** consent of the instructor.

Variable credit course, 1-2 credits.
Organization and execution of observational studies of children in a variety of non-laboratory settings, including day care centers. Focus will be on the use of field research methods to study principles of child development, including language, emotional, cognitive, social and moral development. Students will meet regularly with the instructor. **Prerequisites:** PSC 110, 235 and consent of the instructor.

523. Research Seminar, Staff
Four credits.
Reading, discussion and experimental investigation of various topics in psychology at an advanced level. Each student prepares a research proposal and reviews the proposals of other students. The investigation is conducted independently and reported at a symposium held at the end of the semester. **Prerequisites:** PSC 110, 211 and 212, and senior standing.
524. Senior Studies
Four credits.
A consideration in some depth of one or more problem areas of psychology. This course typically requires the reading of several original works by major figures of the past, as well as by contemporary psychologists. **Prerequisites:** PSC 110, 211 and 212 and senior standing.

**Sociology and Anthropology**

*Professor* Jacqueline Clark (Sociology, *on leave spring 2019*);

*Associate Professors* Marc A. Eaton (Sociology, *Chair*), Emily J. Margaretten (Anthropology, *on leave 2018-19*);

*Visiting Professor* (Anthropology) Ursula M. Dalinghaus

**Sociology**

**Major Mission Statement:** The mission of the sociology major is to help students learn to think sociologically so that they may understand, interpret and analyze the social world. To this end, the major seeks to:

- Prepare students to think critically about societal issues and problems.
- Prepare students to understand basic and applied research in the discipline.
- Prepare students to conduct their own sociological research.
- Prepare and encourage students to share and use their sociological knowledge in their everyday lives.

**Communicating Plus - Sociology:** All sociology courses emphasize the application of sociological concepts and knowledge to case examples and practical problems faced by society, through both written and oral communication. What is most important to gain from courses in sociology is a distinctive way of interpreting the world around us, that is, an understanding of how we may understand the reality of our social world in sociological terms that are often unfamiliar. This emphasis on the conceptual will provide the most enduring form of education, preparing students to assume their roles as citizens in a humane society, able to critically analyze the causes of problems we face, and to take an active role in discovering and working toward their solution. All sociology courses incorporate learning and teaching strategies to further achievement of these educational goals.

**Requirements for a major in sociology:** 36 credits: Required SOC 110, ANT 215, SOC 315, 401 and 502. Electives (16 credits): 12 other credits in sociology and four required credits in anthropology to be selected from ANT 222, 224, 275, 327 or 335. Up to eight credits from these anthropology courses may count toward the major.

**Requirements for a minor in sociology:** SOC 110 and 16 other credits in sociology to be selected in consultation with the sociology advisor.

**Broad Field Social Studies Teacher Licensure Options Early Adolescence/Adolescence (Grades 6-12):** Students seeking licensure at the levels in the social science disciplines (economics, history, politics and government, psychology and sociology) may choose one of the options listed below to add endorsements in fields outside their major. Students may complete a minor in a discipline outside the social sciences or the broad field licensure program outlined below. Broad field licensure prepares teachers to teach in general social studies classes in grades 6-9. They also will be licensed to teach the specific discipline of their two concentrations at the high school level. Given the very difficult job market for social studies teachers, students
Courses of Study

should consider one of these options to strengthen their employment options:

Option 1 – Major/Minor Program: The first option open to student majoring in a social studies discipline is to complete a minor or a second major in another social studies discipline or a subject outside the social sciences. Recent examples of programs designed on this model are a history major with and English minor and a politics and government major with an English minor. In this case, the student would student teach and be fully licensed to teach both subjects.

Option 2 – Social Studies Major with Broad Field Social Studies Licensure: As part of their program of study, students must complete the following:

1. A major in a social science discipline (economics, history, politics and government, psychology or sociology),
2. Concentrations, as defined in the chart below, in two other social science disciplines, only one of which may be in history. Note: students majoring in history must take their concentrations outside that discipline.

3. At least one course in each of the following disciplines: economics, history, politics and government, psychology and sociology.

4. One of the courses that address geography as a factor that influences human interactions and society from the following list: HIS 281, HIS 282, ECO 332 or 361, or POL 112. This course also may count toward fulfillment of criteria 1-3.

Students are encouraged to extend the breadth of their social science background by also taking courses in anthropology, global studies, Latin American and Caribbean studies, and religion.

110. Introduction to Sociological Imagination  
      Clark/Eaton
      Four credits.
      This course introduces students to the discipline of sociology. Theories and methods used in sociology are introduced, as well as the concepts of culture, socialization, social institutions, among others. Issues related to race, class, gender and deviance also are considered.

116. Consumer Culture  
      Clark
      Four credits.
      This course will examine consumer behavior from a sociological perspective. It will focus on the study of American consumption patterns and compare them to those in other places around the world. It will also examine the consequences of consumerism, including the effects on personal and national debt, as well as the impact that consumer behavior has on the environment. Same as ENV 116.
201. Social Problems
   Clark/Eaton
   Four credits.
   This course examines problems in social inequality, social institutions, social control and social change in the United States. Emphasis is placed on the nature of each problem, its effects on American society, and its causes and possible solutions. As part of the requirements for the course, students will participate in service-learning at a location that is related to a social problem covered in the course. Prerequisite: SOC 110 or ANT 110.

204. Sociology of Jobs and Work
   Clark
   Four credits.
   Examines the field of sociology through the study of work and occupations. Topics covered will include the social evolution of work, the various types of work and the social meanings attached to them, inequality in the workplace, and the future of work.

205. Sociology of Deviance
   Eaton
   Four credits.
   This course considers how definitions of deviance are socially constructed, with attention paid to how these definitions are created in the context of social power and institutions. Topics covered include theories of deviance, stigmatized identities, deviant subcultures, and both internalizations of and resistance to deviant labels.

210. Special Topics
   Clark/Eaton
   Variable credit course, 2-4 credits.
   Special topics in sociology not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites.

300. Departmental Studies
   Clark/Eaton
   Variable credit course, 2-4 credits.
   Special topics in sociology not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites.

301. Social Movements
   Eaton
   Four credits.
   This course considers theory and research about past and present movements for social change in the United States and beyond. Topics covered include leadership, ideology, recruitment, strategy, organizational dynamics, media relations and reasons for success or failure. Social movements covered change frequently because of ongoing efforts at social change, but are likely to include the U.S. civil rights movement, the feminist movement, LGBTQIA movement, environmental movements, anti-apartheid movement, anti-globalization movements, the Occupy Wall Street movement and the Arab Spring. Prerequisites: SOC 110 or ANT 110.

302. Sociology of Health and Medicine
   Clark
   Four credits.
   Focuses on the institution of medicine in contemporary industrial society. Topics include societal and individual views of disease, social epidemiology, the medical professions, health care delivery systems, health policy and ethical issues in health care. Prerequisites: SOC 110 or ANT 110.
303. Death, Dying and Bereavement  
Clark  
Four credits.  
Examines the sociological perspective on the death and dying process. Topics include anticipatory mourning, the death and dying process, social meanings of death, medical responses to terminally ill patients, and theoretical and methodical issues related to the studying of death and dying. *Prerequisite: SOC 110 or ANT 110.*

304. Sociology of Inequalities  
Clark  
Four credits.  
Focuses on inequalities of class, race and gender in American society. Topics include the relationship of social inequality to social class and life chances, the social construction of race and gender, how ideas about race and gender have been and continue to be used to justify unequal treatment, and the consequences these have for people's everyday lives. *Prerequisite: SOC 110 or ANT 110.*

305. Self & Society  
Eaton  
Four credits  
This course focuses on theories and subjects of social psychology. Specific consideration is given to the individual in a social context. Major topics include: symbolic interactionism, people as symbol makers, significance of the self, role-taking and role-making, the significance of social reality, communication and social movements. *Prerequisites: SOC 110 or ANT 110 or PSC 110.*

306. Criminology  
Clark  
Four credits.  
This course examines the problem of crime in American society, focusing attention on how crime is defined and measured, patterns of criminal behavior, theories of crime causation and crime policy. It also examines the criminal justice system, focusing on ethical issues related to it, how they are currently dealt with and how they could be addressed better in the future. *Prerequisites: SOC 110 or ANT 110, plus four or more other credits in sociology.*

308. Public Sociology and Activism  
Eaton  
Four credits.  
This project-oriented, student-driven, team-based course uses sociological theories and methods to work toward substantive changes on an issue of social justice selected by the students. It is noted in the ethics of social justice and public sociology, which compel sociologists to use their knowledge to improve the lives of those in their communities. Students will select a social justice issue, and design and implement an action plan that sets concrete goals for real-world improvements in the lives of people affected by the issue selected. *Prerequisites: SOC 110 or ANT 110, plus eight other credits in sociology.*

309. Sociology of Religion  
Eaton  
Four credits.  
This course explores the role of religion in American society, past and present. Christian and non-Christian religions are addressed, as well as alternative religious movements, cults, the emergence of a “spiritual but not religious” population in the United States, and atheistic and agnostic belief systems. Particular attention will be paid to the way that religion influences social norms and values, personal identities and one's sense of community. Topics discussed in relation to religion and spirituality include: race/ethnicity, social class, gender, sexuality, politics, and the use of drugs, among other topics. *Prerequisites: SOC 110 or ANT 110.*
312. Sociology Through Film
   Clark
Four credits.
Examines a variety of films from a sociological perspective. Emphasis will be given to how
feature-length and documentary films portray characters’ race and ethnicity, gender, social
class and sexualities, as well as what these portrayals indicate about the larger societies in
which they are situated. Weekly film screenings will be supplemented with course readings,
class discussions and analytic papers about the films. Prerequisites: SOC 110 or ANT 110, plus
four or more other credits in sociology.

315. Sociological Theories
   Eaton
Four credits.
This course focuses on comprehension and analysis of original source material from important
theoretical works in sociology from the mid-19th century to present. The theories of classical
thinkers such as Marx, Durkheim, Weber, Simmel and Mead are studied along with
historically marginalized theorists such as DuBois and contemporary theorists such as
Bourdieu and Foucault. The course examines society from functionalist, conflict, feminist,
critical race, symbolic interactionist, cultural, post-colonial, post-modern and post-
structuralist, and globalization perspectives. Prerequisites: SOC 110 or ANT 110, four or more
other credits in sociology; and sociology or anthropology majors only or instructor consent.

401. Methods of Social Research
   Clark
Four credits.
Methods by which sociologists design research, collect and analyze data, and present results.
Topics include techniques for collecting quantitative and qualitative data, strategies for
deductive and inductive analysis, and the interpretation of results. Prerequisites: SOC 315 and
eight other credits in sociology; sociology majors only or instructor consent.

502. Senior Seminar: Social Research
   Clark/Eaton
Four credits.
Reading and discussion of various topics related to sociological research. Each student also
proposes and conducts a sociological research project, including formulation of a problem,
review of literature, research design, data collection, analysis and public presentation of
results in an original paper. Prerequisites: SOC 401, 12 other credits in sociology. Junior or
senior standing.

Anthropology

   Major Mission Statement: The mission of the anthropology program is to equip
students with intellectual and practical tools to engage with diverse populations and
to appreciate the importance of intercultural communication. With its holistic and
comparative approach to understanding the human condition — i.e. from a cultural,
biological, linguistic and archaeological perspective — the anthropology program
offers exciting career opportunities for students interested in education, travel, social
justice and working with people.

   Anthropology courses also are fundamental to a well-rounded teaching degree in
broad social studies certification. Please speak with the Department of Education for
further details.

   Communicating Plus - Anthropology: Students completing a program in
anthropology develop skills in the four Communicating Plus areas — written
communication, oral communication, critical thinking and problem solving —
through required and elective coursework in the discipline. The anthropology program is based on a sequence of courses that emphasize the staged development of skills and abilities. As students complete required coursework in 100- and 200-level courses, they are developing skills that will be used for more sophisticated analysis, problem-solving, and presentation of information and theoretical perspectives in 300-level elective courses and the senior seminar research project. Graduates of this program will have had many and varied opportunities to present their ideas in written and oral forms. They also will have had many opportunities to engage in the kinds of discussions, debates, hands-on learning activities, data analysis and research through which anthropologists attempt to integrate humanistic, scientific and social scientific perspectives to address human problems.

Requirements for a major in anthropology (32 credits): Required (16 credits): ANT 110 or SOC 110, ANT 215, SOC 315, ANT 502. Eight elective credits in anthropology at the 200 level or higher. Eight elective credits in sociology at the 200 level or higher, to be selected from SOC 201, 204, 210 (Sociology of the Paranormal), 301, 303 or 309.

Requirements for a minor in anthropology (20 credits): ANT 110 and 215 and 12 elective credits in anthropology.

110. The Human Experience: How To Think Anthropologically

Four credits.
Introduction to cultures around the world and the principal methods and concepts used in their study. Anthropology involves the holistic study of human life on earth, including economic, social, religious, political and symbolic systems. Students will explore such diversity through films, workshops and ethnographies. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

200. Departmental Studies

Variable credit course, 2-4 credits.
Special subjects in anthropology not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

215. Ethnographic Field Methods

Four credits.
A course designed to introduce students to ethnographic field methods and anthropological inquiry. Topics include: current debates in cultural anthropology, research design and implementation, fieldwork ethics and ethnographic writing. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. Prerequisite: ANT 110 or SOC 110 or consent of the instructor.
222. Anthropology and Contemporary Global Issues
Margaretten
Four credits.
An analysis of the impact of global changes on societies in Africa, Asia, Latin America and the Pacific Islands. The course will address the following issues: the spread of global capitalism, modernization, urbanization, poverty, detribalization, terrorism, disease, cultural survival and immigration. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. Same as ENV 222.

224. Gender, Sex and Sexuality: Cross-Cultural Views
Margaretten
Four credits.
An exploration of the socio-biological constructions of gender, sex and sexuality across a range of cultural and historical contexts. Draws upon anthropological case studies to investigate relationships and ideologies of femininity, masculinity and androgyny — including that of hetero-normativity, transgendered practices and identities, and same-sex relations. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. Same as WOM 224.

232. Medical Anthropology
Margaretten
Four credits.
This course introduces students to concepts and experiences of health, healing and illness in diverse societies. It focuses on the cultural meanings of these experiences while also considering the institutional context and power dynamics of global health systems, including that of biomedicine. Course expectations include intensive reading and writing assignments with in-class discussions supplemented by lecture material and ethnographic films. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

241. Societies of Africa
Margaretten
Four credits.
An introduction to the diversity and complexity of social worlds in Africa with particular attention to cultural and historical processes that shape everyday life. Topics include: the legacies of colonialism, post-colonial development, social organization, identity formations, and popular representations of “Africa” in Western thought. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

275. Africa and Human Rights
Margaretten
Four credits
This course delves into the relations of power that have shaped the lives, livelihoods and living standards of Africans today. It probes the basis of these power relations — often rooted in political, economic and social inequalities — while also taking care to highlight the varied responses and strategies that Africans have enacted to resist their marginalization. Thus, with a sustained focus on human rights, this course utilizes anthropological case studies to present the diversity, vitality and complexity of daily life in Africa and its Diaspora.

300. Departmental Studies
Staff
Four credits.
Special subjects in anthropology not covered by regular courses. Topics are announced as courses are offered. This course may be repeated for credit when topics change. Some topics
Courses of Study

may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. Prerequisite: ANT 110 or SOC 110 or consent of the instructor.

314. Religion, Magic, and Witchcraft
Margaretten
Four credits.
The role of the sacred in cultural systems. Topics include: the relationship of belief systems and rituals to other aspects of culture; the differences and similarities between magic, religion, witchcraft and mythology; the development of religious systems; religion as a form of symbolic communication; and cults in the modern world. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. Prerequisite: ANT 110 or SOC 110 or consent of the instructor.

327. Global Youth Cultures
Margaretten
Four credits.
This course explores the social worlds and experiences of youths in diverse settings. In doing so, it presents youth as a “relational” concept that does not correspond to age or a developmental stage but rather to structural trends, technologies, and life expectations. This course thus highlights the contributions and centrality of youths to current intellectual thought, particularly in relation to theories of marginality, personhood, popular culture, globalization and modernity. This is a reading and writing-intensive course with occasional film viewings. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. Prerequisite: ANT 110 or SOC 110 or consent of the instructor.

335. Urban Anthropology
Margaretten
Four credits.
An examination of cities as sites and subjects of anthropological inquiry. Case studies focus on the relationship between spatial forms and social practices with particular attention to the power dynamics of urban planning, commodity flows, and processes of local/global connectivity, including that of disconnectivity. Required field trip. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. Prerequisites: ANT 110 or SOC 110 or consent of the instructor.

502. Seminar in Anthropological Method and Theory
Margaretten
Four credits.
Selected topics in anthropology. Emphasis is placed on method, theory and inference. Students will prepare research papers related to specific problems considered each year. Required of all anthropology majors, this course may be repeated for credit when topics differ. Prerequisite: open to junior and senior anthropology majors and minors. Other juniors and seniors may be admitted with the consent of the instructor.

Theatre

Professors Kenneth L. Hill (Chair); Associate Professor John G. Dalziel; Visiting Professor Susan M. Hill

Departmental Mission Statement: The theatre department provides all interested students the opportunity to pursue their goals in the theatre. The curriculum and production program furnishes a strong undergraduate background in practical experience in the theatre and in the study of dramatic literature and history.

Communicating Plus - Theatre: The core courses in the theatre major address written and oral communication skills, critical thinking and problem-solving. These skills are imbedded in the course work. If these courses are taken in a normal consecutive sequence, the student works on developing and mastering skills in all areas of Communicating Plus. The courses at the 100 and 200 levels introduce students to these skills, and the courses in the 300 and 400 levels help the students master these skills.

The theatre department has three distinct minor options: theatre production, teaching minor in theatre production, and dramatic literature. All minors develop skills in written and oral communication, problem-solving and critical thinking.

Requirements for a major in theatre: THE 101, 131, 231, 232, 255, 512; two courses selected from THE 260, 268, 301, 352, 362, 363, one of which must be at a 300 level; English 340 (Shakespeare); and a minimum of four credit hours in THE 202 and/or 210 and/or 212.

Requirements for a teaching major in theatre: THE 101, 131, 231, 232, 255, 301, 512; one course selected from THE 260, 268, 352, 362, 363; English 340 (Shakespeare); and a minimum of four credit hours in THE 202 and/or 210 and/or 212.

Requirements for a minor in theatre: THE 101, 131, 255; two courses selected from: THE 231, 232, 260, 268, 301, 352, 362, 363, 512; minimum of four credit hours in THE 202 and/or 210 and/or 212.

Requirements for a teaching minor in theatre production: THE 101, 131, 255, 301, 512; minimum of four credit hours in THE 202 and/or 210 and/or 212.

Recommended for majors: Electives develop special skills or knowledge and at least one is recommended beyond the minimum requirements: any THE 200 or 300 level course.

Course Substitution: THE 101 can be waived for students with extensive high school course work and production experience, however, the total hours of theatre courses must be satisfied by substituting an upper-level course.

101. Introduction to Theatre: K. Hill/Dalziel

Understanding and Making Theatre

Four credits. Offered in fall.

An introduction to all aspects of the theatre and to the unifying principles of a theatre production. The course touches upon the historical development of the theatre and upon its dramatic literature. Some practical application and work. Exposure to live theatre productions on campus and via scheduled field trips. Field trip fee: $25.00
131. Beginning Acting  
K. Hill  
Four credits. Offered in spring. 
Fundamental skills and theories of the craft of acting are introduced and explored through in-class acting exercises, discussion and the performance of in-class scenes. Areas of exploration are: imagination, actor connection, Stanislavski's theory of acting and fundamentals of improvisation. Evaluation is based on participation, scene analyses, memorized and performed scenes, tests/quizzes and live theatre attendance.

200. Topics in Theatre and Drama  
Staff  
Variable credit course, 1-4 credits. 
Special subjects in theatre not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics, courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

202. Acting Lab  
Staff  
One credit. 
Participation as cast member of departmental production(s). Responsibilities established individually with instructor after auditions. Credits may be counted toward graduation, but not toward fine arts exploration requirement. Grading is Pass-Fail. Prerequisite: consent of instructor.

210. Production Lab-Scenery & Lighting  
Dalziel/Staff  
One credit. 
Participation as a member of production staff for departmental production(s). Responsibilities established individually with instructor after first production meeting. Credits may be counted toward graduation, but not toward fine arts exploration requirement. Grading is Pass-Fail. Prerequisite: consent of instructor.

212. Production Lab - Costumes  
S. Hill  
One credit. 
Participation as a member of production staff for departmental production(s). Responsibilities established individually with instructor after first production meeting. Credits may be counted toward graduation, but not toward fine arts exploration requirement. Grading is Pass-Fail. Prerequisite: consent of instructor.

231. Theatre and Drama I: Ancient through Renaissance  
Pleiss Morris  
Four credits. Offered in fall 2018 and alternate years. 
The dramatic literature, history and production practices of ancient Greece, Rome, medieval Europe and the Renaissance. Understanding dramatic structure, metaphoric significance and thematic content in historical context is emphasized. Lectures, group discussion, play script analysis, readings in theatre history, reading response assignments, research and creative projects/papers. Same as ENG 231. Field trip fee range: $0 - $40.

232. Theatre and Drama II: Restoration through Contemporary  
K. Hill  
Four credits. Offered in fall 2019 and alternate years. 
The course encompasses the dramatic literature, history and production practices from the Restoration through contemporary theatre. Understanding dramatic structure and thematic
content in historical context is emphasized. Lectures and group discussions, play script and theatre history readings, reader response assignments, research and creative projects/papers. Same as ENG 232 of the same name. Field trip fee: $25.

248. **The Actor's Voice for Stage and Media**  
K. Hill  
Four credits. Offered in fall 2019.  
Vocal and physical techniques of expression are developed as the student gains performance skills, poise and confidence in public presentations. The steps in preparing a piece of literature for public presentation are studied: selection, analysis and rehearsal. The course emphasizes development of vocal techniques, analysis, the performance of dramatic literature, prose and poetry.

255. **Stagecraft**  
Dalziel  
Four credits. Offered in fall 2018 and alternate years.  
Various aspects of technical theatre are covered: scenery construction, scene painting/texturing, property construction, lighting, sound, drafting and stage management. Individual projects and production preparation/participation form the core of the course. Materials fee: $25.

260. **Introduction to Lighting Production and Design**  
Dalziel  
Four credits. Offered in spring 2019 and alternate years.  
The student develops a method of analyzing and responding to play scripts as a lighting designer. Basic skills in drafting, sketching and visual research are introduced. Projects move the student from initial intuitive responses to completed production plans for lighting. The technical aspects of safe stage lighting and safety with electricity are covered through practical projects in plot execution, troubleshooting, minor maintenance and the operation of computer-controlled dimming equipment. Lectures and demonstrations, discussions, technical and design projects and examinations.

268. **Makeup Design and Application**  
S. Hill  
Four credits. Offered in spring 2019 and alternate years.  
A study of and development of skills in the art of makeup design and application. Character analysis, period application, character aging, and special materials techniques are included in makeup design. Lectures/demonstrations, discussions, technical and application projects.

300. **Departmental Studies**  
Staff  
Variable credit course, 1-4 credits.  
Variable topics in theatre not covered by regular courses. This course may be repeated for credit when topics change. Sometimes taught in conjunction with THE 202. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

301. **Classroom and Children's Theatre**  
K. Hill  
Four credits. Offered in fall 2018.  
The course is an exploration of theatre for young audiences and examines techniques for using theatre in the classroom. Topics will include acting, directing, designing and playwriting for young audiences. Students will develop the resources needed to function as theatre teachers and develop an appreciation for the dramatic literature of children's theatre. Lectures, group work, presentations, play analysis, adaptations, live theatre, design projects and lesson plans.
Field trip fee: $25.

352. Acting II: Topics in Acting  
K. Hill  
Four credits. Offered in spring 2020.  
Special topics such as scene study or auditioning. Scene study is a practical upper level acting course that develops various acting skills. Auditioning provides the actor with basic monologue and scene preparation strategies and skills for all types of auditions. Performance projects. Prerequisite: THE 131 or 248, or consent of the instructor.

362. Scenic Design  
Dalziel  
Four credits. Offered spring 2020 and in alternate years.  
The student develops a method of analyzing and responding to play scripts. Projects move the student from initial and intuitive responses through play script analysis and visual research to completed designs. Rudimentary skills in drafting, drawing, imagining, color rendering and scenic model making are introduced. Lectures, demonstrations, discussions, design and research projects. Prerequisite: THE 101 or consent of the instructor.

363. Costume Construction and Design  
S. Hill  
Four credits. Offered in spring 2020 and alternate years.  
The course will provide an introduction to costume design and basic sewing techniques and costume construction. Students will develop methods for costume design and execution, the imaginative process and visual research of plays. Topics include costume construction techniques, reading and adjusting patterns, costume rendering and historical costume research. Materials fee: $25. Prerequisite: THE 101 or 268, or consent of the instructor.

512. Senior Seminar in Directing Theories and Practices  
K. Hill  
Four credits. Offered in spring.  
Theories and history of directing and practical experience through the presentation of a one-act play for the public. The means of instruction are: discussions, reports, lectures, assigned readings, in-class scene preparation. Prerequisites: THE 101, 131, junior or senior status and the approval of the theatre department's faculty.

Women's and Gender Studies  
Professors Barbara A. McGowan (Coordinator), Sarah Mahler Kraaz  
Women's and gender studies is a vigorous field which seeks to uncover and understand the effects of gender categories and sex roles on our history, knowledge, cultures and individual experiences. To that end, women's and gender studies is resolutely interdisciplinary and trans-disciplinary, drawing on the insights of a new generation of scholars and teachers that encourages analysis of all gender roles in critical and creative ways.  

Requirements for a minor in women's and gender studies: Eighteen credits including WOM 202, 550 and at least 12 credits from WOM 204, 300 or 400. Other courses may be counted toward the minor, provided they are approved by the coordinator of the Women's and Gender Studies program.
202. Introduction to Women's and Gender Studies

Variable credit course, 2-4 credits.
This course is an introduction to women's and gender studies and will consider issues surrounding women, men, gender and feminist theory from a variety of academic perspectives. Special attention will be paid to the development of the modern American women's movement and the impact recent changes in education, work, marriage, politics, economics, religion, marriage and child-bearing patterns have had on the lives of American women and men. Both academic and popular sources will be used to explore the lives of girls and boys, women and men.

204. Topics in Women's and Gender Studies

Variable credit course, 2-4 credits.
Special topics in women's and gender studies not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

224. Gender, Sex and Sexuality: Cross-Cultural Views

Four credits.
An exploration of the socio-biological constructions of gender, sex and sexuality across a range of cultural and historical contexts. Draws upon anthropological case studies to investigate relationships and ideologies of femininity, masculinity and androgyny — including that of hetero-normativity, transgendered practices and identities, and same-sex relations. May count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information. Same as ANT 224. Prerequisite: ANT 110 or consent of the instructor.

243. Women's Literature

Four credits. Offered in 2014-15 and alternate years.
Works in various genres by women writers. Attention to issues surrounding women's writing, possibly including the following: how and why has women's writing been marginalized? Is there a style of writing that is essentially female? How do women's texts handle the issue of oppression? To what extent is feminist criticism a useful tool for studying literature? For comparison, the course may include writings by men, but the main focus will be the work of women. Same as ENG 243.

300. Departmental Studies

Variable credit course, 2-4 credits.
Special topics in women's and gender studies not covered by regular courses. This course may be repeated for credit when topics change. Please see the pertinent schedule of courses for the listing of topics courses and possible prerequisites. Some topics may count toward the global and cultural studies requirement; refer to the Academic Policies: Global and Cultural Studies Requirement section for more information.

330. Women and Family in Medieval and Early Modern Europe

Four credits.
This course will focus on gender roles in European history, from the late Middle Ages through the Early Modern era. The course will explore the different roles women and men played
within the family as that institution evolved during this time period. The course also will explore the opportunities and restrictions placed on women by the major religious, cultural and social institutions of the time. The course will examine the impact of class on women’s opportunities as well. Different times and places will be highlighted, including 12th-century France, 15th-century Venice, 16th-century Nuremberg, and 17th-century Belgium. Same as HIS 330.

400. Research in Women’s and Gender Studies

Staff

Variable credit course, 2-4 credits.

This course varies in subject matter and course requirements, but includes a significant research component. See the course number in parentheses for specific course descriptions. Different courses listed under this number may be taken for credit.

550. Senior Project in Women’s and Gender Studies

Staff

Variable credit course, 2-4 credits.

Students pursue a specific topic or concern in such a way as to produce a sizable project (e.g., research paper, essay, collection of creating writing, artwork, social project, etc.), sharing ideas and problems in a seminar-like setting throughout the semester. Prerequisite: senior standing or consent of the coordinator of the program.
Off-Campus Study

Off-campus study can enrich a student's general culture, deepen their understanding of a major and test their career goal. It can occur in this country or abroad, and the opportunities for foreign study are not limited to majors in, or users of, a foreign language. Foreign study has the further merit of increasing one's perspective as a citizen of the United States.

Ripon offers a variety of off-campus programs. Students with a cumulative grade point average of 2.00 or higher are eligible to apply for admission to off-campus programs. Waiver of the senior residence rule must be obtained from the associate dean of faculty by seniors who wish to participate in off-campus programs. Students should consult program advisors for information about academic credit, application dates and other matters.

Students who are considering participation in an off-campus study program in the fall or spring semester of the 2019-20 academic year must declare their intention to participate by Feb. 20, 2019. Failure to formally declare an intention may limit the student's access to the Ripon College Off-Campus Study Grant. Having declared an intention to attend an off-campus study program does not obligate a student, and there is no penalty to students who have declared an intention but do not actually go on a program. Contact the Office of the Registrar regarding the process by which to declare an intention. Consult the Office of Financial Aid for information about costs and the Ripon College Off-Campus Study Grant.

Self-Designed Off-Campus Study:

This opportunity is designed to provide individualized study not currently available in on-campus or off-campus programs and to give the student an opportunity to design a project reflecting personal interest and capacities. The project may involve a single topic or a group of related topics, may be departmental or interdepartmental in scope and must meet College standards of intellectual rigor.

A student applying for off-campus study under this option will submit a detailed proposal to a faculty member who will serve as their advisor. The proposal should provide the following information: a description of the project; a statement of purpose or goals; the current status of the project (i.e., how much preliminary work has been done); the availability of materials and facilities, such as a bibliography and permission to use libraries, museums, archives and laboratories; the method of evaluation (e.g., written or oral examination, research paper, laboratory reports, concert recital, art exhibition).

If the faculty advisor approves it, the proposal next is submitted to the department or departments concerned. In sanctioning the project, the department(s) will establish the number of credits to be granted for its successful completion. Following departmental approval, the project will be forwarded to the associate dean of faculty and registrar for final action. Upon completion of the project and return to the campus, the student will present the results to the department in the form previously agreed upon. The Satisfactory-Unsatisfactory grading option will be available to participants.
Student participants will be charged the normal tuition fee or a fee based on the credit charge, whichever is lower. A student may participate in the program only once during his or her college career and receive no more than 16 credits. Projects of limited scope may be undertaken during the summer.

**Approved Programs:**
To be eligible for approved off-campus programs, students must have at least a 2.0 cumulative grade point average. Grades and credits earned in approved Ripon College programs (listed below) will appear on the Ripon College transcript as if earned in residence (with a notation naming the program) and will be included in the Ripon College grade point averages and credit calculations. Further information and links to program websites are available at www.ripon.edu/off-campus.

**Programs Abroad**
Students who complete one semester of study for graded credit in a study-abroad program fulfill the global and cultural studies requirement.

**Argentina - Córdoba** (The Center for Cross-Cultural Study program)
Córdoba has six universities and thousands of students. As a student at the Universidad Nacional de Córdoba, you have an opportunity to interact with students from all over South America.
Excursions to other areas, museums and cultural sites allow the student immersion into the life of an Argentine student.
Length of program: fall semester, spring semester, full year and summer programs.
Eligibility: open to those who have completed one semester of college Spanish with a minimum 3.0 GPA in the subject.
Credit: 17-22 credits.
Application deadlines: May 15 (for fall semester); Oct. 15 (for spring semester).
Campus advisor: Professor Geoff Guevara-Geer.

**France - Montpellier** (University of Minnesota program)
This program offers students the opportunity to live and study in one of France’s fastest-growing cities. While studying at the Paul Valéry University, the liberal arts division of the University of Montpellier, students experience life in a blossoming cultural and educational milieu. Excursions introduce students into the unique character of southern France.
Length of program: fall semester, spring semester or full year.
Eligibility: two years of college French.
Credit: 10 credits may be counted toward the minor.
Application deadlines: April 1 (fall semester or full year); Oct. 1 (winter/spring semester).
Campus advisors: Professors Dominique Poncelet and Jean-Blaise Samou.

**France - Paris** (Academic Studies Abroad program)
This program offers students the opportunity to study at the Université de Paris-Sorbonne as well as the Institut Catholique. Classes are offered at all levels of study, and all courses are taught in French. Paris is the ideal city in which to learn and perfect French. Besides classes, students take part in cultural and historical excursions.
Length of program: fall semester, spring semester or full year.
Eligibility: 3.0 GPA, two years of college French; three or more years of French in high school.
Credit: a maximum of 10 credits may be counted toward the minor.
Application deadline: June 1 (fall semester); Oct. 15 (winter/spring semester).

Campus advisors: Professors Dominique Poncelet and Jean-Blaise Samou.

Hungary - Budapest

Hungary has a long tradition of excellence in mathematics education. However, because of the language barrier, students have not been able to take advantage of the skill and dedication of the mathematics faculties of Hungarian universities.

The Budapest Semester is a program in English for North American undergraduates. Mathematics and computer science majors in their junior/senior years may spend one or two semesters in Budapest and study under the tutelage of eminent Hungarian scholar-teachers. The instructors are members of Eötvös University, the Mathematical Institute of the Hungarian Academy of Sciences, and Budapest University of Technology and Economics, the three institutions known for having educated more than half of Hungary's highly acclaimed mathematicians. Most instructors have had teaching experience in North America and are familiar with the cultural differences.

Length of program: fall or spring semesters.

Eligibility: juniors and seniors.

Application deadlines: April 30 for fall semester; Nov. 1 for spring semester.

Campus advisor: Professor David Scott.

Italy - Coldigioco: Earth and Environment (Luther College program)

This program is particularly suited for students interested in environmental studies and gaining field experience with the rich geology of Italy. Students will live at the Osservatoria Geologico di Coldigioco, a medieval village restored into a vibrant scientific center. No prior language is required as students will take an intensive introductory Italian language course for the first three weeks of the program. Students will learn about the different earth systems: biosphere, atmosphere, hydrosphere and lithosphere. They will learn how humans influence and are influenced by these systems. Finally, they will learn how to interpret the changes in these systems over time by examining the geology of rocks. A liberal arts perspective on the sciences will be introduced as students explore the connections between art, science and our sense of the aesthetic in order to develop their own skills in the visual communication of scientific information. In the final two weeks of the course, students will work in small groups (2-5 individuals) and in consultation with
program faculty to design and implement a field-based research project.

Length of program: fall semester only: 12 weeks, early August to late October.

Eligibility: one science course with lab.

Credit: 16 credits.

Application deadline: February 15.

Campus advisor: Professor Memuna Khan.

Japan - Tokyo (Earlham College program)

Students study at Waseda University’s International Division in Tokyo after a brief orientation providing intensive language practice and cultural discussions. Students enroll in Japanese-language courses as well as academic courses taught in English with Japanese and other international students. Most students choose courses on Japan and Asia, but courses in the sciences, math and other disciplines also are available.

Although Japan study encourages students to enroll in the full-year program, semester options are available for students who cannot spend a year away from their home campus. Students have the option to live with a Japanese family or in a Waseda University dormitory. A minimum grade point average of 3.0 on a 4.0 scale is required. Acceptance in the program is contingent on completion of at least one semester or term of Japanese language study prior to departure and on approval of the School of International Liberal Studies at Waseda University.

Japan Study is a collaborative initiative in international education managed by Earlham College and recognized by the ACM.

Length of program: mid-September to late-July (full academic year); mid-September to early February (fall semester); mid-September to mid-March (fall semester with Cultural Practicum); mid-February to late July (intensive language + spring semester).

Eligibility: sophomores, juniors, seniors with a minimum 3.0 GPA.

Acceptance in the program is contingent on completion of at least one semester or term of Japanese language study prior to departure and on approval of the School of International Liberal Studies at Waseda University.

Credit: 16-18 credits.

Application deadlines: Contact the Office of the Registrar.

Campus advisor: please contact the Office of the Registrar.

Russia - St. Petersburg (American Institute for Foreign Study program)

The enormous political, social and economic changes taking place in Russia provide a fascinating context for this program, and the St. Petersburg program site provides a particularly rich environment for understanding the changing nature of Russian life. This American Institute for Foreign Study program is affiliated with St. Petersburg State Polytechnic University. No previous Russian language study is required, and the program offers a full range of language courses, seminars in English for foreign students, and seminars in Russian for advanced students. Students have the choice of living in a residence hall or with a Russian family and receive a meal allowance. Other features include cultural activities such as visits to museums, palaces and concert halls, day field trips, a three-day London visit before the program, the services of a pre-departure Student Advisor Center and on-site resident director, a three-day visit to Moscow, an optional four-day visit to Helsinki, Finland and Tallin, Estonia, and a public transportation pass.

Length of Program: fall semester (late August through mid-December), spring semester (late January through mid-
Eligibility: sophomores, juniors or seniors with at least a 2.5 GPA.
Credit: 12-18 credits.
Application deadlines: May 15 (fall semester) and Oct. 1 (spring semester).
Campus advisor: please contact the Office of the Register.

Scotland - University of St. Andrews (Butler University IFSA program)
This quality academic program is especially attractive for students with interest in the sciences, biotechnology, economics and anthropology who wish to study abroad while keeping pace with the requirements for graduation. Many other academic programs at St. Andrews also are highly ranked, making the program attractive for a variety of students. As an IFSA Butler student, students are entitled to enroll in undergraduate courses for which they are qualified and for which space is available. The affiliation with the Butler University IFSA program offers personalized pre-departure advising as well as full-time on-site staff. Students have an on-site orientation in Scotland. There also is emergency assistance to students from the on-site staff.
Length of Program: fall or spring semester.
Eligibility: second-semester sophomores, juniors or seniors who have at least a 3.2 GPA.
Credit: minimum of 15 credits, maximum of 16 credits each semester.
Application deadlines: Oct. 15 for spring semester; April 1 for fall semester.
Campus advisor: Professor Colleen M. Byron.

Spain - Alicante (The Center for Cross-Cultural Study program)
Students in this program will find themselves immersed in a cross-cultural environment with students from Spain and around the world.
The fastest-growing university in Spain, Universidad de Alicante is dedicated to the cultivation of students’ academic and professional skills while developing critical thinking and social awareness. After completing an intensive language and cultural period, students have the opportunity to enroll in a wide variety of courses.
Students need not be language majors as this program may be of particular interest to majors in business, marketing, politics and government or education.
Length of program: fall semester, spring semester, full year, or short-term programs.
Eligibility:
A. Spanish Studies Program:
Two semesters of high school Spanish/two semesters of elementary college Spanish or the equivalent; Minimum 3.0 GPA in Spanish course work required; exceptions may be made with strong recommendations from faculty.
B. Integrated Studies Program:
Two semesters of advanced college-level Spanish or the equivalent, or native/near-native speakers of Spanish; and approval from Universidad de Alicante, based upon the performance on UA’s online examination; Minimum 3.0 GPA in Spanish course work required; exceptions may be made with strong recommendations from faculty.
Credit: A maximum of 16 credits may be counted toward the Spanish major, 11 credits toward the minor.
Applications due to campus advisor: May 15 (fall semester); October 15 (spring semester).
Campus advisor: Professor Tim Reed.

Spain - Madrid (Academic Studies Abroad program)
This program offers students direct-enrollment at three universities in Madrid: the Universidad Carlos III, the Universidad Complutense and the Universidad Autónoma. Access to the campuses provides a diverse selection of coursework.

Providing all levels of study, students experience cultural and historical excursions to complete the immersion experience.

Length of program: fall semester, spring semester or full year.

Eligibility: two years of college Spanish; three or more years of the language in high school; 3.0 GPA.

Credit: a maximum of 16 credits may be counted toward the Spanish major, 11 credits toward the minor.

Application deadlines: March 15 (fall semester or full year); Oct. 15 (winter/spring semester).

Campus advisor: Professor Tim Reed.

Spain - Seville (The Center for Cross-Cultural Study program)

Students enrich their education by attending classes at The Center for Cross-Cultural Study or at the Universidad de Sevilla following an initial intensive language period. This culturally rich program provides a combination of studies, cultural visits and excursions.

This program may be of particular interest to majors in Spanish, business, marketing, politics and government or education.

Length of program: Academic year, semester, and short-term programs.

Eligibility: A. Spanish Studies Program
Requirements: One semester of intermediate college-level Spanish or heritage speaker. 3.0 GPA in Spanish coursework required.

B. Integrated Studies Program
Requirements: Completion of two semesters of advanced college-level Spanish or the equivalent, and/or heritage speakers of Spanish.
3.0 GPA in Spanish coursework required.
Credit: a maximum of 16 credits may be counted toward the Spanish major, 11 credits toward the minor.

Applications due to campus advisor: May 15 (fall semester); Oct. 15 (spring semester).

Campus advisor: Professor Tim Reed.

Spain - Toledo (University of Minnesota program)

This program offers students the opportunity to live in the walled city of Toledo. Toledo, declared a World Heritage Site by the United Nations, is a living museum where Spanish history is preserved.

The program is offered in collaboration with the prestigious José Ortega Marañón Foundation, which employs native faculty considered experts in their fields.

Students live in a residence with other program attendees or in host family homes. This, combined with excursions, immerses students in the cultural and historic perspectives of Spain.

Length of program: fall semester, spring semester, full year or short-term programs.

Eligibility: Open to those who have completed four semesters of college Spanish with a minimum 3.0 GPA in the subject.

Credit: a maximum of 16 credits may be counted toward the Spanish major, 11 credits toward the minor.

Application deadlines: See advisor for deadlines.

Campus advisor: Professor Tim Reed.
Wales - Bangor University

Two types of study-abroad programs are available at the Bangor University. In each case, the University will make every attempt to secure accommodations for participants. Students will have all the rights, privileges and responsibilities of other University students during their periods of study.

1. The first study-abroad program at Bangor University is intended for students of biology, chemistry, psychology and related fields and is open for study first or second semester, depending on courses students wish to take and the flexibility of their schedules. Students must have at least sophomore standing, but junior standing is preferred. A GPA of 3.0 is required for study of psychology; a GPA of 2.5 is required for study in other areas. Information about courses is available through the College’s website.

   Length of program: one semester, either fall or spring semester.
   Eligibility: second semester sophomores, juniors or seniors (at least junior standing preferred).

2. The second is tailored specifically to the needs of students of education intending to be licensed at the elementary (Early Childhood/Middle Childhood) level. This is open for study first or second semester. Students will take selected courses in the School of Education as well as spend time each week in local schools. Coursework and in-school observations are chosen with the assistance of an advisor at the School of Education in order to assure an appropriate program and take maximum advantage of opportunities to learn about the British educational system and international issues in elementary education. Ripon College students interested in this program should discuss it with their educational studies department advisor as far in advance of their application as possible and plan their course of study at Ripon to complement the courses and in-school experiences they will have in Bangor. Courses of study tend to be organized by ages of children to be taught (upper or lower primary) and skill development rather than subject content area.

   Length of program: one semester, either fall or spring semester.
   Eligibility: juniors or seniors.

Applications for fall semester study (either program), including two letters of recommendation and a transcript, are due to the program advisor by May 1.

Applications for spring semester study, including transcript and two letters of recommendation, are due by Sept. 30. Pertinent background information is available on the College’s website.

Application forms may be obtained from the advisor.

   Campus advisor: Professor Kristine Kovack-Lesh.

Note: Since Bangor University posts official grades only once per year during the summer, seniors studying there during the first or second semesters will need to make special arrangements to have “unofficial” grades reported before Ripon’s Commencement and understand that these are provisional until the summer postings.

Wales - Swansea University Program

Study at Swansea University is particularly appropriate for students who wish to continue progress in certain areas of scientific studies with an overseas experience. Swansea has programs open for American students in physics, mathematics and engineering. Students in other disciplines also may wish to investigate courses of study available there in sport science, humanities and social sciences.

Length of program: fall or spring semester. (Typically spring for physics,
mathematics and engineering unless students are willing to stay through January for final examinations.)

Eligibility: second-semester sophomores, juniors or seniors.
Credit: maximum of 16 credits each semester.
Application deadline: Sept. 30 for spring semester, May 15 for fall semester.
Campus advisor: Professor David Scott.

Programs in the United States

Chicago, Illinois - Newberry Seminar in the Humanities (ACM program)
Newberry Seminar students have an extraordinary opportunity to do advanced independent research at one of the world's great research libraries, the Newberry Library in Chicago, Illinois. They attend interdisciplinary seminars taught by visiting professors and work with resident scholars and library staff. During the semester-length fall seminar, students write a major research paper based on the Newberry's collections in the humanities. The Newberry seminar is for students looking for the personal and academic challenge of intensive, self-directed archival research, and it is well-suited to those considering graduate study.

Length of program: fall semester: early September to December.
Eligibility: exceptionally qualified students who will be juniors or seniors at the time of the seminar.
Credit: 16 credits.
Application deadline: March 15.
Campus advisor: Associate Professor Ann Pleiss Morris.

Chicago, Illinois - Teach Chicago! Program
Offered by the Chicago Center for Urban Life and Culture, students in this program will teach daily, under the supervision of a cooperating teacher, at a K-12 site selected by the program. All participants also attend a weekly student-teaching seminar.

Length of program: fall or spring semester: August to December or January to May.
Eligibility: Must meet student teaching requirements as defined by Ripon College.
Credit: 14 credits.
Campus advisor: please contact the Office of the Registrar.

Knoxville, Tennessee - Oak Ridge Science Semester (ACM program)
The Oak Ridge Science Semester (ORSS) enables students to join ongoing investigations at the Oak Ridge National Laboratory in research areas as diverse as astrophysics, cell biology, DNA sequencing, genetic mutagenesis, parallel computing, robotics, toxicology and much more. In their research, ORSS student participants use the sophisticated resources available at the laboratory, including supercomputers, state-of-the-art electron microscopes, lasers and analytical instruments such as a Fourier transform mass spectrometer and a scanning tunneling microscope. Participants in this fall semester program join one of the research groups at ORNL, with a scientist from the ORNL staff serving as a mentor. This research experience, using the laboratory's sophisticated resources, is the core of the program. Students are expected to contribute significantly to the design and methodological approach of their research activity, and they often find this the most demanding and rewarding experience of their college careers.

Length of program: fall semester only: August to December.
Eligibility: juniors and seniors in biology, chemistry, computer science, environmental studies, physics or
mathematics.
  - Credit: 12-16 credits.
  - Application deadline: March 1.
  - Campus advisor: Professor Dean Katahira.

ROTC Cadet Troop Leadership Training (CTLT)

A student who does not complete the basic ROTC courses normally taken in the first and sophomore years may enter the Military Science program in the junior year by completing 28 days of leadership development instruction in the Cadet Troop Leadership Training Course (CTLT) at Fort Knox, Kentucky. Participants receive military pay and travel allowances. Qualified students generally are offered a two-year ROTC scholarship covering full tuition, book expenses and a stipend upon completion of CTLT. Further information may be obtained from the Department of Military Science.

Southwest, USA - American Indian Reservation Project (Indiana University program)

Offered in conjunction with Indiana University Bloomington, students in this program will teach daily at one of the Navajo Reservation schools in Arizona, New Mexico or Utah, under the supervision of a cooperating teacher. All participants will be required to take a preparatory course through Indiana University. The cost of room and board while on site usually is minimal. The low cost/free housing and meals are given in exchange for the daily work students will do in the dormitory with the Navajo children and teens who reside there during the week.

- Length of program: fall or spring semester: 16-18 weeks.
- Eligibility: must be approved for student teaching by the Department of Educational Studies.

Credit: 13 credits.
  - Application deadline: at least one year prior to student teaching.
  - Campus Advisor: Professor Hervé Somé.

Washington, D.C. - Washington Semester

The Washington Semester program is administered by American University in Washington, D.C. Students may choose programs in American government, global economics and business, foreign policy, international environment and development, international law and organizations, journalism and new media, justice and law, religion, politics, peace and security, public health and sustainable development. All programs combine seminars, internships and independent research. The advisor can provide descriptions of the various programs.

- Length of program: fall semester, spring semester or summer program: August to December, January to May, or June to July.
- Eligibility: second semester of sophomore year, juniors and first-term seniors.
- Credit: maximum of 16 credits.
- Application deadline: See advisor for deadlines.
- Campus advisor: Professor Henrik Schatzinger

Woods Hole, Massachusetts - SEA - Sea Education Association

The Sea Education Association was founded in 1971. This program provides undergraduates with the opportunity to study the ocean from several perspectives and to do it both onshore and from the platform of a traditional sailing vessel. Combining an engaging academic and research curriculum with a voyage to the deep ocean under sail (with engine backup), this program is
unique in the United States.

Students of any discipline are encouraged to apply to the 12-week SEA semester program that combines both shore and sea components. Onshore, students live and study alongside professional researchers, scholars and mariners. Students learn about the ocean's power and mystery by studying a variety of topics including: maritime policy; maritime cultures, history and literature; nautical science; climate change; marine biology; and oceanography. At ports of call, students learn about and experience the local culture. A component of the academic program requires that students design a research project that will be the focus of their work while at sea.

The sea component takes students to the open sea and exotic locations in a vessel that is campus, classroom and home. Applying the knowledge that they acquired ashore, students have hands-on experience sailing a traditional sailing schooner. The goal of the SEA Program is to provide intensive coursework and practical experience both ashore, in a residential campus, and at sea, aboard a deep-ocean sailing research vessel.

Length of program: fall or spring semester: 12 weeks.

Eligibility: sophomores, juniors and seniors.

Credit: 17 credits.

Application deadlines: May 15 (fall semester); Nov. 1 (spring semester).

Campus advisor: Professor Robert Wallace.

Woods Hole, Massachusetts - SES - Semester in Environmental Science: Marine Biology Laboratory

Founded in 1888, the Marine Biological Laboratory (MBL) at Woods Hole, Massachusetts is a world-renowned center for biological research and education with a long tradition of offering excellent hands-on research courses at both the graduate and undergraduate levels. The MBL's facilities include one of the world's best library collections of biological and oceanographic literature, a campus-wide computer network, teaching laboratories equipped with running seawater, advanced instrumentation for chemical analysis including two isotope ratio mass-spectrometers, climate-controlled growth chambers and a Marine Resources center dedicated to the culture and maintenance of marine organisms.

The Semester in Environmental Science (SES) is sponsored by the Marine Biological Laboratory's Ecosystems Center. The Ecosystems Center is the ecological research arm of the MBL. The goal of the Center is to investigate fundamental processes and interactions linking organisms with their environment and to apply the resulting knowledge to the wise management of the world's natural resources.

The SES program comprises two core courses (Aquatic Ecosystems, Terrestrial Ecosystems), one elective course (usually two or three of the following are offered in any year: Aquatic Chemistry, Mathematical Modeling in Ecology, Ecology and Management of Wetlands, Human-Dominated Ecosystems, Issues on Global Ecology, Microbial Methods in Ecology, The Role of Animals in Ecosystems), two Special Seminars (Distinguished Scientists Series, Science Writing Seminar), and an Independent Research Project.

Length of program: fall semester only: 15 weeks.

Eligibility: primarily designed for juniors majoring in one of the natural sciences; at a minimum, students should have completed the introductory courses for majors in biology, chemistry, and mathematics.
Credit: a total of 16 credits for the semester.

Application deadline: students are encouraged to consult with their academic advisor and the campus advisor to the program as soon as possible to assure that their application is filed by the previous March.

Campus advisor: Professor Robert Wallace.
Pre-Professional Studies

Health Professions
Careful planning of the student's academic program is important, and students should select Biology 121 and/or Chemistry 111 in their first year.
Consultations with one of the health professions advisors should begin during the first year. Members of the Health Professions Advisory Committee are listed in the Faculty Committees section of the Register of the College found at the end of this catalog.
For entry into training programs for most medical professions, college grades are very important as well as first-hand experience with the medical professions, demonstrated ability to work well with other people and involvement in community service and/or volunteerism.

Athletic Training
Athletic training encompasses the prevention, examination, diagnosis, treatment and rehabilitation of emergent, acute or chronic injuries and medical conditions. Athletic training is recognized by the American Medical Association (AMA), Health Resources Services Administration (HRSA) and the Department of Health and Human Services (HHS) as an allied healthcare profession. Athletic trainers (ATs) are highly qualified, multi-skilled health care professionals who collaborate with physicians to provide preventative services, emergency care, clinical diagnosis, therapeutic intervention and rehabilitation of injuries and medical conditions. Athletic trainers work under the direction of a physician as prescribed by state licensure statutes. Athletic trainers are licensed or otherwise regulated in 49 states and the District of Columbia, and the Board of Certification credential of Athletic Trainer, Certified (ATC) is recognized nationwide.
The athletic training academic curriculum and clinical training follows the medical model. Students who want to become certified athletic trainers must earn a degree from an accredited professional athletic training curriculum. Professional athletic training programs are transitioning to an Entry-Level Master's Degree, meaning that they no longer are admitting freshman, instead requiring a bachelor's degree from an accredited college. The specific admission requirements for professional athletic training programs differ between schools, and a student should plan carefully to ensure your education and work experiences enhance the chances for admission. The following guidelines should be kept in mind while planning an undergraduate curriculum: Anatomy and Physiology, 8 credit hours (BIO 211 and 312); Chemistry, 5 credit hours (CHM 112); Physics, 4 credit hours (PHY 171); Research Methods, 4 credit hours (EXS 500); Statistics, 4 credit hours (MTH 120 or PSC 211); Athletic Training, 4 credit hours (EXS 211); Biomechanics, 4 credit hours (EXS 432); Nutrition, 4 credit hours (EXS 286); and Functional Anatomy 4 credit hours (EXS 287).

Chiropractic Medicine
A doctor of chiropractic is a primary health care provider who gives particular attention to the relationship of the structural and neurological aspects of the body. A chiropractor is trained in physical examination, orthopedic and neurological testing, radiographic interpretation and direct palpation of joint movement. Although most chiropractic colleges specify a minimum of 90 undergraduate semester credits as a
requirement for admission, the majority of entering students have a bachelor’s degree. No specific undergraduate major is required. Most chiropractic colleges require a minimum grade point average, typically 3.0, with no science course below a “C.”

The specific admission requirements for chiropractic colleges may differ between schools. However, guidelines from the American Chiropractic Association should be kept in mind while planning an undergraduate curriculum. A minimum of 24 semester credits in Life and Physical Sciences with at least half of the courses including a lab component is required. Specific requirements include Organic Chemistry I (CHM 111), General Chemistry I (CHM 112) and Introductory Biology (BIO 121). Recommended courses include General Chemistry II (CHM 211), Organic Chemistry II (CHM 214), Human Anatomy and Physiology I (BIO 211) and Physics I (PHY 171). Other suggested courses include Human A&P II (BIO 312), Vertebrate Zoology (BIO 216), Genetics (BIO 219), Microbiology (BIO 314), Cell Biology (BIO 327), Physics II (PHY 172), Introductory Psychology (PSC 110) and Introductory Sociology (SOC 110).

Ripon College has a preferred admissions agreement for admission into Northwestern Health Sciences University (NWHSU) in Bloomington, MN for their Doctor of Chiropractic program. NWHSU will provide a $2000 tuition stipend for each Ripon College graduate who enrolls in this program. Ripon College students will be accepted for admission to NWHSU under this preferred admissions program upon: 1) Completing a minimum of 90 semester credits from a regionally accredited institution. 2) Completing a minimum of 24 semester credits in Pre-Professional Studies 219

Natural Science in which ½ of the credits come from labs. 3) Attaining a minimum 3.0 cumulative grade point average in Ripon College course work or 2.75 for provisional acceptance. 4) Receiving a positive recommendation from the chair of the Health Professions Advisory Committee. 5) Timely submission of all application materials to NWHSU. It is highly recommended that students apply 9-12 months prior to anticipated date of matriculation. 6) Conditional acceptance will be offered upon successful completion of one half of the prerequisite course work and minimum of 60 credits have been completed and full acceptance will be offered upon successful completion of all entrance requirements.

**Dentistry**

Although many dental schools specify three years of pre-professional education as a minimum requirement for admission, most entering students have a bachelor’s degree. No specific undergraduate major is required. Most dental schools require a certain level of performance on the Dental Admission Test; students planning to enter dental school directly after graduation from Ripon should take this test the spring of their junior year. Dental schools also assess the undergraduate transcript, grade point average, letters of recommendation and an interview.

The specific admission requirements for dental schools differ between schools, so it is important that the applicant consult the specific prerequisite courses required for a specific school of dentistry. The following guidelines should be kept in mind while planning an undergraduate curriculum:

- General Chemistry, 8-10 credit hours (CHM 112 and 211)
- Organic Chemistry, 8-10 credit hours (CHM 111 and 214)
- Biology,
Pre-Professional Studies

Medicine, Allopathic and Osteopathic

Medical schools seek candidates with a high level of scholastic achievement and intellectual potential, as well as the motivation and humanistic concern necessary for success as a physician. These qualities are measured by college grades, particularly science grades, letters of recommendation from undergraduate faculty and pre-medical advisers, Medical College Admission Test (MCAT) scores, interview assessment, an applicant’s personal statement and application, exposure to clinical medicine and volunteer work and community service. Acceptance into medical school is competitive, and the mean grade point average for accepted students is about 3.6. Although most medical schools require a minimum of three years of undergraduate work before admission, the majority of entering medical students have a baccalaureate degree.

Medical schools do not require a specific major; however, most applicants major in biology, chemistry or such combinations as chemistry-biology or psychology-biology. Although an understanding of the principles of the sciences basic to medicine is required of entering medical students, breadth of education also is expected. A successful medical student must effectively acquire, synthesize, apply and communicate information. Thus, studies in the humanities and in the social and behavioral sciences and opportunities for the development of effective writing skills are strongly suggested.

Independent study and research also are encouraged.

The specific admission requirements vary from school to school, and a student should plan carefully to ensure their education and work experiences enhance the chances for admission. The following guidelines should be kept in mind when planning an undergraduate curriculum: general biology or zoology (with lab), 4 credit hours (BIO 121); advanced biology or zoology (with lab), 4 credit hours (BIO 211, 216 or 219 for example); general chemistry (with lab), 8 credit hours (CHM 112 and 211); organic chemistry (with lab), 8 credit hours (CHM 111 and 214); biochemistry, 4 credit hours (CHM 422); physics (with lab), 8 credit hours (PHY 171-172); English, 6 credit hours; statistics (MTH 120 or PSC 211) for most schools and calculus (MTH 201) for some schools. Courses such as human anatomy and physiology, vertebrate zoology, genetics, microbiology, cell physiology, psychology and sociology also are helpful when preparing for medical school and the MCAT.

Ripon College is affiliated with Lake Erie College of Osteopathic Medicine (LECOM) in Erie, Pennsylvania, and Bradenton, Florida. Our affiliation via the LECOM Early Acceptance Program (EAP) allows qualified students to be provisionally accepted, i.e. a reserved seat, to LECOM’s medical school to earn a doctorate in osteopathic medicine (D.O.). Applicants must be U.S. citizens or legal permanent residents. Application to the EAP can occur as early as the senior year in high school and up through the second year at Ripon College. To receive a provisional acceptance, students must complete a successful interview by LECOM at a LECOM campus or a regional interview site. Affiliates must be officially
enrolled in the Ripon-EAP for the two consecutive years prior to matriculating at LECOM. LECOM will follow the progress of students in the Ripon-LECOM EAP throughout their time at Ripon College. In addition, students in the Ripon-LECOM EAP participate in events at the LECOM campus and elsewhere.

To matriculate to LECOM, the student must have completed the prerequisite course work as an uninterrupted full-time student, have a cumulative science GPA of 3.2 or higher and a cumulative overall GPA of 3.4 or higher. LECOM does not restrict the number of AP credits that may be used to fulfill the credit requirements. The medical school entrance exam, MCAT, is not required for most students in the Ripon-LECOM EAP. Students applying to LECOM via the EAP apply directly to the medical school and not through application services such as AACOMAS and AMCAS.

Students interested in enrolling in the Ripon-LECOM EAP should consult with a member of the Health Professions Advising Committee and take the following prerequisite courses: 6 credits in English (ENG 110 or CTL 110 and one additional English course), 6 credits in behavioral science, 4 credits in physics (PHY 171), 8 credits in biology/genetics (BIO 219), 8 credits in inorganic chemistry (CHM 112, CHM 211), 8 credits in organic chemistry (CHM 111, CHM 214), and biochemistry (CHM 422). Required prerequisites all must be completed with a C or better.

Nursing and Ripon College’s Affiliation with Rush University

Although a person with an undergraduate nursing degree will have no trouble finding employment, to advance in this field it usually is necessary to obtain a master’s degree. Graduate entry-level nursing programs are available for those students who have earned a baccalaureate degree. Graduate programs in nursing include a master’s of science (M.S.), doctor of nursing (N.D.), and doctor of nursing science (D.N.Sc.). For these programs, an applicant must have a minimum grade point average of 3.0. The graduate record exam (GRE) and an interview are required. Prerequisite course work varies between programs and interested students should consider courses in human anatomy and physiology (BIO 211 and 312); microbiology (BIO 314); inorganic chemistry (CHM 112); organic chemistry (CHM 111); psychology (PSC 110, 235 or 242); sociology (SOC 110); English; and statistics (MTH 120 or PSC 211-212).

Ripon College is affiliated with Rush University School of Nursing in Chicago, and Ripon graduates who meet the admission requirements can be accepted automatically into the Generalist Entry Master of Science in Nursing program. Required prerequisite courses, all completed with a grade of C or better, include chemistry (CHM 111-112), human anatomy and physiology (BIO 211-312) and microbiology (BIO 314). A GPA of 3.0 or higher is required (both overall and science-specific GPA), and the GRE exam is waived if the applicant has a Ripon College GPA of 3.25 or greater.

Optometry

The American Optometric Association (AOA) published definition of an optometrist is: “Doctors of Optometry are independent primary health care providers who examine, diagnose, treat and manage diseases and disorders of the visual system, the eye and associated structures, as well as diagnose related systemic conditions.” Most students entering optometry school
have a bachelor's degree from a four-year college or university. Optometry programs assess undergraduate grade point average, scores on the Optometry Admission Test (OAT), undergraduate degrees, biographical information, knowledge of the profession, letters of reference and an interview. The specific admission requirements for optometry schools differ markedly from one school to another, and it is important that the applicant obtain a catalog from the specific school or college of optometry where he or she plans to apply. The following guidelines should be kept in mind while planning an undergraduate curriculum: biology, including general zoology (BIO 121), microbiology (BIO 314), human anatomy and physiology (BIO 211 and 312), cell biology (BIO 327), and genetics (BIO 219); chemistry, including inorganic (CHM 112), organic (CHM 111), and biochemistry (CHM 422); general physics (PHY 171-172); English composition; psychology (PSC 110); and mathematics, including calculus (MTH 201) and statistics (MTH 120). Additional courses may include sociology, public speaking, business and economics.

Pharmacy

Historically, the functions of a pharmacist centered on the preparation and provision of a drug product to a patient. However, over the past 30 years, pharmacists have begun to complement their practice with a more proactive approach, emphasizing pharmaceutical care. Today, pharmacists are responsible for selecting an appropriate dosage and dosage schedule, preparing medication for administration, providing information about medication, and advising and monitoring patients to prevent or detect harmful side effects. Reflective of this change, schools and colleges of pharmacy now offer the doctor of pharmacy (Pharm. D.) degree as the only professional degree in pharmacy.

A Pharm. D. Degree requires at least two years of pre-professional study followed by at least four years of professional study. Consequently, a number of students obtain their bachelor's degree before matriculating into a Pharm D. program. Entry-level Pharm. D. admission is based upon completion of pre-pharmacy courses, quality of academic record, Pharmacy College Admission Test (PCAT) scores, letters of recommendation, résumé and a personal interview. The specific admission requirements for Pharm. D. programs differ markedly from one school to another and are generally more extensive and detailed than those of medical schools. It is important that the applicant consult the specific prerequisite courses required for the specific school of pharmacy.

The following guidelines should be kept in mind while planning an undergraduate curriculum of preprofessional preparation: inorganic chemistry, 8-10 credit hours (CHM 112 and 211); organic chemistry, 8-10 credit hours (CHM 111 and 214); biochemistry (CHM 422); biology, at least 12 credit hours including general biology (BIO 121) and one additional from vertebrate zoology (BIO 216), genetics (BIO 219), or botany (BIO 227); microbiology (BIO 314); anatomy and physiology (BIO 211-312); general physics, 8-10 credit hours (PHY 171-172); calculus, 4-5 credit hours (MTH 201); statistics (MTH 120 or PSC 211); English; micro-economics, 3-4 credit hours (ECO 212); social science, 3 credit hours, sociology (SOC 110) or anthropology (ANT 110); behavioral science, 3 credit hours, (PSC 110); history, 2-3 courses; humanities, 6 credit hours; ethnic studies, 3 credit hours.
hours; and additional electives to satisfy the requirements of the particular pharmacy school.

**Physical Therapy and Corrective Therapy**

The basis for certification as a physical therapist is the Doctor of Physical Therapy degree. Although there is no specific major required for entrance into a physical therapy program, the undergraduate major often is biology or exercise science.

The specific admission requirements vary considerably from school to school and are generally more extensive and detailed than those of medical schools. It is important that the applicant consult the specific prerequisite courses required for the specific school of physical therapy. Many admission requirements include a bachelor's degree from an accredited college or university; GRE; a minimum cumulative grade point average, usually a 3.0; a minimum science grade point average; successful completion of all prerequisite courses no later than the spring semester prior to summer admission; evidence of professional behavior required to participate effectively in a health care environment; and satisfactory completion of volunteer or paid patient care experience in two physical therapy settings under the supervision of a physical therapist, usually a minimum of 20 hours in each setting.

The following guidelines should be kept in mind while planning an undergraduate curriculum: biology, including introductory biology (BIO 121), animal biology, with lab (any zoology course); human anatomy and physiology, with lab (BIO 211 and 312); a year sequence of chemistry, with lab (CHM 111 and 112); biochemistry (CHM 422); a year sequence of general physics, with lab (PHY 171-172); psychology, including general psychology (PSC 110) and human development (PSC 235 or 242); and statistics (MTH 120 or PSC 211). In addition, the following courses are recommended by many schools and required by others: biomechanics, exercise physiology, neurosciences, physiological psychology, calculus, ethics, medical sociology, cultural diversity, counseling, public speaking, public health, English and technical writing, English composition, computer science and additional courses in the humanities and social sciences. Internships with physical therapists also are required (x99 courses across campus). Because most physical therapy programs require hands-on experience, students are encouraged to get involved in the athletic training program. Exercise science 211, 361, and 362 will also prepare student's manual skills.

A baccalaureate degree with a major in exercise science is a prerequisite for admission to a training program in corrective therapy. Following graduation, the interested student enters a one-year training program at an approved institution where corrective therapy is available. There is a subsequent certification examination. For more information, consult any member of the Health Professions Advisory Committee.

**Physician Assistant**

Physician assistants are health professionals licensed to practice medicine with physician supervision. Within the physician/PA relationship, physician assistants exercise autonomy in medical decision-making and provide a broad range of diagnostic and therapeutic services. For example, PAs are qualified to take medical histories, order laboratory tests, diagnose and treat illnesses, give medical advice, counsel patients, perform physical exams, assist in surgery, and set fractures.
Pre-Professional Studies

The specific admission requirements for PA programs differ from one school to another, and it is important that the applicant obtain a catalog from the specific PA program where he or she plans to apply. Although no specific major is required, you should plan carefully to ensure that your education and employment experiences enhance your chances for admission. Most PA programs now are completely at the graduate level, and a baccalaureate degree is required. Further, significant direct patient contact experience is required prior to admission. Thus, it is a good idea to volunteer in a hospital, and to obtain EMT or CNA certification.

Some schools also require the Allied Health Professional Admissions Test (AHPAT).

The following guidelines should be kept in mind while planning an undergraduate curriculum: inorganic chemistry (CHM 112), organic chemistry (CHM 111), biochemistry (CHM 422), general biology (BIO 121), zoology (BIO 215 or 216), microbiology (BIO 314), human anatomy and physiology (BIO 211 and 312), general psychology (PSC 110), and additional electives to satisfy the requirements of the particular physician assistant program.

Ripon College has an affiliation with Trine University in Indiana. Trine University will reserve two seats in each annual cohort of students entering its Masters of Physician Studies (MPAS) program for qualified students of Ripon College. Qualified students must submit complete applications for admissions prior to November 1 of each year. To be considered for admission to the Trine MPAS program students must 1) hold a baccalaureate degree from Ripon college prior to entering the MPAS program 2) Have a 3.5 minimum overall GPA 3) Have discernment into the PA profession 4) Have completed the GRE General test within the last 5 years, A combined verbal/quantitative score of 300 minimum is required 5) have completed the following prerequisite courses with no graded lower than a C: microbiology (BIO 314), organic chemistry (CHM 111), anatomy and physiology (BIO 211 and 312), PSC 110, MTH 120 or PSC 211, and one semester of medical terminology (please talk to the chair of the Health Professions Advisory Committee on how to fill the medical terminology requirement) 6) successfully participate in the MPAS program interview process. For more details about the affiliation please talk with the chair of the Health Professions Advisory Committee.

Podiatry

Podiatric medicine is a branch of the medical sciences devoted to the study of human movement with the medical care of the foot and ankle as its primary focus. A doctor of podiatric medicine (DPM) specializes in the prevention, diagnosis and treatment of foot disorders, diseases and injuries. Although schools of podiatric medicine specify three years of pre-professional education as a minimum requirement for admission, a baccalaureate degree is strongly recommended (more than 90 percent of entering students have a bachelor's degree). No specific undergraduate major is required. Most colleges of podiatric medicine require the Medical College Admission Test (MCAT). Podiatric colleges also assess the undergraduate transcript, grade point average, letters of recommendation (one from the Health Professions Advisory Committee, two from science faculty, and one from a podiatric physician) and an interview.

The minimum semester credit hour requirements for all of the colleges of podiatric medicine include the
following: biology, 8 credit hours (BIO 121 and an additional course); chemistry (general/inorganic), 8 credit hours (CHM 112 and 211); organic chemistry, 8 credit hours (CHM 111 and 214); physics, 8 credit hours (PHY 171-172); English, 6 credit hours (ENG 110 and an additional course). It is strongly recommended that the college curriculum also include three or more of the following courses: anatomy and physiology (BIO 211 and 312), biochemistry (CHM 422), genetics (BIO 219) and microbiology (BIO 314). The latest a student may take the MCAT is in the spring of the year prior to fall admission.

**Veterinary Medicine**

Schools of veterinary medicine are some of the most selective of professional schools. They assess the undergraduate transcript and grade point average, standardized examination (usually the MCAT or GRE taken in the spring of the junior year), animal contact and work experience with both large and small animals, veterinary medical experience, other preparatory experience, college degree earned, extracurricular activities, letters of recommendation and a personal interview.

The specific admission requirements vary considerably from school to school and are generally more extensive and detailed than those of medical schools. It is important that the applicant obtain a catalog from the specific school of veterinary medicine where he or she plans to apply. Although no specific major is required, you should plan carefully to ensure that your education and animal work experiences enhance your chances for admission.

Typical course requirements include: general and qualitative chemistry, 8-10 credit hours (CHM 112 and 211); organic chemistry, 8-10 credit hours (CHM 111 and 214); biochemistry, 3-4 credit hours (CHM 422); general biology or zoology, 5-6 credit hours (BIO 121 and an additional course in animal biology, most likely BIO 216); genetics or animal breeding, 3 credit hours (BIO 219); microbiology, 3-4 credit hours (BIO 314); physiology, 3-4 credit hours (BIO 211-312); general physics, 6-10 credit hours (PHY 171-172); statistics (MTH 120 or PSC 211); English, 3-6 credit hours; social science or humanities, 6-10 credit hours; and additional electives to satisfy the requirements of the particular veterinary school. In addition, calculus (MTH 201) and courses in animal behavior and husbandry may be required.

**Other Fields of Study**

**Engineering**

A pre-engineering program will prepare students for further education in the field of engineering as they earn a bachelor's degree in a similar field. Students intending to become engineers may follow one of three plans. The first option is to complete a bachelor's degree at Ripon and then do advanced work leading to a master of science in engineering from a technical school. The second option is to study three years at Ripon and three years at an engineering school; students following this plan receive a bachelor's degree from Ripon and a master's degree from a technical school. The third option is to study three years at Ripon and two years at an engineering school; students following this plan receive bachelor's degrees from both institutions.

Students in these programs need strong aptitudes in mathematics and science and should enroll in mathematics and physics courses during their first semester of course work at Ripon College.
Students interested in combining studies in the biological and physical sciences for graduate studies leading to degrees in bioengineering or medical physics should consult any member of the Health Professions Advisory Committee.

Forestry and Environmental Studies

Students interested in forestry, environmental studies and resource management may complete their baccalaureate degree and then select a graduate program, usually for two years, leading to a master's degree. A major in environmental studies would be an appropriate course of study at Ripon College. Consult Professors Soren Hauge, Memuna Khan or Robert Wallace.

Government Service

Careers in military service, politics and public administration do not require a specific major or a specific set of courses. Students wishing to pursue a successful career in any of these fields must develop skills of logical analysis and argumentation and mastery of the English language in writing and speech. Training in economics and in statistics and computer science is highly desirable; insight gained from the study of history, philosophy and politics is invaluable.

Students contemplating military or governmental service careers elect courses from economics, English, history, philosophy, and politics and government and usually major in one of these disciplines. Students wishing to pursue a career in national security and foreign policy should also consider the national security minor.

For more information consult Associate Professor Lamont Colucci (politics and government) or the Office of Career and Professional Development.

Journalism

Interested students should elect a well-rounded group of courses with an emphasis on English, history, economics, communication, and politics and government. A self-designed major in journalism may be considered. When choosing a major, students should anticipate the probable area of journalistic specialization, such as science reporting or performing arts criticism. Practical journalistic experience may be obtained by working on the staff of the campus newspaper, radio station, yearbook, literary magazine, or office of marketing and communications. Experience also may be obtained at the local cable access channel in downtown Ripon. A semester or summer internship with a newspaper, radio station or television network is highly recommended.

A student who goes from Ripon into specialized training at a school of journalism may, by previous arrangement, qualify for a degree from Ripon and from the school of journalism provided that the student completes three years at Ripon, the Catalyst curriculum and a major.

Law

Admittance into post-graduate law school or legal administration programs requires a liberally educated student who can demonstrate a mastery of communication and analytical skills. No specific major or set of courses is required, however a strong background in logic either from the philosophical or mathematical discipline combined with writing courses in journalism, English or the social sciences will prove useful. The introductory law and constitutional law classes will provide an excellent test for a student's interest level. These preparatory classes as well as classes in a definite interest area such as politics,
business, sociology or psychology will give the student the background needed for a successful legal career.

The interdisciplinary nature of the Ripon College program permits a student to prepare for the rigors of post graduate law school or other schools of legal and court administration. In today's world of specialization, a successful candidate for a legal career must have the opportunity to explore the legal environment while developing that niche in environmental law, business law, criminal law, sports law, literary law, labor law or one of the more than 100 specialties practiced today. For more information, consult the pre-law advisor, Steven Sorenson.

**Pre-Law Scholars Program**

Students in the Pre-Law Scholars Program are permitted to apply for admission to Ripon College's 3+3 law school partners (Marquette University Law School, Mitchell Hamline School of Law) during their junior year. Students admitted to a 3+3 law school partner will complete their final undergraduate year as first-year law students. Students then will transfer their law school courses back to Ripon to complete their undergraduate degree. Admission to the Pre-Law Scholars Program is limited to incoming first-year students with a minimum score of 26 on the ACT test and a cumulative GPA of 3.65 or higher. Enrolled students may apply to the program at any time if they have a cumulative GPA of 3.50 or higher at the end of their first or second year at Ripon College. Students with a GPA lower than 3.50 will be considered if other aspects of their Ripon College academic record show a demonstrated level of success.

Students in the Pre-law Scholars Program are eligible for admission to Ripon's 3+3 law school partners during their junior year if all of the following conditions are met:
- The student will successfully complete at least 96 credits of coursework by the end of the junior year;
- The student will successfully complete Ripon's Catalyst curriculum course work by the end of the junior year;
- The student will successfully complete a major by the end of the junior year;
- The student has taken the Law School Admission Test (LSAT); and
- The student has completed an application for admission to the law school(s), following the regular admission process.

Students in the Pre-law Scholars Program are neither guaranteed admittance into a 3+3 law school partner, nor required to apply during the junior year. Students may withdraw from the program at any time. Students who are not admitted to a 3+3 law school partner will be permitted to return to Ripon for their senior year to fulfill the remaining requirements for graduation. Letter grades from law school will not transfer to Ripon. Students who withdraw from a 3+3 law school partner without completing the first-year law requirements will be permitted to return to Ripon, without the need to reapply, to complete the necessary credits to earn a baccalaureate degree. Other specific details may apply, based on the memoranda of understanding with the law schools; consult the dean of faculty's office for details.

**Military Leadership**

The U.S. Army and Ripon College offer Army ROTC courses that can lead to a commission as a second lieutenant in the United States Army. Excellent opportunities, benefits and a variety of careers in the military service are available as a commissioned officer. Students also may apply for graduate
study and professional studies such as law, medicine or dentistry prior to commissioning. Qualified cadets in the military science program may compete for ROTC scholarships which, in addition to a subsistence allowance, cover the full cost of tuition, books and fees. Consult the Department of Military Science for further information.

Ministry
The best preparation for special study at a divinity school or seminary is a well-balanced liberal arts education, with emphasis on English, philosophy, religion and social sciences. Public speaking also is important. Consult Professor Brian Smith.

Social Work
A liberal education is excellent preparation for a career in social work because it gives broad exposure to problems that people and societies face which social workers typically encounter. Students interested in social work may major in economics, history, philosophy, politics and government, psychology or sociology, or may plan a self-designed major. Graduate work should be strongly considered. Consult Associate Professor Jacqueline Clark.

Teaching
**Licensure:** Under the supervision of Ripon’s educational studies department, a student may earn teacher licensure in several subject areas. Ripon believes a good teacher meets the standards of professional preparation in education, possesses competency in the subject matter taught, understands the human needs that motivate individual behavior, and is sensitive to the forces and value systems that influence society. The College further believes that these qualities are best developed at the undergraduate level through a program of liberal and professional education. The professional coursework in education that Ripon offers is designed to prepare teachers for initial licensure. Their on-the-job experience, graduate study and professional development activities are the ingredients for continued development as good teachers.

**Specialized Areas of Education:** Ripon provides the prerequisite work for graduate study in most specialized areas in the field (e.g., reading, school counseling). Ripon’s academic departments offer elective courses which provide background preparation for these specialized roles. Students interested in one of these specialized positions should seek the advice of education professors no later than the sophomore year.

**Private Schools:** Students with strong academic records, but lacking licensure, can be employed by private schools for elementary and secondary teaching. Courses in education strengthen such a teacher’s qualifications, but students should be aware that many private schools hire licensed teachers.

**College and University:** A master’s degree is the usual minimum for an initial appointment, and a terminal degree (such as the Ph.D.) often is required. A strong departmental major at Ripon qualifies the student for admission to an appropriate graduate school. Consult with the chair of the Department of Educational Studies for more information.
Residence Halls
Ripon College offers its instructional facilities within a total social and residential environment. Attending this institution is a complete living situation in which all may participate. For this reason, all full-time students, except those who are married, have children, or who are living with their immediate families within 30 miles of Ripon, are required to live in the College residence halls. In this way, Ripon College strives to be a true “community of scholars” in the best sense of those words.

There are eight residence halls on campus offering a variety of living options. Typically, first-year students are housed together within groups. First-year students who pledge fraternities and sororities continue to live in their halls until their sophomore year when they move into upper-class living areas.

Food Service
Sodexo Food Service is the contracted campus food provider. The general manager, executive chef, catering manager, dining room supervisor and administrative offices are in the Pickard Commons upper level at the end of the dining room behind the kitchen. Meals served in the Common Dining Room emulate a food court style, having several food type choices at lunch and dinner; breakfast is ordered off the grill. Meals are served “all you care to eat” with a variety of healthy choices and vegetarian options and we offer several meal plans to accommodate different life styles and eating habits.

Meal plans are split between board meals and points which are flexible spending dollars that can be used for retail items or meals. Special arrangements can be made with the chef for special dietary needs, take-out meals (i.e., student teachers), or any other special situation that curtails using standard meals or the standard meal plan.

Hours of operation in the Commons: Monday through Thursday, 7 a.m. to 8 p.m.; Friday, 7 a.m. to 7 p.m.; Saturday, 7:30 a.m. to 7 p.m.; and Sunday, 11 a.m. to 7 p.m. “Simply to Go Grab & Go” operates from 9 a.m. to 7 p.m. Monday through Friday (closed Saturday and Sunday).

The “We Proudly Serve” Starbucks Coffee Shop is on the first level of Pickard Commons. A variety of coffee drink choices, as well as bottled beverages, candy and in-house bakery items are served. Hours of operation are: Monday through Friday, 7:00 a.m. to 4 p.m.; Saturday and Sunday, 11 a.m. to 2 p.m.

The Spot, located in Harwood Memorial Union, provides a wide variety of beverages, snacks, special meal options, and made-to-order hot and cold sandwiches. Hours of operation in The Spot: Monday through Friday, 11 a.m. to 10 p.m.; Sunday, 6 p.m. to 10 p.m. The Spot is closed on Saturday.

The Willmore Center’s Micro Market is in the lobby of Willmore Center and provides a full selection of on-the-go meal options and beverages. Rally dollars or points may be used. This location is self-checkout and is open anytime the building is open.

Social Fraternities and Sororities
Four fraternities, three sororities and one coed fraternity are active at Ripon College; six are chapters of national
organizations. Each group is housed in a facility owned and operated by Ripon College.

The fraternities and sororities are as follows:

Fraternities
- Phi Delta Theta
- Phi Kappa Pi (local)
- Sigma Chi
- Theta Chi

Sororities
- Alpha Chi Omega
- Alpha Delta Pi
- Kappa Delta

Coed Fraternity
- Theta Sigma Tau (local)

**Athletics for Men and Women**

The Ripon College athletic program seeks to establish and maintain an environment in which athletic activities are conducted as an integral part of the student athletes' educational experience. The program establishes and maintains the values of cultural diversity and gender equity. Student athletes exhibit fairness, openness, honesty and sportsmanship in their relationship with officials, spectators and other student athletes.

In both men’s and women’s athletics, Ripon is a member of the National Collegiate Athletic Association (NCAA) Division III and the Midwest Conference, an association of 10 colleges in Illinois, Iowa and Wisconsin: Beloit, Cornell, Grinnell, Illinois College, Knox, Lake Forest, Lawrence, Monmouth, Ripon and St. Norbert. The University of Chicago is an affiliate school against which Ripon competes in football and baseball. Macalester College is an affiliate school against which Ripon competes in football.

Men’s sports at Ripon: cross country, cycling, football, soccer; basketball, swimming and diving, indoor track and field in winter; baseball, tennis and outdoor track and field in spring.

Women’s sports: cross country, cycling, soccer, tennis, volleyball; basketball, swimming and diving, indoor track and field in winter; outdoor track and field in spring, softball; and dance.

First-year students are eligible for participation in all varsity sports.

Organized intramural sports for both men and women are scheduled regularly. These include flag football, basketball, innertube water polo, indoor soccer, bowling, volleyball, kickball, floor hockey and softball.

**Counseling Services**

Counseling Services is located in Bartlett Hall. Confidential, no cost personal counseling, consultation, educational programming and referral are available to all currently enrolled students. Licensed, masters level therapists utilize a brief counseling model, generally seeing students for 6-8 sessions (or less) in a semester. Counseling and wellness-themed activities work to help students resolve emotional difficulties, learn effective coping skills, address the effects of trauma and improve overall functioning.

When personal and academic concerns intersect with one another, on-campus referrals may be made to Student Support Services, The Office of Career and Professional Development, the Registrar’s Office, or a student’s faculty advisor. Off-campus referrals may be made for more specialized or extensive assessment and treatment, with the fees for these services becoming the responsibility of the student.

Appointments for counseling may be scheduled by sending a request to rccounseling@ripon.edu. Students are responsible for the timely cancelation of appointments they do not plan to keep. Repeated failure to do so may result in the loss of access to services for the remainder of the semester. For more information, please see the Counseling Services webpage at ripon.edu/counseling.
Student Support Services

The Student Support Services (SSS) program is a United States Department of Education funded TRIO program and provides a network of academic, personal and career support for many students on the Ripon College campus. Students use the program's services on an appointment or drop-in basis and receive guidance and information about transitions to college, study skills, financial literacy and direction toward college graduation. Information and workshops on financial literacy, professional documents, resumes and editing for graduate and professional school are also offered. After 10 years (2007-2017), 53 Ripon College first-generation and/or underrepresented students were accepted to graduate school through the McNair Scholars graduate school preparation program. Many attended high profile institutions including UW-Madison, Duke, Colorado State, Nebraska, Rowan, Illinois Institute of Technology, Rush University, UW-Milwaukee, Baylor University, Indiana University, Arizona State, UCLA, University of Washington, Texas A&M, Medical College and the Graduate School of Milwaukee, University of Minnesota, Oregon, Wyoming, University of Iowa, Purdue University, Penn State, Notre Dame, Florida State. Student Support Services continues to have a mandate to guide students to graduate school.

Students meet and interact with the full-time professional Student Support Services staff, student tutors and peer contacts and also participate in a variety of off-campus cultural and educational programs including trips to Chicago, Milwaukee, Madison and Green Bay.

Students potentially qualify for the SSS program if they are citizens, a national or permanent resident of the United States, if neither parent graduated from a four-year college or university (first generation), and/or are eligible under U.S. Department of Education guidelines for taxable household income and family size, or if students hold documentation of a physical or learning disability which may require educational accommodations. The program's goal is to increase the retention and graduation rates of our students by providing a supportive, welcoming, informational and challenging service environment on the campus. Phone: 920-748-8107.

Tutoring

Tutoring in college is oftentimes a new and unique service for students and is a valuable supplement to a student's classroom experience and interaction with the professor. All students on the Ripon campus have the opportunity to request a tutor and several hundred students utilize the service every year. Students seek tutoring assistance in order to review material with another student or in small groups with a tutor who has previously done well in the course. Tutoring should be perceived as an opportunity to carry learning outside of the classroom. Tutoring is free for any Ripon College student. The ideal situation for many students is to work with a tutor on a regularly scheduled weekly basis, beginning early in the semester. Tutors are recommended by the faculty, and tutors attend training sessions on how to assist students to improve their performance. Tutoring is facilitated by the Student Support Services office on the Ripon College campus, and students may obtain information about the tutoring services through the Student Support Services office located in Bartlett Hall.
Disability Services

Student Support Services supports individuals with documented physical or learning disabilities by providing a variety of services based on a reasonable, success-based model. Reasonable accommodations include, but are not limited to: note taking assistance, extended test time, alternative test location (a quiet, distraction-free environment for testing), instruction and access to reading software (Kurzweil) and voice to text (Dragon Speak) support. Not all students require the same set of accommodations, and Student Support Services is highly motivated to support each student by determining and providing accommodations that will meet their needs. Additionally, students with disabilities are encouraged to meet with staff on a regular basis in a supportive “coaching” atmosphere to focus on success strategies and receive assistance with organization, study skills and self-advocacy.

Students with a diagnosed and documented disability should make an appointment to meet with Student Support Services 920-748-8107 in order to determine eligibility and discuss needs.

Fine and Performing Arts

The Rodman Center for the Arts is an excellent venue for concerts, live theatre and art gallery shows.

Concerts include performances by the Music Department faculty and a Chamber Music at Ripon series that brings to campus distinguished soloists and small groups of musicians. College music ensembles include the Choral Union, Chamber Singers, Jazz Ensemble, Symphonic Wind Ensemble and Orchestra. Students also perform in departmental recitals and, as music majors, present senior recitals. From time to time, students form chamber music groups to perform for special events on campus as well as in concert. Recent groups include a brass quintet, a saxophone quartet, and a flute trio. A student-run pep band provides another opportunity for instrumentalists and the group performs at various sporting events and other activities during the year.

The theatre department presents three main stage productions each year, a student directed one-act play festival and the student produced “24-hour theatre”. Play titles span the centuries and genres from Greek tragedy, Shakespeare and musical theatre to contemporary Pulitzer prize winning dramas and comedies. The department is active in the Kennedy Center American College Theatre Festival and has won several Certificates of Merit for Associate Productions. Each year, selected students enter the Regional Festival’s competition in the various theatre arts.

The Department of Art and Art History presents art exhibitions every semester featuring works by professional artists and by students—both majors and non-majors. Artists of international, national and local reputation regularly exhibit their work and conduct workshops for students. Students have access to the college’s permanent art collection, displayed across the campus. The Caestecker Sculpture Garden surrounds Rodman Center for the Arts.

The student programming board, Ripon Live, presents several musicians each semester.

Caestecker Fine Arts Series

The Ripon College Caestecker Fine Arts Series brings well-known music acts and art exhibits to the campus twice per academic year. Events are offered at no charge to Ripon College students.
because of the generosity of Ripon College Honorary Life Trustee Tom Caestecker.

**Student Government**

Within the framework of general College policy, student groups and officers are responsible for various areas of student life.

The Student Senate is the formal body for the consideration of issues relating to the governance of student life. Three students, chosen by the Senate, are authorized to attend and to vote at faculty meetings, and students chosen by the Senate are members of many faculty and student committees. Other important student government bodies include the Judiciary Board, the Interfraternity Council, and the Panhellenic Council.

Each fraternity and sorority has its own officers who, among their other responsibilities, are responsible for adherence to College policies and act as liaisons between the fraternity or sorority and the College administration.

**Honorary Societies**

In several fields of study, Ripon students and faculty have formed local societies or chapters of national honor societies. Ripon has had a chapter of Phi Beta Kappa (general liberal arts) since 1952. Others include: Alpha Psi Omega (theatre), Beta Beta Beta (biology), Eka Francian (chemistry), Lambda Alpha (anthropology), Lambda Pi Eta (communication), Laurel (local honorary society), Omicron Delta Epsilon (economics), Order of Omega (Greek leadership), Phi Sigma Iota (foreign languages), Pi Kappa Delta (forensics), Pi Lambda Theta (education), Psi Chi (psychology), Sigma Pi Sigma (physics), Sigma Tau Delta (English), and Theta Alpha Kappa (religion).

**Lectures and Symposia**

Each semester, special lectures and symposia are conducted by academic departments, student organizations and other groups. Eminent authorities on contemporary and perennial issues speak on campus as guest professors, as part of programs sponsored by student organizations, the Phi Beta Kappa program, and at commencement. Faculty members, students, administrators and local citizens exchange information and opinions through such forums as the Ripon College Liberal Arts Symposium.

**Student Media**

The College Days (campus newspaper) appears every three weeks; WRPN-FM (campus radio station) streams daily; Parallax (literary magazine) is published every spring. Students have the opportunity to select and plan entertainment on campus by becoming involved in the College’s programming board, Ripon Live.

**The Ripon Communication Consortium**

The Ripon Communication Consortium prepares students to be effective and ethical communicators in the 21st century. Among the co-curricular programs, teams, activities and student organizations coordinated by the Consortium are: Ethics Bowl (intercollegiate competition); The Ripon Speakers Bureau; College Days (newspaper); WRPN radio; RPN-TV (pending student interest); Parallax (literary journal); and Photogenesis (photography/design).

The Consortium is coordinated by Ripon’s Department of Communication, recipient of the 2014 Rex Mix Program of Excellence Award from the National Communication Association recognizing the best undergraduate communication.
program in America. Students participating in one or more of the Consortium groups will benefit from: practical real world experience; opportunities outside of the classroom and off-campus; résumé-building programs; development of advanced communication, leadership and organizational skills. Sophomores, juniors and seniors actively involved in one or more of these groups may be eligible for Consortium scholarships; consult the Office of Financial Aid for additional information.

Religion
Ripon is historically rooted in the Judeo-Christian tradition, although it has been nonsectarian since 1868. The numerous local churches welcome students. Campus Christian Fellowship is active on campus and open to all individuals interested in Christian fellowship. There is a synagogue in Oshkosh (20 miles from Ripon) and a mosque in Neenah (40 miles from Ripon). There is also an interfaith chapel open 24 hours a day for meditation or personal prayer at the First Congregational Church next to East Hall on Ransom Street which is available for use by those of all faiths. A campus entrance to the chapel is located just north of East Hall. Zen Buddhist style meditation sittings are held in the chapel on most Sunday afternoons during each semester.

Special Interests
Students who share special interests are encouraged to organize, to voice opinion, to espouse particular courses of action, or simply to share their interests. Examples of such groups are the Black Student Union, Campus Christian Fellowship, Circle K, Ripon College Feminists, Pep Band, La Unida, Queer Straight Alliance, Students for Social Justice, Cultural Diversity Club, DREAM (Disability Rights, Education, and Activism Movement), EGOR (Environmental Group at Ripon), and Ripon College People for Animal Welfare (R-PAW).

Student Personnel Services and Advising
The very nature of an institution such as Ripon College makes possible a variety of informal and unstructured opportunities for obtaining advice and counsel. In addition, more formal channels exist through the office of the dean of students, the College counselors, and the system of faculty academic advisors.

Faculty Advisors
(See Academic Advising on page 35 of this Catalog.)

Health Services
Medical care is provided Monday through Friday when classes are in session. Students may see the nurse practitioner for evaluation and treatment or the student may seek care with a physician of their own choice. Assistance is provided in making appointments with area physicians and the local hospital is utilized in an emergency situation. Referrals are coordinated with other community resources as well.

Health Services is a confidential environment dedicated to assisting students in their acquisition of knowledge, skills and behaviors necessary to recover, build and maintain health. Medical care provided includes nursing evaluation, available medications, available laboratory tests, and health education and information. Health Services is active in assessing and responding to public health needs of
the campus community and promoting healthy life choices.

**Orientation Committee**

Each summer, fall, and winter new Ripon College students are welcomed by the Orientation Committee. The Committee is comprised of upperclass students who facilitate activities designed to ease the transition of new students into the Ripon College community and provide them with the tools to be successful.

**Ripon College Career and Professional Development**

Ripon College Career and Professional Development provides students with curriculum focused individualized career readiness support through innovative hands-on opportunities that measurably prepare students for life after Ripon. Students encounter a proactive approach to career and professional development through a variety of innovative programs, curricula and events in which they practice their strengths, resources and liberal arts education to develop a strong story focused on career and/or post-graduate education goals and real experiences. We focus on four impact areas:

- **Curriculum Integration:** We provide curriculum-based sessions throughout a student’s four years enhanced with classroom workshops and activities. Staff visit each and every Catalyst class and work closely with each senior seminar course to prepare students to be career-ready.
- **Co-Curricular Experience:** We provide opportunities that enhance a student’s discovery and participation in career-building skills development including Pop-Up Career Shop advice and assistance, What the Fork dinner, Mocktails and Mingle events, CareerTrex and the annual WorkForce Career & Internship Fair. Students sign into CareeRed, our online career pathway tool and job posting center, in their first year and access specialized content as they progress through their four years at Ripon.
- **Extra-Curricular Support:** We provide activities and opportunities that supplement students’ career discovery through a variety of on- and off-campus adventures including career networking opportunities, testing support, conferences, professional development, graduate school application and interview support, and on-campus employer recruitment and interviews.
- **Outcomes Measurement:** We provide accurate and thorough data and outcome-related results that demonstrate both satisfaction and success. This data is driven by our aggressive goals to assist each student in being career-ready by graduation. We belong to the National Association of Colleges and Employers and the Wisconsin Independent and Private Colleges Career Consortium and follow best practices based on industry-leading research.

For more information or to see more of what we do visit www.ripon.edu/career-services

**Office of Constituent Engagement and Career Services**

Constituent Engagement initiatives and programs are designed to engage, educate, support and connect Ripon College alumni, parents, students and friends through a variety of experiences.
while improving the constituent’s desire to give back to our College. Events are often social in nature, but maintain the goal of connecting Ripon’s many constituencies amongst each other based on geography, interests, careers, experiences, etc. Strong constituent engagement, communication and education are the first steps in creating a connection to Ripon College that will further develop a strong sense of tradition and deep-rooted bonds that ultimately will advance the College through volunteerism, event attendance and financial support.

Programs that focus on student-alumni connections are Homecoming and Family Weekend, Career Discovery Tours, Alumni Career Days, Senior Class VIP and Cap & Gown Parties, Sophomore Class Endless Connections Program, among others.

Programs that focus on alumni/parent and alumni/College connections also include Homecoming and Family Weekend, Regional Events and Alumni Weekend. The Office of Constituent Engagement is also responsible for coordinating Commencement annually, as well as overseeing donor engagement events for Athletics, Arts, Lane Library, and others.

Office of Constituent Engagement
alumni@ripon.edu 920-748-8126

**Designated Smoking Area Policy**

Ripon College’s nonsmoking policy is designed to conform to Wisconsin’s Clean Indoor Air Act 211, enacted April 18, 1984.

The college is concerned for the rights and interests of all its employees, students, and campus visitors, whether they are smokers or nonsmokers.

Policy: Smoking is prohibited within 15 feet of all Ripon College campus buildings.
Awards and Honors

Every year, the College holds an Awards Convocation to recognize outstanding merit and achievement among students and faculty members. The College, various academic departments, campus organizations, and outside sources also present awards to Ripon undergraduates, faculty and staff members. Below is a list of awards presented on a regular basis.

**Achievement Award in Anthropology:** to the outstanding senior in anthropology.

**Achievement Award in Art and Art History:** to the student who has shown superior enthusiasm and creativity in the Art and Art History Department.

**Achievement Award in Biology:** to the student who has demonstrated the highest degree of excellence and initiative in the biological sciences.

**J.T. Lewis Prize:** to the student who shows outstanding initiative and performance in the introductory biology course.

**Dr. Charles Nichols Award:** to a student with a special interest in botany. It is awarded in memory of Dr. Charles Nichols, Professor of Biology Emeritus.

**Senior Business Management Prize:** to the outstanding senior in business management.

**Larry Barker Prize:** to a first-year student planning to major in chemistry who best combines the qualities of high scholarship, personal integrity, and simple friendliness. In memory of Larry Barker, Class of 1940.

**Franklin L. Stone Award:** to a sophomore majoring in chemistry who shows an outstanding capacity for scholarship and a dedication to excellence. Given in memory of Franklin L. Stone, an employee of the College from 1959 to 1983.

**Guy and Maude Russell 1911/1917 Chemistry Award:** to the student majoring in chemistry who best combines the qualities of scholarship, leadership and service to fellow students.

**Achievement Award in Chemistry-Biology:** to a student who has done outstanding work in the chemistry-biology major.

**Achievement Award in Communication:** to the student who has done outstanding work in communication.

**Milton H. Westhagen Award in Economics:** to the student who has exhibited outstanding achievement and interest in economics. Named for the late Milton H. Westhagen, chair of Ripon’s economics department from 1948-72.

**Burton J. Stallard, Class of 1926, Prize in Education:** to a senior with a career goal in educational studies who has shown insight into fundamental issues, has been involved in education-related experiences, possesses broad interests beyond the field itself, and has an above-average academic record.

**Achievement Award in Educational Studies:** to the student who has done outstanding work in educational studies.
Lucy Smith Morris Shakespeare Prize: awarded for outstanding work in the study of Shakespeare. Lucy Smith Morris, founder and first president of the Wisconsin Federation of Women's Clubs (WFWC), was an authority on Shakespearian drama, writing a study pamphlet on the subject that became a guide to other study clubs and later college classes.

Dorothea Wilgus Pickard Prize: to the student who has done the best work in creative writing over the past year. The prize is given in memory of a longtime friend and trustee of the College, herself a published author, and is underwritten by an endowment provided by former President and Mrs. Bernard S. Adams.

Ethel Lyon 1912 Graduate Scholarship in English: a graduate award, the sum of which is to apply toward tuition to the graduate school of the recipient's choice; established in memory of Ethel Lyon.

Mrs. John James Prize in Composition: to the student who has done the most outstanding work in English composition.

Pierre Guiet Prize in English: to a senior English major intending to go into graduate work.

Achievement Award in Environmental Studies: to a student who has done outstanding work in environmental studies.

Achievement Award in Exercise Science: to a student who has done outstanding work in exercise science.

Achievement Award in Foreign Languages: to a student who has done outstanding work in the Foreign Language major.

Global Studies Achievement Award: to a student who has demonstrated superior work in global studies courses and effectiveness in improving campus and community understanding of global issues.

John F. Glaser Award: to a junior who has shown distinction in the study of history. The award is given in memory of Dr. John F. Glaser, professor of history at Ripon College from 1954 to 1979. The mixture of a kind, gentle and giving man, a dedicated professional and an understanding educator will never be forgotten by those who knew him.

Achievement Award in History: to a student in history for distinction in the work of the history major.

Edwin W. Webster 1919 Endowed Scholarship in History: to a sophomore or junior majoring in history. This award is given in memory of Professor Edwin Webster who returned to his alma mater to teach history and classics during a career spanning from 1921 to 1962.

Achievement Award in Mathematics: to the student doing the most outstanding work in mathematics.

Ripon College Mathematics and Computer Science Award: recognizes student achievement by giving an award to a first-, second- or third-year student majoring in mathematics.

Harry A. Cody, Jr. 1933 Memorial Award in Military Science: to an ROTC cadet in the junior year who is a student in good standing, loyal to the College, of high moral character, and possesses demonstrated officership qualities. The award is given in memory of ROTC alumnus, Harry A. Cody, Jr.
“Sarge” Peters Award: to a deserving first-year student with a demonstrated level of academic performance and a desire to continue at Ripon and in ROTC. This award is in memory of Master Sergeant Arthur Peters who served 54 years in the U.S. Army, with the last 24 years (from 1920-44) at Ripon College.

Bruce Martz Endowed Music Award: to a sophomore or junior who is studying and has a true love for music. This award is intended to help students pursue their interests in an area of music.

Lucile Mosling Grams Music Scholarship: to a junior majoring or minoring in music who has a demonstrated interest in one or more areas of the musical arts. This award is given in memory of Beverly Thomann, a very special member of the Ripon community and of the College family. As an author, educator, student and volunteer, she was always helping others. The Ripon community is truly privileged to have enjoyed her warmth for 29 years.

Calmerton/Yahr Music Award: to a student based upon scholarship, musical ability and leadership in music.

Donald Bruening 1962 Prize in Philosophy: to a senior possessing notable interest and ability in philosophy; given in honor of Donald Bruening.

William Harley Barber Award: in recognition of outstanding achievement by a student in the physics department. This award is in memory of Dr. Barber’s years of service as a professor of physics from 1906-1946. He also served as dean of the College from January 1915 to June 1924.

Achievement Award in Physical Science: awarded to recognize a student doing the most outstanding work in the physical science major.

Achievement Award in Politics and Government: for outstanding work in politics and government.

Achievement Award in Psychobiology: to a student doing the most outstanding work in the psychobiology major.

Achievement Award in Psychology: to an outstanding senior psychology major.

Achievement Award in Religion: to the student who exhibits the most outstanding work in religion.

Achievement Award in Spanish: to the student who exhibits the most outstanding work in Spanish.

Achievement Award in Sociology: to the outstanding student in sociology.

Theatre Achievement Award: awarded for excellence in some area of theatre.

Samuel N. Pickard Award: to the members of the upperclass who have made the most significant contribution to Ripon College through scholarship, athletic achievement and personal character. Pickard served as a Trustee of the College from 1932-73.

John Storzer Graduate Study Scholarship: awarded annually to the Ripon College senior majoring or minoring in exercise science with the highest cumulative grade point average. This award was established in 1974 by alumni, friends and family of John Storzer to commemorate the seventeen years he served the students of Ripon College as a coach, teacher and athletic director.
Jeff A. Thompson, Class of 1987, Award: to a junior who, while maintaining satisfactory academic progress, has demonstrated enthusiasm, determination, perseverance, and unselfishness in the intercollegiate football program at Ripon College. This award is given in memory of Jeff A. Thompson.

The Peter A. Mattiacci ‘58 Award: presented annually to a physical education student as the student embarks on completing the required 14 credits of student teaching and the student teaching seminar. The award recognizes the student teacher who has demonstrated high academic achievement, promoted a lifestyle of health and wellness and who has made positive contributions to the College community and/or the Ripon community.

David L. Harris Memorial Award: given by the student senate to the student who has contributed most to the betterment of the College community through clubs and organizations within Ripon College. Given in memory of David L. Harris, dean of men and professor of psychology from 1954 to 1986.

American Association of University Women Awards: The Webster family established two American Association of University Women Awards (AAUW) to express appreciation for outstanding service by junior and senior women. Criteria are: good academic achievement and service to the College, to the Ripon community and to humankind. These awards were established in 1987 as a lasting tribute to Mary Eva Webster, the wife of Edwin W. Webster, class of 1919 and professor of history at Ripon College from 1921 to 1962. Mrs. Webster not only supported her husband’s activities but also was a significant contributor to the College through her work with the AAUW, the Ripon College Women’s Club and other volunteer work. Students were welcomed into the Websters’ home and given the support, comfort and, sometimes, the admonitions which helped them to become better students and better people.

Alumni Association Senior Award: to members of the senior class who have through leadership, enthusiasm, involvement and personal achievement, contributed to the betterment of campus life at Ripon College.

Class of 1991 Award: to a junior who has maintained an excellent academic record while contributing significantly to Ripon College’s extracurricular life. The recipient must be a conscientious student, create a positive image as a member of the community and personify Ripon College’s emphasis on the well-rounded experience of a liberal arts education. The award is made available by an anonymous member of the class of 1991.

Deans’ Award: to an outstanding senior chosen for scholarship, leadership, character and service to the College.

Clifford Crump, Phi Beta Kappa Award: to a sophomore and a junior chosen by the Ripon chapter of Phi Beta Kappa on the basis of academic attainment, breadth of cultural interests, evidence of intellectual interest outside the classroom, and service to the community; established in honor of Clifford Crump, former chairman of Ripon’s mathematics department from 1937-58.
Student Support Services Outstanding Tutor Award: to the student tutor who exhibits a high degree of dedication for helping others in an academic area, who has a professional approach in working with the Student Support Services staff, and who has a history of success in assisting his/her peers achieve a deeper understanding of a discipline.

Student Organization Leadership Award: to student organizations whose members have exemplified outstanding service to the campus and community.

Student Leadership Award: to student leaders exhibiting dependability, dedication, service to campus and outstanding leadership qualities.

Faculty/Staff Mentor Award: presented by the Student Activities Office to individuals who promote in-and-out-of-classroom learning experiences.

Senior Class Award: awarded by members of the senior class, the award recognizes an outstanding faculty member who best exhibits a commitment to helping students realize their full potential by challenging them in and out of the classroom.

May Bumby Severy 1908 Awards: awarded to faculty members in recognition of their excellence in undergraduate teaching.

Erroll B. Davis Minority Achievement Award: to an outstanding minority student who is within 12 months of graduation and who has studied business administration/business-related discipline or engineering. The award was created by Alliant Energy Foundation in honor of Erroll B. Davis Jr. and his years of leadership and service to the utility industry.

James Underkofler Award for Excellence in Undergraduate Teaching: to a faculty member for outstanding performance and excellence in undergraduate teaching. Given in honor of James Underkofler and his 48 years of service to Wisconsin Power & Light and the utility industry.
Expenses

Comprehensive Fee
The Ripon College comprehensive fee covers tuition, room, board, student activities and admission to most campus events. Students are entitled to medical services at the Student Health Center and admission to all athletic events, plays, guest lectures and convocations. Part of each student’s comprehensive fee is allotted to the Student Senate for apportionment among various student activities, such as the newspaper, the literary magazine and social events. Expenses not covered by the comprehensive fee include books, personal expenses, charges for special field trips, certain departmental supplies and certain music lessons.

Students who are not required to live on campus are charged only for tuition and the activity fee.

*Standard double room rate.

Special Fees and Expenses
Students are charged $260 per semester for a half-hour weekly music lesson (normally 12 lessons per semester). No refunds can be made after the fourth week of instruction which is generally the fifth week of classes. There is no charge for music majors and minors.

The charge for students taking fewer than 12 credits is $1,400 per credit. For auditing only, the charge is $100 per credit for those not paying full tuition.

A special program for senior citizens of the Ripon community enables them to audit courses for $10 per course. Details are available in the Office of the Registrar.

Additional tuition, housing and other costs apply to the In Focus program.

The College does not insure the personal belongings of its students and recommends that parents or students provide for this coverage through their homeowner’s insurance or by purchasing a renter’s theft/fire/accident damage policy.

Other expenses include books and supplies, and incidental personal expenses (laundry, toiletries, recreation).

Optional Health Insurance
Ripon College offers an optional ACA-compliant health insurance plan administered by WPS Health Insurance for students who do not have individual or family medical coverage. Two plans are available, differing in deductible/coverage and premium amounts. Both plans cover injuries due to participation...
in intercollegiate and intramural sports. Participation in intercollegiate athletics requires that students first provide proof of coverage and sign a waiver which indicates that the coverage is in effect. International students studying at Ripon College must provide proof of adequate insurance coverage for the duration of their stay in the United States. Proof must be submitted prior to arrival in the U.S. Information about insurance coverage options is available on the Ripon College website.

**Schedule of Payments**

One-half of the comprehensive fee is payable at the beginning of each semester (Aug. 15 and Jan. 15, respectively). A late fee will be charged for any account not paid by the due date. Registration will not be completed, nor will permission to attend classes be granted until the account is paid in full.

**Education Payment Options For Students and Families**

**The Interest-Free Monthly Payment Option:** The Interest-Free Monthly Payment Option enables families to spread all or part of their expenses over equal monthly payments. By eliminating the lump sum payment due at the start of each term, this option provides participants with more time to pay education expenses and is completely free of interest charges. Available to all students and families, the only cost for participation is a small enrollment fee.

Additional information for this program is available on the myRipon portal under the Students tab.

**Ripon College Refund Policy**

**Complete Withdrawal – Official Process**

Ripon College’s refund policy directly reflects federal regulation and applies to all students whether or not they are receiving federal financial aid. Students who withdraw from Ripon College up through the 60 percent point in time in the semester will be eligible for financial aid (federal, state and/or institutional) in an amount equal to the percentage of the semester completed (“earned amount”). The remainder of their financial aid (“unearned amount”) will be returned to the appropriate funding source (excluding Federal or College Work-Study earnings). Students are responsible for returning unearned federal assistance, less the amount returned by the school. (See “Return of Title IV Funds” policy below.)

Students who withdraw after the 60 percent point in time in the semester will be considered to have “earned” all of their financial aid for that term. No funds will be returned to the funding source.

Students withdrawing from the College for any reason are liable for a $100 withdrawal fee plus payment of a percentage of the comprehensive fee (tuition, room and board, and activity fee) for the semester. The percentage of comprehensive fee charged corresponds to the percentage of the semester completed. For example, a student who withdraws at the midpoint of the semester would receive a 50 percent reduction of the comprehensive fee. After the 60 percent point of the semester is reached, no reduction of the comprehensive fee is provided.

Students or parents who feel that individual circumstances warrant exception to the above policy should
appeal in writing to the dean of students, 300 Seward Street, PO Box 248, Ripon, WI 54971. Refund examples are available upon request from the Office of Financial Aid.

All withdrawing students need to complete the withdrawal/check-out form available from the Office of the Dean of Students. Completion of this form will ensure that students follow all withdrawal procedures. Withdrawal procedures include residence hall room inspection by hall director or resident assistant for resident students and return of all campus keys.

The completed withdrawal/check-out form must be returned to the Office of the Dean of Students along with the student's Ripon College identification card.

Partial Withdrawal
Students who withdraw from classes during the semester but remained enrolled for at least one credit will not receive a refund, and financial aid for the semester will not be adjusted.

Unofficial Withdrawal
Students who stop attending all classes for at least two weeks will be administratively involuntarily withdrawn from classes. The determination that the student has stopped attending classes will be made by the associate dean of faculty and registrar after checking with all of the student's instructors. A determination of last day of attendance also will be made. If no definitive date can be determined, the midpoint of the semester will be used.

The associate dean of faculty and registrar will review all students who receive a final semester grade point average (GPA) of 0.00 to determine if the 0.00 was because of actual failure of the class (an earned “F”) or because of non-attendance (an unearned “F”). If all classes were failed because of non-attendance, the student will be administratively involuntarily withdrawn from classes after a determination of last day of attendance has been made. If no definitive date can be determined, the midpoint of the semester will be used.

In either situation above, a “Return of Title IV Funds” calculation will be performed by the Office of Financial Aid.

Ripon College Return of Title IV Funds Policy (R2T4)
A student may find it necessary to withdraw from all classes during a semester. The student may be eligible to receive a refund of tuition and course fees depending upon the date of the withdrawal. If circumstances cause a student to withdraw from all classes, they are encouraged to contact their academic advisor so their decision will be based on a clear understanding of the consequences of withdrawing from all classes.

When it is determined that a student is withdrawing from school either through the “official process” by submitting the appropriate documents or through the “unofficial process” (see “Ripon College Refund Policy” above), the last day of attendance is determined by the date the paperwork is submitted or as determined by the associate dean of faculty and registrar for the “unofficial process.”

Determining Aid Earned
If a student withdraws from Ripon College, then the school, the student or both may be required to return some or all of the federal funds awarded to the student for that semester. The federal government requires a return of Title IV federal aid that was received if the student withdraws on or before completing 60 percent of the semester.
Federal funds, for the purposes of this federal regulation, include Pell Grant, Supplemental Educational Opportunity Grant, Federal Direct Loans Subsidized and Unsubsidized, Federal Perkins Loans, and Federal Direct Parent PLUS Loans. The formula used in this federal “return of funds” calculation divides the aid received into earned aid and unearned aid.

A student “earns” financial aid in proportion to the time s/he is enrolled up to the 60 percent point. The percentage of federal aid to be returned (unearned aid) is equal to the number of calendar days remaining in the semester when the withdrawal takes place divided by the total number of calendar days in the semester. If a student was enrolled for 20 percent of the semester before completely withdrawing, 80 percent of federal financial aid must be returned to the aid programs. If a student stays through 50 percent of the semester, 50 percent of federal financial aid must be returned.

For a student who withdraws after the 60 percent point in time, there is no unearned aid. However, a school still must complete a R2T4 calculation to determine whether the student is eligible for a post-withdrawal disbursement.

In compliance with federal regulations, the financial aid office will perform the calculation within 30 days of the student’s withdrawal and funds will be returned to the appropriate federal aid program within 45 days of the withdrawal date. An evaluation will be done to determine if aid was eligible to be disbursed but had not disbursed as of the withdrawal date. If the student meets the federal criteria for a post-withdrawal disbursement, the student will be notified of their eligibility within 30 days of determining the student’s date of withdrawal. If the eligibility is for a grant disbursement, the funds will be disbursed within 45 days of determining the student’s date of withdrawal. If the eligibility is for a loan, the student will be notified in the same time frame but they must reply also to the Office of Financial Aid if they wish to accept the post withdrawal loan obligation. A post withdrawal disbursement of any funds would be used first toward any outstanding charges before any funds are returned to the student.

Return of Title IV Federal Financial Aid

After the amount of unearned federal aid is calculated, the Ripon College repayment responsibility is the lesser of that amount or the amount of unearned institutional charges. The school satisfies its responsibility by repaying funds in the student’s package in the following order:

- Federal Direct Loan Unsubsidized
- Federal Direct Loan Subsidized
- Federal Perkins Loan
- Federal Direct PLUS Loan
- Federal Pell Grant
- FSEOG
- Other Title IV Grant Funds

Keep in mind that when Title IV funds are returned, the student borrower may owe a balance to the institution and/or the U.S. Department of Education. If a student fails to repay grant funds, s/he may be ineligible for future federal financial aid.
