Application for Research Assistant Position
Infant Cognition Lab (Dr. Kovack-Lesh)

Name: ____________________________
Email: ____________________________
Year at Ripon (freshman, soph, etc.): ____________________________
Major/Minor: ____________________
Overall GPA: ____________________________
Major GPA: ____________________________

Working in a research laboratory is a major time commitment. If you are selected for a position your required amount of hours per week in the laboratory will vary based on if you are receiving course credit or are in a paid departmental RA position (see next question for more info on hours). Most of our times are between the hours of 8:30 – 5, M-F (this varies based on my teaching schedule) and occasionally on Saturdays (usually appointments would be scheduled between 10-2). We will work around your class schedule. Will this be a problem for you?

Were you interested in working in the lab for credit (about 4 hrs/wk for each credit hour), for a paid position (4 hr/week), or either?

Psychology courses taken and grades (include current courses):

Describe your previous experience interacting with children. Experience with children between 4 mon - 14 mon of age is most relevant:
Computer skills (software you have used, comfort working with computers, etc.):

Describe any previous research/laboratory experience you have had:

A large part of the work that you would do involves working and interacting with families. How comfortable are you with talking to families on the phone and in person (consenting, debriefing, etc.)?

Why are you interested in working in the Infant Cognition Lab?

Due to training purposes and the nature of developmental research being lengthy at times (especially in Ripon), are you willing to commit to more than one semester? If so, what is the minimum number that you are willing to commit to at this time?

Thank you for your interest!
